American Railroad Journal.

New York, Saturday, January 7, 1865.

The New Year.

The recurrence of a fresh anniversary is usually made the occasion of remark by newspapers that meet with success. Getting rid of the old year as good naturedly as possible, and rejoicing with the advent of its successor, they seem to "welcome the coming" and "speed the parting guest."

Bidding a friendly adieu therefore to 1864, we hail the arrival of 1865, and with more than ordinary satisfaction. For if all signs do not fail us it is a messenger of peace, and we see its bow in the clouds that are retiring from our view, although they still slightly obscure the vista.

The opinion is rapidly gaining ground that during the present year we shall be at peace even with those of our own household who have left the protection of its roof, and run after strange gods. It seems impossible under present appearances that they can much longer remain absent in their hopeless and helpless condition, and that they will come back to share the blessings of our common inheritance.

We may therefore look forward to a brilliant future, when our present difficulties are settled, and an advance in all our material interests, at a rate hitherto unknown. Strange as it may appear this war has completely stirred up the great powers of this nation. It did not know, it had not imagined what its resources are. We have commenced thinking about ourselves, and find we are strong and determined. The two greatest draughts on a people when engaged even its self-preservation, are men and money, and these have been given with an unheard of liberality. This remarkable spirit will now be turned into its wonted channels, but the latter will be too small for its current. We shall probably see everything hereafter which enterprise and industry attempt, carried forward on a large scale and in a confident manner. Commerce, manufuactures and internal improvements will be marked by a display of new skill and courage, and the grander their movements the more popular will they be.

One interest of the country is likely to be very much promoted in the change. We mean that of mining. There is no longer any doubt that our gold and silver bearing territories will be rapidly developed, by a large accession of labor from our disbanded armies. Our soldiers inured to hardship and pleased with adventure, will be very apt to turn their attention to the territories where ordinary labor may pay itself as it goes along. With this purpose we shall see them moving in large columns to the gold and silver mines of the West, and founding new towns and cities as they advance. We may confidently expect that our mines will be made to yield enormously within a few years from this cause. The population is already rapidly increasing in these territories, and will become still more rapid as the avenues to them shall be completed, and when the Eastern division of the Union Pacific Railroad shall have united with the Western, both making all the progress we could fairly have expected, and which peace will greatly accelerate, we shall be astonished even with our present sanguine calculations at the progress of population and the yield of gold and silver.

In connection with this we may anticipate a very extensive emigration from Europe to the United States. It is stated that even now whole communities in Germany are preparing to emigrate, induced to do so by the favorable reports constantly made to them by their friends already among us. Our foreign readers have no idea whatever of the results ordinary agricultural labor will produce in the territories alluded to. Take for example an official statement of Governor Evans of Colorado, embodied in a recent report of the Secretary of the Treasury. We may see from this what an industrious man may do with 25 acres of land in Colorado.

10 acres of corn, 40 bushels to the acre at $3 per bushel, will yield $1,200.

15 acres of wheat, 30 bushels to the acre at $3 per bushel, will produce $1,350.

Corn fodder from 10 acres at $10 per acre, will give $100.

Wheat straw from 15 acres 20 tons at $10 per ton, will give $200. Total, $2,850!

Is it possible when this fact is known abroad, that thousands on thousands will not hasten to such a field of labor, or that a large number of our own people will not emigrate, as soon as they can reach by an easy route so promising a locality?

With regard to our internal improvements we look to a large extension in the far west. The most fertile soil in the world invites their construction. The railway to the Pacific will be pressed forward with vigor. At the last session of Congress farther concessions were made to the project. And believing it is now in good hands, and its construction is eagerly demanded by the public, it may almost be set down as a thing accomplished. This great trunk line will unite the Atlantic and the Pacific, change the entire current of commerce, make New York the clearing house of the world, and turn the trade of Asia into American channels. We cannot too highly appreciate the future of this great work, an element in our strength which time will surely reveal in a most astonishing manner.

We may look therefore to this as one great source of our future commercial prosperity.

Our internal industries will also rapidly advance, with the extended area of our commerce and the increase of our population. At the end of this century as our statistians calculate, we shall have in this Union one hundred millions of people. Many of our readers will live to see the

day and to verify these predictions. It is not possible to realize the idea fully. Wonderfully as New York, Brooklyn, Philadelphia, Boston, Cincinnati, Chicago and the other like cities have increased, no one can imagine the consequences of the existence of one hundred millions of people, homogeneous, united, industrious, successful and happy. Certainly the new world will be far ahead of the old in every particular but antiquity.

Such are a few of the reflections which crowd upon us as we meditate on our future.

Let us accept our responsibilities therefore with cheerfulness, and above all with a deep sense of our obligations to that Providence which has made us "parts of this stupendous whole," and entering as we do on a new year, remember all our duties as men, citizens, neighbors, patriots and Christians.

Pittsburg and Connellsville Railroad.

We have been favored with a copy of the Twelfth Annual Report of this company. From this we learn that the earnings of the road during the fiscal year ending October 31, 1864, were:

From passengers		$145,410 71
" freight		160,939 52
" U. S. mail		3,650 00
" shop work, etc.		5,922 64
		$315,922 87

The total expenses were:

Mainten'e of motive power.	$69,583 46	
Conducting transportation.	50,123 36	
Maintenance of way	61,845 06	
Maintenance of cars	19,020 28	
		200,572 16
Net earnings		$115,350 71

The gross earnings of the road for the fiscal year ending October 31, 1863, were $215,587 49; the expenses, $110,251 34; and the net earnings $105,355 95—showing an increase in earnings of $100,335 38; in expenses of $90,340 62; and in net earnings of $9,994 76. The net earnings of the past year are 36.5 per cent. of the gross earnings (not including general expenses). The net earnings of 1863, were 48.4 of the gross earnings (not including general expenses.)

The gross revenue as stated above was $315,922 87; of which $205,944 were earned by the 49 miles of road between Connellsville and the Brinton junction with the Pennsylvania railroad; $89,142 by the 10.6 miles between Port Perry and Pittsburg; and $20,836 by the 12½ miles of the Fayette County Branch between Connellsville and Uniontown. The current expenses of maintenance and working during the same period have been $200,572 16; adding to which for salaries, insurance, legal expenses, stationery, printing, and miscellaneous, $13,781 99; there will be a total of $214,354 15—leaving a net revenue of $101,568 72. In 1863, the current expenses of working, maintenance and administration were $120,358 60—leaving $95,228 29 as the net revenue of the year; showing an improvement of $6,340 43.

The whole number of passengers carried during the year, irrespective of distance was 395,843, against 262,841 the previous year—showing an increase of 133,002, or 50½ per cent. The average distance traveled by passengers has been 11.6 miles. Equivalent number of passengers carried one mile, 4,615,024.

The freight transported all distances was 199,552 tons, against 143,972 tons in 1863—an increase of 55,580 tons, or 38½ per cent. The freight was carried an average distance of 28½ miles, equivalent to 79,346 tons over the whole road, or 5,712,879 tons one mile. Of the freight carried, 17,638 tons passed eastward and 181,913 westward.

The company have 12 engines, which have run 256,176 miles; 11 passenger, 24 house, 31 gondola, 17 coke and 10 dumping cars.

The total expenditures on construction account during the year, for road-bed, buildings, rolling stock, right of way and real estate, has been $74,214 62, of which $73,914 62 were spent on the western and $300 on the eastern division.

In the first attempted organization of the company in 1846, and in the preliminary surveys then made, the sum of $8,965 47 was expended. From the subsequent and effective re-organization, in 1853, up to October 1, 1864, the further amount of $2,265,387 70 was expended, of which $221,468 78 were spent upon the eastern and $2,043,918 92 upon the western division, and of the latter sum $441,348 34 on the Turtle Creek division. These totals do not embrace the general expenses or the profit and loss and interest accounts.

The floating debt of the company at the close of the past fiscal year was $69,533 58—an apparent reduction of $13,296 46, There were, however, in the hands of the treasurer and agents at the end of the year, $21,368 38, adding to which Allegheny County and Turtle Creek Division bonds, worth $7,730, and good accounts receivable, $8,481 11, making a total of $37,579 49, and deducting outstanding accounts payable, there is a balance of assets of $18,922 79, which taken from the amount of floating debt shown in the general account, leaves $50,310 79 as the true amount of liabilities at present unprovided for. The company have also $52,900 of the M'Keesport Borough bonds, on which a market value cannot at present be placed, although they should be made available at some time not far distant.

The principal of the Sinking Fund of the Baltimore Loan, amounting to $17,000 has now been entirely replaced, and only about $1,600 of interest remains to be paid, which will shortly be done, the company having fulfilled its engagements with the city in this matter, as promised in the last annual report.

The amount collected from defaulting stockholders during the year has been $3,040 40.

The net income of $101,568 72 as stated above is thus accounted for:

For construction and equipment	$62,348 77
U. S., State and city taxes	7,876 10
Baltimore loan sinking fund	7,800 00
Coupons construction bonds T. C. Div.	17,886 18
Real estate, ground rents, etc.	4,882 36
Right of way on T. C. Division	6,436 12
Engineer department	2,059 06
Interest on floating debt	2,280 13
Total, as above	$101,568 72

The expenditure for engineering was incurred in superintending works of construction, and preparing to place the road from Connellsville to Cumberland under contract.

The value of materials on hand at the close of the year was $2,882 04 more than at the end of the preceding year.

The company have leased the Fayette County railroad, 12½ miles in length, extending from Connellsville to Uniontown. The lease is for 99 years from Oct. 31, 1864. The rent, $9,000 per annum, payable monthly.

Condensed Balance Sheet.

Payments on capital stock		$1,770,413 93
Real estate bonds, due 1868 and 1883		100,000 00
Loan from city of Baltimore, 1886		1,000,000 00
First mortgage construction bonds on Turtle Creek Division		400,000 00
Bills payable		50,651 55
Sundry accounts payable		18,581 93
Receipts from transportation department	$528,930 58	
Payments	201,700 89	
		327,229 69
		$3,666,877 20
Preliminary surveys		$8,965 47
Graduation, masonry and bridging		912,935 74
Superstructure		655,485 20
Right of way		126,051 29
Real estate		209,731 32
Depot grounds and buildings		78,795 80
Rolling stock		163,004 04
Engineering		117,131 91
General expenses		145,341 45

Secretary and Treasurer.—Jno. B. Page, Jr.
Superintendent.—Wm. B. Stout.

Schuylkill Navigation Co.

The annual meeting of this Company was held in Philadelphia on the 2d inst. The following is an abstract of the report:

Tonnage—Anthracite coal, 1,000,500 tons; miscellaneous articles, 162,191 tons; to and from Union canal, 61,881 do., making a total of 1,224,572 tons, being 119,637 tons more than in the year 1863, of which the gain in the anthracite coal tonnage was 116,123 tons.

The income of the Company was as follows: Tolls on anthracite coal, $1,419,895 01; on miscellaneous articles, $70,077 43; on Union canal trade, $37,861 79; rents, $25,232; interest money received, $4,399 60; making a total of $1,557,165 83, being an increase of $635,409 07 over 1863.

The total expenses during the year amounted to $920,369 28, being $155,196 23 more than in 1863, and leaving a balance to be carried to the credit of the profit and loss account of $636,796 55.

☞ The bill for the payment of invalid and other pensions, reported from the Committee of Ways and Means, for the year ending with June 1866, provides $4,000,000 for invalid pensions; $7,000,000 for pensions to widows, mothers, children and sisters; and $230,000 for revolutionary pensions; an aggregate of $11,230,000.

City Passenger Railroad Fares.

A very important matter to come before the Legislature this winter, will be the settlement of the fares in the horse cars of this city. It is a question whether, as the law now stands, the companies have any legal right to exact the extra cent they are now charging. The Act of Congress which permitted the tax upon gross receipts to be added to the fares, did not certainly contemplate the addition of eight times the tax, and the utmost legal ingenuity we think would fail in establishing the right to add 20 per cent., when

the act expressly authorizes 2½ per cent. to be added and no more. We do not mean to be understood as opposing an increase of fares. On the contrary, there can be no question but that it is actually necessary, unless the people of this city can make up their minds to dispense entirely with the means of conveyance they now have, meagre as they are; but we desire to see the fares raised in a legitimate way, and by an authority that cannot be disputed. While nearly every item that is involved in operating a horse railway has doubled in cost, it cannot certainly be expected that the roads can carry passengers at the old rates.

The following table gives the operations of our horse railways for the past 10 years, reduced to a unit of a mile run and a passenger carried, all the roads being aggregated and averaged for each year:

Receipts and expenses of the horse railways of New York for the past 10 years, reduced to the unit of one mile run by a car, and one passenger carried:

Year.	Av. receipts per mile run by a car.	Av. expense of running a car one mile.	Average profit of every mile run by a car.	Cost for every passenger riding.	Av. net earnings per c. on cost.
	cts.	cts.	cts.	cts.	cts.
1855	27.5	20.6	6.9	3.8	6.7
1856	26.8	17.9	8.9	3.3	9.7
1857	29.7	19.9	9.8	3.4	10.7
1858	29.6	18.6	11.	3.1	12.5
1859	29.8	18.7	11.1	3.2	13.
1860	23.5	15.8	7.7	3.3	12.1
1861	20.9	15.4	5.5	3.7	8.8
1862	20.3	14.	6.3	3.5	9.9
1863	20.4	14.7	4.7	3.6	8.4
1864	24.1	21.5	2.6	4.5	3.16

The net earnings for each mile run by a car in 1855 were 6.9 cents, and these increased to 11.1 cents in 1859. For the year 1864 they are but 2.6 cents.

Down to 1862 the cost of running a car one mile had been reduced from 20.6 cents to 14 cents. In 1864 the cost was 21½ cents; and strangely enough the receipts per mile run show a diminution from 29.8 cents in 1859, to 20.3 cents in 1862. In 1864 they had increased to 24.1, but still they were not up to the mark of 1859 by 5.7 cents per mile. This result would at first sight indicate a falling off in the number of passengers carried per trip, but as we all know from sad experience that the cars are more and more crowded from year to year, it follows that passengers are carried a greater average distance now than formerly.

In other words, comparing 1864 with 1859, we find that while the receipts per mile run have decreased about 20 per cent., the expenses have increased over 50 per cent.—and notwithstanding the largely increased number of passengers carried, viz: 60,328,750 in 1864, against 32,889,000 in 1859, the cost for every passenger had increased from 3 2-10th cents to 4½ cents. In 1864, therefore, with a capital of about $10,000,000, the total profits were $301,664, while in 1859 with a capital of $5,000,000 they were $591,000.

This it must be borne in mind is the result of an average of all the roads. If we examine each one separately according to the returns for 1864, we find that while a portion show slightly better results, others show a much worse statement, and some of them an actual loss.

The following is a statement of the operation of each road for that year:

Names of Roads.	No. of pass. carried.	No. of miles run by cars.	Receipts from pass.	Expenses of operation.	Receipts p. m. p. run by cars.	Exp. p. m. run by cars.	Cost for pass. cents.	Av. net earnings per c. on cost.
2d Avenue	6,914,122	*1,800,000	$345,706	$330,584	19.	18.4	4.78	3.16
3d "	16,700,000	3,000,000	836,514	673,114	27.5	22.4	4.03	6.7
4th "	5,975,238	786,000	289,761	*235,800	36.8	*30.0	3.95	9.7
6th "	8,050,674	1,892,000	402,533	400,522	21.3	21.7	5.09	10.7
7th "	1,890,941	345,400	94,547	76,584	27.4	22.2	4.07	12.5
8th "	9,054,012	2,426,000	452,700	448,493	18.6	18.5	4.95	13.
9th "	1,802,160	802,000	90,108	108,221	11.2	13.4	6.00	12.1
Cent. Park	6,560,471	*988,400	325,805	296,521	33.	*30.	4.52	8.8
Grand st..	3,551,182	456,400	178,056	155,763	39.	34.	4.37	9.9
Totals....	60,328,750	12,496,200	$3,015,230	$2,764,602	†24.1	†21.5	†4.5	8.4

* Estimated.
† Average.

The Sixth Avenue road statement shows that where they received 5 cents they expended 5 1-10th cents; the 9th Avenue spent 6 cents for every 5 received; the 8th Avenue received but 1-20th of a cent profit on every passenger carried; the 2d Avenue less than a quarter of a cent.

If these increased expenses were the result of extravagant management, there would be good reason for opposing any increase of fare, but an examination of the first table given, shows that down to 1862, without any material change in the cost of horse feed or wages, the management of these roads had decreased the cost per mile of running their cars about 33⅓ per cent., and from the fact that the cost for each passenger carried had remained about the same, it is proved that they had been able to render increased service to the public by carrying a greater distance in consequence of this economy.

But during the past year all these conditions have changed.

Hay and grain have doubled in cost.

Wages have increased 50 per cent.

Horses have increased 50 per cent. in value.

Cars have doubled in price.

Iron and timber are only to be obtained at gold prices, and vary from two to two and one half times their normal values.

With all this appreciation of every expense which goes to make up the cost of operating our horse railways, the fact that the reports show an increase of only 50 per cent. cost for every mile run, is the best proof possible that the closest economy has been shown in the management. The public grumble and well they may at the manner in which they are crowded and jammed into these cars, but they should look to the other side of the question. If they do this they will see that even in this way they cannot be carried for the price they are paying. There is but one alternative; either to dispense entirely with our system of horse railways and go on foot, or to increase the fares to a remunerative mark. There is no service rendered to the public so cheap, and there never has been in the transportation of passengers so much return for the same amount of money as upon these roads. Our steam roads charge us 3 cents per mile. Our ferries from 2 to 3 cents for a half mile; but our much abused horse cars are expected to carry us 8 miles for 6 cents, and unless every passenger has a seat the whole system is called an imposition and a swindle.

Every reasonable person will concede that these fares should be increased. The question is to what extent. Even if prices of materials and labor remain the same during 1865 as in 1864, the cost of operation will be greater. The high prices of cars, horses, iron, timber, &c., during the past year have imposed upon many of these companies the necessity of running their old stock, and of postponing renewals that are becoming more and more exigent.

Another year and these items will come in to swell the expenses largely, and we believe that the reports for 1865 will show an increase of not less than 20 per cent. over 1864. The average number of passengers carried in each car during this year is 34. With this number it has been shown the receipts have been but 24 1-10th cents per mile run. To have paid a fair return upon the investment they should have been 30 cents, or about 6 cents from each passenger.

To have given each passenger fair accommodations they should not have averaged over 20 per trip. The cost of running the car does not vary materially whether the load be 20 or 40. It follows therefore, that if we restrict the cars to an average load of 20 passengers, this number should pay the same amount that 34 passengers should pay, viz., 30 cents, per mile.

If therefore, 34 passengers should pay 6 cents each, or say $2 for the trip, 20 passengers should pay 10 cents each.

Every calculation that can be made based upon the reports of the past year, must convince any unprejudiced person that even with the crowded and suffocating loads which are carried, the service cannot be rendered at less than six cents, and with any restrictions as to the average number allowed, the fare must be raised to 10c. Let this matter be thoroughly examined, and we believe that grumbling at the character and extent of the accommodations furnished will cease, and the necessary increase of fare be unopposed.

Let it be increased to 10 cents, and then hold the companies to the obligation to furnish every passenger a seat.

We do not believe that 6 cents will do more than compensate for the accommodations we now have, and that unless the fare be placed at a still higher rate we must be content with the same accommodations as heretofore.

A very simple plan will take away every possible cause of difference between these companies and the public.

Let there be the ordinary cars upon which the fares shall be 6 cents, and then permit special cars to be provided upon which the fares shall be 10 cents; the condition being that no more passengers shall be taken upon the latter than can be provided with seats. Passengers can then make their

choice, either to have a seat and pay its fair value, or to take their chances of the usual crowd in the cheaper vehicle.

We believe this to be the proper way in which to operate these railways, and that any Legislation which would bring this about would not only be an act of justice to the companies, but would put an end to the differences between them and the public, and enhance the public accommodation.

Steam Tonnage in our Foreign Trade.

The application of steam power for the propulsion of sea-going vessels is one of those great facts which has had its origin and accomplishment within so recent a period, that men still in the vigor of youth remember well the first passages made by the pioneers in the maritime revolution which succeeded their adventures.

To America must be conceded the honor of making the first voyage by steam across the Atlantic. The "Savannah" a steamer of 350 tons sailed from New York on the 19th June 1819, and arrived at Liverpool on the 15th July after a passage of 26 days. Nearly twenty years intervened without further trial, and hence we must conclude that the result of the Savannah's exploits had not been satisfactory.

On the 5th day of April 1838, the "Great Western" left Bristol and the "Sirius" left Cork for New York, at which port they arrived on the 23d having made their passage respectively in 18 days. The Great Western, on her second voyage from Bristol to New York, arrived after a passage of 14½ days on the 17th June 1838. The first steamer of the Cunard Line, the "Britannia," after a passage of 14 days and 8 hours arrived at Boston July 18, 1840.

It is from this last date that we must fix the period of the introduction of steam navigation into the foreign commerce of the United States. But steamships (we quote from the Treasury volume lately issued*) were of little importance for the carriage of merchandize until nearly ten years later, when the establishment of American lines to Europe, competing with the British, developed the capacity of steam transportation and prepared the way for its general introduction into the trans-atlantic trade.

For two or three years previous to 1850, the aggregate of steam tonnage entering our ports swelled the volume of foreign shipping very sensibly. At a later period, and with larger vessels the increase of this tonnage has been rapid, until it has reached proportions nearly equal to the sailing tonnage of all classes coming from the two or three leading commercial countries of Europe. The system was, in fact, suddenly and almost completely built up in 1848-'50, American lines to Havre, Bremen and Southampton, and to Liverpool being established simultaneously with one to Havana from Charleston, and the vast half-foreign California and Isthmus lines. The tonnage of all these goes to swell the aggregate published in official reports as arriving from foreign ports, but the entire Isthmus and California trade, including all that touching at Vera Cruz and Havana, either to and from the Isthmus or to and from New Orleans, should properly be separated from that crossing the Atlantic. It is so separated in the following statements and the effect is to greatly reduce the proportion of American Steamship tonnage appearing to be employed in foreign trade. Technically, clearances from Panama for San Francisco are from a foreign country, but in fact little or no commerce with foreign countries is represented. Little or none is represented in arrivals at New York from Chagres or Panama, or in arrivals from Cuba of steamers merely touching at that port on their way from Mexico or the Isthmus.

The statistics of steam tonnage employed in our foreign trade, therefore, require to be stated with several discriminations to be properly understood. In the aggregate the proportions of American and foreign appear nearly equal; but when the distinctions just referred to are made, and the absolute foreign trade only is considered, the amount of American tonnage is greatly reduced. For several years, however, or from 1851 to 1857 the American trans-atlantic lines had great success and attained an ascendancy in that trade that appears favorably in the published returns. The arrivals at New York alone were over 120,000 tons for each of several years, and this against an average of about 80,000 tons foreign. The Isthmus and Cuban arrivals of American steamers, entered as foreign amounted to 160,000 tons more, yet the merchandize traffic by them from any foreign country was very small in amount, and the statements should be kept distinct.

There is also a large local trade conducted by steamers with Canada on the Great Lakes, the tonnage of which is technically classed with that entering from foreign ports, yet which does not represent any considerable trade strictly to be designated foreign. The annual arrivals of this description of shipping amount to 2,300,000 tons or more, but its character is more nearly that of ferry and passenger transit than anything else. The amount is so little significant of commerce such as the Trans-Atlantic trade always must be, whether conducted by steamers or sailing vessels, that it has not been recorded to illustrate the relation of steam to foreign commerce generally.

With the British provinces of the Atlantic coast there has been for many years a moderately active traffic in small steamers. They sometimes come down as far as Boston or New York but generally run only between the ports of Maine and Halifax, or elsewhere in Nova Scotia and New Brunswick.

With these preliminary explanations we proceed now to show from the published reports the general results of ocean steam navigation as indicated by arrivals at the seaports of the United States during the past 20 years.

The tabulations following show the distributions of the tonnage in the foreign trade entered at Portland, Boston, New York and Philadelphia, distinguishing the domestic from the foreign tonnage:

1. *Steam Tonnage Entered at Portland, Me.*

Year ending June 30.	From Gt. Britain.	From British N. Am. Prov.	Total tonnage.
1855	2,907	....	2,907
1856	....	166	166
1857	12,794	....	12,794
1858	5,538	6,854	12,392
1859	4,924	60	4,984
1860	25,075	9,722	34,797
1861	32,267	....	32,267
1862	37,071	2,803	39,874
1863	18,328	234	18,562

The above was all foreign shipping no entries of American tonnage being recorded.

2. *Steam Tonnage Entered at Boston, Mass.*

Year ending June 30.	Foreign. From Great Britain.	Foreign. From British N. Am. Prov.	American. From British N. Am. Prov.	Total Tonnage Entered.
1846	11,941	3,204	....	15,145
1847	11,719	396	....	12,115
1848	14,655	184	....	14,839
1849	16,000	....	....	16,000
1850	20,000	....	....	20,000
1851	22,000	....	....	22,000
1852	26,449	....	....	26,449
1853	28,572	....	11,780	40,352
1854	23,667	....	....	53,667
1855	58,114	1,610	....	59,714
1856	57,833	10,632	....	68,465
1857	54,945	7,980	....	62,925
1858	58,624	6,580	385	65,589
1859	58,979	6,445	....	65,424
1860	56,530	7,249	....	63,779
1861	67,283	6,120	....	73,403
1862	54,141	2,838	....	56,979
1863	57,305	....	....	57,305

The entries at Boston began with the establishment of the Cunard Line in 1840, and the arrivals previous to 1846 were 12,000 to 15,000 tons annually; but the exact quantities cannot be obtained.

3. *Steam Tonnage Entered at New York, N. Y.*

" 1863	247,009	477,923	724,932

The actual proportion of the tonnage recorded as in the foreign trade of the United States resulting from the entry of steam vessels is very large, both of American and of foreign vessels; but as has been said, much of it is in fact not what the record appears to make it. The Isthmus trade is really coastwise rather than foreign, and therefore all or nearly all the American steam tonnage entering at San Francisco and New Orleans with the Isthmus arrivals at New York should be struck off. The entries at both New York and New Orleans from Cuba and Mexico are in a great degree of steamers merely touching at Havana and Vera Cruz for passengers and mails, and carrying very little freight. A more legitimate trade was for several years conducted by the steamer Isabel from Havana to Charleston.

On the north Atlantic coast again the steamships touching at Portland and Boston appear in some cases to have been regularly entered there, as well as at New York, in most cases probably bringing cargo for both ports. The Cunard line had its original terminus at Boston, however, and steamers have constantly fully discharged at Boston and Portland both, when running as part of the regular lines, or as extra ships on them from Liverpool. The lake steamer tonnage is of course entirely excluded, and the direct trans-atlantic trade is therefore reduced to the arrivals at Portland, Boston, New York and Philadelphia. Stating this separately, the following is the result:

Actual steam tonnage arriving in foreign trade.

Year ending	American.	Foreign.	Total.
June 30, 1844	....	3,572	3,572
" 1845	....	3,780	3,780
" 1846	....	28,496	28,496
" 1847	....	21,236	21,236
" 1848	12,414	41,357	53,771
" 1849	20,801	69 897	90,698
" 1850	19,181	70,462	89,642

" 1861	68,880	439,466	508,346
" 1862	15,884	424,579	440,463
" 1863	....	473,114	473,114

To include Charleston the American totals would be increased about twenty thousand tons annually from 1851 to 1861; but this could not be considered trans-atlantic trade in the sense represented above, being wholly from Havana. The steam tonnage (wholly American) which entered Charleston from foreign countries each year was as follows:

1850–'51	14.924	1855–'56	21,204
1851–'52	18,696	1856–'57	21,917
1852–'53	22,000	1857–'58	21,010
1853–'54	23,317	1858–'59	36,781
1854–'55	20,489	1859–'60	26,990

and for the 6 months ending Dec. 31, 1860. 11,604

Passing over to the Pacific coast we here state the steam tonnage entered at San Francisco from foreign ports:

	American			Foreign	Am. &
	Isthmus & Nicaragua.	British Colonies.	Total Amer.	British Colon's.	foreign ton'ge.
1853–'54.	78,125	....	78,125	....	78,125
1854–'55.	79,644	....	79,644	....	79,644
1845–'56.	74,814	....	74,814	1,243	76,057
1856–'57.	63,384	....	63,384	288	63.672
1857–'58.	52,500	....	52,500	288	52,788
1858–'59.	51,335	58,760	110,095	2,458	110,553
1859–'60.	79,067	46,324	125,490	3,131	128 631
1860–'61.	64,052	32,437	96.489	479	96,968
1861–'62.	71,413	30,867	102,280	....	102,280
1862–'63.	85,535	36,459	121,994	4,809	126,803

The steam tonnage arriving at New Orleans from foreign ports was technically large from the commencement of the Isthmus trade to the close of 1860, and all in American vessels. Estimating for the record of two or three quarters, the following is the amount, about one half of which is from Havana, and the other half from the Isthmus, Central America and Mexico. The years 1855, 1856, 1857 and 1860 are complete:

June 30, 1855	60,868	June 30, 1858	75.000
" 1856	64,571	" 1859	78,000
" 1857	76,514	" 1860	88,530

The New York line touching at Havana was mainly a coasting and passenger trade, and this makes up more than half the total. The arrivals from the Isthmus and Mexico were much thesame.

At Mobile there were a few arrivals of American steamers from foreign ports, but their amount in any year was small.

On the northeastern frontier, entering at Castine, Maine, there is a large aggregate of tonnage accumulated by the frequent trips of small American steamers plying to New Brunswick and Halifax. The average of such arrivals amounts to over 60,000 tons annually since 1853, being in the fiscal years:

1854–'55	64,219	1860–'61	55,423
1855–'56	67,401	1861–'62	75,323
1856–'57	53,178	1862–'63	61,444

The intervening years (1857–'60,) are not readily distinguished. This was all American tonnage.

The swelled volume of tonnage arriving from foreign countries during the last ten or fifteen years is more largely due to steam than would at first appear, in consequence of the introduction of the items above described. Taking the fiscal year 1859–'60 as an example, the total tonnage reported as arriving in the foreign trade is of

American vessels	5,921,285 tons.
Foreign vessels	2,253,911 "
Total	8,175,196 "

Excluding the tonnage from Canada, the American is reduced to 3,304,009 tons, and the foreign to 1,594,575 tons. Deducting further the California and Isthmus trade in American steam vessels for entries at

New York	170,641 tons.
New Orleans	88,530 "
San Francisco	125,400 "
Castine	55,000 "
or a total of	439,571 "

—the tonnage actually entering in the foreign trans-oceanic trade is reduced to 2 864,438 tons.

The peculiar conditions attending the technical statements of tonnage and shipping have thus to a great extent, concealed the injuries which have been suffered in general ocean commerce, misleading to the impression that large accessions were being made to the shipping so employed, when in fact great and most injurious reductions were taking place.

The peculiar character of the trade passing the Isthmus of Panama, the tonnage of which appears as entered and cleared for foreign countries, but which for reasons before stated is taken as almost exclusively coastwise, is the best explained in the Consular Reports from Panama, from which the following statements are taken. These statements do not distinguish the values from each country entered for consumption—only the total values from all countries:

VALUES OF CARGOES ENTERING PANAMA.

Yr. end'g Sep. 30.	For consumption.	In transit for U. S.	In transit for Europe.	Total Values.
1860	$1,378,814	$36,846,930	$14,928,256	$53,148,000
1861	1,145,310	50,146,345	13,056,250	64,347,905
1862	2,413,815	28,282,400	27,000,244	57,696,620

VALUES OF CARGOES CLEARED FROM PANAMA.

Yr. end'g Sep. 30.	Exports of Panama.	In transit from U. S.	In transit fr. Europe.	Total Values.
1860	$129,000	$8,325,000	$4,400,000	$12,784,000
1861	256,000	10,149,225	2,206,625	12,624,850
1862	2,869,557	11,647,595	5,113,204	24,706,428

In 1860 there was also of merchandize exported in 31 British vessels, to the South Pacific Coast $3,500,000, and in vessels of other nations $1,200,000. In 1862 there is included in the outward total the following items:

Value of cargoes from—	
Central America to South Pacific	$66,000
South Pacific to Central America	76,250
Europe and elsewhere (treasure)	4,444,268
Europe and the United States (jewelry)	578,962

The total values inward and outward are therefore—

	Inward.	Outward.	Total
1859	$57,679,925	$13,857,000	$71,536,925
1860	53,148,004	17,484,000	70,632,004
1861	64,347,905	12,624,850	76,972,755
1862	57,826,620	24,795,428	82,622,049

To be Continued.

American Railroad Journal.

Saturday, January 7, 1865.

Stock Exchange and Money Market.

The general question of finance is still earnestly discussed by the press not only, but by that numerous class of persons who growing wealthy with the country at large, are recognized as capitalists and financiers. Large amounts of money being constantly required by the Government, it is natural enough that the ways and means of raising it should be discussed by the public. It is a pleasing circumstance that the discussion takes the shape of *how* this money should be raised, rather than how it should be avoided, how the Treasury can do the best for the country, rather than how it should be made to submit to usurious terms. Nevertheless in his future operations, it is hoped that the Secretary will not overstep the bounds of propriety. It is his determination we learn, to withdraw the legal tender 5 per cent. notes, supposed from the last official statement to be at present about $105,500,000.

It is also understood that these will be received in payment of subscriptions to the 10-40's, and if so, will probably absorb the remainder of the latter standing out unsubscribed, estimated at the present moment at $85,000,000. But in place of the amount so withdrawn from circulation, we are to have 3 years 6 per cent. compound interest legal tenders, with the expectation that they will be retained as investments for the time being, and kept out of circulation. We have some doubts with regard to this policy. After all, they are and will be used as legal tenders in every emergency, and must be considered as money. We doubt whether any legal tenders should bear interest at all, any more than the silver dollar issued from the mint. Its office is that of money—cash. Its lawfulness as an immediate payment of debts gives it a peculiar and important function, different from a Treasury scrip of the usual character. Nor do we well see why the Government should pay interest on notes that are used as money, and liquidate and pay indebtedness. They are put in circulation really as money and perform its uses. As such the people are willing to receive them, trusting to their final redemption at no distant day. It has therefore been suggested by very wise and experienced financiers and political economists, that the Government should at once issue all the legal tenders it requires without interest; such tenders to lose their character of money after twelve months from their date, at which time they would be fundable in a stock issued specially for that purpose. This would make the operations of the Treasury perfectly plain and simple, save it from the necessity of calling on banks or bankers, using agencies, paying commissions, and multiplying the forms of its loans, and it would no more inflate the currency than it is now inflated by the various shifts of legal tender interest bearing notes. The machinery of the Treasury would then work easily, and the public would not be mystified as it now is with the various kinds of stocks, loans, notes, and certificates which require much study to keep them clearly in the mind. At least we may say that the plan is so simple a one, that it deserves attention.

We have several times alluded to the probability that the cotton still remaining in the South, will yet become an important auxiliary in the settlement of our monetary affairs. The Richmond papers have recently asserted, that they have yet untouched three millions of bales. Now the first step to turn this fact to account has been made by the Secretary. The Collector of this port has been ordered to Savannah to take possession of the 33,000 bales recently captured there, and bring them to New York for sale. If these bales are of the uniform size of 500 lbs., the gross weight would be 16,500,000 lbs., and at the present price of cotton, say $1.20 per lb., would produce $16,800,000, a sum which would pay all expenses of the new draft of 300,000 men, and of putting them in the field. Nor is the cotton in Savannah all that we have to expect from its capture.

Immense quantities still remain untouched in Georgia, which as the river is opened by our gunboats, will find its way into our hands. In fact, our Government would have a perfect right to ap-

propriate all the cotton found in the rebel States, and apply it to the expenses of the war. The millions of bales, which it is alledged by the Richmond papers remain in the confederacy, at present prices would produce one thousand eight hundred millions of dollars. In this light the subject becomes intensely important, and even if we should view it with large deductions, it still retains its importance.

We perceive from the commercial tables of the past year, that our imports of foreign merchandize have been of the value of $214,604,238, and our exports, chiefly of a domestic character have been $215,252,312. So that our imports have been say $27,173,238 greater than they were in 1863, and our exports have been larger than they were in that year by $44,541,318.

The amount of specie exported in 1864 is given at $50,108,748, being more than in 1863 by the sum of $354,746 only. It must be remembered that the yield of our gold bearing States and territories received in New York have been $12,952,-967, against $11,847,286 the previous year, while large exports from California by the way of the isthmus direct to Europe have been felt in exchange, which has throughout the year been abundant at par, and below par for unquestionable bills. This is a curious state of things, and shows that the remittance of specie abroad has been made generally at a loss, and must be accounted for on other principles than those which usually actuate *bona fide* shippers.

The gold actually received for customs at this port the last year, was $66,993,840, and this exceeded the amount received in 1863 by the sum of $8,072,214. When we come to add the receipts at the other Atlantic ports and those on the Pacific, we shall probably find the amount ample for all the gold interest the Government has so far promised to pay. But it should by no means follow out its policy of issuing gold interest bonds any further. For should our imports decline hereafter, the receipts of gold would decline, and should the Government come into the market at any future time as a purchaser, there is no knowing what premium it might have to pay. From all we can learn, Mr. Fessenden will not put the Government in this position. On the contrary, he has good reason to hope that he can get all the money he wants by paying interest in currency, which we contend will in no great distance of time become equivalent to gold.

By the Australasian, we learn that the grain market has improved in England, and even before the news was many hours old our enterprising shippers were taking advantage of it. It is therefore probable that large quantities of wheat, flour, &c., will go forward during the present month.

Our quotations by a previous arrival were to the 18th of December, and then the following prices ruled:

Canadian per bbl	22 to 23 stg.
American, sour, per bbl	20 to 21 "
" fresh "	22 to 23 "

A slight rise on these prices will therefore warrant exportation, certainly for grades which are quoted here at from $9 to $10.

The gold market has fluctuated largely during the past week, being marked by a considerable rise and fall, produced by the usual calculations, rumors, inventions, and opinions. We have for some time ceased to regard these as having the least importance, beyond the effect they have of giving the sellers of certain commodities the opportunity of asking what they please for them. It is to be observed, however, that all classes, rich and poor, except perhaps those who have by the freaks of fortune gained more money than they could have earned in any regular business, have reduced their consumption of all extravagantly priced articles, and in this way meet these unjust advances without much trouble. At the same time numerous articles are still purchasable at moderate cost; as for example, coke, a fuel greatly in use is now sold at $4 the chaldron, which is within half a dollar of the lowest price at which it was ever sold in this city. Anthracite instead of being $12 per ton as it was quoted a few months since is now to be had at $10. So that gold does not absolutely control all prices as is pretended.

For the 10-40 loan the Secretary of the Treasury advertises he will receive subscriptions in payment of $15,000 and upwards, 5 per cent. Treasury notes for their face and interest, and in three instalments, to wit., the 7th, 14th, 21st inst., but not for any other securities. Governments are strong in anticipation of the withdrawal of the 10-40's. Their present market value will be found in our usual weekly tables.

Bank shares are reported dull, and so with railway bonds, though still standing in good estimation, and many of them at a handsome premium. Railway shares are variable, Central, Hudson River, Reading, and Illinois, stand highest on the list, while many respectable companies are quoted at below par. For these differences we again refer our readers to our tables.

We cannot close these remarks without a brief allusion to the condition of the finances of this State as disclosed in the message of Governor Fenton, to the Legislature which assembled on Tuesday at Albany. Notwithstanding the pressure of war upon the country, the resources, wealth and income of the State appear to be but little affected. The State debt proper is but $6,278,954 87. The canal debt is $22,327,816 25. The surplus revenue from the canals the last year is $3,-317,356 06. From this it will be seen that the State of New York is sound to the core, and though as a State it has about double the population of Holland, its whole debt with a canal revenue adequate to its redemption in ten years, is not one-thirteenth part of that of the former country, whose area of surface and production is but one-quarter of that of New York, its ancient colony.

Money is plentiful, and the rate shows it is all employed in some form or other.

The balance in the Sub-Treasury on Tuesday was $21,654,522 83.

The receipts of the National Treasury for the month of December were as follows:

Internal revenue	$20,249,983
5-20 loan	25,000,000
10-40 loan	33,042,250
	$88,292,238

This enabled the Treasury to pay off all the audited requisitions up to Nov. 30, without inflating the currency one dollar. This is equal to more than a thousand millions per annum, and shows the enormous financial power of the Nation.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ We call the attention of our readers to the advertisement of the "New York, Philadelphia and Baltimore Consolidated Petroleum and Mining Company." It offers very great inducements to parties willing to enter into speculations of this sort, many of them remarkably successful. Judging from the parties who give their indorsement to the project, we think the opportunity offered for investment in this kind of property a good one. Office 71 Broadway.

Fitchburg and Worcester Railroad.

The annual meeting of this company was held at Fitchburg, Mass., on the 3d inst.

The annual report shows that $19,800 of the funded debt, and $218 27 of the floating debt have been paid since the last report, leaving to be paid hereafter in the aggregate—funded and floating debt—$9,197 73.

The earnings of the road for the past year have been $61,664 75, an increase of $13,589 05 over the previous year. The expenses of operating the road have been $40,049 23, an increase of $17,636 12 over the expenses of 1863. There is included, however, in this bill of expenses the cost of six acres of land and two dwelling houses, purchased at Sterling Junction, and the purchase of water rights and expense of an aqueduct at Pratt's Station in Sterling.

The Directors state that it has been their plan to pay six per cent. dividends, and apply all surplus earnings over expenses in reduction of the liabilities, thereby reducing the cost of the road. They have succeeded in the last ten years, by paying debts and the purchase of their own stock, in reducing the cost of the road from $334,000 to $227,194, besides adding more than $20,000 to the real estate of the road outside the location of the road, and more than $10,000 to the rolling stock. The liabilities of the road have been reduced during the year $11,018 27, leaving only $9,197 73 to be paid.

The following gentlemen were elected directors for the ensuing year: Ivers Phillips of Worcester, Nathaniel Wood and H. A. Blood of Fitchburg, James H. Carter of Lancaster, and William D. Peck of Sterling. The directors organized by the choice of Col. Ivers Phillips of Worcester, as President, and H. F. Coggshall of Fitchburg, Treasurer.

Morris and Essex Railroad.

The Morris and Essex Railroad Company are receiving proposals for $2,380,000 1st mortgage, 7 per cent. bonds, being the entire balance of the $3,500,000 which can be issued under the first mortgage, except for the second track and extension to the Water Gap. These bonds are in sums of $100, $500, and $1000, redeemable in fifty years, with coupons payable in New York, and provision for a sinking fund for their redemption at maturity. The bonds are offered for sale for the purpose of completing the extension of the road from Hackettstown to Phillipsburg, for building the branch road from Denville via Boonton to Newark, and for furnishing coal, freight and passenger cars and engines.

☞ The new firm of Oddie & Gamble, the former late of the firm of Oddie, St. George & Co., have established themselves at No. 8 Broad street, as stock, bond and gold brokers. They are considered as prompt, energetic and well posted business men, with much experience, and with the capital required for extensive operations.

☞ Messrs. Mott Brothers, publish their card in another column announcing their place of business No. 30 Broad street, and their readiness to buy and sell on Commission, the various securities now offered in the market. These gentlemen are highly recommended to us. They are successors of the late well known house of Mott, Hill & Co., and have all the facilities for carrying on a large business.

☞ The following is an extract from the circular of Ford, Suit & Co., Bankers and Brokers, 15 Broad street, dated New York, Jan. 2d, 1865:

The Gold Exchange is an institution inaugurated as a necessity of the war. There are many interested in the fluctuations of gold, who are deterred from participating in the transactions of the Board from a want of familiarity with its details.

As gold is the standard of all values, none can ignore its importance or affect indifference to its fluctuations. The terms used in the Gold Exchange, and quoted in the market reports, are thus explained:

Cash Gold—Is for delivery on the day bought or sold.

Regular—Is for next day's delivery, without interest.

Buyer 3—The buyer has the option of requiring the delivery of the gold within three days, without notice or interest.

Seller 3—The seller has the privilege of delivering the gold during the three days, the transaction carrying no interest.

Contracts over three days carry interest from date.

The legitimate commission for buying or selling gold is one-eighth of one per cent. The transactions are conducted upon orders, accompanied with the remittance of a margin of twenty per cent. or more, according to the contract. An order to purchase or sell one hundred thousand dollars of gold, requires a deposit with the broker of one-fifth, or $20,000, in currency; larger or smaller sums in like proportion.

Agricultural Branch Railroad.

The annual meeting of this company was recently held at Northboro'. The board was organized by the choice of Ivers Phillips, and H. F. Coggshall, Treasurer.

The first section of the road, which is run under a lease by the Boston and Worcester Railroad Co., is reported to be in good condition, and its net earnings for the year amount to $15,784 09, showing an increase of $2,809 73 over the previous year.

The second and third sections of the road, from Northboro' to the junction with the Fitchburg and Worcester road in the north part of Clinton, are expected to be completed during the coming year. The necessary funds have been provided thus far to carry on the enterprise successfully, and there is now required only the sum of $300,000 to be realized from the sale of bonds or subscriptions to stock. Nearly one-half this sum has already been subscribed by stockholders, and the directors apprehend no serious difficulty in disposing of the balance as the work progresses and the money is wanted.

☞ A plan is said to be on foot at Chicago to tunnel the south branch of the river to an extent sufficient to accommodate railway trains and ordinary travel. The movement originated with the Pittsburgh, Fort Wayne and Chicago Railroad Company, who have long felt the necessity of having greater facilities for communications with the south side, their large freight depot being west of the river. They proposed to the city to raise $100,000 by private subscription if the Common Council would appropriate a similar amount for the construction of a tunnel under the river at Washington-st. In consideration of raising this money, and the payment of $20,000 cash to the city, the railroad company ask that the Common Council shall vacate that portion of West Adams-st. between Canal-st. and the river, in order that they may occupy the same as depot grounds in connection with the property they already hold adjoining.

Report of the Secretary of the Treasury.

We gave an analysis of the recent report of the Secretary of the Treasury in a late number of the JOURNAL. But as some discrepancies are apparent in the estimates, we republish from a cotemporary the following condensed statement, in which the errors have been reconciled and corrected:

Fiscal year '63–'64.	Estimated.	Actual.
Balance in Treas'ry July 1, 1863	$5,329,044 21	$5,329,044 21
Receipts from revenue and other sources	156,239,456 04	260,632,717 44
Loans as per detail below	594,000,000 00	618,114,884 92
	$755,568,500 25	$884,076,646 57
Expenditures	749,731,960 42	865,234,087 86
Balance in Treas'ry July 1, 1864	$5,836,539 83	$18,842,558 71

Fiscal year 1864–'65.	First Quarter, Actual.	Three last Quarters, Estimated.
Bal. in Treasury July 1, 1864		$18,842,558 71
RECEIPTS.		
Customs	$70,271,091 96

☞ The Commissioners of Internal Revenue has decided that scrap iron, heretofore taxed, is not subject to tax under the Internal Revenue law, a tax upon it in the ore having already been paid.

Railroad Earnings—Weekly.

The traffic of the Great Western Railroad for the week ending Dec. 30, 1864, was as follows:

Passengers	$21,900 70
Freight and live stock	35,283 79
Mails and sundries	1,416 38
Total	$58,600 87
Corresponding week of 1863	50,317 33
Increase	$8,283 54

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Dec. 22, 1864, were:

	1864.	1863.
Passengers	$2,142 34	$1,565 89
Freight	7,486 56	3,824 96
Express	104 16	104 16
Mails	296 58	296 58
Total	$10,029 64	$5,791 59
Increase		$4,238 05

The earnings of the Marietta and Cincinnati Railroad for the 3d week in December:

	1864.	1863.
Passengers	$7,855 08	$5,618 88
Freight	10,962 39	8,577 43
Mail, express & telegraph	1,079 58	907 00
Total	$19,897 05	$15,103 31
Total since Jan. 1	$986,435 38	$689,547 97

The earnings of the Grand Trunk Railway for the week ending Dec. 24, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$31,019 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	72,515 00
Total	$106,658 00
Corresponding week, 1863	119,202 00
Decrease	$12,544 00

Elevated Tops on Railway Carriages.

To the Editor of the Railroad Journal:

SIR:—I am glad to see that this foolish mania for elevating the tops of railway carriages is receiving a check, and that it is likely to become obsolete and give way before the good sense of the traveling public. No man of experience and common sense will deny that the tendency to *upset* the vehicle is much greater than without this superstructure. That it only requires the most superficial and cursory view of this structure to comprehend the disastrous consequences which must inevitably ensue by tumbling forty or fifty human beings headlong into this *cul de sac*, whilst the train still keeps in motion! The very idea is horrible to contemplate.

In the old fashioned common car there are 20 or 30 good oak or ash rafters, or as they are technically called carlinas which bind the sides of the car together and form the roof—these are covered with ¾ or inch thick boards laid longitudinally—the whole being again covered with tin or thick canvass and forms a compact mass of material, which, of itself, in case of an upset, would for some time, sustain a great weight and form an efficient barrier against obstructions which might intervene in case the coupling should hold on longer than usual, whilst in the same case with the raised roof there are only 5 or 6 of these carlinas, (just enough of them to allow all the passengers to fall through into the *bag*,) and mangle the limbs and bodies of the unfortunates. And this *top* being but slightly fastened to the other roof would give way immediately with such a load in it, leaving these carlinas to do their work of destruction on being drawn over this mass of human beings.

But it is not only the raised or elevated tops that are so dangerous, those cars which carry about the same, (say a ton) weight of metal boxes and water (for ventilation they say!) on their tops which have the same top heaviness and tendency to upset, also, which are the means of much destruction to human life.

It is strange that the directors of railroad companies who frequently have to pay such large sums of money for loss of life and limb, do not see that the most of these accidents arise from want of engineering skill, (for it is to engineers that most of these casualties are attributable,) and exercise their own judgment in the matter.

It is not the *weight* that I find fault with, it is the *locality* of the weight. It stands to reason that on a 4 feet 8½ inch gauge road, any weight 14 feet above the rail, must have a tendency to upset the carriage; how great that tendency must be when at the height of 14 feet above the rail half a ton weight be suspended!

Look at the frequency and fatality of our railroad accidents since this elevated top mania has taken possession of some of our railroad men. It would be invidious to name the roads, but I think I may safely refer to those roads which have escaped those accidents in a great measure.

The Michigan Central stands, I believe, at the head of all the (long) roads for its good road bed, good engineering, its good management, and its comfortable cars. *These cars are all old fashioned.* No elevated tops; and I will venture to say there are less lives lost and maiming done than on any road, east, west, or south, having the same amount of the passenger traffic. Can the same thing be said of any road with the elevated top cars?

I should have much less difficulty in accounting for the adoption of this *new* figment of raised tops if it were confined to the *broad gauged* roads, but on the 4 feet 8½ gauge this extra weight being three times the height of the width of the truck wheels, is presumptuous, and if the stockholders do not put their *veto* upon the practice, the judges should charge every jury, that besides finding exemplary damages, they should in every case find it "manslaughter," and of maiming, a felony at least.

But *cui bono?* What good is a raised top to a railway carriage. The *space* that is added to the top of the car is filled with the air from the lungs of a load of passengers in five minutes, and after that it might just as well for all sanitary purposes not be there! "It looks lighter and better." This indeed is its *only* recommendation; but if car builders were to so construct their cars as to prevent one half the light, being shut out by the *blinds* which cover half of the upper and best parts of the windows by being closed *from the top* instead of being *drawn up from the bottom*, the cars would be light enough.

The fact is, there are such numbers of Harpies preying upon railroads in the "furnishing" way, and superintendents are so credulous, each one vieing with another to have the best "looking" cars, that *utility* is lost sight of—except by the few sensible men, who instead of being carried away with every new vagary, study utility, and make the

safety and the comfort of their passengers their chief aim.

Such as these, from an extended experience, I take to be the managers of the Michigan Central, Boston and Lowell, New York and Washington through line, Pittsburg, Fort Wayne and Chicago, and Pennsylvania Central.

HENRY RUTTAN.

COBOURG, Canada, Dec. 29, 1864.

Construction and Applicability of Statute.—Injuntions to Restrain Railroad Companies from using Lands Appropriated by them.—Voluntary Conveyance of Right of Way.

The late case of Villas against The Milwaukee and Mississippi Railroad Company and another, was an appeal from the Circuit Court for Crawford County, Wisconsin, to the Supreme Court of that State.

The judgment in the court below was for the plaintiff.

The facts sufficiently appear in the opinion of the court, which was delivered by

COLE, J.—It seems to us impossible to sustain this suit upon the theory of the complaint.

It is an application for an injunction under the statute, on the ground that the railroad company has failed to make compensation for property taken for the use of the road. But the great difficulty with the case is, that it appears that the respondent (the plaintiff) sold the property to the company, and that his title has vested in the Company by virtue of a conveyance made by his appointment.

The legal title of the property was in trustees, who conveyed the respondent's interest to the company at his direction and request. This is a conceded fact in the case. And the evidence establishes, beyond all controversy, the further fact that the corporation agreed to pay the respondent for his interest, thus conveyed a thousand dollars in the stock of the company. It is claimed that the company never delivered to him nor to any one for him, the stock until it had become nearly worthless, and therefore that he is not now obliged to receive it, but is entitled to compensation in money to the value of one thousand dollars of the stock at the time the conveyance was made. Assuming this to be a correct position, we are still unable to perceive upon what ground an injunction against the company can be sustained.

Concede that the company failed to deliver the stock as it agreed, and that the respondent has a good cause of action for the non-performance of the agreement; still this does not entitle the respondent, either under the statute or upon well established principles of equity, to an injunction, to restrain the company from running its cars over lands which have been conveyed to it. The statute evidently refers to a case where the company, by right of eminent domain, enters upon land and appropriates it to the use of its road without making compensation, which proceeding is, in its nature, *in invitum*.

Where a railroad company takes or appropriates any lands or real estate "*owned by or belonging to any resident of this State*," (*Wisconsin*) who may be entitled to compensation, &c., which the company refuses, &c., to make, then the statute authorizes the person so entitled, by injunction, to restrain the company from running its cars over the land thus taken. But it is the "owner" of the land whose property has been taken and appropriated to the use of the company without compensation and against his will, who is entitled to this extraordinary remedy by injunction.

The statute could not have intended to give a party who had voluntarily conveyed his land to the corporation, the right to an injunction to restrain the running of cars over their road, as a means of enforcing the payment of the purchase money. Such we are confident, could not have been the design of the legislature in enacting chap. 129, R. S., and it is under the provisions of that law that the injunction in this case is attempted to be sustained.

It was contended on the argument, that this case came within the principles laid down in Davis *vs.* the La Crosse and Milwaukee Railroad Company, 12 Wis. 16. A slight examination will show that the two cases are essentially different. Davis was the acknowledged owner of the land on which the company had constructed its road. He had a perfect right of its use, occupation and enjoyment. He had never parted with the title. The company took the real estate under its charter, and permanently used it for about eighteen months, without making compensation. Under these circumstances, we held that the company should either make compensation or cease to use the land.

But here no such conditions exist. The respondent has voluntarily parted with his title. He is no longer owner of the land, and could not claim the right to use and occupy it as his property. If the company has neglected to pay him he must resort to the usual remedies to collect the consideration money. But it would be very harsh, to interpose, by an injunction to restrain the company from using its road, as a means to enforce its payment.

Even in the recent case of Pettibone *vs.* The La Crosse and Milwaukee Railroad Company, decided at the last term, 14 Wis., 443, we held that where the company entered upon a person's land at his instigation, and upon his verbal promise to give the right of way, the injunction should be denied, that by such conduct on the part of the owner the company might naturally be thrown off its guard, and neglect to take the steps necessary under its charter to obtain the right of way.

But this is a far stronger case; for instead of nviting the company to enter upon the land, and appropriate it under a promise to give the right of way, the respondent has given a deed of the premises.

It follows from these views, that the judgment of the circuit court must be reversed, and the cause remanded with instructions to dismiss the complaint.

Dedham and West Roxbury Street R.R.

The enterprise of constructing a railway to Dedham has been in progress during the past few months, and is completed nearly to West Roxbury village. The route is over Shawmut Avenue, as far as what was formerly known as Taft's Tavern, whence it lies over South, Centre, and Spring streets to Dedham. The company have the right by their charter to enter upon and use the tracks of the Metropolitan Railroad, paying reasonable compensation therefor, and their route into Boston will be the same as that of what is designated as the Oak street line of the Metropolitan company. —*Boston Traveller.*

Interest and Dividends.

The Fitchburg and Worcester Railroad Company have declared a semi-annual dividend of $3 a share, clear of all taxes, payable on the 10th inst.

The Norwich and Worcester Railroad Company have declared a dividend of 5 per cent., payable January 10, free of tax.

The Terre Haute and Richmond Railroad Company will pay, 9th Jan., a semi-annual dividend of 5 per cent, and an extra dividend of 5 per cent, free of tax.

The New Castle and Wilmington Railroad Company, have declared a dividend of 3½ per cent. for the past 6 months.

The Schuylkill Navigation Company have declared a dividend of six per cent upon the common and preferred shares, payable less the United States and State taxes, on the 23d inst.

The Lehigh Valley Railroad Company have declared a quarterly dividend of 2½ per cent., payable on the 12th inst.

The New York, Providence and Boston Railroad Company has declared a quarterly dividend of three per cent, free of Government tax, payable January 3.

The Delaware Division Canal has declared a dividend of three per cent, payable on the 9th of January.

The Cape Cod Railroad Company has declared a dividend of $2 per share.

The Metropolitan Railroad (Boston) have declared a dividend of 3 per cent, payable free of tax on the 7th inst.

Coupon No. 10 (July 1864) of the Extended Bonds of the First Mortgage of the Northern (N. Y.) Railroad Company will be paid (less U. S. tax) at the office of George A. Kettell, No. 53 Washington street, Boston.

The Hannibal and St. Joseph Railroad Company will pay the January coupons of their convertible bonds at the office of Duncan, Sherman & Co.

Interest on all the bonds of the Mississippi and Missouri Railroad Company, due January 1, 1865, will be paid on presentation at the Corn Exchange Bank on and after January 3.

The Quicksilver Mining Company has declared a dividend of five per cent in gold.

☞ A most important discovery has just been made in South America. It is that the great River Amazon has been found to be navigable from one end to the other; that, in fact, a new route has been opened between the Atlantic and the Pacific. The Morona, a Peruvian steamer, which was sent to explore the Amazon, has arrived at Mayro, about 300 miles from Lima. The Morona navigated more than 2000 miles of the Amazon proper, and 600 of the Yeayali and the Pachitea Rivers, which, until then, had seen only Indian canoes. The country is, of course, inhabited only by savages, but it is of wonderful fertility.

☞ The steamer Costa Rica from Aspinwall has brought $1,148,850 in gold, $500,000 being for the U. S. Treasury. This is a pleasing indica- of the return of our gold into its old channels.

☞ The New York Central Railroad Company intend petitioning the Legislature for a repeal of the law restricting their charge upon passengers to two cents per mile.

Telegraph System in Great Britain.

The statistics of the telegraph system in the United Kingdom—that is, of the telegraphs open to the public, for there are many purely private lines—are interesting. In 1861, there were 11,528¾ miles open; in 1862, 12,711½ miles; while last year the lines were extended to cover 13,892¼ miles, which, however, consisted of 55,012¼ miles of separate wires. The number of stations was increased in proportion, and last year there were 1,755 open, containing 6,196 instruments through which about 3,400,000 messages were sent. In addition to these lines actually on British soil, the submarine lines to Calais, Boulogne, Dieppe, Jersey, Ostend, Hanover, Denmark, with which the other lines are more or less all in connection, cover 887 miles, with 2,683 miles of wire. This line has upward of 3,000 stations in foreign countries. The messages sent by it to and from foreign countries were in 1861, 230,000; in 1862, 310,595; and in 1863, 345,784, while the mileage was not increased. The several lines were last year, Electric and International, 8,230 miles of line, 39,042 miles of wires, and 1,023 stations. The number of messages sent by this company during 1863 has not been ascertained, but calculating the proportion of increase from the returns of the two years immediately preceding, may be estimated at nearly 2,000,000. The British and Irish Magnetic, 4,196¾ miles, 17,257½ miles of wires, 464 stations, 827,424 messages; Southeastern Railway, 316 miles, 2,642½ miles of wires, 94 stations, and 62,968 messages were sent; London and Brighton Railway, 213 miles, 541½ miles of wires, 46 stations, 43,208 messages; London District, 107 miles, 430 miles of wires, 81 stations, 247,806 messages; and the United Kingdom, 881 miles, 6,090 miles of wire, 48 stations, whence 226,729 messages were forwarded.

☞ The Consular and Diplomatic bills reported in the House appropriate $1 361,800 for the year ending with June, 1866, of which $200,000 are for the relief and protection of American seaman abroad; $17,000 to carry into effect the treaty with Great Britain for the prevention of the African slave trade; $11,500 for the diplomatic and consular expenses of our officers at Hayti and Liberia; $25,000 for expenses under the emigration act; and $20,000 under the neutrality act.

☞ The interest on the public debt of the State of Illinois is now almost entirely reimbursed from the seven per cent. loan upon the traffic of the Illinois Central Company. The half-yearly payment of the Company to the State Treasury on this account, to 1st October last, was $234,455.

This Company is organized under the laws of the State of New York. The principal office is No. 71 Broadway, with branch offices in Philadelphia and Baltimore, for the convenience of subscribers, where the certificates of stock will be issued to subscribers without delay. The property has been selected with great care during the last three years by those of the directors who have been constantly operating on Oil Creek, and throughout the entire oil region of Pennsylvania, as well as Western Virginia, and was not selected to sell, but for the purpose of development and producing oil, having now some ten wells under contract, and being bored with vigor, besides those already completed and producing oil, making in all 13 wells now on the property. Every acre of this Company's property is bottom, and the best of boring land, much of it on Oil Creek, Cherry Run, Cherry Tree Creek, Walnut Bend, Alleghany River, and other streams where the lands are being developed with good success.

OFFICE IN NEW YORK, where Prospectus, Maps, and every information can be obtained,
No. 71 BROADWAY, NEW YORK.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., New York, Dec. 22, 1864

AT A MEETING of the Board of Directors, held this day, it was resolved that a dividend of five per cent. in cash, free of Government tax, be paid on the first day of February next, to the holders of full-paid shares of this Company, registered the 20th day of January next, and that the transfer books be closed on the said 20th day of January, and opened on the 3d day of February.

THOMAS E. WALKER, Treasurer.

Travelers Insurance COMPANY,

HARTFORD CT.,

INSURES AGAINST

ACCIDENTS of EVERY DESCRIPTION,

CAPITAL, - - $500,000.

FIVE DOLLARS ANNUAL PREMIUM

Will insure $5,000 against accidental loss of life while traveling by any public conveyance.

TEN DOLLARS PREMIUM

Secures a policy for $5,000 and also $25 per week compensation for personal injury, incapacitating the assured from his ordinary business.

TWENTY-FIVE DOLLARS PREMIUM

Secures a full policy for $5,000 and $25 per week compensation for all and every description of accident, traveling or otherwise.

Policies for $500, with a $3 per week compensation, can be had for $3 per annum, or any other sum between $500 and $5,000 at proportionate rates.

INSURANCE TICKETS

Will soon be on sale at all the Railway Stations covering the passenger with $3000 Insurance in case of fatal accident, and **$60 Per Month** compensation for personal injury—at the rate of 10 cents for 24 hours travel.

American Railroad Journal.

New York, Saturday, January 14, 1865.

The Law of Negligence as Applied to Railroads.

So far as we are aware, no treatise has yet been prepared on the general subject of *Negligence*. The subject is as distinct and well recognized among lawyers as *Assault and Battery* or *Trespass*, but the rules which have grown up under that branch of the law, especially within ten or a dozen years last past, are so widely scattered through many hundred volumes of reported cases, as to be comparatively unknown to many, and imperfectly understood by all.

From the very necessities of society there arises the moral obligation to so conduct our affairs that no injury shall result to another.

In the protection which the law seeks to throw around society, it has imposed this obligation upon every man, and has provided remedies for its violation. The common law, by a long series of adjudged cases, has clearly defined the character and effect of this obligation. It has given force to it, in adjudging between parties, either by considering it as a part and parcel of a contract to perform—namely, to perform carefully and skillfully—or by considering the obligation to use care and caution, as binding upon all men, irrespective of special contracts, on the ground of public policy.

Negligence, therefore, is the violation of the obligation to use care, skill and diligence in all we do. And one who has suffered injury by reason of such negligence may recover his damages. So general a principle, involving a public duty so universal in its obligation, has led the Courts to many nice discriminations in determining the extent of the duty, the degree of care and caution imposed, and how far particular persons are liable for its omission.

By far the greater number of adjudged cases, within the last twenty-five years, upon the subject of negligence, have been those in which the duties and liabilities of railroad companies were involved. The application of the general principles of the law of negligence to railroad companies is now well understood; and whether railroad companies be considered as common carriers of goods, or common carriers of passengers, or as gratuitous bailees or bailees for hire, in the more general sense, or whether they be deemed as corporate *persons* subject to the general public duty to use care and caution in all their acts—they are alike subject to the rules of law long established in respect to those various characters.

It would be quite impossible to give, within the limited space of a newspaper article, a general view of the liability of railroad companies for their acts of negligence. But we may state that, in general, four things must subsist to entitle a party to succeed in his action to recover for damages resulting from the negligence of another.

1. The injured person must be one who was entitled to demand the exercise towards himself of care, skill and diligence in the act wherein the injury occurred.

2. The injury must be such as could have been avoided by the exercise of care, skill and diligence.

3. The plaintiff must not by his own negligence have contributed to the injuries caused by the negligence of the defendant.

4. The party injured must have sustained damages. There must be *damnum et injuria*.

WHAT PERSONS MAY NOT TAKE ADVANTAGE OF THE DEFENDANT'S NEGLIGENCE.

There may be a case where even conceding that the defendant was guilty of negligence, yet as the plaintiff was in no position to exact the exercise of care and prudence as to himself by the defendant, he could not hold them liable for his injuries resulting from such negligence.

The duty of a defendant to exercise care and prudence depends upon the question whether the plaintiff was in the exercise of a legal right. (Aurora Branch Railroad Company, 13 Ill., 585.) If a person places himself unlawfully on the track of a railway he can only recover for wanton injury. And where two companies have the right to use a track, although authorized by one company, he will be considered unlawfully upon it. when he uses the track for an improper purpose, He is to be deemed a trespasser, (Railroad Company *vs.* Norton, 24 Penn., State, 465,) and has no claims upon the company for the exercise towards him of more than the most ordinary care. So a person injured while on the platform of a car, or in any baggage, wood or freight car, in violation of the regulations of the company, is prevented by the statute of this State from recovering for the injury.

The decisions upon the subject of injuries to domestic animals, by railroads, are very numerous, but may be reduced to a comparatively few principles. Where the owner of the animals is unable to show that as against the company they were properly on the track, or in other words, that it was through the fault of the company that they were enabled to come upon the road, the company are not, in general, liable. Some of the cases, go so far as to hold that the company is not liable where they are not originally in fault, and the animals are exposed to the injury through the fault of the owner, mediately or immediately. For instance, if an animal escape into the highway and thus get upon the track where it intersects with the highway and is killed, the company are not liable. (Towns *vs.* Cheshire Railroad, 1 Foster, 363.)

So in a case, tried within the present month, in the Supreme Court of this city, a trespasser was

not allowed to recover damages for injuries received by him while in the act of trespassing. (Lehey *vs.* Hudson River Railroad Company.)

It appeared that the accident occurred in the freight depot of the company, on the Tenth avenue, between Gansevoort and West Twelfth streets; that the deceased, who was not an employee of the company, nor a passenger on their cars, was standing at the rear of one of the cars of the defendants, obeying a call of nature, when some cars of the company, from which the horses had been detached, were switched off the main track into the depot, and coming violently in contact with the car, against which the deceased stood, threw him down and ran over his body, killing him almost instantly.

The counsel for the company moved to dismiss the complaint, on the ground that the defendants were not guilty of any negligence, and that the deceased being a trespasser, his representative, the plaintiff, could not recover.

The Judge took this view of the law and granted the motion.

This class of cases is to be distinguished from those in which the company are held not liable for an injury, on the ground that the person injured contributed in some degree to produce the injury.

MUTUAL OR CO-OPERATING NEGLIGENCE.

It is a favorite defence of railroad companies to actions for negligence, that the plaintiff himself was guilty of negligence and cannot therefore recover. But, if we mistake not, this subject is imperfectly understood, and parties may rely upon this defence, to their sorrow.

Now the true principle is that the mutual or co-operating negligence which deprives one party of any right of action against the other, is where the act which produced the injury would not have occurred but for the combined negligence of both.

There may be mutual negligence, and yet one party have a right of action against the other. If a man negligently lie down and fall asleep on a railroad track, and is injured by a train, the engineer of which was wantonly negligent, or failed to exercise *ordinary* care, the party injured would have a right of action against the company. (Kernahacker *vs.* Cleveland and Columbus Railroad Company, 3 Ohio, R., 172, N. S.; Trow *vs.* Vermont Central Railroad Company, 24 Verm., 494; Davie *vs.* Mann, 10 Mees. & Welsby, 545; Butterfield *vs.* Forrester, 10 East, 60;) for, though the party lying upon the track was guilty of negligence in going to sleep in such a place, still it was not his act that caused the injury, but the want, in the engineer, of ordinary care, by the exercise of which he could have stopped the train.

On the other hand, if a vehicle is driven at an improper rate of speed through a street, and a passenger who sees it approaching, improperly attempts to cross, in the expectation that he will be able to pass before it can reach the spot where he crosses, and he is injured by coming in contact with it, that is a case in which the united negligence of both co-operated and produced the accident, which otherwise would not have occurred. Where such is the case, both parties are the joint authors of the act which caused the injury, and the degree or proportion in which each may have contributed to produce it, is immaterial, as one is not entitled to have satisfaction from the other for an act which had its origin in their mutual negligence.

But if the effect of the negligence of one party was to produce injury to a certain extent in any event—that is, if its effect was to produce a certain amount of injury even if the other party had been guilty of no negligence at all, then, though the negligence of the other party may have rendered the loss or injury greater than it would otherwise have been, still they are not the joint authors of all that has taken place, and it is possible to distinguish the amount of injury caused of the one from the amount of injury caused by the negligence of the other. If a certain amount of damage was caused, in any case, by the acts of the defendants, and an ascertainable amount by the acts of the plaintiff, it does not follow, because the plaintiff by his act increased the amount of his damage, that he is to have no remedy against the defendant for the damage which was caused by the acts of the defendant alone.

It will of course be found difficult, almost impossible to apply this principle of divided responsibility, to a case of personal injury resulting from the negligence of both the defendant and the plaintiff. Thus if a man on a train sees that there will be a collision, and resolves to leap from the train, but before he leaps, the collision occurs and one arm is broken, and then leaps to the ground and the other arm is broken by his fall—we think he might recover the damages resulting from the breaking of the first arm, with which he had nothing to do, but he would be precluded from recovering any thing for the injuries resulting immediately from his leaping from the train which was his own folly; if it should appear that such injury would not have probably occurred had he remained on the train.

But such a case would not often occur. A man is injured by an accident on a railroad to which he in some measure contributed by his own negligence. How many bruises or hurts were occasioned by his own, and how many by the company's negligence, the Courts will not stop to inquire; but the injury being one and the same, and resulting from one and the same act, a party who participated in the act and contributed even in the slightest degree to the result, cannot recover at all. It may be stated therefore, as a general rule in cases of personal injury, that the person injured must not have contributed to the injury; and having so contributed, he cannot recover.

The question will then arise,—

WHAT IS NEGLIGENCE ON THE PLAINTIFF'S PART?

In this state, at least, it is well settled that if a plaintiff uses *ordinary care*, he cannot be deemed to have contributed to the negligence. (Center *vs.* Finney, 17 Barb., 94; Seld. Notes, No. 2, 44; Eakin *vs.* Brown, 1 E. D. Smith, 36.) He is not bound to use extraordinary care to avoid an accident. It has even been decided in one case, that a passenger injured by a collision resulting from defendant's gross negligence, is entitled to recover, although at the time of the collision he was in the baggage car; if he was lawfully there, notwithstanding he knew the position to be much more dangerous, in the event of such a collision, than a seat in the passenger car, and that too, though the result might demonstrate that he would not have been injured if he had been in a passenger car. His imprudence or want of care was held not to contribute to cause the *accident* which occasioned the injury. (Carrol *vs.* New York and New Haven Railroad Company, 1 Duer, 571, and to similar effect, Colegrove *vs.* New York and New Haven Railroad Company, 6 Duer, 382.) But in the following case the plaintiff did contribute to cause the accident. A lunatic was traveling on a railroad in charge of his father, and the father left him in one car and took a seat in another. The lunatic not paying his fare after repeated requests, the conductor, in ignorance of his condition, put him off the train, and he wandered about the track and was run over by another train and killed. It was held that there was negligence on the part of the father, which was attributable in law to the lunatic, and none in the conductor, and no recovery could be had. (Willetts *vs.* Buffalo and Rochester Railroad Company, 14 Barb., 585.) So in another case, where the plaintiff was negligent in getting his vehicle in the way of defendant's cars, and defendant's cars might have been stopped in season to avoid a collision but for the want of adequate brakes, plaintiff was not allowed to recover. (Owen *vs.* Hudson River Railroad Company, 2 Bosw., 374.) So crossing a railroad track, where five different tracks ran parallel, after looking one way only has been held, in the case of a man of full age, conclusive evidence of negligence. (33 Barb., 429.) A great many other instances found in the books might be given to illustrate the general principles on the subject of negligence to which we have referred. Enough, however, have been given to give a tolerably fair idea of the state of the law as at present held. We may state, in conclusion, that the strictness of former rules is being to some extent abated, and that the Courts have, in a measure, relaxed the rules as to the liabilities of railroad companies for injuries caused by accidents. By imposing upon passengers the strict necessity of exercising care and caution on their own parts, they have tended to check the enormous verdicts formerly obtained against railroad companies for injuries to the person.

Cleveland and Pittsburg Railroad.

The annual meeting of the stockholders of this company was held in Cleveland on the 4th inst. From the report of the directors which was presented, we learn that the earnings during the year 1864 were $2,512,315 50, and the expenses $1,505,636 54, leaving as net income, $1,006,678 96. Two dividends of four per cent. each have been paid. During the year, $270,000 of bonds have been converted into stock. The financial condition of the company is sound and prosperous. It has no floating debt which cannot be paid from debts due, and all its engagements are promptly met. There has been expended on construction account during the year $664,032 52. The additions to the equipment of the road have cost nearly a quarter of a million dollars, and past experience makes it evident that ten locomotives, as many passenger cars, and two hundred and fifty flat cars, with an addition of twenty miles siding, will be needed for the prompt and efficient dispatch of business.

Three propositions were laid before the stockholders for their decision. The resolution in favor of increasing the capital stock for the purpose of providing for a large increase of motive power

and rolling stock, as recommended in the Directors' Report, was agreed to. That in favor of leasing the Tuscarawas Branch to certain persons interested in mining lands adjacent to the line, was also adopted. The proposition to purchase a half interest in the Cleveland, Zanesville and Cincinnati Railroad, (Akron Branch) was rejected.

The following gentlemen were elected directors: J. N. McCullough, Cleveland; James F. Clark, Cleveland; C. A. Reed, Cleveland; W. W. Holloway, Bridgeport; P. B. Geisse, Wellsville; David Gibson, Cincinnati; Charles R. Carroll, New York; George M. Ives, Hartford; H. C. Kingsley, New Haven; Noah L. Wilson, New York; B. F. Jones, Pittsburg; Joshua Hanna, Pittsburg.

Wealth and Resources of Rhode Island.

We have from time to time given our readers in a condensed form, statements of the wealth and resources of some of our nowest, largest and most flourishing States, to illustrate the wonderful progress which civilization is making on our free soil, and especially to convince our foreign readers of the permanent and increasing power of the republic.

We now propose to show them what the smallest of States among us may do for itself under the protection of the Union, and that area and land are by no means indispensable to great prosperity in the Western world. Rhode Island is not so large as many private estates in Europe. It is but about 49 miles in length, and 29 in breadth good measure, containing of land and water about 885,000 acres, but every acre of either is a gold mine in productive power. It was originally settled by a liberal-minded man, whose name is now synonimous with the spirit of toleration. The descendants of Roger Williams still are proud of the name and the fame of their illustrious ancestor. Its first form of Government was that of a Royal Charter granted some years after the first settlement in 1636, and it was one of the thirteen original colonies, though it hesitated in its adoption of the constitution longer than any of its associate colonies, not coming into the Union until 1790. Its population in 1701 was 10,000; in 1800 69,122, and in 1860 174,620.

It contains four principal cities and towns, viz., Providence, with a population of 50,666; Newport, a celebrated watering-place with 10,508, in the summer season one half more; and South Kingston, Bristol and East Greenwich with an average of about 4,000; Bristol, however, being the most populous of the three.

The cultivated land amounts to 329,884 acres, and uncultivated, 189,814. The value of the farms is estimated at $19,385,578, and the implements of husbandry used on them at $587,241. The live stock is thus enumerated. Horses, 7,121, milch cows, 19,700, working oxen, 7,857, other cattle, 11,548, sheep, 32,624, swine, 17,478.

The products of animals are as follows: butter, 1,014,856 lbs., cheese, 177,252, wool, 94,699; the value of slaughtered animals is $713,725, and of wax and honey is $5,801.

The cereals are necessarily small in quantity; of wheat, but about a thousand bushels, of rye more in proportion, to wit., 28,259 bushels, Indian corn, 458,912, oats, 234,453, barley, 40,998, and buckwheat, 3,573.

The commercial crops are too inconsiderable to notice, the only one of the least value being tobacco.

The miscellaneous crops are:

Peas and beans, bushels	7,699
Irish potatoes "	542,909
Sweet " "	946
Wine, gallons	507
Hay, tons	82,725
Clover seed, bushels	1,221
Grass seed "	4,229

The orchard products are of the annual value of $83,691; of market gardens, $146,661.

What Rhode Island lacks in agricultural wealth, it makes up by its mechanical industry.

Its manufacturing establishments in 1860, were 1,160 in number, but since the war they have largely increased. The capital employed was in 1860, $23,300,000, the value of the raw material annually consumed, $23,400,000, a little more than the capital. 33,000 operatives were employed, or about 21 per cent. of the whole population, and the value of the articles produced was $47,500,000! This is more than the capital employed twice over.

The number of the spindles run was 766,000, of looms 26,000, the cotton used amounted to 38,521,608 lbs. The spindles in the wool factories numbered 86,048, the looms 1,586, and the wool used was five millions of pounds.

The following is a list of the principal articles manufactured:

Cotton goods	$12,258,657
Woollen and mixed goods	6,599,280
Jewelry, &c	3,006,678
Clothing	1,188,086
Steam machinery	1,068,825
Flour and meal	555,619
Iron castings	336,600
Boots and shoes	315,959
Fish, (whale, cod and mackerel)	308,750
India rubber goods	246,700
Furniture	217,472
Printing	205,262
Gas	197,785
Lumber	172,174
Agricultural implements	117,845
Soap and candles	107,332
Sewing machines (6,000)	90,000
Leather	80,897
Malt liquors (6,400 bbls.)	31,267

A few thousand bushels of coal are annually produced in this State, but not of a good quality, nor is Rhode Island geologically a coal producing State.

The value of the foreign imports and exports is $716,828. The total of tonnage entering and clearing, 48,868 tons.

The banks about 90 in number in 1860, had an active capital of $21,090,619, and were so prosperous as to have a handsome surplus of assets. The Savings Banks principally used by the operatives, and 22 in number had deposits, the saved wages of labor of $7,822,000, which may be fairly considered to have been the gains of these 33,000 operatives.

There are five principal railroad lines in Rhode Island, the aggregate length of which is 119 miles, costing $4,571,496. It has no canals and does not need any, for its water communications are ample, and the gift of nature. Rhode Island has no public debt, or at least had none before the breaking out of the rebellion.

It will thus be seen that this little State is one of the most thrifty in the Union.

☞ A cargo of railroad ties were recently shipped from Washington to Spain. The ties were cut along the Eastern Branch from the white oak and chestnut timber.

Tonnage of Competing Coal Co's.

In the year 1864 the product of the anthracite collieries of Pennsylvania approximated eleven millions of tons. There were moved from the shipping points in the several basins very considerably over ten millions of tons, which shipments are exclusive of local consumption by the towns and workshops, etc., in the mining districts, that contain more than a quarter of a million of inhabitants.

Anthracite coal is forwarded to market down the Schuylkill, down the Lehigh, down the Susquehanna, up the Lackawanna, up the North Branch, and up the West Branch. The bulk of the movement, however, is toward Philadelphia and eastward destinations.

The subjoined statement from the *U. S. R. R. and Mining Register*, comprises the tonnage of the seven great competing Anthracite Coal Lines, which supply the general tidewater market:

	1864 Tons.	1863 Tons.
Phila. & Reading R. R.	3,065,559	3,065,261
Schuylkill Canal	1,000,500	885,542
Lehigh Valley R. R.	1,295,419	1,195,155
Lehigh Canal	758,087	699,557
Del., Lack. & W. R. R.	1,302,457	1,223,166
Del. & Hudson Canal	848,076	828,150
Pennsylvania Coal Co*	759,544	661,954
Total	9,029,642	8,588,785

The tonnage of the lines above named for four years antecedent to 1863 was in these quantities, to wit:

1862	6,897,601	1860	7,337,837
1861	6,843,489	1859	6,742,498

* The Pennsylvania Coal Company in 1864 shipped 504,507 tons by the Delaware and Hudson Canal, which makes the whole tonnage moved on that canal for the year 1,362,583 tons. The Pennsylvania Coal Company in 1864 forwarded 255,037 tons over the Erie Railroad.

Boston and Maine Railroad.

The total income of this company for the year ending November 30, 1864, was $1,272,601 53; and the total expenditures, $829,269 60. Two dividends of 8 per cent. were paid during the year, amounting to $342,178 79, leaving a surplus of $40,970 85. The total surplus is now $834,753 87. 2,574,345 passengers have been carried over the road during the year.

Railroads in New Jersey.

Applications are to be made to the Legislature of New Jersey, now in session, for the following named charters:

Newark and New York Railroad Company, with authority to construct a railroad from Newark to Communipaw Bay; for a horse railroad, with dummy engines, from Newark to the Hudson River; for a horse railroad from Newark to South Orange; to authorize the Paterson and Newark Railroad Company to build a bridge over the Passaic River between Belleville and Newark—to construct the road along the Passaic below high water mark, and to connect with a railroad in Hudson County; to authorize the Newark Plank Road Company to build a horse railroad along their wagon road; to authorize the Morris and Essex Railroad Company to construct branches and lateral roads, and to bridge the Delaware River; to charter a railroad to run through Essex, Union, Somerset and Warren Counties; to build a railroad from Peapack, through Morris and Union Counties to Essex; to charter a horse railroad from Newark to Lyons' Farm; to authorize the Weequahick Lake Association to build a horse railroad from the lake to Newark; to incorporate the Washington and Mulberry streets (Newark)

horse railroad; to authorize a railroad from Newark to Jersey City, with $100,000 capital; to authorize a horse railroad from Newark to Montclair.

Steam Tonnage in our Foreign Trade.

Continued from page 5.

The very small proportion of trade for consumption in Panama and of outward exports, the produce of Panama, is decisive that the tonnage of the United States Steamships on that line, cannot properly be regarded as in the foreign trade.

In 1862, further statements of tonnage arrived and cleared are given as follows:

Vessels at Panama and their tonnage for the year ending Sept. 30, 1862.

	Inward.		Outward.	
Vessels.	No.	Tons.	No.	Tons.
American	60	89,184	57	86,578
English	42	30,611	42	30,611
Spanish	2	475	2	475
French	2	536	2	536
N. Y. and all other.	70	3,350	70	3,350
Total	176	124,156	173	121,550

The value of cargoes in American bottoms, inward and outward, in 1862 was $59,671,194.

The following statement of the transit of treasure and freight over the Isthmus of Panama in 1862, towards the Pacific and towards the Atlantic, is also from the Consular Report for 1862:

Travel and Transportation over the Isthmus of Panama for the year ending Sept. 30, 1862.

	Towards the Pacific.	Towards the Atlantic.	T'l both ways.
Passengers...No.	21,456	9,706	31,162
Gold	$4,444,268	34,605,467	39,049,736
Silver	———	14,285,935	14,285,935
Jewelry	578,062	———	578,062
Am. mails, lbs.	232,886	31,964	264,850
Eng. mails, "	35,565	10,127	45,692
Extra bag'ge lbs.	345,547	217,901	563,448
Freight, lbs	54,758,378	20,061,601	74,819,919
Freight, feet	737,684	33,279	770,963

Of the treasure carried towards the Atlantic there was:

Gold to the United States	$26,401,693
Silver to the United States	16,513
Gold to England	8,091,032
Silver to England	14,198,008

As the tonnage accounts appear in the official records the various ocean steam lines are but imperfectly disclosed. A brief review of the history, progress and condition at the time referred to in the Treasury Document under analysis (1863) becomes necessary for a proper understanding of the subject.

After the experimental trip of the Sirius in 1838, the Great Western ran for several years (1840-1846) almost alone to New York. In 1842 and 1843 there were three or four arrivals of the British Queen from Antwerp; but the principal opening of the steamer trade was made by the Cunard Line established in 1840 and 1841 from Liverpool *via* Halifax to Boston. There were several of these vessels—the Columbia, the Acadia, the Caledonia and the Britannia—the first four of the line. The Columbia was lost in 1843, and was succeeded by the Hibernia and the Cambria, to which were added on the extension of the line to New York in 1848 the Niagara, Europa, Canada, and America, and the Trent and Severn of the West India line occasionally came to New York. The Cunard line was the pioneer as a commercial venture strictly. It always carried a larger share of merchandize than other British lines and larger also than the American lines afterwards established to British ports. A French line from Havre appears in the arrivals at New York in 1847, steamers of about 600 tons each, viz. the Union, Philadelphia, New York and Missouri but they disappeared in the ensuing year.

Simultaneously with the extension of the Cunard line to New York, and its enlargement to a total of 85,000 tons arriving in the fiscal year 1848-'49 there was established an American line to Bremen. The Washington and Hermann and a large steamer the United States made several trips to and from Havre. The Isthmus lines were begun nearly at the same time, expanding rapidly in 1850 and 1851, and as they touched at Vera Cruz and Havana, frequently their tonnage appears as foreign arrivals entering from Mexico and Cuba, though conducing little actual foreign commerce. In 1850 the first arrivals of the Collins line were reported at New York—the Atlantic, Pacific, Arctic, and Baltic. The tonnage of these ships rose to 75,000 tons annually in 1853 and 1854 but the line was abruptly discontinued in 1857.

An interruption of the Cunard line to New York occurred in 1855 amounting to an absolute discontinuance for the entire year, but it was resumed in 1856. The line ran to Boston, however, as usual.

In 1856 a French line from Havre was started to New York, composed of the Barcelone, the Lionnaise, the Alma, and the Cadiz, but they made a few trips only. Several British steamers—the Jason, Etna, Alps, etc., made a few trips also from Havre to New York in 1856 and 1857, but they were not afterwards continued.

From Bremen, the Hansa, a Bremen ship, in 1856 and 1857 made a few trips to New York, and the Jason and Argo (British) after the withdrawal of the Hermann and Washington (American). A line of Belgian steamers was also started in 1856, the Leopold, the Belgique and the Constitution, but soon withdrew. The Hamburg steamers Borusia and Hammonia, and the Bremen line, before referred to, continued in successful operation between the North German ports and New York from their beginning in 1856. In 1859 and subsequent years they received the addition of two or three heavy steamers, the Teutonia, Bavaria, and Saxonia from Hamburg, and the Bremen and New York from Bremen. Together the amount of tonnage from Hamburg and Bremen rose rapidly from 1858 forward, amounting to 109,892 tons, in the calender year 1863. The success of the line has been so decided as to lead to a large diversion of the trade of continental Europe through the ports of Hamburg and Bremen, ranking them next to England in the general amount of trade with the United States.

The trade with France, largely carried by the American line of steamers to Havre from 1857 to the close of 1861, is now received through a British built line, just making its first passages in June 1864, and a second line of new foreign steamers, is also started between Liverpool and New York.

The effect of the establishment of the Bremen and Hamburg lines in the trade of the United States with those countries is so striking as to require notice here. The following is a comparison, beginning with 1855, of the proportion of American and foreign vessels engaged in this trade:

	American.		Foreign.	
	No.	Tons.	No.	Tons.
1854-'55	50	39,525	236	159,807
1855-'56	88	37,293	214	121,498
1856-'57	36	37,411	264	171,844
1857-'58	30	31,300	235	169,060
1858-'59	9	11,224	218	186,599
1859-'60	5	4,033	193	170,222
1860-'61	12	8,298	181	161,005
1861-'62	10	7,361	196	189,604
1862-'63	9	9,018	183	179,595

The conduct of this trade has therefore almost wholly passed to other than United States vessels. The value of the trade has also increased beyond all proportion to the tonnage. In 1859-'60 the imports from the two ports were $18,497,607, and the exports $18,378703—a total trade of $36,877,-310, a very little indeed of which was carried by American ships.

The present condition (June 1864) of the foreign steam lines to the United States is shown in the following table, first embodied in a memorial to Congress by the Chamber of Commerce of New York:

Lines.	Ships.	Tons.
Cunard Line	11	26,870
Screw Line	4	6,682
Dale Line	12	23,757
London and New York S. S. Co	2	3,386
Anchor Line	3	3,694
Montreal Ocean S. S. line	3	2,819
Galway Line	2	6,000
National S. Nav. Co	9	28,690
Hamburg American Packet Co	5	11,700
N. German Lloyds' S. S. Line	4	10,155
General Trans-Atlantic Co.'s Line	5	4,700
Jamaica, Hayti, Nassau and Havana	2	1,500
Total	62	129,953

The Adriatic, one of the Galway Line and owned abroad was originally built for the Collins Line, and is now the only Steamers of American build which crosses the ocean!

Various propositions for the establishment of new American steam lines to foreign countries have been made during the past year, and it has been claimed that the aid of the government should be accorded to any lines which should be opened at least to the extent of the aid regularly accorded by the British Government in like cases. The circumstances surrounding any such enterprises at the present time are decidedly adverse, unless aid of some decided character is afforded. The national and semi-official character attached to European Steamer lines by the Government supporting them undoubtedly goes far toward securing them precedence in passenger carriage, in important and valuable freights, and in every element of security, with the advantages it brings, the consideration of chief importance now in distant voyages. A system of official recognition similar to that which has so long characterized the royal mail steamer lines of Great Britain is urgently needed for the United States.

At the instance of the promoters of a new steam line to Brazil, among others, Congress has just (June 1864) passed an act extending aid in the favor of guaranteed payments for postal service.

The following tabulations which originally appeared in the Report of the Chamber of Commerce, and prepared by Mr. Stevens, their able Secretary, are embodied also in the Treasury Document; and with these we shall conclude the present article.

The first series relates to the average duration of passage between Europe and the United States,

referring to 1859 for its statements. From this we make the following:

Cunard Steamers—

From Liverpool to Boston made 27 passages averaging ..... 13d. 20h. 53m.
From Boston to Liverpool 26 passages averaging ..... 10d. 23h. 21m.
From Liverp'l to N. Y. 26 passages. 18d. 8h. 20m.
From N. Y. to Liverp'l 26 passages. 10d. 16h. 40m.

Collins Steamers—

From Liverpool to New York 11 passages averaging ..... 12d. 0h. 30m.
From N. Y. to Liverp'l 11 passages. 10d. 22h. 0m.

New York and Southampton Line—

From Southampton to N. Y. 5 pass. 10d. 2h. 20m.
From N. Y. to Southampton 5 pass. 9d. 19h. 30m.

The shortest passage across the Atlantic was made by the Baltic (Collins) in 1854, and embraced 9 days 16 hours and 59 minutes.

The annexed exhibits the subsidies to American and British lines as they existed in 1857.

American Lines.

Lines.	Trips—No.	Miles.	Amount Mileage.	Amount of Subsidy.	Pay p. m.
Collins	29	3,100	124,000	$385,000	$3.10½
Bremen	13	3,700	96,000	128,987	1.34
Havre	13	3,270	85,000	88,484	1.00½
Aspinw'll.	24	3,200	153,600	290,000	1.88½
Pacific	24	4,200	201,600	348,250	1.70
Havana	24	660	32,112	60,000	1.86½
Vera Cruz.	24	900	43,200	26,062	0.07
Total			725,732	$1,035,740	$1.80½

British Lines.

Lines.	Trips—No.	Miles.	Amount Mileage.	Amount of Subsidy.	Pay p. m.
Cunard	52	3,100	304,000	£173,340	$2.38½
Royal Mail.	24	11,402	547,296	270,000	2.46
Pen. and Oriental.	24	16,596	796,637	244,000	1.53½
Australian	12	14,000	336,000	185,000	2.75
Bermuda	24	2,042	98,000	14,700	0.75
Panama	24	2,718	130,434	25,000	0.96
W.C.of Africa	12	6,245	149,880	23,250	0.62½
Total			2,362,247	£936,290	$2.29

The subsidies allowed by the British Government have been gradually increasing from the year 1850 and additions made thereto as new services were required for the lines, growing out of the increased commerce which followed their establishment, and in times of commercial distress as well as in prosperity, the same sustaining and unfaltering protection has always been afforded by the sagacious and far-seeing policy of that enlightened government.

While treating on this subject it will be well to look into the statistics of other nations and note their doings. Great Britain demands the first consideration. Of its registered steam fleet in 1860-'62 the numbers and tonnage show as follows:

	Vessels of 50 tons or less. No.	Tons.	Vessels over 50 tons. No.	Tons.
1860	802	18,471	1,186	433,881
1861	854	19,683	1,268	585,015
1862	898	20,864	1,319	515,270

The employment of registered steam vessels not including colonial, as divided between the home and foreign trade in 1860, '61 and '62, was as follows:

	1860.	1861.	1862.
Home Trade	92,254	102,795	104,020
Home & foreign partly	29,803	24,924	29,463
Foreign Trade	277,437	313,465	328,310
Total tons	399,494	441,184	461,793
Vessels	929	997	1,033

All which is irrespective of steamers engaged in the river trade. The number and tonnage of steamers built and registered in the United Kingdom from 1853 to 1862, is shown in the annexed columns:

Years.	No. of Vessels—Iron.	Wood.	Total.	Tonnage of Vessels.
1853	117	86	153	48,215
1854	152	22	174	64,255
1855	195	38	233	81,018
1856	175	54	229	57,573
1857	155	73	228	52,918
1858	112	41	153	53,150
1859	106	44	150	38,003
1860	149	49	198	53,796
1861	159	42	201	70,869
1862	181	40	221	77,338

The prepondency of iron in steamship building began in 1853, and it is noticeable how completely that material has controlled since that time. In the 10 years of the table there were 1,501 steam vessels built of iron, out of a total of 1,940 leaving but 439 built of timber.

The following shows the proportion of domestic and foreign steam shipping employed in the foreign commerce of the kingdom in 1853 and 1863 comparatively:

	Entered. 1853.	1863.	Cleared. 1853.	1863.
British	1,176,850	2,645,121	1,090,000	2,594,367
U. States.	46,670	618	51,347	449
Other f'g'n	112,116	507,701	109,402	458,144
T'l tons	1,335,636	3,153,440	1,250,749	3,052,960

The proportion to which foreign built steam vessels enter into the home or foreign trade of the kingdom, is relatively smaller than the sailing tonnage notwithstanding the opening of the coasting trade to foreign bottoms in 1853. The German States and the French have a moderate share in that trade—small indeed rather than moderate—while the United States have now absolutely none! The united tonnage belonging to all foreign nations, is not a sixth part of the whole tonnage employed. The contrast exhibited as to the proportion of American steam tonnage, employed in trade reaching British Ports in 1853 and 1863 as very striking, and at best a humiliating feature in our commercial condition.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Jan. 6, 1865, was as follows:

Passengers	$13,615 01
Freight and live stock	45,501 26
Mails and sundries	1,272 43
Total	$60,388 70
Corresponding week of 1864	41,568 41
Increase	$18,820 29

The earnings of the Grand Trunk Railway for the week ending Dec. 31, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$36,077 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	84,363 00
Total	$123,564 00
Corresponding week, 1863	109,765 00
Increase	$13,799 00

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the 4th week of Dec., | $165,104 49
Corresponding week of 1863 | 124,238 60
Increase | $40,865 89

The earnings of the Chicago and Rock Island Railroad for the 1st week in January, 1865, were | $79,074 00
Corresponding week of previous year | 13,539 00
Increase | $65,535 00

Erie Railway.

The following is an official statement of the financial condition of this company:

Earnings for the 11 months to Nov. 30, 1864		$11,983,866 77
Estimate for December		1,216,133 23
Earnings for the year 1864		$13,200,000 00
Expenses to Oct. 1	$7,091,408 87	
November & Dec	1,708,591 13	
		8,800,000 00
Net earnings		$4,400,000 00
Int. on mort. bonds	$1,356,173 00	
Rents, taxes, &c	1,060,599 00	
		$2,416,770 00
		$1,983,230 00
Dividends July 1, 1864	$925,982 50	
Jan. div. on pref. stock	298,576 50	
		$1,224,469 00
Surplus		$758,761 00
4 per cent. on $16,398,100 of common stock is		655,724 00
Surplus after paying dividends		$103,037 00

Allegheny Valley Railroad.

An adjourned meeting of the stockholders of this company was held in Pittsburg on the 5th inst., to take definite action on the proposition to lease the road to the Mahoning and French Creek Railroad Company. After a brief discussion, the vote on adopting the proposition was taken, and resulted in its favor by a majority equal to two-thirds of the capital stock of the company. The lessees will immediately put under contract the extension of the road from its present terminus to Oil City. The extent of road to be built to complete a direct communication with Oil City is only seventy-five miles, the survey of which has been already made. It is a most important work, and must tend materially to the development of the resources of the country through which it will pass.

North Pennsylvania Railroad.

The earnings of this road during the year ending November 30, 1864, were:

From passengers	$305,307 66
" freight	435,850 59
" mail	2,947 25
" rents, &c	5,928 81
Total earnings	$750,034 31
Preceding year	524,637 69
Increase	$225,396 62

This is equal to an increase of $18,783 02 per month.

The opening of the Penn Haven and White Haven Railroad has added considerably to the passenger and miscellaneous freight business of the North Pennsylvania Railroad. The number of travelers has more than doubled in two years.

☞ The following gentlemen have been elected officers of the Philadelphia and Reading Railroad Company: President, Charles E. Smith; Managers, S. M. Felton, H. Pratt McKean, A. E. Borie, Robert B. Cabeen, J. B. Lippincott, Moses Taylor; Treasurer, S. Bradford; Secretary, Wm. H. Webb.

American Railroad Journal.

Saturday, January 14, 1865.

Stock Exchange and Money Market.

The nations of the old world staggering under the enormous loads of debt created by official profusion and aggressive wars, seem to have a very large amount of sympathy for us, in regard to our financial affairs. The cases are entirely dissimilar. Our previous national debts were fully paid off without difficulty even in the infancy of the Nation, and now that we are approaching manhood with vastly increased strength and resources, we feel assured that our backs are fully equal to our burthen. Perhaps it would be useful employment for foreign unfriendly cities to look at home. What is the present financial position of England? We see by our latest files that it is causing great solicitude. The following is an extract from a London Journal of the 25 of December last:

"Fifty years of peace find us with a heavier debt than at the end of the great war. It is 800 millions even yet, and since the beginning of the century we have paid the almost fabulous sum of £2,262,488,852 for interest alone. In fourteen years the taxation has increased 7s. 9d. per head per annum, so that we have each of us individually a heavier burden to bear. Nor ought we to be bamboozled with the deception that the increase has been rendered necessary to the urgency of our defensive requisitions. In ten years there is an increase in the Civil List of £8,035,975; and in the cost of collecting a revenue, which a wholesale repeal of duties ought to have greatly reduced, of £1,236,428. The excess of taxation has amounted to 11.77 per cent., or a total of £7,398,012. Long speeches have, indeed, fobbed us off with the fallacy that, because the proportion of taxation per article has been reduced, our burdens are virtually diminished. But no man of common sense believes that if in 1854 he paid £62,800,000, and in 1864 he was charged £70,200,000, he disburses less merely because the amount is more skillfully imposed. Nor must we be confused by the sophistry of the Exchequer into giving Mr. Gladstone credit for effecting a great reduction in the income, property and assessed taxes. A property tax of 1s. 2d. yielded £10,642,621 in 1855, and a reduction to 7d. in 1864 has yielded £9,084,000. We ourselves, find that we pay a larger amount at 6d. than on the same income we did at 9d.; but the reason is simply this, that what are called active officers have been let loose upon the public, that fresh rack-rent valuations have been made of all property, that surcharges have been unscrupulously resorted to, that extortion in every available shape has been stimulated by express direction of the Exchequer, that the house duty has been most unfairly enhanced, and the land and assessed taxes have been stretched to the utmost. If these overcharges had been equally levied there would have been less reason to take exception to the process; but when men feel that, while they are paying at this exorbitant rate, districts where more reasonable surveyors act are exempt, they are little disposed to credit Mr. Gladstone with a relief which proves to be only the hocus-pocus of figures, and the legerdemain of the way of stating the public accounts. In thirty years our expenditure has increased £26,201,000, equal to the interest of the whole of the public debt. This is all a Reform Act has done for us."

Surely after such a picture as this we may feel assured that we are as yet in no such predicament. For eighty years we have scarcely known what taxation was, and we are therefore better prepared than any nation on the globe to meet its temporary pressure. But besides this we are convinced of our own strength by each day's disclosures. Even the Confederates admit that they as well as ourselves had no previous idea of our gigantic power. In the meantime we have only to proceed with coolness and courage to the end in view, and all will yet be well. Every indication points to the early termination of the struggle, and there is no feeling of exhaustion on our part. The Money Market is active, and good rates are paid for money, showing that it can be used to advantage, and the signs of general prosperity bear out the idea. As much as 10 per cent. has been freely paid on good commercial paper. The weekly report of the associated Banks to Jan. 7, shows the following results:

Loans	$199,444,969
Specie	19,666,211
Circulation	8,283,832
Deposits	147,442,071
Showing a dec. in loans since Dec. 31, of	$4,400,282
" " specie	491,230
" " circulation	100,806
An increase in deposits of	$79,820

We are glad to know that the city Banks adhere to the policy of retaining their specie reserves, in contradistinction to that of many of the leading country institutions, which have almost denuded themselves of coin, not caring to carry a large amount of their means as a dead weight, and anxious to make a profit by its conversion into currency. These banks will however lose in the end all they gain now by this disposition of their funds for when called on to resume specie payments, as they certainly will be as soon as the Government withdraws its legal tenders, they will find their profits disappear like the gilded equipage of Cinderella, when the hour approaches for a return to their normal condition.

The gold market has been quiet the past week, and has ruled quite equally. It has stood pretty firmly in the neighborhood of 226. A fall of a few per cent. however occurred on Tuesday. The probable arrival and sale of large quantities of captured cotton in this city, to the extent of 15 or 16 millions of dollars will have a large effect both on the prices of gold and exchange, and be felt to an extent not fully estimated by speculators. Exchange for good commercial bills continues to rule under par as it has done for a long time past. None but the best class of bills bring anything above par. The number of National Banks according to the latest returns is now 685, with a total capital of $143,641,400, and a circulation of $78,724,520, a little more only than half their capital, and quite in contrast with the issues of many banks in the interior.

Governments continue steady and in great demand. The subscriptions are so numerous and on so large a scale, that the Treasury Department is relieved of its pressure, and it is thought will be able to get along very comfortably in the future. Besides the collection of the internal revenue is proceeding with great success, and the people appear more ready than ever to meet the wants of the Country. The balance in the Sub-Treasury on Tuesday was $26,233,051 59.

Railway shares and securities show a decided advance in the prices of last week. There is more inquiry, and large transactions have taken place in them. There are some exceptions as there always will be owing to the dexterity of manipulation, but as a whole we may aver that the Railway interest is stronger and still improving.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois War Loan, 98; Ohio 6s, 1870, 101; Brooklyn City Water Loan, 107; Mariposa 2d mort., 20; Manhattan Gas, 185; Nicaragua Transit, 5; Copake Iron, 4¼; Indiana 5s, 86; North Carolina 6s, 58; McGregor Western 1st mort., 79½; Buffalo and State Line, R. Albany and Susquehanna Railroad.

This road has been completed and opened to Cobbleskill, in Schoharie County, 45 miles from Albany; and the company have iron and material to complete the track to Richmondville, five miles, further. Most of the grading is completed to Oneonta, Otsego Co., 80 miles from Albany, to which point the iron will be laid early in the Spring. Considerable grading has also been done between Oneonta and Binghamton. There is to be a tunnel of 2,000 feet in length, about 17 miles from Binghamton, of which the approaches are excavated and some 800 feet of the heading, and upon which the work is being prosecuted day and night.

The first division of the road, 35 miles has been in operation over a year. The gross earnings for the first year from September 30, 1863, to September 30, 1864, were $97,861 07 of which about 50 per cent were required for running expenses. The earnings in October and November, 1864, show an increase over the corresponding months of 1863, of $7,000 88. The total expenditures for construction and equipment of the road to date have been $2,855,321 04.

The Albany and Susquehanna Railroad Company have thus complied with the conditions entitling them to the first installment of State aid, $250,000; which are, that the company shall have expended at least $1,000,000 in the construction and equipment of the road, and in good faith put the same in operation 40 miles from the city of

Albany, through a portion of the County of Schenectady, to the town of Cobbleskill, Schoharie Co.

Under favorable circumstances it is thought the entire line from Albany to Binghamton, can be completed in eighteen months.

Railroad Fares.

We were sorry to see our tables giving the results of the operations of the New York City Passenger Railroads for 1864, and the past ten years, which we had prepared with much labor, so unceremoniously appropriated by the *Tribune* in its issue of Monday last, while the conclusions which those tables forced upon us were not adopted. The *Tribune* is decidedly opposed to any increase of fares, because these roads enjoy "valuable franchises which they obtained on certain conditions, one of which was the restriction of the fares to five cents. This restriction they now seek to escape, under the plea that five cents are considerably less now than they were when the bargain was made." And the *Tribune* admits the fact of the depreciation of the five cents "broadly and fully." We as broadly and fully admit the fact that these companies, when the franchises were granted, did agree to carry passengers for five cents; but we *do not admit* that they agreed to carry passengers for five cents in paper currency not worth over 40 to 50 cents on a dollar. What they agreed to receive was in specie or its equivalent. What they get now is neither one nor the other. There is some plausibility in the argument that some of them being "corruptly chartered,their stock watered," etc., they should now compensate the public for the dividends heretofore paid on a valuation represented by thrice the actual cost of construction and equipment. Putting aside the fact that this would only apply to a small portion of the roads now in operation, it is a sufficient answer to this argument to say, as between the parties to that agreement, that the public *agreed* to pay five cents; and whether this rate would pay on half the actual cost of the roads, or on thrice the cost, was a risk the companies assumed. The franchises proved to be valuable, and the stock sold at its value. To argue now that because the owners of this property five or ten years ago received large dividends, the present owners should operate the roads at a loss, is a sort of logic that we do not understand, But it is not a fact that all of them have paid these enormous dividends. The Second Avenue road has barely paid its expenses for years. The Sixth Avenue has not paid more than fairly upon a fair cost for a number of years, while the past year it has actually been operated at a loss. The Ninth Avenue has never but little more than paid expenses. In 1863–'64 it has been run at a loss of nearly $20,000. The Third and Eighth Avenue roads have been profitable; but even with *their* profits to make up the deficiencies of the others, the whole aggregate profits of all the roads will only show an amount equal to about three per cent. on their represented cost, and this too in currency. Reduce this to a specie standard, and it amounts to about one and a quarter per cent. Even admitting that the cost has been watered, as the *Tribune* says, to thrice the actual amount, which is not the fact, the profit then would be less than four per cent. The *Tribune's* argument is rather an appeal to popular prejudice, than a plea for fair dealing. The railroad companies would now no doubt be content with the agreement, viz: five cents per passenger, but the public do not carry out their side of the contract when they insist upon being carried for what is worth but little more than two. In asking seven cents, the companies get about three-fifths the amount they formerly received; and when the *Tribune* insists that what is called five cents now is *the* five cents *agreed* upon, and endeavors to hold the companies to their bond upon such a technicality as this, we must differ from it in toto. It would be quite as reasonable to insist that the *Tribune* should be sold for two cents in paper now, because it sold for two cents in specie three years ago.

All these considerations apply as well to the case of the New York Central Railroad. Its franchise, like the city roads was given with certain conditions attached. They were to carry passengers for two cents per mile. No one will pretend for a moment that they agreed to take a piece of paper worth less than one for this service simply because it had the words "two cents" printed on it. And in now asking an increase to two and a half cents, they are simply asking that they may get actually about one-half the amount that the Legislature agreed they should receive. We might furnish tabular statements of its receipts and expenditures for a series of years to show the justice of this increase, but we do not care to spend our time in compiling tables to be appropriated without credit next day to the *Tribune's* money article.

Michigan Southern and Northern Indiana Railroad.

This company has declared a dividend of 3½ per cent. on the common stock, free of government tax, payable on the first day of March. The transfer books will be closed on the 14th of February. Also a dividend of 5 per cent., less the Government tax, on the guaranteed stock, payable on the first day of February. The transfer books for the guaranteed stock will be closed on the 17th inst. In connection with the declaration of these dividends, the managers have issued the following notice:

In order to reconcile conflicting interests in dispute growing out of a claim made by a portion of the guaranteed stockholders for back dividends, this company has consented as a compromise to accept of a proposition made by parties owning and representing a large majority of the guaranteed stock, and by parties who have heretofore brought suits for back dividends against this company, which suits are now on this settlement withdrawn. This company deems it but just to offer the same terms of settlement to the remaining stockholders as have been accorded to the majority above named, viz:

In addition to the 5 per cent. cash dividend payable on the first day of February next, this company is ready to issue to the guaranteed stockholders, common stock at par to the extent of 80 per cent. of the guaranteed stock held by them, in full payment of all claims for dividends and interest accruing prior to 1st of February, 1863, indorsing such payment upon the face of the guaranteed stock certificates. All common stock so issued prior to the closing of the common stock books on the 14th of February prox., will be entitled to the 2½ per cent. dividend on common stock, payable 1st March, 1868.

The guaranteed stock outstanding at the date of the last annual report was $2,588,600. This, we learn, has been reduced to $2,100,000; of which $1,500,000 will accept the compromise. No suits are now pending on account of these arrears of dividends, and the whole question has been practically closed.

Illinois Central Railroad.

The sales of lands by this company in 1864 were 264,422.05 acres for $2,898,980 19. The net cash collections on this account were $2,451,911 37. Applied as follows, viz: to purchase $2,300,000 of Construction bonds, $1,440,090; credit Interest funds $1,011,820 81—total $2,451,911 37. The interest on the funded debt during 1864 was $1,-000,027 50. This charge will be reduced in 1865 $164,360, being the interest at 7 per cent. on $1,-667,000 bonds paid in 1864, and $681,000 of the $3,000,000 bonds called in for payment, but still outstanding, though the interest ceased on the 13th of October last. The demand for the Lands of the Company continue on a large scale, and the Company have been readily enabled to raise their first cash installment on new sales to 20@25 per cent.

☞ We again call the attention of our readers to the advertisement of the "New York, Philadelphia and Baltimore Petroleum and Mining Company."

The extraordinary advantages offered capitalists by this new branch of industry are naturally causing great interest, and we believe investors will do well to consider the inducements offered them by this very respectable and powerful company.

☞ Our readers will notice, on the 2d advertising page, the advertisement of Messrs. Sampsons & Baldwin, Iron merchants. This is a well known house in the trade, formerly in Broad street, now removed to No. 16 Cliff street, with warehouse and offices reaching through to 241 Pearl street. Complete assortments of the best kinds of iron, may be found at their establishment, where they also act as agents for the Ticonderoga Iron Company. Magnetic iron ores and Charcoal blooms for sale, delivered on Lake Champlain. These ores are in high repute.

☞ The Union Trust Company have taken a Banking Office at No. 73 Broadway, next below Trinity Church, and with a capital of $1,000,000, will accept the usual trusts and deposits committed to concerns like the old New York Life and Trust and United States Trust Companies. Mr. Isaac H. Frothingham, is President, Hon. John V. L. Pruyn, Vice President, and W. T. Aldrich, Secretary. The Trustees are Merchants and Bankers of the highest character in the city and in the interior of the State.

☞ Proposals will be received until February 1, 1865, by the New York and Middle Coal Field Railroad and Coal Company, at the office of the Resident Engineer, in Orwigsburg, Schuylkill County, Penn., or at the Office of the Company in Philadelphia, to construct the remainder of the earthwork and masonry of the Eastern Division of their Railroad, extending from Schuylkill Haven to the mouth of Lizard Creek in the Lehigh Valley, and also to construct the Western Division of their road, extending from Schuylkill Haven into the Middle Coal Field together with the Branches, to accommodate the trade of the various coal districts. Proposals will also be considered for the necessary hoisting Machinery for a system of inclined Planes to be used in connection with their Railroad.

Interest and Dividends.

The Erie Railway Company have declared a dividend of 3½ per cent. on the preferred stock and 4 per cent. on the common stock. These dividends will be paid at the Treasurer's office on the 1st February, less the Government tax.

The Cleveland and Pittsburgh Company have declared a dividend of 5 per cent., payable February 1.

The Mount Carbon Railroad have declared a dividend of 3 per cent., payable on demand, clear of all taxes.

The Little Schuylkill Navigation Navigation, Railroad and Coal Company have declared a semi-annual dividend of three per cent., clear of all taxes, payable on the 23d instant.

The East Mahanoy Railroad Company have declared a semi-annual dividend of three per cent., clear of State tax, payable on the 10th instant.

The Huntingdon and Broad Top Mountain Railroad Company have declared a semi-annual dividend of 3½ per cent. on its preferred stock, payable on the 17th instant.

The Lehigh and Luzerne Railroad Company has declared a semi-annual dividend of six per cent., payable on the 18th inst.

The West Branch Canal have declared a dividend of five per cent. in cash, and a dividend of ten per cent. in stock.

The Chestnut and Walnut Street Passenger Railway Company have declared a dividend of $1 50 per share, subject to National and State taxes, payable on the 12th instant.

The Spruce and Pine Street Railway Company have declared a semi-annual dividend of one dollar and a quarter per share, less the tax, payable on the 18th instant.

The Second and Third Street Passenger Railway Company, have declared a dividend of five per cent., clear of taxes, payable on demand.

The Tioga Iron Company have declared a dividend of five per cent., payable on the 16th inst.

The Minehill and Schuylkill Haven Railroad Company have declared a semi-annual dividend of four per cent.. equal to two dollars per share, payable on the 20th instant, clear of all taxes.

Population of China.

The following statistics relating to the internal condition of China proper are taken from the statistical chart of a new work, by Mr. R. Montgomery Martin, late her Majesty's treasurer for the colonial, consular and diplomatic services in China, and member of the Legislative Council at Hong Kong, entitled "China, Political, Commercial and Social." In China proper it appears there are 367,632,907 inhabitants, and in the dependencies of Mantchooria, Mongolia, Turkistan, Thibet, &c., about 40,000,000, making a total of 400,500,000 of people under one Government. The population on each square mile is 283, and the area in square miles is 1,297,999. The quantity of land is estimated at 830,829,100 English acres, of which 141,119,743 is under cultivation. The land tax realizes 27,854,023 taels of silver; the salt revenues 4,618,834 taels and other duties 991,092 taels. The total fixed revenue of the province is 35,016,023 taels, of which sum 22,445,573 taels, and 3,423,955 shih of rice (a shih being about 160 pounds avoirdupois,) are transmitted to the imperial treasury, while 5,569,829 taels remain in the provinces. The standing army and militia number 1,232,000 men. The table from which the above statistics are taken is prepared from various authorities, the greater portion having been furnished in China and translated from the official records.

Albany and West Stockbridge Railroad Sinking Fund.

The report of the Trustees of this Fund, for the year ending Nov. 30, 1864, is as follows:

		Dr.
Bonds and mortgages on hand per last report		$436,865 74
Bonds and mortgages paid since last report		75,465 08
		$361,400 66
Bonds and mortgages loaned since last report		29,800 00
		$391,200 66
Albany city bonds (cancelled) per last report		$63,000 00
Albany city bonds (water loan)		77,000 00
Albany city bonds (coupon)		68,000 00
N. Y. Central Railroad bonds		5,000 00
Albany co. bonds pr. last rep't.	$15,000	
Albany co. bonds purchased since last report	216,000	
		$231,000 00
Cash deposited in Bank		87,017 61
		$872,218 27
		Cr.
Contributions from Western Railroad as per last report		$313,111 14
Interest on investments, per last report	$505,825 63	
Interest on investments since last report	58,335 78	
	$564,161 41	
Less amount paid agent's salary, exps., premium on investments, &c	5,054 24	
		$559,107 17
		$872,218 26
Interest due, not paid	$3,989 09	
Interest accrued, not due	10,877 47	
		$14,866 56

THOMAS W. OLCOTT, JOSEPH C. Y. PAIGE, } Trustees.

☞ The Carleton *Sentinel* states that the location of the Wolhaupter route for the branch railroad is finished. The distance is eight and three quarters from the St. Andrews' road at M'Kenzie's Corner. The work is comparatively light; the steepest grade will be 60 feet per mile, the same as in the De'Beck line, while the terminus of the former will be 300 feet nearer the Houlton road than the latter.

Pittsburg City Railroad Indebtedness.

The Annual Report of the City Solicitor which was presented at a meeting of Council on the 4th inst., is a complete review of the progress made during the year in compromising our railroad indebtedness. From it we learn that, in May, 1864, the suits on coupons had swelled to the number of ninety-nine, and the aggregate amount of judgments, interest and cost, reached $525,000. On the first of January, 1864, the Controller, John McCargo, Esq., had lifted four hundred and forty-eight of the old bonds, and since then he has canceled nine hundred and twenty-six—making a total of thirteen hundred and seventy-four. He has also negotiated the compromise of about one hundred and fifty more, leaving less than three hundred of the old bonds still outstanding. Nearly all the judgments have been compromised on the same terms with the bonds.—*Pittsburg Chronicle.*

Carriers by Railway.—Special Contract for Conveyance of Live Stock.—Reasonableness of Condition.

In the recent case of Gregory *vs.* The West Midland Railway Company, the complaint stated in the first Court, that the defendants were the owners and proprietors of the West Midland Railway, and of certain trucks and carriages used by them to carry cattle thereon for hire and reward, and the plaintiff delivered to the defendants, at their request, a cow, to be by them safely and securely carried in the said trucks, from Abergarenny to Newport for reasonable reward in that behalf, and it became the duty of the defendants to use due and proper care and skill in and about the carriage of the cow on the said journey, and in and about the management of the said trucks, yet the defendants so carelessly and unskilfully conducted themselves in and about the carriage of the cow, and the management of the trucks, that by reason thereof the cow was greatly injured and deteriorated in value during the said journey.

Second Court—that the plaintiff employed the defendants, at their request, and for hire and reward, &c., to provide for the plaintiff a certain truck or carriage as aforesaid, to be used on the said railway for the conveyance of a cow of the plaintiff, from Abergarenny to Newport, by the defendants, and safely and securely to carry the cow thereon from Abergarenny to Newport, and the defendants provided the said truck and received the cow to be carried as aforesaid; and in consideration of the said employment promised and undertook that the truck or carriage provided by them should, at the time of their providing the same, be reasonably fit and proper for the conveyance of the cow on the said railway, and that they would safely and securely carry the cow on the said truck from Abergarenny to Newport; yet the plaintiff avers that, although all things were done, &c., by him, the said truck so provided by the defendants, and in which the cow was carried, was not at the time of the defendants' providing the same, reasonably fit or proper for the conveyance of the cow on the said railway, and the defendants did not safely or securely carry the cow in the said truck from Abergarenny to Newport, whereby the cow, whilst on the journey was greatly injured, &c.

The answer denied first, the first count; second to the same, that the plaintiff did not deliver the cow to the defendants on the terms alleged; third, to the same, that the cow was delivered to, and was received by the defendants, to be carried from Abergarenny to Newport, under a special contract, to wit., between the plaintiff and the defendants, then signed by the person who delivered the cow to the defendants for carriage as aforesaid, whereby the said receipt and carriage thereof were made and were subject to certain just and reasonable conditions, referred to by and embodied in the said contract, that is to say, &c., (setting out the first, third and fourth conditions;) and all conditions were performed and fulfilled, and everything happened to entitle the defendants to the benefit and protection of the said special agreement and conditions; and the defendants say, that the injury to, and deterioration in value of the said cow, and the supposed causes of action in the first count mentioned, were not occasioned, nor did the same happen or arise by the neglect or default of the defendants or their servants;

fourth, to the second count, that the defendants did not promise as alleged; fifth, to the same, that the plaintiff did not employ the defendants to provide the said truck or to carry the cow therein, nor did the defendants provide the said truck, or receive the cow for the purposes and on the terms alleged; sixth, to so much of the breach in the second count as alleged, that the said truck was not at the time of the defendants providing the same, reasonably fit or proper for the conveyance and carriage of the cow, that the said truck was at the time reasonably fit, &c.; seventh, to the second count, similar to the third allegation of the answer.

Issue was joined on these pleadings.

At the trial, before Byles, J., at the Monmouthshire Summer Assizes, 1863, it appeared that the plaintiff, on the 16th of March, 1863, sent a cow and a heifer to the station of the defendants' railway at Abergarenny, to be forwarded to Newport. He paid 4*s.* 8*d.*, for the carriage and signed a cattle ticket specifying the rate of charge, and containing the following words: "I hereby agree to the conditions of carriage on the back hereof." They were as follows:

"The Newport, Abergarenny and Hereford Railroad Company give public notice that they undertake the conveyance of horses in wagons, oxen, cows, sheep, calves or pigs, upon the terms and conditions hereafter stated, and by such only will they be bound; first, they are to be free from all risk or responsibility with respect to *any loss or damage* arising in the loading or unloading, from suffocation or from being trampled upon, bruised, or otherwise injured *in the transit*, from fire, *or from any other cause whatsoever*, it being hereby agreed that the same is to be carried *at the owner's risk;* second, that they are not to be held responsible for carriage or delivery within any certain or definite time, or in time for any particular market; third, that, as the charge for conveyance is for the use of the wagon and locomotive power, *the owner* or his representative, *is requested to see to the efficiency of such wagon before he allows his stock to be placed therein*, and *complaint* must be made *in writing* to the station inspector or clerk in charge, as to *all alleged defects*, either at the time of booking or *before* the wagon leaves the station; fourth, the owner or his drover shall ride free in the wagon in which his stock is loaded, and shall have the care thereof, but as no fare is charged, it is agreed that such owner or driver shall so ride entirely at his own risk. This ticket to be delivered up at the place of destination, in default of which the stock herein named will be detained, and remain at the owner's risk and expense."

The defendants' servants put the cow and heifer, without halters, into a sheep or calf truck with low rails, and during the journey the cow fell or jumped out of the truck, and was greatly injured.

The person on whose land she fell had a claim against the company, and killed her, keeping the carcase for his own use. The plaintiff on paying for the carriage and signing the ticket at the Abergarenny station, was told that the animals had been placed in a truck ready to start, but he did not see either them or the truck.

A verdict was entered for the plaintiff for 80*l.*, if he should be entitled to recover, notwithstanding the conditions; to be reduced to 15*l.*, if he should be entitled to the carcase of the cow only; leave being reserved to the defendants to move, and it being admitted that the truck was not a proper truck for the purpose.

In Michaelmas Term, the defendants' counsel, accordingly obtained a rule to set aside the verdict and enter it for the defendants, on the ground that the plaintiff was bound by the special contract; or to reduce the damages to 15*l.*

The plaintiff's counsel showed cause.

MARTIN, B.—I have a very strong opinion that the view I took of this act—which is contained in my judgment in the House of Lords—is the correct one, but I yield to the House of Lords and act upon their judgment; and looking upon this case and that of M'Manus *vs.* The Yorkshire and Lancaster Railway, together, it seems I am bound to give judgment against the railway company, and that the case exactly falls within the view taken by the majority of the Court of error in M'Manus's case.

Now, the first question is, what is the real meaning of these conditions? The railway company "give public notice;" therefore I apprehend they are conditions strictly within the first proviso in the act. It is impossible as it seems to me for words to be framed more clearly than those in the first condition. The company declare that as far as they are concerned they will not be bound for any sort of loss or damage occurring from the commencement of the loading to the end of the journey. But then, notwithstanding this, there was a question raised with respect to their obligation to provide a suitable wagon; and it strikes me the real meaning of the third condition is "in addition to any damage arising from the loading, we state we will not be liable for any misfortune arising from any defect in the wagon or locomotive power," and they put it upon the owner to examine the wagon. Putting the first and third conditions together, it seems to me they were framed with the intention of expressing, in the strongest words the English language enables them to use, their determination not to be liable for any loss to cattle whatever, and they give us the reason for that; "we make no charge for it; our charge is simply for the use of the wagon and the locomotive power." I cannot conceive how words can be used more strongly, clearly and explicitly to communicate a determination, (so far as their determination is of any avail.) Looking at the remarks of the majority of the Court of error in M'Manus's case, as to the condition there being reasonable, I am unable to distinguish it from the point in controversy here about the wagon; and it does not seem to me that the owner is called upon to look after the wagon himself. Taking the conditions, as I am bound to do, they do provide for the company's non-responsibility throughout, which M'Manus's case has said is an unreasonable thing for them to do, and the condition creating it is therefore void. Whether it is a satisfactory footing upon which the law should stand is another matter. It is in point of fact—instead of leaving people to take care of themselves—attempting to take care of them by a legislative enactment. We are bound to give effect to what the Legislature has enacted, and in my judgment this case depends entirely on the case of M'Manus, from which we cannot depart.

POLLOCK, C. B., BRAMWELL and CHANNELL, B. B., concurred. Rule discharged.

Boston and Worcester Railroad.

For the year ending November 30, 1864, the receipts of this road from transportation were $1,409,685 45; rents $18,057 99; mails $12,139 95; interest $28,386 69; other sources $2,715. Total $1,470,985 08. The expenses were as follows: Fuel $133,941 23; general expenses $42,376 25; passenger department $101,957 72; freight department $164,289 05; new iron, sleepers and other road repairs $151,747 79; repairs of buildings $29,111 95; new buildings $19,121 81; bridge repairs $11,162 61; passenger car repairs $23,921 38; new passengers cars $34,000; freight car repairs $11,696 30; other cars do. $19 99; engine repairs $55,754 38; new engines $31,914 35; oil $13,360 03; waste $4,075 43; wages of switchmen, flagmen, &c. $18,574 09; losses and damage $9,727 95; Agricultural Railroad as rent $15,534 09; tax and insurance (including State tax of $64,045 56) $81,955 30; United State tax and stamps $30,278 72. Total expenses $984,520 45. Two dividends were paid amounting to $450,000. The government tax of $23,684 20 added to this makes $473,684 20 as the total income of the road. A balance remains of $12,780 48, which is added to the reserve fund, which is now quite large. The road is in excellent condition.

Boston and Lowell R. R.

The gross income of this road for the year ending November 30, 1864, was $636,881 25, and the expenditures $475,034 92—leaving a balance of $161,846 33. The net income from traffic of the road has been $179,570 08. The increase of gross income has been $148,406 22, of expenses, $119,475 73, and of net income, $28,930 49. The fuel has cost $63,605 28: repairs on the road $65,820 31; equipment $85,728 80. The company has paid in taxes and insurance, $26,292 82, and in interest $27,148 75. The sinking fund for the reduction of bonds amounts to $187,647. Two dividends, one of three, and one of three and a half per cent., including the United States tax, have been paid, amounting to $113,195 88. The surplus on hand is $415,499 75.

This company, together with the Nashua and Lowell company, have purchased of the several manufacturing companies at Lowell their wharf and estate in Boston, known as the Mill Pond estate, for $300,000, for the enlargement of the freight depot in that city.

Eastern Railroad.

The total income of this company for the year ending Nov. 30, 1864, was $1,063,741 16. The cost of working the road was $579,765 77. The interest paid during the year amounted to $95,608 43, and the United States tax $28,552 54. The net earnings, after deducting all expenses, including tax and interest, were, $364,814 42. Two dividends of 3 per cent. each, have been paid to the stockholders, amounting to $220,626, and a surplus is left of $144,188 42. The total surplus on hand is $303,885 85. The number of passengers carried in the cars during the year was 1,920,767.

Central Pacific Railroad.

SAN FRANCISCO, Monday, Jan. 9, 1864.

The Central Pacific Railroad Company advertise for 5,000 men to work on the grade of the road over the Sierra Nevada Mountains. They expect to have fifty-two miles in running order in August.

Boston, Hartford and Erie R. R.

A meeting of the stockholders of this company was recently held in Boston for the purpose of choosing directors, and for the transaction of other business relating to the recent consolidation with the New York and Boston (Air Line) road. After the adoption of by-laws, a ballot was made for directors, and the following were elected by a large majority:

Geo. M. Bartholomew of Hartford, Ct.; Benjamin E. Bates, Jas. M. Beebe, Jas. L. Little, Joseph L. Little, Jos. W. Clark of Boston; Earl P. Mason, Wm. S. Slater of Providence, R. I.; Le Grand Lockwood of Norwalk, Ct.; Sabin L. Sayles, of Killingly, Thos. Belknap of Hartford, Jas. Low of New York, Oakes Ames of North Easton, H. H. Boody, Henry J. Gardner, Edward Learned of New York.

Fitchburg Railroad.

The gross earnings of this road for the year ending Nov. 30th, were $868,351 88, and the total expenses $559,010 53; leaving a net income of $309,341 35. After paying two dividends of four per cent. each, free from the government tax, and all the expenses of the road for the year, a surplus of the profits remains amounting to $11,236 09, which is added to the reserve funds of the company.

Dubuque and Sioux City Railroad.

We are happy to announce to the people of this city, that premonitory symptoms of the Dubuque and Sioux City Railroad presented themselves in town on Saturday last, *in forma* of a corps of engineers who had just run a line through *via* Onawa. If any evidence had been wanting of the truth of our assertion, that the Dubuque and Sioux City road would consolidate with the Cedar Rapids and Missouri river road, and that but one line would be run through from the place of the junction, we have now the most conclusive proof of what we have so often alleged in the fact of the survey of the route on the line where we charged it would be.—*Sioux City Register Dec. 3.*

☞ The following is a statement of the movement of specie at New York during the month of December:

Specie in Banks and Sub-Treas. Dec. 1	$28,961,268
Received from California in Dec.	2,205,619
Imported from foreign ports in Dec.	114,976
Gathered in from hoards in Dec.	4,876,964
Supply	$36,158,827
Exported in December	6,104,377
Leaves in Banks & Sub-Treasury Jan. 1, 1865	$30,054,450

☞ The Petroleum Tables in the New York *Shipping List* show the following exports for the year 1864:

	Gallons.
From New York	21,288,499
From Philadelphia	7,760,148
From Portland	70,762
From Boston	1,696,307
From Baltimore	929,971
Total	31,745,687
Exports in 1863	28,200,721
Exports in 1862	10,887,701

☞ The shareholders of the projected railroad between Lebanon and Pinegrove, held a meeting last week in Philadelphia, and organized by the election of an efficient Board of Directors. The Reading Railroad Company has a corps of Engineers on the proposed route, and the location attained so far is an excellent and economical one. —*Lebanon Courier.*

Vermont and Massachusetts Railroad.

The gross earnings of this road for the year ending November 30, 1864, were $342,297; running expenses $191,244; surplus of net earnings, after deducting expenses, interest, taxes, &c., for the year, $101,247, which has been applied to the extinguishment of the debt. The actual net indebtedness of the corporation is now but $506,073, including all the bonds outstanding, and deducting therefrom the cash assets on hand. Besides these cash assets, they have on hand stock materials, fuel, waste railroad iron, costing and worth more than $50,000, which not being available for the payment of the debt, is not included among the assets. The rolling stock and equipments are in good order. The number of shares is 28,801, making the net earnings the past year $3 51 per share.

Railroads in Vermont.

Five new railroad charters have been granted in Vermont, namely: The Essex County Railroad, from St. Johnsbury to Island Pond; the Eastern Vermont Railroad, from Windsor to Bellows Falls on the Vermont side of the Connecticut river; the Ascutney Railroad, from Gassett's Station on the Rutland and Burlington Railroad, *via* Perkinsville to Windsor; the Fairfax Railroad, from Fairfax village to Georgia and Fairfax station at East Georgia, and the Rutland and Castleton Railroad, whose termini are indicated by the title.

Military Railroad in Arizona.

In the House of Representative, Washington, December 21st, Hon. G. D. Poston, by unanimous consent, offered the following resolution, which was read, considered, and agreed to:

Resolved, That the Committee on Public Lands be directed to inquire into the expediency of making a grant of public lands to aid in the construction of a military road from the head of navigation on the Colorado river to Great Salt Lake City, and from some point on the said river to Prescott, the capital of Arizona; and also as to the propriety of an appropriation of lands for the improvement of the navigation of Colorado river.

The Russo-Chinese Telegraph.

The *Russian Correspondence* states that a telegraphic despatch has reached St. Peterburg announcing that the telegraphic service is now organized as far as the frontiers of China. The line passes by Kasan, Jumene, Omsk and Irkoutsk, where it divides into two branches, one to Irbitt and the other to Chadrinsk. The total length of the line is 5,438 verstes (five-eights of a mile each). The works have all been completed in three years.

The Siberian line is to be prolonged on the sides of China and America.

☞ The bill for the consolidation of the Hudson River and New York and Harlem railroads was introduced in the Legislature at Albany, on the 11th inst. Its chief provisions are:

First. That the roads shall be consolidated, and the terms of consolidation fixed by the boards of direction of the two comprnies, and ratified by them, and not by the stockholders.

Secondly. It is provided that in case any stockholder of either of the two roads shall refuse to accept of the consolidated stock, the board of direction shall have power to appoint appraisers to fix the value of the old stock belonging to the recusant stockholder, and the award of such appraisers shall be final.

Western (Mass.) Railroad.

The gross receipts of the Western Railroad for the year ending November 30, 1864, were $2,994,378; increase of receipts over 1863 $559,286; increase of expenses in 1864 over 1863 $611,000; of that amount about $200,000 has been paid for State and National taxes, which does not include the Government tax on materials for repairs, such as re-rolling of iron, spikes, wheels, frogs &c., which amounts to a larger sum.

Mexican Pacific Railroad.

Great preparations are being made in Mexico for the construction of a railway from Vera Cruz to some port on the Pacific coast. The task of making it has been committed to M. Escadon, by an Imperial decree. He receives a bonus of $8,000,000, and it is said though it appears doubtful, that he is to have the right forever of fixing the rates at which goods and passengers shall be carried.

Russia in India.

A Constantinople correspondent of the London Telegraph, under date of November 30th, says: "It is a fact of the utmost importance, and should be made known, that Russia has now for some time had telegraphic communication with India. A Russian line passes direct to Teheran, and from thence there is a line communicating with the Persian Gulf submarine cable. Of course it would be impracticable to make use of this means of sending messages for our governmental service; but for commercial purposes it might, to a certain extent be employed. Whether this be so or not, the circumstance of Russia having this line at her command is suggestive of serious consideration, and cannot fail to attract attention."

☞ An ordinance has passed both branches of the Baltimore City Council authorizing and directing the Register of the city to borrow on the credit of city for six months at a rate of interest not exceeding six per cent. per annum, a sum or sums of money in all not exceeding forty-five thousand dollars, and out of the money so borrowed, to pay the interest due on the first day of January, 1865, on the bonds or certificates of loan of the Northwestern Virginia Railroad Company, guaranteed by the Mayor and City Council of Baltimore.

The amount so loaned is to be paid out of the internal improvement tax for 1865, and the amount of interest paid by the Register charged to the internal improvement tax account.

☞ The Metropolitan or underground railway of London is enjoying substantial evidence of success. One week in December there were carried over the road 273,669 passengers, the receipts being £2,703. This is the largest weekly receipt since the opening. This is equal to £720 per mile for the week, or at the rate of £37,000 per mile per annum, and is very largely in excess of the receipt per mile on any other railway in the kingdom.

☞ It is said that the Dubuque and Sioux City Railroad Company intend to proceed immediately to build the road for some distance westward, and, should the winter prove open, the road will be completed into the coal fields of Hardin county before next spring. The track on the Northern Road is now down to within about three miles of Waverly. It is expected that the work will be completed to the depot at that place.—*Cedar Falls Gazette.*

Worcester and Nashua Railroad.

The earnings of this road for the year ending November 30, 1864, were $338,285 06—an increase of $87,261 03 over the previous year. The company have an undivided surplus of $112,750 66.

Old Colony and Fall River Railroad.

The earnings of this road for the year ending November 30, 1864, were $964,029 88. Expenses, etc., $596,638 39. Net earnings, $371,391 49. Total dividends for the year 8 per cent.

☞ We learn from the Message of the Governor of Maine that the whole debt of the State as represented by loans is $5,337,000, of which debt $2,965,000 has been created the past year. To provide for the liquidation of this debt the Governor suggests the establishment of a sinking fund by setting apart a fixed sum annually. The loss of revenue to Maine by existing State Banks surrendering their charters by quitting the field or transforming themselves into National Banks will not be less than $80,000 per annum.

☞ The work of double tracking the Erie Railway from Corning west to Salamanca, is now being pushed, and workmen are engaged at different points along the road.

☞ The Commissioner of Internal Revenue has decided that coupons on railway bonds should be returned as income for the year in which they mature.

This Company is organized under the laws of the State of New York. The principal office is No. 71 Broadway, with branch offices in Philadelphia and Baltimore, for the convenience of subscribers, where the certificates of stock will be issued to subscribers without delay. The property, embracing upwards of six hundred and thirty-five acres, has been selected with great care during the last three years by those of the directors who have been constantly operating on Oil Creek, and throughout the entire oil region of Pennsylvania, as well as Western Virginia, and was not selected to sell, but for the purpose of development and producing oil, having now some ten wells under contract, and being bored with vigor, besides those already completed and producing oil, making in all 13 wells now on the property. Every acre of this Company's property is bottom, and the best of boring land, much of it on Oil Creek, Cherry Run, Cherry Tree Creek, Walnut Bend, Alleghany River, and other streams where the lands are being developed with good success, and prospect of a very large product of oil.

The attention of all interested in Railroads is invited to our Steam Cars for city or other Railroads. Their economy, durability, and efficiency commend them to all who have them in use, or witnessed their operation. They are now being introduced on Street and Suburban Roads in and adjacent to the principal cities; also on Tributary Roads.

With minimum weight and expense they have maximum power and capacity, and are free from noise and smoke. They can ascend the steepest grades, and turn the shortest curves with facility.

We are also prepared to execute orders for all other descriptions of Cars. Circulars with detailed information will be furnished on application.

Important to Miners.

"The United States Disintegrating Ore Company," organized under the State Laws of New York, have purchased from the inventor a perfected process for the treatment of ores, whereby the most unmanageable argentiferous, auriferous and other ores are fully and completely desulphurized and oxydized. By this process the assay can be reached, or, as nearly so as is possible, certainly 95 per cent of it expeditiously and cheaply, and with far less original outlay than is possible by any other known process. Large quantities can be treated in a single apparatus, reaching without difficulty 50 tons per day of 24 hours. Letters Patent have been secured by the Company, amply protecting their rights, and active measures are being taken to introduce their valuable process to the notice of the Mining interests. Temporary office, No. 74 Broadway, Rooms 14 and 15.

Philadelphia and Reading Railroad.

The receipts from operations of this road for the fiscal year ending November 30, 1864, were:

From 342,252 passengers	$909,882
" freight on 807,106 tons mdze	953,776
" " 3,065,577 tons coal	7,203,775
" U. S. mail	28,497
" other sources	178,411
Gross receipts	$9,269,341
Gross expenses	4,961,191
Rec'pts over cost of work'g the road	$4,308,150

The following tabular statement in detail for each branch of traffic shows the comparative results of the year:

1863—Passengers.	Travel	Tons. 211,972	$566,520
	Merchandize	647,363	678,143
	Coal	3,065,261	4,897,200
	Mail		21,309
	Miscellaneous		94,730
	Gross receipts		$5,252,902
	Gross expenses		2,916,159
	Net profit		$2,336,743
	Gross expenses including renewal fund in the year 1863 were 46.64 of gross receipts.		
	" " in the year 1864 were 53.52 " "		

1864—Passengers.		Tons. 342,252	$909,882
	Merchandize	807,106	953,776
	Coal	3,065,577	7,203,775
	Mail		28,497
	Miscellaneous		178,411
	Gross receipts		$9,269,341
	Gross expenses		4,961,191
	Net profit		$4,308,150
	Gross expenses including renewal fund in the year 1864 were 53.52 of gross receipts.		

Increase. p. c.			60.6
	Increase		$342,362
			$3,016,499
			2,045,092
			$971,407
			29.1

The receipts and expenses per passenger and per ton, have been as follows:

	Cost. 1863.	Received. 1863.	Cost. 1864.	Received. 1864.
Per passenger	$0 91.3	$2 67.8	$1 18.7	$2 65.8
Merchandize per ton	0 50.3	1 08.2	0 63.0	1 18.2
Coal "	0 47.0	1 59.8	0 81.0	2 85.0

The gross receipts from passengers and merchandize in the year 1862 were.. $926,980
Year 1864 were 1,863,668

The result of the year's business as condensed from Transportation and Income Account, may be stated thus:

Receipts over cost of working the road		$4,308,150
From which deduct—		
Interest on bonded debt	$467,534	
Interest on bonds and mort..	34,620	
Cost of new cars and engines	1,080,838	
Cost of machines for workshops	12,603	
Cost of coal barges	97,818	
Cost of real estate	233,644	
Cost of new second track, sidings, telegraph, bridges, &c.	597,760	
Sinking funds, as directed by stockholders	273,420	
		2,916,837
		$1,391,313
Amount to credit reserve fund, 1864, per report of Nov. 30, 1863	2,171,259	
From which is deducted for sundry drawbacks on traffic for 1863, paid	$40,897	
and for State Tax on dividend for 1863	47,167	
and for so much of stock dividend declared Dec. 2, 1863, as was not provided for by Bonds purchased and cancelled	327,016	414,580 1,756,679
		$3,147,992
which has been appropriated as follows:		
15 per cent dividend declared Nov. 30, 1864, on Common and Preferred Stock, $17,454 82, at 15 per cent	2,618,129	
Less stock created in lieu of bonds cancelled	104,000	
	2,514,129	
U. S. Tax on above dividend 5 per cent	130,907	
State do	130,906	
		2,775,942
Balance of Reserved Fund		$372,050

The year just closed has been one of great prosperity to those engaged in mining and transporting Anthracite coal.

It has not been an object with the Managers to obtain an excessive share of the profits. They have thought that a liberal policy would stimulate production, and thus insure abundant supplies in the future. This branch of the business, however, has been less regular than in preceding years.

The necessary consequence of these fluctuations has been a great irregularity in the rate of production. It will be observed that the charges for transporting passengers and merchandise have been about the same as in the previous year.

This traffic has been increased more than fifty per cent. during the last year and has more than doubled within two years, showing great activity in the branches of business other than coal. The profits from these two sources are now in excess of the amount required for the payment of interest, and for the annual appropriations to the established sinking funds, and will leave, for the stockholders, the profit on the transportation of coal, the chief source of revenue. The large expenditures to accommodate the increasing business were not available until the latter months of the year.

In the spring and summer, the supply of coal cars particularly, was altogether inadequate to the demand and even in the latter months, was barely equal to it.

The Managers believe, however, that the capacity for transportation, although at times not equal to the wants of the producers of coal, has, on the average, met the requirements of consumers; this is shown by the fact that the season closed with inactive demand and receding prices.

With the addition of the locomotives now constructing and the facilities of the new sidings, recently completed, the coal tonnage, with a regular business, can be largely increased.

It is believed to be the duty of the Company, as well to the producer as to the consumer, to furnish ample transportation facilities for the full supply of an article so essentially necessary as coal; nor can it be doubted that this policy is, manifestly, for the interest of the Stockholders.

If it were wise, originally, to construct the railroad, the propriety of the expenditures, for the required rolling stock and necessary appurtenances, cannot be doubted.

The main workshops of the company at Reading, are now entirely inadequate for the enlarged equipment. It is, therefore, intended to erect new and commodious buildings, on property recently acquired. At the present time a large number of locomotives are necessarily without shelter and suffer greater injury, by exposure, that any saving which could be effected by delay in erecting new engine houses.

It has become evident that the present facilities for shipping coal, at Port Richmond, are not equal to any material increase of business; it has therefore been decided to improve a portion of the adjoining river front, so wisely secured, many years ago, by the erection of three large and commodious wharves, and to extend some of those now existing, to the new wharf line, adopted by the Port Wardens, which will greatly increase their capacity.

The stocks and bonds held by the Company have been increased $685,214 67.

These investments have been made, chiefly, for the purpose of extending the lateral roads, and their branches. The benefit of these expenditures cannot be fully realized during the year in which they have been made.

A portion of this investment has been in the purchase of the securities of various companies, the works of which are leased to this Company. Such purchase is only made when it can be done on advantageous terms, thus diminishing the annual rent, and to that extent, equivalent to a reduction of liabilities.

Throughout the entire year the bonds of the Company have commanded a premium; the purchases for the Sinking Fund have been, therefore, only $104,000 00.

The Sinking Funds, required by the terms of the various mortgages, amounted, last year, to $118,609 00. In some cases it has been found impossible, except at great sacrifices, to obtain the particular class of bonds required by the mortgages; to meet these requirements, the temporary investment of $400,000 00, in government securities, has been continued.

The appropriations to the sinking funds created by the stockholders, amounted last year to $273,420 00.

The bonded debt has been reduced, since the last report, by purchase, $104,000 00, and by conversion, $2,259,000 00, thus leaving it November 30th, $6,675,300 00.

In the last Report, reference was made to the claim to convert into stock the bonds issued in 1844, with the right originally, of conversion, and which were extended, at their maturity in 1860 or 1880. The highest judicial tribunal of the Commonwealth sustained the view of the Managers, that the privilege of conversion had expired.

The amount of convertible bonds, outstanding, is $624,500,000, which are due in 1886.

The negotiation for the lease of the Mine Hill and Schuylkill Haven Railroad and the arrangement with the Schuylkill Navigation Company, have been closed, on the terms stated in last Report.

The wharf at New Castle was finished in December last, and is now ready for the shipment of coal.

The entire line of the Junction Railroad is now in daily use, with the exception of the tunnel under Market street, West Philadelphia, and this is in progress of completion.

The profits of the year having been appropriated as has been stated, the managers, on the 30th of November, declared a dividend of fifteen per cent. payable in stock, on the 31st of December. This course was adopted as, by delay, the holders of the convertible bonds could have collected the coupons, due on the 1st inst., then converted the bonds into stock and also have participated in the dividend. By the means thus pursued, no justice was done to the bondholder.

The Managers deem it proper to state their reasons for not making a larger distribution of stock, to represent the value of the new property acquired.

It has cost unusual prices and it may well be questioned whether it should have a permanent representation in the capital stock, at the high rates paid for it. Other reasons have also influenced them. Many years ago, during the construction of the road and subsequently, in extending the bonded debt, large sacrifices were necessarily made to obtain the required funds, and these losses were charged to the cost of the works or capital account. The property acquired, during the last few years, in excess of the stock divided, reimburses, to a considerable extent, the losses thus incurred.

By order of the Board of Managers.

CHARLES E. SMITH, President.

Northern Illinois Railroad.

We have received a copy of the Third Annual Report of this company, embracing the construction and operating of the road for the year ending September 30, 1864:

The proportion of revenue credited in account with the Racine and Mississippi Railroad amounts to	$77,616 83
The expenses of maintenance of road charges connected with operating, amount to	17,909 55
Leaving Nett	$59,707 28
From which have been paid:	
Coupons on 1st mort. bonds	$39,302 80
Interest " "	1,414 39
Taxes " "	3,359 13
	44,076 32
Making amount credited Revenue, Interest and Dividend for the year	$15,630 96

The extension of the road down the Mississippi, under the powers obtained through the charter of the Warsaw, Rock Island and Galena Railroad Company, has been prosecuted energetically, and as much work has been accomplished as could be done without involving extraordinary expenditures, which it would be imprudent to incur in the present times of extreme prices of labor and materials. The track is laid to the first station, "York," ten miles below Savanna, and that portion of the line will be opened for business on or before the 1st of January. The grading to Fulton, seven miles further, is finished, with the exception of two bridges, and about a quarter of a mile into Fulton, where the work is very light. The bridges on the whole line to Port Byron, 27½ miles from York, are all under contract to be put up this winter, so that the grading can easily be accomplished to admit of the line being opened throughout before next winter. Contracts have been made for the ties necessary for the whole line.

On the completion of the line to Port Byron, thereby making a through route to Rock Island, all northern travel for the Iowa and Nebraska, Missouri and Mississippi Railroads will come by Savanna. The travel between the upper and lower Mississippi will also take that route. Savanna will become an important point, as the connection with the boats for the upper navigation. But, apart from the up river navigation, the route by Savanna will be the shortest for railroad travel to all points on the Mississippi; North, the Northern Illinois and Racine and Mississippi Railroads, making connection at Freeport with the Illinois Central for Dubuque, and at Clinton Junction with the Chicago and Northwestern for Prairie du Chien, La Crosse, St. Paul, Fond du Lac, Oshkosh and Green Bay, and affording an outlet on the lakes at Racine, and by connection with the Milwaukee Railroad at Milwaukee.

The connection at Port Byron, will afford a supply of coal for which the demand at all points North, will be more than it can be hoped to supply sufficiently for many years to come.

On the completion of the connection at Port Byron there is reason to expect there will be little time lost before the line from Rock Island to Warsaw, below the lower rapid of the Mississippi is finished. At Warsaw, the Mississippi is, on an average, closed less than two months in the year, while from Port Byron to Warsaw, in late years, the rapids have been impassable the whole year, with the exception of a few weeks. On that portion of the river, the railroad bridge at Rock Island, and the bridge in course of construction at Fulton are also obstructions to navigation of no slight character. The Captains of steamboats, and others experienced in the navigation of the Mississippi, anticipate in the completion of the through line from Savanna to Warsaw, that the travel and trade of the river will be most advantageously conducted by transfer to the railroad, in connection with boats running to Warsaw for the lower navigation and Savanna for the upper navigation. In corroboration of these opinions, there could be nothing stronger than to refer to the fact that the boat built to run on the Ferry between Savanna and Sabula, drawing only 24 inches of water, has waited all summer without finding an opportunity to get over the rapids, and has been obliged to be laid up below the rapids for the winter. It is unnecessary to give statistics of the trade to be obtained, if these views are correct, as all who have any knowledge of the river business state that it will be difficult for a Railroad Company to supply the requisite rolling stock for a number of years.

The extending connections of the Northern Illinois Railroad suggest the propriety of constituting a company of more extended interests, and, in the coming year, there will probably be an opportunity of uniting with the Racine and Mississippi Railroad under a new organization which will consolidate under one corporation, the two lines, making the route of 180 miles from Racine to Port Byron.

President.—G. A. THOMSON.
Sup't of Construction.—R. W. SMITH.
Secretary & Treasurer.—W. V. BAKER.
Engineer.—NATHANIEL BAILLIE.
Directors.—Richard Irvin, Elijah Northey, Enoch Chamberlain, L. H. Bowen, H. A. Mills, Duncan Mackay, Edward P. Barton, William Shannon, G. A. Thomson, R. A. Knapp, S. C. Tuckerman, Henry T. Fuller, D. W. Dame.

Wealth and Resources of Delaware.

This little State is in many respects the twin of Rhode Island, of about the same size and a little less population. It is 92 miles in length and 22 in breadth, containing 2,120 square miles or 1,356,800 acres. It is divided into three Counties, New Castle, Kent and Sussex, and these are subdivided into 25 hundredths. The soil which contains abundance of marl is very fertile. The cereals, especially wheat flourish abundantly, and the flour known as that of the Brandywine Mills, is justly celebrated and highly esteemed in commerce. The State has quite an interesting history. It was settled by the Swedes in 1627; several nations of the old world at the time, endeavoring to establish colonies in the new. It was captured by the Dutch in 1655, and by the English in 1661. Its population in 1860 was 112,216 of which only 1,798 were slaves.

In 1790 the white population was 46,310, the free blacks 3,899, slaves 8,887. It is now determined by the people to abolish slavery altogether. The principal cities and towns are Wilmington with 21,508 inhabitants, New Castle 5,004, and Dover the capital, 4,498. The first named is a very thriving manufacturing and commercial place, carries on a prosperous trade, and is noted for its success in ship building, both in wood and iron.

Delaware contains 647,035 acres of improved land and 367,230 unimproved. The value of the farms is $1,426,357, and the implements of husbandry used in their cultivation $817,883. The valuation of the whole real and personal property of the State in 1860 was $46,242,181. The live stock consists of 16,562 horses, 2,294 asses and mules, 22,595 milch cows, 9,530 working oxen, 25,596 other cattle, 18,857 sheep and 47,848 swine.

The products of animals were as follows:

Butter 1,480,502 lbs., cheese 6,579 lbs., wool 50,201 lbs., wax and honey 68,130 lbs., and the value of slaughtered animals $573,015.

The cereal crops were of wheat 912,941 bushels, rye 27,209 bushels, Indian corn 3,892,337 bushels, oats 1,046,210 bushels, barley 3,646 bushels, buckwheat 16,355 bushels. The commercial crops were, tobacco 9599 lbs., hops 414 lbs., flax 8,112 lbs., molasses 761 gallons.

The miscellaneous crops are:

Peas and beans, bushels	7,438
Irish potatoes "	377,931
Sweet " "	142,213
Wine, gallons	683
Hay, tons	36,973
Clover seed, bushels	3,595
Grass seed "	1,165
Flax seed "	2,126
Sorghum molasses gallons	852
Sild cocoons lbs	9

The value of the products of the orchards was $114,225, and of market gardens $87,797.

The number of manufacturing establishments was 564 with a capital of $5,360,000, using raw material annually of the value of $5,375,000, employing 6,192 operatives of whom only 860 were females, and producing fabrics of the value of $9,920,000.

The value of the principal articles produced was as follow:

Flour and meal	$1,844,919
Cotton goods	919,108
Iron castings	640,000
" bar, rolled, &c	550,500
Lumber	261,172
Boots and shoes	226,470
Clothing	179,840
Woollen and mixed goods	156,635
Printing	105,332
Agricultural implements	90,581
Soap and candles	61,500
Furniture	50,052
Leather	37,240
Gas	33,175
Sewing machines	15,000
Jewelry, plated ware, &c	1,800

The total of imports and exports for 1860, was $82,427. The tonnage entered and cleared 3,299 tons, the shipping built 5,826 tons.

The number of banks in that year was 12 with a capital of $1,680,745.

The railways are five in number with an aggregate length of 182½ miles, of which 127 miles have been completed at a cost of $4,548,850.*

The Philadelphia, Wilmington and Baltimore is part of the direct route between New York and Washington.

The Chesapeake and Delaware Canal, is its largest and only work of the kind. It connects the Delaware and Chesapeake Bays, by a cut of about 12½ miles in length, 66 feet in width, and 10 feet in depth, thus facilitating an inland coasting trade of great importance and value. The celebrated coal of Cumberland is brought in large quantities through this Canal. The State had no debt in 1860.

Within the last four years, real estate has been changing hands, in consequence of the discovery of their great value as fruit producers. The cultivation of peaches is going on in a large way, and rapidly increasing. Farms suitable to this culture have been sold very cheaply, and have paid for themselves in a single crop. There is no other Country in the world where this fruit is so universally used and so cheaply supplied.

It is believed that the superiority of the product in Delaware, owing to the nature of its soil, the genial character of its climate, and its easy access by water to the cities of Philadelphia and New York, are likely to make it one of the richest of the small States, and the low prices of land are attracting a considerable immigration.

It is stated on good authority of recent date that the value of the products of three or four peach orchards in 1864, was more than that of all the fruit orchards as returned in the census of 1860. And as the art of preserving the fruit has been recently discovered, not only has the demand increased for the use of the table during the proper season, but for preservation and export.

The crop for 1860 is stated to have been equal to one million of baskets, on which there was an actual profit of 70 cents per bushel, making the enormous sum of $700,000.

* See Table of Railroads in the United States, p. 12, No. 1, Vol. XXXVIII.

Interest and Dividends.

The New Jersey Railroad and Transportation Company have declared a semi-annual dividend of five per cent., payable free of U. S. tax, Feb. 1.

The Cleveland, Columbus and Cincinnati Railroad company have declared a dividend of seven per cent., payable, free of U. S. tax, at the office of the United States Trust Company, Feb. 1.

The Delaware and Hudson Canal Co. have declared a semi-annual dividend of ten per cent., payable Feb. 1.

The Metropolitan Insurance Company, of New York, have declared a dividend of 6 per cent. on the outstanding certificates of profits to the holders thereof, payable on and after the 20th of Feb. next; also a dividend of 10 per cent. on the capital stock of the company, payable in cash on demand; also a dividend of 50 per cent. in scrip, on the net earned participating premiums of the company for the year 1864, for which certificates will be issued on and after the 20th day of March next.

The West Philadelphia Passenger Railway have declared a semi-annual dividend of five per cent., clear of tax, payable on the 20th inst.

The Locust Mountain Coal and Iron Company has declared a dividend of four per cent., clear of tax, payable on the 23d inst.

The Glenville Coal Company has declared a quarterly dividend of $1 50 per share.

Mortality of the City of New York.

The number of deaths in this city in 1864 was 25,645, against 25,196 in 1863—an increase of 449, viz:

	1864.	1863.
Males	13,662	13,266
Females	11,983	11,930
Men	5,959	8,665
Women	5,114	4,931
Adults	11,073	10,596
Children	14,572	14,600
Children, under 1 year	6,058	6,118
Ratio of deaths to 1,000 living in	28.7	——
Ratio of deaths to 1,000 living in	——	25.1

The increase of population is estimated at 80,000 in 1864 over 1863. The above calculation of the ratio of mortality is based upon an estimated population in 1863 of 1,000,000, which is a very low estimate, considering our immense floating population.

Finances of New York.—Comptroller's Report.

In the reports from the Comptroller's Office, submitted to the Legislature in January, 1863 and 1864, respectively, the receipts on account of the General Fund revenue for those fiscal years were:

	1863.	1864.
Estimated at	$8,227,000 57	$8,650,805 00
And the expenses for same years at	8,971,705 16	8,518,690 91
Deficiency September 30, 1863	$744,704 59	
Surplus September 30, 1864		$137,114 09

The actual receipts including balances and payments on account of the same fund were:

Receipts	$8,643,504 08	$7,787,536 56
Payments	9,836,291 85	8,651,351 23
Actual deficit	$1,192,787 77	$863,814 67

The receipts on account of the General Fund revenue for the fiscal year ending September 30, 1865, are estimated at the sum of $9,703,824 72
And the payments including deficiency at ..... 9,314'711 15

Estimated surplus September 30, 1865 ..... $389,113 57

The large falling off in the estimated receipts for 1864, arose from delay in collecting and forwarding to the Treasury the tax due from the City of New York. It has, however, been mostly received since the close of the fiscal year.

The entire debt of the State at the close of the fiscal years 1863 and 1864, compares as follows:

	1863.	1864.
Canal debt	$23,278,470 25	$22,441,770 25
General fund debt	6,505,654 37	6,278,954 37
Total	$29,784,124 62	$28,720,724 62

Notwithstanding the heavy payments made by the State for expenses incident to the war amounting to over fourteen millions of dollars, nothing has been added to the debt, and all the principal that has become due has been promptly paid. The policy of paying the debt as it becomes due continues to be pursued, and it is hoped that a few years more will find the State substantially free from incumbrance of any kind. Within the last four years its amount has been reduced to the extent of $4,892,251 23.

The following table contains the particulars of the canal debt in 1863–'64:

	1863.	1864.
Under Article 7, Section 1	$8,427,724 26	$7,591,024 26
" 7, " 3	11,940,000 00	11,940,000 00
" 7, " 10	642,585 99	642,585 99
" 7, " 12	2,258,000 00	2,258,000 00
Total	$23,268,310 25	$22,431,610 25

—the average interest on which is 5¾ per cent.

The following statements from the Canal Department show the receipts and payments on account of the canals during the fiscal years 1863–'64:

Receipts during the years named—

	1863.	1864.
From tolls	$5,028,431 32	$4,308,781 20
" rents of surplus waters	1,165 00	1,511 82
" interest on current revenues	58,016 50	30,002 19
" miscellaneous sources	30,888 53	5,970 31
Total receipts	$5,118,501 35	$4,346,065 52

Payments during same years—

To Commissioners for repairs	$149,347 09	$166,069 98
" Contractors for repairs	353,893 02	498,938 41
" Superintendents for repairs	156,038 63	234,115 71
" Collectors for salaries, clerk hire, pay of inspectors and office expenses	56,774 51	59,320 29
" Weigh Masters	9,164 07	9,256 88
For salaries chargeable to annual revenues, refunding tolls, printing and other miscellaneous payments	45,565 20	61,208 19
Total payments	$770,862 52	$1,028,909 46
"Surplus revenues"	$4,347,618 83	$3,317,356 06

Payments to sinking fund—

Under Article 7, Section 1	$1,700,000 00	$1,700,000 00
" 7, " 2	350,000 00	350,000 00
" 7, " 3	1,116,242 66	1,116,242 66
Total to sinking funds	$3,166,242 66	$3,166,242 66
Payments to the Treasury under Art. 7, Sec. 3, to defray the expenses of Government	200,000 00	151,113 40
	$3,366,242 66	$3,317,356 06
Remainder	$981,876 17	$.....

Especial attention is called to the continued decrease in the canal revenues, the large increase in the expenditures, and the probable necessity of a resort to further taxation to meet the constitutional requirements in regard to the sinking fund. This might have been avoided by a more judicious application of the large "remainders" of 1862 and 1863, which were mainly devoted to "extraordinary repairs." It is too late now to remedy that mistake, but the facts referred to should at least moderate the zeal of those who have been in favor of commencing a new enlargement of the canals, and engaging in other new enterprises, on the assumption that the unprecedented revenues of those years were to increase instead of diminish.

THE STATE FUNDS.

The several funds particularly treated of in this report are the following: The General Fund; the General Fund Debt Sinking Fund; the Common School Fund; the United States Deposit Fund; the Literature Fund; the College Land Scrip Fund, and certain trust funds of small amount.

1—General Fund—Revenue.

	1863.	1864.
Deficiency of the revenue	$.....	$1,192,787 77
Warrants drawn on the Treasury	9,804,599 47	8,417,161 94
Amount transferred to the following funds for interest on money in the Treasury belonging to said funds, viz:		
School fund	19,024 05	26,421 58
Literature fund	812 11	1,594 14
United States Deposit fund	5,450 86	10,442 63
Railroad sinking funds	898 98	1,134 26
Amount transferred to other funds	4,880 50	1,140 00
Amount of warrants drawn on the Treasury remaining unpaid Sept. 30, 1862 and 1863	625 88	668 91
Total payments	$9,836,291 85	$8,651,351 23
Amount of receipts into the Treasury for the fiscal years ending Sept. 30	$7,820,009 06	$7,785,069 51
Transferred from school fund for bonds for lands	1,214 00	1,949 00
Amount of warrants drawn on the Treasury remaining unpaid Sept. 30, 1863 and 1864	668 91	518 05
	$7,821,891 97	$7,787,536 56
Balance in Treasury Sept. 30, 1862	821,612 11	.....
Total means	$8,643,504 08	$7,787,536 56
Deficiency in revenue	$1,192,787 77	$863,814 67

The following statement shows the condition of the Treasury at the end of the fiscal years 1863 and 1864:

	1863.	1864.
Amount of warrants drawn on the Treasury on account of the several funds	$12,711,367 84	$10,820,138 87
Amount of warrants drawn and unpaid	625 88	668 91
Balance due the Treasury Sept. 30, 1863	.....	534,289 16
	$12,711,998 72	$11,355,096 94
Amount received into the Treasury on acc't of the several funds	$10,821,808 68	$11,269,575 12
Amount of warrants drawn and unpaid	668 91	518 05
Balance in the Treasury Sept. 30, 1862	1,351,733 02	.....
	$12,177,704 56	$11,270,093 17
Amount overdrawn Sept. 30	$534,289 16	$85,003 77

Statement of balances due from and to the Treasury Sept. 30, 1863–'64:

	1863.	1864.
From the General Fund revenue	$1,192,787 77	$863,814 67
From the General Fund debt sinking fund	.....	209,501 55
	$1,192,787 77	$1,073,316 22

	1863		1864	
To the school fund, viz:				
Capital	$394,019 08		$523,312 59	
Revenue	62,408 96	456,428 04	56,805 50	580,118 09
To the literature fund, viz:				
Capital	$22,721 51		123,721 51	
Revenue	16,297 87	39,019 38	19,455 12	143,176 63
To the U. S. deposit fund, viz:				
Capital	$87,387 18		157,494 12	
Revenue	241 07	87,628 25	697 10	158,191 22
To the Mariners' fund, viz:				
Capital	$194 81		164 81	
Under protest	1,169 76	1,334 57	1,169 76	1,334 57
To the General Fund debt sinking fund	38,888 56		.....	.....
To railroad sinking funds	35,155 85		.....	.....
To soldiers' allotment fund	54 96		.....	54 96
To college land scrip fund	.....		.....	64,762 40
To the Treasurer for am'ts overdrawn	534,289 15		.....	85,003 77
	$1,192,787 77			$1,073,316 22

General Fund Debt Sinking Fund.

	1863.	1864.
Balance from previous year	$104,960 38	$38,878 56
Amount received into the Treasury during year.	350,000 00	350,000 00
Total means	$454,960 38	$388,878 56
Amount paid during year	416,081 82	598,380 11
Balance Sept. 30, 1863	$38,878 56	$.....
Balance due Sept. 30, 1864	.....	209,501 55

General Fund State Debt.

The amount of the General Fund State debt on the 30th Sept. was	$6,505,654 87	$6,278,954 37
The principal of the debt is re-imbursable as follows, viz:		
On demand	$53,910 68	$53,910 68
1864	287,700 00	.....
1865	178,000 00	178,000 00
1866	385,000 00	385,000 00
1868	942,961 05	942,961 05
1870	700,000 00	700,000 00
1875	900,000 00	900,000 00
1878	800,000 00	800,000 00
At pleasure	2,258,082 64	2,258,082 64
	$6,505,654 87	$6,217,954 37
Not paying interest		61,000 00
Total		$6,278,954 37

The amount of the contingent State Debt for stock issued and loaned to sundry railroad companies, is $338,000 00.

School Fund.

	1863.	1864.
This fund amounted to	$2,694,552 38	$2,734,213 15
Amount received into the Treasury for year ending September 30	$395,315 38	$382,291 26
Amount paid out of the Treasury during the year ending 30th September	332,906 42	325,485 76
Balance in the Treasury on the 30th Sept.	$62,408 96	$56,805 50
The revenue of this fund is estimated for the current year, viz:		
Interest on State stock	$65,803 27	$65,803 27
Interest on Comptroller's bonds	21,378 00	21,378 00
Interest on bonds for lands	20,000 00	16,000 00
Interest on bonds for loans	23,000 00	15,000 00
Interest on loan of 1840	3,000 00	2,900 00
Interest on money in the Treasury	24,000 00	31,000 00
Dividends on bank stock	4,800 00	5,500 00
	$161,981 27	$157,580 27
From the income of the U. S. deposit fund	165,000 00	165,000 00
	$326,981 27	$322,581 27
The payments for the year are estimated at	$324,000 00	$324,000 00

Literature Fund.

	1863.	1864.
This fund amounted to	$269,952 12	$269,952 12
Balance in the Treasury on the 30th Sept.	16,297 87	19,455 12
The revenue of this fund is estimated for the current year at	43,577 02	44,346 16
Estimated payments during the same period	43,000 00	41,243 91

United States Deposit Fund.

Capital	$4,014,520 71	$4,014,520 71
Revenue	261,868 79	260,965 01
Balance in the Treasury on the 30th Sept.	241 67	697 10
The revenue of this fund is estimated for the current year at	255,609 36	256,697 15
Estimated payments during the current year, viz:		
Appropriations:—		
Common school dividends, including the salaries of the School Commissioners of the several counties	$165,000 00	$165,000 00
Dividends to the academies	28,000 00	28,000 00
Am't to be added to the capital of the school fund	25,000 00	25,000 00
Instruction of common school teachers in the several academies	18,000 00	18,000 00
State Normal school, for maintenance	12,000 00	12,000 00
Teachers' institutes in the several counties	8,000 00	8,000 00
Balance of appropriation per chap. 210, Laws of 1863, for teachers' institutes	1,062 25	.....
	$257,062 25	$256,000 00
Tranfer from revenue to capital for diminution in the loans under foreclosure of mortgage	4,000 00	5,000 00
	$261,062 25	$261,000 00

	1863.	1864.
Tonawanda Railroad Company sinking fund	$71,430 77	$74,079 41
Tioga Coal, Iron, Mining and Manufacturing Company sinking fund	8,079 95	9,823 58
Long Island Railroad Company sinking fund	4,081 95	4,204 41
Mariners' fund	11,334 57	11,334 57
Soldiers' allotment fund	54 96	54 96
Indian annuities	7,361 67	7,361 67
College land scrip fund	.....	64,762 40

The deficiency in the General Fund at the close of the fiscal year, 30th September, 1864, was $1,192,787 77. On the 30th September, 1863, it was $863,814 67. This has been substantially extinguished by the receipt of taxes from the city of New York since that date. Consequently it will not be necessary to make provision for any deficiency, unless it be for one to be created by unnecessary and unexpected appropriations. With proper prudence and caution in this respect, the State tax for the ensuing year may be largely reduced. The equalized valuation of real and personal estate for the year in the aggregate $1,500,999,877. For the ordinary expenses of Government, a tax of 1½ mills will be sufficient. There will be then required for schools, ¾; for canals, ⅛; for the extension of Chenango Canal, unless that act shall be repealed, 3-16. Total, 2 11-16, against 5¼ for the current fiscal year. There is no good reason why the tax should exceed the rates named.

The following is a brief statement of the principal payments made on account of the war, or directly occasioned by it, since its commencement:

Under the Act of April 16, 1861	$3,000,000 00
Bounties 1862 to 1864 inclusive	9,076,873 44
Arms and equipments for State troops	841,197 19
Militia, National Guard	553,924 53
Sick and wounded soldiers	182,284 66
Harbor and frontier defence	4,979 42
Bureau of Military Statistics	20,403 22
Claims of State troops	183,134 28
Adjutant Generals office, muster roll department	6,282 45
Volunteer militia	84,506 35
On account of United States direct tax	400,000 00
	$14,353,085 54

Imports and Exports of the Port of New York.

The Custom House has made up its statement of imports (in gold) and exports (in currency) to the close of September. The following are the imports at New York from foreign ports, for July, August and September, 1864:

	July.	August.	September.
Entered for consumption	$6,382,928	$6,603,653	$4,390,114
Entered for warehouse	14,954,635	10,437,478	5,258,568
Free goods	917,684	936,474	832,557
Specie and bullion	128,052	245,858	56,220
Total entered at port	$22,383,299	$18,223,463	$10,539,459
Withdrawn from warehouse	3,386,873	7,967,843	6,852,329

The following is a comparative statement of the imports of foreign merchandise at this port and Customs revenue for the first nine months of the last four years:

	Imports of Mdze.	Customs Revenue.
1861	$134,989,116	$15,856,132 35
1862	137,856,395	42,276,832 80
1863	137,547,817	42,323,075 69
1864	189,504,769	56,370,920 13

The exports from New York for the months of July, August and September, 1864, were as follows:

	July.	August.	September.
Domestic produce	$26,251,673	$26,617,850	$15,595,548
Foreign free	249,404	127,537	848,742
Foreign dutiable	5,137,460	2,231,782	2,460,138
Specie and bullion	1,947,329	1,001,813	2,835,398
Total exports	$33,585,866	$29,977,982	$21,739,826
Total export of specie	31,638,537	28,976,169	18,904,428

The following will show the exports, quarterly, exclusive of specie, for the first nine months of each of the last four years:

	1861.	1862.	1863.	1864.
1st quarter	$33,477,742	$32,075,568	$50,615,908	$41,429,756
2d quarter	33,123,489	29,798,344	41,046,726	48,416,686
3d quarter	30,175,918	45,313,299	38,825,587	79,519,134
9 months	$96,777,149	$107,187,211	$130,487,221	$169,395,576

The re-exports of foreign goods for the nine months of 1864, included in the above total, amount to $1,582,848 of free, and $13,961,235 of dutiable, making a total of $15,543,583 re-shipped to a foreign market. This is three times the quantity re-shipped for the same period of the previous years.

American Railroad Journal.

Saturday, January 21, 1865.

Stock Exchange and Money Market.

A bill has been reported in the House of Representatives, authorizing the Secretary of the Treasury to increase the issue of 7-30's to the extent of 400 millions. We presume this settles the question as to the issue of any more gold bearing interest securities. The 7-30's will be popular enough if there is no further competition of the kind alluded to. The immense amount of money disbursed by the Government in carrying on the war makes the desire for investment universal, and not only so but easy. The people are but lending to themselves; what they take out of their pockets they put back in their pocketbooks. All they want beyond the actual cost of the moment for their living, they desire to put at interest; and whom can they better trust than themselves? The good sense of the public is shown not less than their patriotism in thus giving back to the Government on time, the surplus earnings or profits of the day. And that both principal and interest are sure to be paid in gold or its equivalent in a sound currency, is just as certain as that the land we inhabit is permanent, and its future prosperity inevitable. Many sound political economists consider that the National securities are to play a great part in our future advancement.

Every day's events bring the present crisis nearer to a close. We have never from the first doubted what the result was to be. Our position was peculiar, untried; not the ablest men took the lead in our affairs, but time and experience are developing the fact, that we had the material, and opportunity has brought it out.

Among the commercial and therefore financial questions of the hour outside of the financial problem, is that of our reciprocity treaty with the British North American provinces. It has been determined by Congress to give the twelve months notice of its termination. We have before us letters from two distinguished members of that body in relation to the subject. In one it is stated that the question is one of the most momentous now under consideration; in the other the belief is expressed, that within the twelve months, another more favorable treaty may be negotiated. In this hope we concur. For the aggregate of our trade with the provinces is much larger than with many of the European, Central American and South American nations put together. We look upon the interests of the States bordering on the lakes as to be too great to be overlooked or forgotten. The provincials are equally interested, and more than anxious for an active commerce with the United States, and we have no doubt but that all reasonable concessions will be made us to secure a renewal of the treaty in some form or other. We therefore wait with much interest the development of a new movement in this direction. We are seeking trade to the ends of the earth; it would seem an act of folly to reject that which lies at our own doors.

The gold market has been affected pretty seriously in consequence of the late military successes. The capture of Savannah, and the brilliant assault on Fort Fisher, now successfully accomplished under the inspiration of General Grant caused its sudden depression.

The enlargement of the public debt, and the issue of fresh currency in the shape of compound interest notes do not seem to have produced a rise, nor the recent shipments of specie abroad, to a considerable extent. It is believed that there is a larger amount of gold in the country now than at the beginning of the war, by more than eighteen millions of dollars, and in the city of New York the reserve of specie is nearly seven millions greater. There is doubtless gold and silver enough in the country to serve as a sufficient basis for sustaining all the Government and bank issues if we had peace, and a certainty of no further issues of paper.

It is now understood that the cotton captured in Savannah is to be brought to this city, and sold in convenient parcels by semi-weekly auctions, and that the quantity to be disposed of is much larger than was at first supposed. We do not doubt that this arrangement will have a decisive and an imme-

diate effect on the price of gold and exchange, and with more force than has been calculated. It will furnish remittance in kind on which bills may be drawn equal to three months' coin shipments, which will be equivalent to returning just so much specie, and if the shippers choose to have proceeds brought back in coin, either for the cotton or for exchange, for it would amount to the same thing, it is quite possible that the gold current might set in strong enough to change the character of our present foreign business relations, and ease our domestic market at once. We have in common with many others always contemplated some such result as soon as the war took such a turn as to place the cotton crop within reach of our armies.

Foreign exchange is at this moment in excess of the demand and very dull, an evidence of a decided character as to the increasing advantage we are gaining by the excess of our exports over our imports. There can be no other good reason for the low rates and want of animation in the bill market.

The Government securities are firm, but not as active as they were a short time since, purely for the reason that a fixed policy has not yet been declared at Washington as to the future of its operations. Investers like to know what is to be the form, character and time of each new Treasury loan, and until these are settled with regard to the amounts necessary still further to be raised, it is in vain to expect stability in the market price. If it could be positively known that no more legal tenders, or gold paying bonds were to be issued, particularly under the general conviction that the war is near its close, there would be seen an extraordinary advance in rates, and an animation in the market to which it has been long unused.

Railway shares continue dull, while the bonds of many of the most esteemed companies stand at high figures, and the supply is limited. All attempts to depreciate the character of railway property are founded in an entire misapprehension of their permanent value. In our judgment they have a fixed and inherent strength which time will but the more surely reveal. The temporary check, which the increased price of work, labor and materials, the freights and fares being at the old rates, produces in their net earnings will not last long except the war should be protracted, in which case no doubt legislation would provide the proper remedy.

During the week ending January 14, the capital of the National Banks has been increased by various new companies to the extent of $7,223,-210, so that the $300,000,000 which is the limit to the permitted extent of the National currency is being rapidly approached. If the old banks should at once come into the new system and take up this limit left, they would have the whole bank circulation in their hands, and it would then be of a uniform character, and the future currency of the country would be the best it ever had. There is no doubt this view of the subject will have its effect on the greater part of the old local institutions.

The specie product of California continues to increase in a most surprising manner. The exports from San Francisco up to the 22d of December, 1864, are given at $54,114,914, against for the same period in 1863, $45,132,548, an increase of $9,982,366. The yield of Idaho, Montana, Utah and Colorado will also be very large during the present year. In this respect our country has the brightest prospects of any other on the globe, and this consideration gives stability to its financial prospects to an unprecedented degree.

It is stated on the best authority that the internal revenue is getting to be enormous in amount, and if the other cities and towns do as well proportionably as New York, the gross amount for the year will be much larger than the most sanguine anticipated. A few years taxation with such results would end our fears and our National debt together.

No review of the Money Market can be complete without some allusion to the Petroleum Companies. These are the most remarkable creations of the day, and the most timely. Their number and nominal capital are immense. They are springing up in all directions. The wells are found where they were not expected to be found, and their source and origin, no longer attributed to their immediate relations to coal strata, are yet a puzzle to geologists. But they are no puzzle to political economists who see in their products enormous wealth, for them a great and increasing demand, and for other nations an incalculable boon. A cheap and universal illuminating power is one of the greatest advantages we can confer on distant or neighboring nations. Besides this, in the residuum of distilled petroleum are found the bases of the most beautiful and permanent colors, and it is proved by recent scientific experiments, that the article itself may yet be used as fuel for the propulsion of ocean steamers, by which a vast saving in room and coal will be effected.

While therefore, speculation may go too far in its views with regard to the value of particular oil bearing localities, there can be no doubt that in the aggregate the results will be largely productive. Many of the companies are paying unheard of dividends already.

Thus we have gold and petroleum in the greatest profusion to help us forward in our career of prosperity. Cotton certainly can no longer claim an exclusive control over commerce.

The imports of foreign goods into the port of New York for the first nine months in 1864, were $189,504,760, and the exports for the same period $169,395,576, being nearly forty millions more than during the equivalent period in 1863, and nearly double what they were in 1862. This is conclusive proof of the rapid increase of American production notwithstanding the war.

The exports for the week ending January 17, from this city, were $4,064,308.

Money is easy, and rules at 7 per cent.

Gold in Montana.

Some of the mines now worked in this new territory are said to be prolific almost beyond belief. One lode, according to the recent report of Mr. C. F. Pettengill, who is in the East purchasing machinery, yields $400 per ton of rock even now. It is 2 feet in thickness, and of great extent. Its product for 200 feet depth and 400 in length, as now worked, is calculated at $3,500,000. The quarrying costs $7 per ton, and crushing $2 per ton. This lode is but a sample of a vast many others in that region.

Steel for Railways.

We have received from the Secretary of the Erie Railway Company, a Circular from the house of P. S. Justice, on the subject of the use of cast steel rails, tyres and axles. We have on former occasions spoken our opinions freely, on the great superiority of this form of iron for such purposes. Four rolling mills on the Bessamer system of preparation are now actively employed at Sheffield, in producing the cast steel rails, and our Railway Companies can be supplied in any quantity, and at short notice.

☞ We notice among the new Houses entering into business, that of SMITH, MARTIN & Co., No. 3 Wall street. The former is a Banker from Buffalo seeking a large field for the employment of his ability and capital, Mr. Martin has been six years Cashier of a Bank of high repute in that city, and the Co. is Mr. Altman, from the same place, making a strong and experienced firm.

These gentlemen propose to deal in all kinds of Government Stocks and Securities, those of the States, and also in railway and other bonds and shares. They also allow interest on deposits from their customers, and make collections in all parts of the United States and the Canadas. With a cash capital all paid in, convenient location, and their reputation as men of business, they enter the field with great advantage, and their Western relations in past years must give them a position and a correspondence that can not be other than of a first-class character.

Railroad and Steamboat Accidents.

The total number of casualities by Railroad Accidents in 1864 was 2,250; of which 404 resulted in death, and 1,846 in wounds. In 1863 the number of casualities were 935, viz.: killed 264, wounded 671—an increase in 1864 of: casualties, 1,325; deaths, 140; wounded, 1,175. These figures do not include accidents where no lives were lost, accidents to individuals which were caused by their own carelessness or design, or deaths or injuries resulting from the recklessness of persons in crossing or standing upon railroad tracks where trains were in motion.

The total number of casualities by steamboat accidents in 1864 was 501; of which 358 resulted in death, and 143 in wounds. In 1863 the number of casualties were 340, viz: killed 255; wounded, 85—an increase in 1864 of: casualties, 161; killed, 103; wounded, 58.

The following table exhibits the number of Railroad Accidents, with the number of persons killed and injured by such casualties during the past twelve years:

	Accidents.	Killed.	Wounded.
1853	138	234	496
1854	193	186	589
1855	142	110	539
1856	143	105	629
1857	126	130	536
1858	82	119	417
1859	79	129	411
1860	74	57	315
1861	63	101	459
1862	99	264	877
1863	89	264	671
1864	140	404	1,846
Total	1,368	2,103	7,785

The following table shows the number of Steamboat Accidents, and the killed and wounded during the past twelve years:

	Accidents.	Killed.	Wounded.
1853	31	319	158
1854	48	587	225
1855	27	176	107
1856	29	358	127
1857	30	322	82
1858	27	300	107
1859	21	342	146
1860	29	597	134
1861	19	69	88
1862	16	220	70
1863	20	255	85
1864	26	358	143
Total	323	3,903	1,472

☞ We call attention to the advertisement of the Ninth National Bank, which has a very extensive list of our best merchants as stockholders, and a very excellent Board of Directors to secure the efforts of its officers. This institution has reached in less than a year a position of great usefulness as well as profit to its stockholders, having paid a five per cent. dividend, and having over 16 per cent. surplus after paying it. Mr. Orvis, the President, has had much experience as a bank officer in Troy, N. Y., and was also one of the originators of the Park Bank in this city. Mr Hill, the Cashier, was several years in the Park Bank, and was also a cashier in Elizabethtown, N. J., where his father an eminent banker, is President of the National Bank of New Jersey.

☞ The "New York, Philadelphia and Baltimore Petroleum Company," with a considerable portion of its capital stock subscribed, will keep its books open a few days longer at the instance of parties who desire the delay. The opportunity for subscription is a good one, guaranteed by the respectability of the managers, and no doubt will be embraced by many who desire to invest in this new mine of American wealth.

Passengers by the Steamships.

The following is the number of passengers carried by the different steamship lines in 1864:

	Eastward.	Westward.	Total.
Liverpool, New York and Philadelphia Steamship Company	9,364	32,926	42,290
Cunard line, New York	2,947	3,123	6,070
Cunard line, Boston	2,092	2,422	4,514
Cunard Emigrant line	1,860	8,143	10,003
Hamburg line	2,638	10,355	12,993
Bremen line	2,534	12,222	14,756
Canadian Mail line	3,752	12,389	16,141
Galway line	102	793	895
National line	2,465	14,112	16,577
Glasgow (Anchor) line	1,356	4,075	5,431
French Mail line	468	628	1,096
London line	689	3,091	3,780
Casual steamers	36	735	771
Total	30,306	105,014	135,317

Croton Aqueduct Department.

The receipts and expenditures of the Croton Aqueduct Department during the past year are given below. It will be seen that there is an increase in the receipts of the department over 1863 of $27,990 25.

RECEIPTS.

	1863.	1864.
Water Rents	$869,642 39	$895,612 72
Penalties and fines	11,316 51	11,621 55
Permits for taps	2,572 00	2,779 00
Permits for sewers	16,169 00	15,375 00
Permits for vaults	18,155 64	19,686 79
Materials sold		770 73
Total	$917,855 54	$945,845 79

EXPENDITURES.

Water pipes and laying	$123,556 98	$168,056 79
Street repairing	101,926 48	68,042 56
Trap-block pavement	51,877 83	67,185 34
Sewers, repairing, etc.	59,261 98	43,809 20
Sewera'e system surveys		2,498 52
Wells and pumps	2,350 58	2,700 82
Salaries	65,978 94	78,830 03
Water works extension	225,885 73	91,977 48
Contingencies	6,919 31	743 74
Wells and pumps, repairing	2,369 58	2,700 82
Aqueduct, repairs, &c.	90,225 33	56,587 23
Total	$730,352 74	$583,132 62

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Jan. 13, 1865, was as follows:

Passengers	$8,724 55
Freight and live stock	35,908 50
Mails and sundries	2,493 25
Total	$47,126 30
Corresponding week of 1864	51,930 36
Decrease	$4,804 06

The earnings of the Marietta and Cincinnati Railroad for the 1st week in January:

	1865.	1864.
Passengers	$9,929 87	$6,081 38
Freight	9,527 59	4,376 19
Mail, express & telegraph	1,086 33	944 58
Total	$20,543 79	$11,352 15

The earnings of the Grand Trunk Railway for the week ending Jan. 7, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$28,816 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	77,203 00
Total	$109,143 00
Corresponding week, 1864	91,415 00
Increase	$17,728 00

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the 1st week of Jan., $155,289 05
Corresponding week of 1864 67,687 73

Increase $87,601 32

The earnings of the Chicago and Rock Island Railroad for the 2d week in January, 1865, were $72,492 00
Corresponding week of previous year 40,690 00

Increase $31,802 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of January, 1865, were $82,287 00
Corresponding week of previous year. 49,078 00

Increase $33,209 00

The earnings of the Michigan Central Railroad for the 2d week in Jan., 1865 $61,509 00
Corresponding week of previous year 35,054 00

Increase $26,455 00

The earnings of the Cleveland and Toledo Railroad for the 1st week in Jan., 1865 $50,594 00
Corresponding week of previous year 27,593 00

Increase $23,001 00

The earnings of the Toledo and Wabash Railroad Company for the first half of January, 1865, were $70,970 00
Corresponding week of previous year. 24,755 00

Increase $46,215 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Dec. 31, 1864, were:

	1864.	1863.
Passengers	$3,692 16	$2,896 69
Freight	14,727 06	7,855 26
Express	104 16	104 16
Mails	296 58	296 58
Total	$18,819 96	$11,152 69
Increase		$7,667 27

Receipts from January 1st to Dec. 31:

1864	$587,077 77
1863	414,511 43
Increase	$172,511 34

Finances of New Jersey.

From the Message of the Governor we learn that the finances of this State are in a most healthy condition.

The receipts for the fiscal year from the usual sources were $535,683 28, and the disbursements for the same period, $496,410 28, leaving a balance on hand of $139,373.

The State is out of debt.

The total amount of available school funds is $511,439 29.

The balance in favor of the war fund is $324,546 75.

The whole amount of bonds issued by the State, for the war fund is $2,590,600.

The State has paid, or will pay this year, on interest and to extinguish bonds, $252,000.

The premiums on the sale of State bonds amounted to over $50,000.

The State claims, for its advances to the United States Government, a balance of $940,037.

Railroad Earnings--Monthly.

The earnings of the Erie Railway for the month of Dec., 1864, were $1,267,414 58
Corresponding month last year 985,320 89

Increase $282,093 69

The earnings of the Cleveland and Toledo Road for the month of Dec., 1864, were $208,291 00
Corresponding month of previous year 184,309 00

Increase $23,982 00

The earnings of the Michigan Central Railroad for the month of Dec., 1864, were $376,470 40
Corresponding month of previous year 306,186 38

Increase $70,284 02

The earnings of the Cleveland and Pittsburg Railroad for the month of Dec., were $201,169 40
Corresponding month of 1863 180,408 39

Increase $20,761 01

The earnings of the Chicago and Rock Island Railroad Company for the month of Dec., 1864, were $308,187 00
Corresponding month of previous year 192,056 00

Increase $116,131 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Dec., 1864, were $398,091 00
Corresponding month of previous year 341,608 00

Increase $56,483 00

The earnings of the Toledo and Wabash Railroad for the month of Dec, 1864 $222,851 16
Corresponding month of 1863 96,203 70

Increase $126,647 46

The earnings of the North Pennsylvania Railroad Company for the month of December, 1864 were $63,761 66
Corresponding month last year 46,597 60

Increase $17,164 06

The traffic receipts of the European and North American Railway for the month of Dec., 1864, compared with the corresponding month last year, is as follows:

	1864.	1863.
Passengers	$4,836 17	$5,736 38
Freight	5,877 03	5,855 60
Mails and Sundries	459 30	476 30
Total	$11,172 50	$12,068 28
Decrease in 1864		$895 78

Railroads.—The Theory of Construction, Earnings and Dividends.

The recent attempt to depreciate the value of the shares of the Erie Railway, affords an appropriate occasion to consider the propriety of the payment of dividends by a company, at the same time it is increasing its construction account.

We may start from the incontrovertible premise that the earnings of all roads must, as a rule, be in ratio to their cost. A similar rule holds in every department of industry and trade. If an increased or augmented result is sought, it must be upon increased means of investment—otherwise the royal road to wealth would be found, in which the result would bear no proportion to the agency employed.

It is in obedience to such a necessity that the capital of every railroad in the United States has been increased from one to ten fold, and always in appropriate ratio to its increased earnings. The Erie Railway was commenced upon an estimate cost of $6,000,000—a sum not equal to one half of its present earnings. It was opened in 1851 at a cost of $24,000,000. It earned in 1852 $3,537,766. We will assume that in 1864, its capital account, capitalizing its leased roads, to be double that at its opening—or $48,000,000. In the meantime there has been applied to construction net earnings to the amount of $20,000,000, making the total cost of the road to the stockholders, $68,000,000, a sum nearly three times greater than the cost the day it was opened. Its earnings in the same time have increased in four-fold ratio.

But such increase of capital and earnings, great as it is, has not been so striking as that of the main line of the New York Central Railroad, for an equal period after it was opened. The last link in this road, the Attica and Buffalo was opened in 1842. On the 30th of September, 1843, the cost of the Mohawk and Hudson, Utica and Schenectady, Syracuse and Utica, Auburn and Syracuse, Auburn and Tonawanda, and Attica and Buffalo, was $7,625,780. Its total earnings for the year were $1,108,131. Neither the consolidated company, nor the more important lines that compose it, ever omitted a dividend. Yet its capital account has been increased more than five-fold since the date of its opening; at the same time that at least $15,000,000 of earnings have been applied to construction. Its earnings in the meantime have increased ten-fold. This road was constructed at an early day, and had consequently to be entirely rebuilt, which partly accounts for the enormous increase in its construction account. Unlike the Erie, it always enjoyed a good credit which enabled it to borrow at low rates, and to increase its capital to any desired extent without appropriating what belonged to the stockholders in the shape of dividends. Their regular payment in the face of an enormously increased construction account, is one of the causes why the market value of its stock is so deservedly high.

The history of these two roads is that of any other important line in the United States. The Reading Railroad was opened in 1842 at a cost of $7,112,292. It earned in 1843 $394,318. Its capital account had increased to $28,000,000 in 1864, and its earnings to $7,000,000. In the meantime $15,000,000 of earnings have gone into construction. Its cost had increased six-fold and its earnings nearly twenty-fold. If we take roads more recently constructed we shall find similar, though not so striking illustrations of the increase of the cost of roads in ratio to earnings, for the reason that the science of construction is now thoroughly understood. A modern road is very different from one built twenty years ago. The Michigan Central Railroad was opened in 1852 at a cost of $8,156,000. Its earnings that year were $1,069,948. Its capital account in 1864, was $14,000,000, and its earnings $4,200,000. In the meantime it applied earnings to the amount of more than $7,000,000 to construction, so that the road has really cost the stockholders over $20,000,000. The Illinois Central was to cost $17,000,000. It has cost more than twice that sum. It has increased its

earnings since its opening in 1856, from $1,961,730, to $4,500,000 in 1864. In the same time net earnings to the amount of $5,000,000 have been applied to construction.

From what has been stated it will be seen that a rapid increase in the construction account of the railways of this country is inevitable, and that such increase must always be in approximate ratio to their increased earnings. How shall the means for such increase be provided? from capital or from the perpetual application of earnings to construction? If the latter alternative should be adopted, the stockholders of many of our best managed and most productive and prosperous companies would never receive directly a penny on their investments either presently, or at any probable future period; nor would such investments have any considerable market value, no matter how productive the roads were, provided such companies shall make any provision for the transaction of the legitimate business of their lines. Not to do this would be to refuse to carry out the object for which these roads were undertaken, and would inevitably lead to the construction of more lines, and to ruinous competition. A railroad is built to accommodate the traffic of the section it traverses. If that traffic increases should not the original capital account be augmented? There is just as good reason for the increase as there was for the first outlay.

The objection to such increase, if there be any, is based upon the distrust of the management of railroads rather than on any violation of a correct business principle. From the inadequate provisions made in the outset for construction, nearly all our companies have at one time or another fallen into great embarrassments. With large earnings in many cases, no dividends have been paid, or if commenced have been omitted from the constant and steady demand for construction, and from the inability of the company to borrow money except at ruinous rates. The hopes of the owners of railroad property have been disappointed so often, that it had come to be regarded as a difficult problem to tell whether or not a dividend had been earned. Necessity for a long time compelled the application to construction of whatever was received. But, gradually, one after another of our companies completed their roads, and emerged from their embarrassments still with the same necessity as ever upon them to add to their facilities as their business increased. The Erie company does not propose to provide an equipment more approved in form, or in higher condition than that at present in use, nor a more perfect roadway. Should it determine for the future to limit its business to its present capability, then the whole enterprise may be regarded as consummated in a completed road, and with an adequate income upon its cost. It is a perfectly simple and easy matter for it to pay regular dividends for the future, without increasing its capital. But it can, in such case increase its earnings only in a very small ratio. There never was a time in which such increase was prospectively so great. Within the past year a great line, the Atlantic and Great Western Railway has been completed which carries the gauge of the Erie to St. Louis. This tributary is already earning at the rate of $5,000,000 annually—a sum much larger than the Erie earned upon a cost of $24,000,000. The whole traffic of this road is tributary to the Erie for nearly all its entire length. To accommodate it will require one hundred engines costing at the present time $2,500,000 and probably two thousand cars, costing say $2,000,000 more. Additional track will also be required. The outlay contemplated will enable the company to earn in 1865, $3,000,000, over the earnings of $13,200,000 in 1864—which is half a dollar of increased income for every dollar of additional outlay. With its present equipment the road could not increase its earnings over those of the past year.

We presume that no one objects that such increase of capital is not wise. The question is whether while it is going on it is expedient for the company to pay dividends. If they have been actually earned, and if such additional capital must increase, instead of weaken the ability of the company to pay them in the future, we can see no possible reason why they should not be paid. If the road is actually earning eight per cent. on its stock, the latter is worth par, and the payment of dividends at this rate will cause the stock to be sought for at that price. No one questions that such earnings have been made. If so the present stockholders are entitled to their benefit. The present generation as well as the future have some rights, and no duty is more imperative upon any body of directors than to adopt such a line of policy as will give to the securities of their roads, a price which shall correspond as nearly as possible to their real value. If no dividends are to be paid except by companies whose construction is fully closed we must forego for all time dividends upon nine-tenths of our roads, and among them many of our most productive and best managed lines and virtually destroy the value of investments which have cost their owners nearly $1,000,000,000.—*Jerome, Riggs & Co.'s Circular.*

Appropriation of Land for Use of Railroad.—Injunction.—Acquiescence in Use of Land.—Compensation for Same.

The late case of Pettibone *vs.* The La Crosse and Milwaukee Railroad Company and others, was an appeal from the Circuit Court for Columbia Co., Wisconsin, to the Supreme Court of that State.

The nature of the action is stated in the opinion of the court.

The complaint, after stating the unlawful appropriation of the plaintiff's land to the use of the railroad company, and that no compensation had been made therefor, demanded that the damages which he had sustained might be assessed, and the defendants be adjudged to pay the same, and that in the meantime and until such compensation were made, the defendants should be enjoined from running cars over the land.

The answer alleged, among other things, that "if the premises were entered upon taken or used as in the complaint alleged, the same was done with the acquiescence and consent of the plaintiff."

After the evidence on the part of the plaintiff was closed both parties insisted that the court should assess the damages which the plaintiff had sustained; but the court decided that it could not do so under the decision of this (Supreme) Court in Davis *vs.* The La Crosse and Milwaukee Railroad Company, 12 Wis. 16, and both parties excepted.

The evidence introduced by the defendants in support of their answer is sufficiently stated in the opinion of the Court.

The case was tried and submitted upon an agreement that it might be taken under advisement. The judgment was afterwards rendered.

The court found that the plaintiff's land described in the complaint had been taken by the railroad company, and appropriated for its use more than three years before the commencement of the suit, and that no compensation had been made therefor to the plaintiff, and granted an injunction order according to the prayer of the complaint. The finding of the court was silent as to the question whether the entry and appropriation by the railroad company, had been made with the plaintiff's consent.

A motion for a new trial on the ground that the judgment was contrary to law and the evidence, was overruled, and exceptions taken. The following is the opinion of the court which was delivered by.

PAINE, J.—This action was brought to enjoin the defendants from running their cars across the plaintiff's land, upon the ground that no compensation has been made for the land.

The counsel for the appellants (defendants) contended that the decision of this court in the case of Davis *vs.* The La Crosse and Milwaukee R. R. Co. 12 Wis. 16, should be overruled, and that no injunction should be granted to restrain a railroad company from running their cars over any land upon which they had built their track, until it appeared that the compensation for the land had been legally ascertained. It was said that either party, the owner of the land as well as the company could move in that matter and have the compensation fixed, and therefore if he did not do that he ought not to be allowed to enjoin the company from using his land.

But if there had been no change in the law, we should adhere to the decision in the Davis case, upon the ground that it was for the company to take the initiative, when it wished to appropriate the land of another, and did not devolve upon the owner to set in motion the proceedings designed to divest him of title.

But at its last session the legislature enacted that the owner might in all cases proceed to cause the damages to be assessed, and that no injunction should issue until they were assessed, Chap. 175, Gen. Laws of 1861. What is the effect of this act upon the question, the conclusion to which we have come in this case makes it unnecessary for us to determine. Whether it infringes in any degree, upon the constitutional right of the citizen to have his property or the compensation for it, or is a regulation of the mode of proceeding in such cases which the legislature may legitimately enact, is a question that can be settled upon argument when it necessarily arises.

But we have come to the conclusion that independently of the effect of this statute, and of the decision in the Davis case, there were good grounds for denying the injunction in this case. We think a decided prepondence of the evidence shows that the company altered the location of its road, and ran the track where it now is upon the plaintiff's land, at his instigation and upon his promise to give them the right of way. This being so, it is a good answer to his application for an injunction, whether his promise was made in such form as to be binding upon him in law or not. His counsel argued the case upon the theory that if such promise was void under the statute of frauds, then it could have no weight in determining the plaintiff's right to an injunction. But this by no means follows. Such a conclusion would be entirely repugnant to all the reasoning upon which a part performance of a parol contract for the sale of lands, which is void under the statute of frauds, is held to take the case out of the statute. In such cases, courts of equity not only refuse to interfere in behalf of the party who seeks to rely on the statute, but actually interfere against him, and compel him to perform the contract, and this upon the ground that to allow him to set up the statute would operate as a fraud upon the other party, and leave him liable to an injury for which he could not be properly compensated.

We do not say that the facts disclosed here would be sufficient to justify a specific performance against the plaintiff, nor that they would not. But whether they would or not we think them

fully sufficient to justify a refusal of an injunction in his behalf, which may be refused upon slighter grounds than would be required to enforce a specific performance against him.

An injunction is an extraordinary remedy, and as was said by this court in Sheldon *vs.* Rockwell, 9 Wis., 180, the granting or refusal of it, "rests in the sound discretion of the court. They are never granted when they are against good conscience or productive of hardship, oppression, injustice or public or private mischief." The authorities cited in that case show that they will not be granted where the party complaining has unreasonably acquiesced, by mere silence, and inaction in the appropriation of his property for public improvements. And how much more clearly should they be refused where the original appropriation was at his instigation and under a promise by him to give the right of way.

The invalidity of an agreement at law will not prevent a court of equity from looking at it, to see whether either party is attempting to use it to work a fraud or wrong upon the other. Blakesly *vs.* Johnson 18 Wis., 530. And the same principle is applicable to the determination of the right to an injunction.

It is undoubtedly true that considerable inconvenience might result from granting such an injunction. And although we do not consider that as a sufficient for ground denying it where the party has not unreasonably acquiesced in, and did not originally invite the act of which he complains, yet where either of these facts did exist, the inconvenience resulting from an injunction adds great force to the reasons for its refusal. When the owner stands upon his legal rights, it is for the company to take the necessary steps to acquire the right of running over his land, and perhaps his mere inaction for a time should not be too strongly construed into acquiesence in view of the course of decisions sustaining the rights of companies to enter preliminarily for purposes of location, survey, &c., before making compensation. But where it appears that the party invited them to enter, and promised to give the right of way, it may fairly be assumed that the company neglected in consequence of such acts on his part, to take the steps necessary to obtain the right.

And that being so, whatever may be his rights at law, he ought not to be allowed to impose on the company, or on the public the inconvenience of an injunction.

The court below properly refused to go into the question as to the amount of compensation.

The mode prescribed by the charter is the only way of arriving at that.

But for the reasons already stated, the judgment of the Circuit Court is reversed, with costs.

Judgment reversed.

Passports and the Railroads.

By the regulation requiring passports from persons entering the United States from Canada, travel through Canada from points in the United States is about used up. The Great Western and Grand Trunk Roads have given up the through passenger business, and have withdrawn their express trains, to save the expense of running them light. It is reported that the express trains will be withdrawn from the New York Central Branch between this city and Suspension Bridge. Western passengers all go by the south shore. The Michigan Central Company has withdrawn one of its express trains from Detroit to Chicago.—*Rochester Democrat.*

Currency of Loyal States.

Statement of the approximate amount of legal tender and other notes in circulation, January 1, 1865:

United States notes (*currency proper*)	$433,000,000
Fractional and postage currency	21,000,000
One years 5 p. c. legal tender notes	41,000,000
Two years 5 p. c. " "	13,000,000
Two years 5 p. c. " " *coupon*	50,000,000
Three years 6 p. c. comp. int. notes	120,000,000
Total United States issues	$670,000,000
National Bank notes	76,000,000
State Bank notes	120,000,000
Total of all kinds of notes	$866,000,000
But as the interest notes are not in general circulation these ought to be deducted, viz:	216,000,000
Leaving	$650,000,000

as the amount of notes in actual use.

☞ The imports and exports of the precious metals into and from France, for the year ending September 30, 1864, were:

	Imports.	Exports.
Gold	£13,231,823	£10,477,402
Silver	8,373,257	10,333,408
Total	£21,605,080	£20,810,810

Ship Canal Around Niagara Falls.

The Chicago Board of Trade has adopted a series of resolutions in favor of a Ship Canal around Niagara Falls, and authorized the appointment of an agent to proceed to Washington and urge upon Congress the duty of providing for the construction of the work. It is claimed that this canal would create a new bond of Union between the east and the west, and forever secure the military and commercial ascendancy on the great lakes to the government and citizens of the United States.

☞ The new bridge of the Chicago and North Western Railway Company, across the Mississippi River at Clinton, and connecting their Galena airline division with their Iowa lines, was completed on the 7th inst. This will add very largely to the earnings of this company, as it enables them to accommodate the business of that section of country which is tributary to their Iowa lines, and which heretofore, owing to the difficulty of crossing the river, has to a considerable extent sought other means of access to Chicago.

☞ The tunnel under the Apennines, on the Bologna and Florence railroad, has just been opened to the public, and the line is now open from Turin and Milan to Rome and Naples without any other interruption than the few miles which separate Civita-Vecchia from Orbitello, on the Tuscan coast.

Wealth and Resources of New Jersey.

This State in 1762 was a part of New York, and remained so until 1702. In many of its peculiarities and relations it might even now be considered a part of New York. In much business and in many interests it is identical with us still. It is about 163 miles in length and 52 miles in breadth, containing 8,320 square miles, or 5,324,824 acres of land and water of which 1,944,445 acres are improved, and 1,039,086 unimproved. The value of the farms is $180,250,838, and of the implements of husbandry used in their cultivation $5,746,567.

The population numbers 672,035, but in 1790 it was but 184,139, and in 1749, a little more than a hundred years ago 60,000.

The live stock consists of 79,707 horses, 6,362 asses and mules, 188,818 milch cows, 10,067 working oxen, 89,909 other cattle, 135,228 sheep, and 236,089 swine.

The products of animals are as follows: butter, 10,714,447 lbs., cheese, 182,172 lbs., wool, 849,250 lbs., wax and honey, 194,055 lbs., and the value of slaughtered animals, $4,120,276.

The cereal crops are estimated at 1,768,128 bushels of wheat, 1,439,497 of rye, 9,726,336 of Indian corn, 4,539,132 of oats, 24,915 of barley, 877,386 of buckwheat.

The commercial crops are as follows: Tobacco, 149,485 lbs., hops, 3,722, hemp, 430 tons, flax, 48,650 lbs.

The miscellaneous crops are:

Peas and beans, bushels	27,675
Irish potatoes "	4,171,690
Sweet " "	1,034,832
Wine, gallons	21,083
Hay, tons	508,729
Clover seed, bushels	39,208
Grass seed "	85,410
Flax seed "	3,241
Maple sugar, lbs.	3,455
" molasses, gallons	8,088

The value of the orchard products was in 1860, 429,402, and of market gardens which finds a ready market in New York and Philadelphia, $1,542,155, having trebled in ten years.

The number of manufacturing establishments was at the last census 4,060, with a capital of $40,000,000 using yearly $40,600,000 of raw material, employing 127,720 operatives, of whom 13,060 were females, and producing fabrics of the value of $81,000,000.

The value of the principal products is as follows:

Flour and meal	$6,399,610
Clothing	3,975,486
Cotton goods	3,250,770
Steam engines and machinery	3,215,673
Jewelry, &c	2,269,844
Iron castings	2,203,338
Boots and shoes	1,850,187
Lumber	1,602,319
Woollen goods	1,527,209
Iron, bar, and other (rolled)	1,370,725
Leather	1,297,627
India rubber goods	1,013,000
Malt liquors	865,910
Soap and candles	595,075
Iron, pig, (29,048 tons)	575,820
Spirituous liquors	490,842
Gas	239,474
Furniture	232,500
Printing	217,270
Fish, (shad, oysters, &c.)	209,277
Agricultural implements	198,200
Silverware and watches	11,500

It contains 12 principal cities and towns, the largest being Newark, with a population of 71,914, Jersey City on the Hudson, opposite New York, 29,226, Patterson on the Passaic River, and a large manufacturing place, 19,588, Trenton on the Delaware, 17,221, Camden, opposite Philadelphia, 14,858, Elizaboth, a great coal depot, 11,567, New Brunswick, 11,255, Rahway, 7,130, Burlington, once the home of Joseph Bonaparte, 5,174, Princeton, the seat of an ancient college of reputation, 3,618, and Hudson City and Hoboken, both opposite New York, the former with 7,229, and the latter 9,662 inhabitants. These two last, with Jersey City, may be considered commercially as suburbs of New York, with which they are connected by numerous ferries, on which large steamers capable of carrying a thousand passengers each are constantly plying.

The total of the direct foreign and domestic imports annually is $44,766.

The tonnage is 12,985 tons, and the same amount of shipping entered and cleared annually, and 4,264 built. 108,030 tons are owned in the State. Jersey City is a part of the collection district of New York and therefore subordinate, but it is expected that it will be made a port of entry and delivery, which will greatly add to its prosperity.

The canals of New Jersey are as follows:

Delaware and Raritan, between Bordentown and New Brunswick 43 miles long, 75 feet wide and 8 feet deep.

The Delaware feeder between Bull's Island and Trenton on the Delaware, 22¼ miles long, 60 feet wide and 6 feet deep. The celebrated Morris, at one time almost exclusively the property of foreign holders, 101 miles long 40 feet wide and 5 feet deep, between Jersey City and Phillipsburg, on which vast amounts of coal are annually transported to New York.

The railways are 29 in number; their aggregate length is 1,001 miles, of which 836 miles have been completed at a cost of $38,964,872.*

The Camden and Amboy, connecting the Delaware at Philadelphia, and the city of New York is the longest, being 92 miles in extent, being the great route southward to Philadelphia, Baltimore

* See Table of Railroads in the United States, p. 12, No. 1, Vol. XXXVIII.

and Washington, one of the most important and lucrative roads in the United States.

The valuation of the real and personal estate in New Jersey in 1860, was $467,918,324.

The pursuits of the people are largely agricultural and manufacturing. The soil is generally fertile, and well adapted to cereals, vegetables and fruits. On the Atlantic coast marl has been found underlying the sand in great abundance, and the consequence is that the land there is fast filling up with settlers, who find it easily cultivated and very productive. A railway passes through it. The ores of New Jersey are numerous and valuable; iron, copper and zinc abound, and a species of the former, celebrated as Franklinite. There are many smelting furnaces, forges, rolling and other factories engaged in the production of iron, zinc and copper.

The climate is mild and healthy. In short, New Jersey is a very prosperous and favored State, and stands high on the list in every respect.

English and American Coal Trains.

The *London Railway News*, in an article on the coal trade on the London and Northwestern Railroad, says: "An ordinary load for one locomotive is thirty-five trucks, but even that immense weight is sometimes exceeded." Now as a truck, according to the same authority, "holds between six and eight tons of coal," it follows that thirty-five trucks of eight tons each make 280 tons a maximum English load.

On the Philadelphia and Reading Railroad, last year, the loaded trains *averaged* 576 tons of coal, or more than twice the number of tons in a maximum train on the London and Northwestern Railroad. The newer engines on the Philadelphia and Reading Railroad draw 150 cars containing about five tons each, or nearly 750 tons of coal on freight.—*U. S. R. R. & Mining Register.*

Commerce of San Francisco.

The destination and value of exports from the port of San Francisco, exclusive of the precious metals, during the three years selected, were as follows:

Exports to—	1861.	1862.	1863.
New York	$1,605,034	$2,245,633	$2,736,435
Boston	98,345	1,192,489	1,505,690
Great Britain	2,838,004	1,355,217	1,697,822
Australia	1,056,401	332,385	489,685
Br. Columbia	1,177,152	2,195,903	1,746,801
Mexico	1,094,930	1,014,639	1,819,652
Peru	163,264	271,251	216,206
China	711,841	722,229	1,246,254
Hawaiian Is	288,877	293,370	357,369
Japan	15,577	21,598	43,901
Other countr's	838,647	920,680	920,584
Total	$9,888,072	$10,565,294	$12,877,399

This table includes the production of Oregon, British Columbia and Northern Mexico, as well as of California. The principal articles of California production were as follows:

Productions.	1861.	1862.	1863.
Barley	$361,452	$131,282	$65,044
Bread	64,892	69,805	65,290
Copper ore	135,240	370,200	719,300
Flour	858,425	688,234	767,270
Hides	444,995	947,253	924,567
Lumber	69,931	149,560	123,084
Oats	156,879	72,045	130,602
Quicksilver	1,579,850	1,138,961	1,073,078
Silver ores	211,345	34,740	118,109
Wheat	2,702,434	1,372,572	1,754,116
Wool	519,577	1,069,194	1,119,098
—and including articles of minor importance a total of	$6,795,758	$6,211,788	$7,208,289

Including exports of treasure, the entire exports of California productions during these three years may be classified as in the following table:

Products of	1861.	1862.	1863.
The mine	$42,103,193	$44,105,662	$47,982,398
Agriculture	3,265,471	1,246,350	2,013,975
The herd	1,041,217	2,027,082	2,182,155
The forest	69,931	149,460	134,086
The sea	21,828	21,868	11,285
Manufactures	962,875	798,191	873,854
The vine	8,000	25,836	81,456
Total	$47,472,217	$48,773,549	253,280,209

The following table shows the value and destination of treasure shipments from San Francisco during the years 1854 to 1863 inclusive:

Years.	Shipment of Treasure from San Francisco to— Atlantic Ports.	England.	China.	Panama.	Other Countries.	Total.
1854	$16,533,166	$3,781,080	$965,887	$204,592	$500,908	$52,045,633
1855	38,730,564	5,182,156	889,675	330,207	128,129	45,161,731
1856	39,895,296	8,666,289	1,308,852	258,208	578,732	50,697,484
1857	35,531,778	9,847,743	1,993,264	410,929	692,978	48,976,697
1858	33,891,236	9,265,739	1,916,007	299,265	175,770	47,548,026
1859	40,146,437	3,910,930	3,100,756	279,949	202,890	47,640,462
1860	35,719,296	2,672,986	8,374,680	800,819	258,185	42,325,916
1861	32,728,011	4,061,779	3,531,279	349,769	95,920	40,676,758
1862	26,194,085	12,960,140	2,660,754	434,508	322,324	42,561,761
1863	10,389,330	28,467,256	4,206,370	2,503,296	505,667	46,071,920
10 y'rs.	$341,659,147	$88,306,954	24,957,524	5,267,602	3,516,010	463,706,838

The imports answering to these exports are in some measure indicated by the following statement of the tonnage arrived at San Francisco during the year 1863:

Am. vessels from domestic ports	1,516	367,980
" " foreign ports	238	214,655
" " whaling voyages	12	4,300
Foreign vessels from foreign ports	182	54,254
" " whaling voy'es	1	200
Total	1,899	641,393

By a return from the Treasury Department the total value of imports at San Francisco for the year ending June 30, 1863, was as follows—in American vessels $7,848,969, and in foreign vessels $3,333,173 or a total of $10,684,142.

The present tendencies of the Pacific trade of California to the different countries are worthy of observation. To New York and Boston the leading articles are hides, wool and copper, as follows:

	1860.	1861.	1862.	1863.
Copper ore, cks.	....	11,155	72,938	109,470
Hides, number	200,116	177,998	315,751	308,189
Wool, bales	11,767	14,791	21,911	16,078

To Great Britain the exports chiefly consist of wheat and flour as follows:

Wheat, bags	458,495	1,022,664	590,485	844,022
Flour, barrels	86,875	70,945	8,582	12,200

To Australia and New Zealand the leading export is lumber; the former demand for breadstuffs being much below the exportation of 1861.

The East Indies send to California, coffee, sugar, rice, hemp, spices, etc., but taken little in return except gold and silver.

The exports to British Columbia, New Granada, Chili, Society Islands, Manilla, Japan, France, Cape of Good Hope, Central America and Russian possessions are of a miscellaneous character, flour, wheat, lumber and farm produce being the principal commodities shipped.

The table of treasure shipments indicates a great change of destination since 1861. Then the shipments to our Atlantic ports reached $32,628,011, while during 1863 they amounted to only $10,389,330. The treasure shipments to England on the contrary increased from $4,061,779 in 1861 to $28,467,256 in 1863. The cause of this revolution in the course of the carrying trade is sufficiently notorious.

The shipments of wool from San Francisco have been as follows for the four last years:

Shipments to	1860.	1861.	1862.	1863.
New York	11,767	13,244	13,127	9,862
Boston	....	1,547	8,784	6,216
England	315	1,193	78	316
Other countries	....	8	626	....
Total bales	12,082	15,987	21,615	16,898

The export of the important article of quicksilver for the past six years is shown by the following table:

Exports to	1858.	1859.	1860.	1861.	1862.	1863.
N. Y. and Boston	3,569	250	400	600	2,265	95
Great Britain	....	....	....	2,500	1,500	1,062
Mexico	12,901	103	3,886	12,061	14,778	11,590
China	4,132	1,068	2,715	13,788	8,725	5,889
Peru	2,000	671	750	2,804	3,439	3,376
Chili	1,364	930	1,040	2,069	1,746	500
Central America	....	....	....	110	40	40
Japan	....	....	....	50	25	....
Australia	....	325	100	1,050	800	300
Panama	....	133	185	57	124	120
Victoria (Vancouver)	186	19	327	116	5	42
Total flasks (70 lbs.)	24,242	3,399	9,348	35,995	33,749	26,014

The manufactures of California are unexpectedly prosperous, and materially reduce the necessity for importations. Cordage, cement, blankets, white and colored flannels, cloths and cassimeres, gunpowder, leather, malt liquors, tar, rosin, turpentine, soap, wines, are now manufactured with a degree of success which will probably control the home market.

The California supply of coal, chiefly from the Mount Diablo mines is on the increase, reaching 3,700 tons in 1863; but the demand is so great as to warrant shipments from Vancouver Islands, Bellingham Bay and Chili, and even from England and Australia.

The product of gold and silver on the Pacific coast is estimated at $55,000,000 for 1863, of which fully $7,000,000 was received from British Columbia. The total coinage at the mint during the same year was $20,251,417 97.

It is contended by the commercial journals of San Francisco, that the currency of California, which is mostly coin, is more abundant in proportion to population and wealth than that of the Atlantic States, altogether paper. The *Mercantile Gazette* of Feb. 12, 1864, represents the amount in circulation in the Pacific coast as $25,000,000; that the population of California with the adjoining State of Oregon and territories is 600,000 which gives $41.66 *per capita*. The total value of real and personal property in the Pacific coast is estimated by the *Gazette* to be $340,000,000, of which $25,000,600 is about 7 per cent. The currency of the loyal States east of the mountains, notwithstanding its expansion to meet the exigen-

cies of the nation is below those rates to population and property. The population of the loyal States and of the insurrectionary districts which are held by our armies is about 24,000,000. If the currency was at the California standard—$41 *per capita*—its aggregate would be $984,000,000, and a proportion of 7 per centum upon the total valuation of property would give an equal aggregate.

Chicago and Northwestern Railway.

The Chicago *Tribune* of the 12th inst. gives a description of an excursion from that city, over the Dixon Air Line, of the Chicago and Northwestern Railway Company, to celebrate the completion of their new bridge across the Mississippi River at Clinton, and concludes with the following statement of the condition of that company:

No enterprise is well placed before the American mind that does not meet the practical test of figures. "How does it pay?" We have chosen to seek from official sources the proof that enterprises having to do with the material developement of the West cannot be otherwise than remunerative in good hands. The following data are important as proofs of this nature:

The bonded debt of the company is	$10,093,000
The preferred stock is	8,430,500
	$18,523,500
The common stock is	11,990,500
Total cost of the road	$30,514,000
The bonded debt bears 7 per cent. interest, it requires therefore to pay it	$706,510
Preferred stock is entitled to a dividend of 7 per cent	590,100
To pay interest and dividend on preferred stock	$1,296,610
The road has earned since the consolidation, June 1st, 1864	4,226,844
At the same rate per year its earnings would be	7,246,019
Its operating expenses have been little less than 57 per cent of its earnings.	$4,130,000
Expenses for rent of Iowa lines for six months ending Nov. 30 have been $252,637; at the same rate per year.	505,274
To pay interest and dividend on preferred stock	1,296,610
Total expenses	$5,931,884
Surplus applicable to dividend on common stock	$1,314,135
Dividend of 7 per cent on common stock	839,350
Surplus after dividend	$474,785

Since consolidation there have been added to the equipment 17 new locomotives, 250 freight cars, 5 passenger cars, 5 baggage cars. These are all of the best construction, and, save a share of the locomotives, are from the Company's works. New and large engine houses have been built at Chicago and Junction station. The Depot grounds at Port Howard and Janesville have been largely improved, and coal sheds for the whole road, tanks, &c., have been built at an expense of over $100,000.

At the time of the consolidation the Galena and Chicago Railroad was represented by 60,305 shares of capital stock. This has all been converted into Chicago and North-Western stock but about twenty five hundred shares and the exchange is constantly being made. Nearly all the outstanding stock of the old Galena is now held in Europe or the seceded States. The increase of earnings for the past seven months of the consolidated road amounts to the sum of $1,415,300, a sum of itself more than sufficient to pay its interest and a dividend of seven per cent. on its entire stock, leaving the earnings as they stood before consolidation to pay the operating expenses of the road.

Dry Goods Trade.

Statement showing the importation of dry goods at New York for the past three years:

Manufs. of	1862.	1863.	1864.
Wool	$25,718,592	$29,713,956	$31,411,965
Cotton	8,501,512	7,913,957	9,405,246
Silk	11,568,807	15,534,469	16,194,080
Flax	7,666,946	10,381,059	11,621,831
Miscellaneous	2,665,370	3,731,106	3,956,630
Total	$56,121,227	$67,274,547	$71,589,752

The importation monthly for the last three years has been as follows:

	1862.	1863.	1864.
Jan.	$2,965,952	$5,269,181	$8,184,314
Feb.	5,344,514	5,027,857	9,437,454
March	6,471,901	9,204,881	12,636,127
April	3,296,498	4,384,007	5,220,245
May	2,944,483	3,612,511	6,081,136
June	3,585,102	2,901,423	4,801,703
July	5,628,014	4,713,365	6,762,750
Aug	8,707,710	8,316,878	7,529,800
Sept	6,185,193	5,892,712	4,147,449
Oct.	3,865,798	6,509,783	2,996,100
Nov	3,710,357	6,071,208	2,235,107
Dec.	3,466,405	5,871,041	1,558,567
Total	$56,121,227	$67,274,547	$71,589,252

The subjoined statement carries the comparison back to the year 1849:

1849	$44,435,571	1857	$90,534,129
1850	60,106,375	1858	60,154,509
1851	62,846,731	1859	113,152,624
1852	61,654,144	1860	103,927,100
1853	98,704,211	1861	48,636,689
1854	80,832,936	1862	56,121,227
1855	64,974,062	1863	67,274,547
1856	93,362,893	1864	71,589,752

☞ The Citizens (Pittsburg) Passenger Railway Company have elected James Verner, President; N. Holmes, Treasurer; and J. R. Murphy, Secretary.

Central Pacific Railroad of California.

We have received the report of S. S. Montague, Esq., Acting Chief Engineer of the Central Pacific Railroad, dated October 8, 1864, which is based on the recent surveys, progress of construction, and the probable receipts of the line as near as they can be estimated. It commences with a reference to the report of the late Engineer in Chief, T. D. Judah, made in 1863, whose survey in 1861, developed the feasibility of a railroad route across the Sierras, with a maximum grade of 105 feet to the mile. It appears that five of the most prominent supposed routes were carefully examined after the most approved scientific rules, and the one chosen has proved to be the best if not the most practicable of any for the passage of the mountains. Not only is the Pass selected the lowest, but the route is the only one on which a continuous line of levels between tide water and summit has been obtained.

The route selected is the most direct of all in its general course, and the distance between the City of Sacramento and the foot of the maximum grade on the Eastern slope is but 118 miles. It follows one of the main spurs of the Sierras, which forms the divide between the waters of Bear River and the Yubas on the North, and the American River on the South, avoiding in this way the deep canons formed by these streams, and the ascent of the Western slope is attained to the height of 7,000 feet without any loss of grade beyond the first 18 miles. But what is still more important is the discovery and realization of the fact that by taking this route the Truckee Pass, the second summit of the Sierras and the Washoe Mountains is avoided, by which the grades are saved and a narrower snow belt obtained which is of material importance in the future value of the road.

The report states that on the portion of the road already completed, the grades have been fixed for a distance of 4½ miles, at 105 feet per mile, which is 11 feet less than the limit allowed by the Act of Congress. Over this part of the line 6 trains daily pass with the average speed of express trains. The other grades thus far used are less than 80 feet to the mile. It also appears that 60 per cent. of the first division is straight, and in the mountainous parts 20 per cent. of the line is also straight.

Some of the first divisions on the first fifty miles have been entirely relocated, securing a great reduction of cost, and the avoidance of a tunnel at Baney's Ranch. Indeed no tunnels will be required on the first division. As no portion of the road was completed at the date of the last report of the Chief Engineer, the following reference is made to the manner of construction of the first division:

Sections 1 to 18, between the City of Sacramento and the California Central Railroad, were put under contract December, 1862, and completed February, 1864, and ready for business. The second sub-division, comprising sections 19 to 31, were commenced July, 1863, and completed June, 1864, and the road opened to New Castle on the 6th of the same month. The Howe Truss Bridge across the American River, comprises two spans of 192 feet in the clear, with approaches of trestling 3,000 feet in length, making a total length of bridging of 3,400 feet. A bridge at Dry Creek 4 spans, of 54½ feet each, and another at Antelope Creek of one span, are the only other wooden structures in 31 miles distance. The culverts are all built of hard-burned brick, or of granite, as circumstances permitted, and are of the most solid and durable description. The ties are generally of Coast or *black* redwood. The track has been laid in a workmanlike manner, and well ballasted, with decomposed granite, and every section is fully supplied with material for the purpose. Commodious freight and passenger depots have been erected at Sacramento and Newcastle, an engine house at the former and stalls for 5 engines. Various facilities have been placed along the line, and a telegraph also.

The rolling stock consisted of 5 locomotives; 6 first class passenger, 2 baggage, 25 box freight, and 25 platform cars; 1 heavy freight locomotive and 20 freight cars are being put together for immediate employment. There was on the way by the sea, at date of the report, the following additional stock: 4 first class passenger, 2 mail and express, 24 freight, and 20 gravel cars. Two other heavy freight locomotives were being constructed by Danforth, Cook & Co., of Paterson, N. J., and extra axles, car wheels, tires, etc., are ordered, so that accidents may be repaired without delay. The rolling stock is all of the best description.

The work in the third sub-division beyond Newcastle to Clipper Gap, a distance of 12 miles, is

progressing rapidly, and is expected to be completed in February, 1865.

In some places trestling has been substituted for embankments where Puget Sound pine and redwood, which last for 8 or 10 years have been used.

Upon the subject of the location of the second principal division of the road, the Engineer says:

The work of location on this division was commenced in July, 1863, but owing to the extremely rugged character of the country, the progress of the survey was necessarily slow, and but about eighteen and a half miles of permanent location were made. New experimental lines were run some eight miles further, and the preliminary location had been commenced, when owing to the lateness of the season, the party was withdrawn from the field.

The greatest difficulty encountered in the work of location, is that of maintaining a continuous ascending grade, which, were it possible to accomplish, the maximum grade from the foot hills to the Summit of the Sierras, could be reduced below 80 feet per mile; but as the frequent depressions or gaps in the Divide, along which the line passes, render a continuous grade impracticable, they necessarily become commanding points in the problem of location.

Thus in order to pass the "Illinoistown and Long Ravine Gaps," we are compelled to maintain for nearly eight miles, a very light average, and in many places a level grade, making in that distance an altitude of but 115 feet, while immediately following is a section of three and a half miles of maximum grade.

From the commencement of the second division, the line passes along near, and frequently upon the summit of the Divide, about two miles, to the Lower Illinoistown Gap; thence along the American River Slope for about one half mile, when it recrosses the Divide through "Bear River Gap," (where a tunnel 500 feet in length will be required,) and thence follows the Bear River Slope of the Divide three and a half miles to Long Ravine. Some heavy work occurs on this portion of the line, but with the exception of the tunnel referred to, will not exceed the average of the work on the last five miles of the first division. The succeeding nine miles from Long Ravine to Gold Run, comprises some of the most formidable work encountered upon the Western Slope of the mountains. Crossing Long Ravine at a height of one hundred and fifteen feet, the line curves sharply to the right, and passes, with a maximum grade along the steep, and in many places precipitous side hill of Rice's Ravine, crossing a succession of short, steep side ravines and gulches, and intervening spurs to Cape Horn, which is a precipitous, rocky bluff, about twelve hundred feet in height above the American River.

The construction of the road around this point, will involve much heavy work, though the material encountered is not of a very formidable character, being a soft friable slate, which yields readily to the pick or bar.

The dip of the ledge is about seventy-five degrees, or nearly perpendicular; but as our line at this point crosses the line of stratification nearly at right angles, the cuttings will admit of a much steeper slope than can be generally adopted for that class of material.

The road around this bluff will necessarily be mostly an excavation, as the construction of an embankment, even with a heavy retaining wall, would in many places be unsafe, if not impracticable. Passing around the face of this bluff, with an aggregate curvature, in one direction, of one hundred and eighty-six degrees, the line enters Robbers' Ravine, the western slope of which it follows for about one and a half mile to "Oak Summit," at the point where the old pack trail crosses the same.

Passing thence via Trail Summit, and along the side hill above the North Fork of the American river, encountering a number of abrupt, deep ravines, (some of which it will probably be necessary to cross temporarily on trestling,) the line enters "Secret Ravine," which it follows for about three-fourths of a mile, and thence follows a tributary of the same to its source, near the Illinoistown and Dutch Flat stage road, about one and a half miles east of Madden's toll house. Thence the line runs near the stage road to "Secret-town Gap," which it crosses at the height of fifty-five feet. The crest of the ridge or divide, (between the American and Bear River rivers,) is here so narrow as to barely admit of the construction of trestle work, and the sinuous course of the line precludes the possibility of using any other kind of wooden structure.

Trestling, strongly and substantially built of the best mountain timber, red fir, sugar pine or tamarack, can safely be depended upon for five or six years, and in the meantime with the facilities for transportation of material which your road will afford, such structures can be replaced either with embankments or stone viaducts, as may be deemed most advisable.

From Secret-town Gap to Gold Run, a disance of two and a half miles, the line passes around the Northern or Bear River slope of Cold Spring Mountain, encountering a succession of deep, abrupt ravines, where some of the heaviest work on this division occurs.

One tunnel of about three hundred feet in length will be required on this portion of the line.

At Gold Run the line attains, and thence follows the summit of the Divide, which presents a very uniform surface for nearly two miles, and the work will be comparatively light.

Leaving the summit of the ridge near Bradley's reservoir, the line bears to the left, and following the Bear River slope of the hill, passes one half mile south of, and three hundred feet above the town of Dutch Flat, to Toll's Mills, a distance of 67 miles from Sacramento, at which point the location survey was suspended. As before stated, the experimental and preliminary location surveys were extended several miles further, and I would suggest the propriety of resuming the surveys at an early day, as the labor required to prepare this division for the contractors will necessarily occupy several months. The line beyond this point cannot deviate materially from the line of Mr. Judah's preliminary survey.

The peculiar location of your road, passing as it necessarily does near the summit of the divide, and consequently crossing the ravines and canons near their sources, precludes the necessity for large and expensive culverts, or other structures for the passage of water, but few places occurring where a water-way of more than forty or fifty feet area of aperture will be required.

The construction of over one hundred miles of mountain road, and that too across one of the most formidable ranges on the continent, where so few important streams are crossed, and so small an amount of expensive bridging actually required, will certainly present an anomaly in the history of railroad enterprises.

In calculating the amount of business to be done on this road, the wants and supplies of the most important mineral districts, the Washoe, Esmeralda, Silver Mountain, Humboldt and Reese River, are considered as certain resources, especially in the articles of lumber and firewood, for which there is a daily increasing demand on a large scale. The through freight from California across the mountains is also counted upon, at about 130,000 tons of freight going east, between California and Nevada, and the return freight of minerals. This freight eastward in 1863, is stated to have been $13,000,000; 116,000 tons are therefore safely assumed, as the freight to pass over this road in that direction. The passenger traffic is estimated as likely to be 263 per day, or 95,995, as indicated by the present amount of stage travel. The report gives the probable return from California business alone, as follows:

Passengers, $208,050, (in gold); freight, $496,000—total, $704,050.			
The receipts from through business to and from Nevada, is estimated as follows:			
116,000 Tons merchandize..	$22	50.	$2,610,000
100,000 Cords of wood	5	00.	500,000
30,000,000 Feet B. M. lumber..	10	00.	300,000
16,000 Tons return freight.	10	00.	160,000
96,000 Passeng'rs both ways	12	00.	1,152,000
Express and mails			30,000
Total			$4,752,000
Add for business in California			704,050
Total annual receipts in gold coin.			$5,456,050
Dednct for expenses for operating, etc.			1,636,800
Leaves net revenue of			$3,819,250
Or 25 pr. ct. per annum on a capital of.			$15,200,000

The estimated net receipts to Dutch Flat, where the local business of Placer, Nevada, Sierra and El Dorado may be expected, are stated at $1,277,050.

In reference to the development of the mineral resources of Placer and the adjoining counties, which embrace the richest mining district of the State, and which will add largely to the local business of the road, the report says:

Besides the placer diggings of the foot-hills, and the heavier gravel deposits through the central and upper portions of the counties referred to, which have heretofore occupied almost exclusively the attention of the gold miner, the large and valuable veins of quartz which traverse the whole western slope of the mountains, are being prospected and worked with success. Recent discoveries of quarts of unusual richness have been made in the vicinity of Illinoistown, and also on Diamond Creek, Nevada county, within five miles of Bear Valley. Mills have been erected and extensive preparations made for the reduction of the rock. The development of the vein at the latter place indicates that it will prove one of the richest yet discovered in that county. At numerous other points in the vicinity of the line, important and promising veins of quartz have been discovered, and with the fine water privileges in the vicinity of these ledges, it only needs capital and enterprise to develop a source of immense wealth to the country.

At Gold Run at Dutch Flat the railroad line crosses the rich vein of auriferous gravel which stretches from Quincy and Pilot Peak on the north, through Downieville, Forest City, Moore's Flat, Alpha, Dutch Flat, Iowa Hill, Forest Hill, Georgetown, and so on to the southern mines, and in which the richest deposits of gold are found. At those places, and at Red Dog, Waloupa, Little York, You Bet, Yankee Jim's, Michigan Bluffs, and other important mining towns in the vicinity of the railroad, the mines are worked by the hydraulic process, and are yielding rich returns.

Copper ore is also found in the immediate vicinity of Auburn, and between that place and Grass Valley. Some of these mines afford evidence of great richness, and will undoubtedly, in time, be a source of revenue to the road.

Soapstone of an excellent quality, and in inexhaustible quantities, is also found near Rattlesnake Bar, but a few miles from Newcastle. This rock is an excellent substitute for fire-brick.

Limestone of a superior quality is also found at numerous points in the vicinity of the road. A large portion of the lime brought to this market, is from the kilns at Alabaster Cave, Lime Point (two miles from Auburn), and the American River quarries, about one mile from Neilsburgh.

Extensive beds of iron ore are found in the vicinity of Neilsburgh, and about one mile from the line of the road. This ore is of a superior quality, and will yield from 70 to 90 per cent. of metal.

The recent discovery and working of the coal mines at Crystal Peak, near the Truckee River, and in the immediate vicinity of the road, is an important fact for consideration in connection with

your future business. From accounts received, it is believed that coal of a superior quality, and in inexhaustible quantity, has been discovered at the eastern base of the mountains, at the point named.

Granite quarries are found at numerous points between Rocklin and Auburn, a distance of thirteen miles, and for quality of rock, are unsurpassed by any in the State.

All varieties of color are found, from the darkest to the lightest, and of every degree of hardness desirable for different class of work.

The most important quarries yet opened are at Rocklin, within twenty-two miles of Sacramento, which is a less distance that similar quarries can be reached by any other road. The unusual cheapness with which this rock can be quaaried, the ledges being everywhere accessible by spur tracks, thus avoiding the cost of intermediate transportation, will, with the low rates of freight at which it can be delivered here, place it in market at a figure that will defy competition.

The value of the unlimited motive power afforded by the waters of the Truckee, Yuba and Bear rivers, and the facility and cheapness with which it can be applied to manufacturing purposes, are facts worthy the attention of capitalists. The rapid declination of these streams renders them available at almost any point; and the dense forests of pine, fir and tamarack growing upon their slopes, suggest a ready means of securing the advantages which they offer. Abundant power can also be obtained by using the water of the mining ditches, which, until transit by rail is supplied, are in some localities more convenient of access than the natural streams.

This water can be used without wastage, and consequently at but trifling cost, as it will in no case be necessary to divert it from its present channel, except for the short distance required to gain the desired elevation.

Other ditches in the vicinity of Gold Run and Dutch Flat with a larger supply of water, also present similar advantages.

The completion of the first fifty miles of the Road, will render available a large amount of the timber lands adjacent to the line, which are now comparatively valueless. For general use the red fir is probably the best timber that can be obtained until the Road reaches the Yuba, where tamarack is found in abundance. The latter is, the best timber produced in this State for ties and other railroad purposes. It will resist decay as well as redwood, and in point of strength and elasticity, is probably equal to the Puget Sound pine. The completion of the Road to Newcastle has placed within reach of the Sacramento market, large quantities of the live oak, white oak, etc., growing upon the foot hills, which for lack of facilities for transportation has hitherto borne but a nominal value.

The lands granted to the Company by the National Government, viz.: 20 Sections, or 12,800 acres for each mile of road, is an important source of revenue for its construction. You are now entitled to these lands for thirty-one miles, or a total of 396,800 acres, which at the minimum Government price may be estimated as worth $496,000.

Many of these lands bordering on the Sacramento, American and Bear rivers are among the most fertile in the State. The value of the timber products of the foot hill lands has already been alluded to. Many of the latter are also susceptible of a high state of cultivation. From their peculiarity of soil, they are particularly adapted to the cultivation of fruit, and in ordinary seasons, the cereals are grown with success. With a proper system of irrigation, these lands may be made highly productive. For the production of the vine, they are considered as far superior to the low lands of the valley, and this fact is already attested by the successful cultivation of numerous and extensive vineyards. That the wine-producing districts of this coast will in future be confined almost exclusively to the foot hills, there can be no doubt.

Already the facilities for travel are greatly increased. By means of the railroad and the stages in connection, Virginia City may be reached in from 4 to 6 hours less time than by any other route. Hotels have been erected along the route, and it is ascertained that the railroad may be kept open without more than the usual difficulties throughout the winter. The report treats this portion of the subject in a very clear and satisfactory manner.

The surveys in Nevada, are being carried forward with great and satisfactory success. The following is a Synopsis of the Financial condition of the company, December 1, 1864:

The total indebtedness of the Company is as follows, viz:	
First mortgage bonds issued	$1,394,000 00
Individual accounts	159,226 14
Unadjusted accounts, and November pay-rolls	20,000 00
Bills payable	20,859 79
	$1,594,085 93
The assets of the Company are:	
Amount due from stockholders	$138,596 68
Placer county bonds	75,000 00
Sacramento county bonds	163,500 00
Amount due from the City and County of San Francisco 7 per ct. bonds, principal and interest payable in gold	400,000 00
Amount due from the Government of the United States, in 30 year 6 per cent bonds, (on the 30 miles of road completed and accepted by the Government)	1,264,000 00

Every alternate section of public land, (except mineral land,) for twenty miles on each side of the road, granted to the Company by the United States.

Under authority of an Act of the Legislature of the State of California, the Company has executed and holds one million and a half of bonds, on which the State pays interest at 7 per cent. in gold coin, for twenty years, from the 1st of July, 1864.

Thirty-one miles of railroad and telegraph line completed, with all necessary depot buildings, etc.

Grading beyond Newcastle has been done to an amount exceeding one hundred thousand dollars.

Eight locomotives, ten passenger cars, four mail and express cars, one hundred and twenty-four freight cars, five hand cars and three construction cars, extra axles, wheels, tires, etc.

Six thousand tons of iron, about three thousand tons of which are laid, the greater part of the balance has arrived; there is also purchased, but not yet shipped, two thousand tons additional.

Chairs and spikes sufficient to lay all the iron, and ties enough for twenty-two miles of road beyond Newcastle, are on hand.

On the 26th of April, 1864, the track was completed from Sacramento to Junction, 18½ miles, and trains were run daily over the road to that point. Little freight, however passed over the road until the 10th of June, when it was opened to Newcastle, 31 miles from Sacramento. The earnings of the road from April 26 to Nov. 30, were as follows:

Passengers, 48,941	$63,403 15
Freight	38,666 89
Express matter	1,487 50
Total	$103,557 54
Expenses of operating	56,289 17
Net earnings in gold	$47,268 37

The average speed is 22 miles per hour for passenger trains, and 15½ for freight traics. The number of miles run by trains was 23,474.

On the extension of the road to Rock Creek or Neilsburg station 42 miles from Sacramento, soon to be completed, the earnings will be increased 50 per cent. while the expenses will not be materially increased.

Interest and Dividends.

The Bellefontaine Railway Company has declared a dividend of three per cent., payable on the 1st of February.

The Philadelphia and Trenton Railroad Company have declared a semi-annual dividend of 5 per cent., clear of all taxes, out of the profits of the last six months, payable on and after the 31st instant.

The Delaware and Raritan Canal and Camden and Amboy Railroad and Transportation Joint Companies have declared a semi-annual dividend of five per cent., free of United States taxes, payable on and after the 31st of January.

The Connecticut and Passumpsic Railroad Company have declared a dividend of 3 per cent. on the preferred stock, payable on the 28th inst.

The New York Central Railroad Company have declared a semi-annual dividend of 3 per cent, payable February 20.

Connellsville and Southern Penn. R. R.

It has been currently reported here for the last day or two that the company only desire to extend their line of road from Mt. Dallas, the terminus of the Bedford Railroad in this county, to the terminus of the Connellsville Railroad in Fayette county, and that no road will be built from Bloody Run to Chambersburg. We do not pretend to say that this report is correct, although there is a plausibility about it which we do not like too well. We think it would be bad faith on the part of the company to the citizens of the counties below us, as well as to a large portion of this county, to deviate from the plain propositions suggested by those who were interested in securing the incorporation of the company, and accepted by those who urged the adoption of the measure, in the counties referred to. We believe it was fairly understood that the road was to start at some point in the Cumberland Valley, and we hope that that understanding will be adhered to. If there is any foundation for the report spoken of, it is evident that the Central company only desired to occupy the ground to keep others from doing so. This argument was used last winter against the incorporation of the proposed company, and from present appearances there was good ground for it. It would be well for the parties interested in a grand trunk road to see that their interests are not thus overridden. We, of course, desire the road above all things, but if a road is to run through this section, let it be a road that will traverse the entire southern border and develop the entire southern tier of counties, otherwise the project will be a failure to a certain extent.—*Bedford Inquirer.*

☞ The *Tribune* says that a temporary injunction has been issued against the managers of the Michigan Southern Railroad Company, restraining them from compromising the arrears of dividends upon the guaranteed stock, as advertised. It is returnable Feb. 6. The complaint takes the ground that there was not, prior to 1862, either net income to distribute as dividends, or any right in the consolidated Company to issue stock in the form it now stands.

☞ The railway between Stockholm and Malmoe, a town at the south of the Swedish peninsula on the Sound, nearly opposite Copenhagen, has been opened. The capital of Sweden is in consequence at a distance of only twenty hours from the Continent.

American Railroad Journal.

Saturday, January 28, 1865.

Stock Exchange and Money Market.

The fall or gold and the depreciation of securities in general, have been the features of the last week's movements in the market. We confess we do not see why the sympathy should have been so great between them. The value of railway property must be justly considered as due to its intrinsic merit, permanence and management. Take any one leading stock. No one for a moment pretends that on a return to specie payments, the shares will fall to a specie price. If so New York Central will go down to 50, Erie to 34, and all other companies in a similar degree. Bank stocks would also decline; the Bank of Commerce would be quoted at 55, Delaware and Hudson 75. No one in his senses expects to see any such result. It is therefore clear that any speculation based upon such calculations will be sure to fail. That gold should fall is not surprising. It has several times declined during the war in the most rapid manner, notwithstanding all the combinations and interests at work to keep it up. And these have been active beyond precedent. Any one familiar with the gold room will have frequently been surprised to see who were the operators for a rise. All classes of people seem to have engaged in it. Small margins have been as readily accepted as large. Persons in very moderate business have risked their small capitals in the hope of sudden gains. The stories in circulation as to the success of various operators even in a small way, have led multitudes of others to the shambles. All classes have been engaged in gold and speculations, and all for a rise, as it is the rising market which most excites cupidity. We have never therefore considered the quotations of this article any guide to valuations of any other, and the facts justify the position we have taken. There are many commodities which have never risen to the gold standard, and when it is attained, their prices will not materially fall. The auction sales in this city for months past have shown any thing but a tendency to advance in many leading staples.

We therefore repeat our convictions that Railway shares though yielding to the sympathetic force of a falling market in gold, are based on better foundations than rumors, or margins, or credulity.

By the returns of the associated Banks the last week we perceive that their loans have decreased $2,626,164, the deposits also $2,862,944, the specie $1,146,039, and the circulation $94,178. It will be seen by our weekly records of their proceedings, that there is no particular line of policy pursued by these institutions, but that they are governed entirely by the circumstances of the hour. What part they are disposed to play when specie payments are resumed remains to be seen. Many of the old institutions are preparing to come under the National Banking system, and it is said propose to make circulation one of their sources of future profit, as it will have a sphere as large as the whole Union, while hitherto it has been local and restricted.

We notice that some cotemporaries are predicting that "stock speculators and merchants must share a common fate" and see their "gains rapidly disappear." For the stock operators we have little sympathy, but we doubt whether the regular merchant is in much danger. His stock is small, his trade has been for cash, he has given no credit. His losses must be therefore very limited. This we think will be found to be the result with all those who have conducted their business with prudence. For the rest experience will be their teacher. On the other hand others familiar with the Money Market, the history of our railways, and the extent of their business perceive a stability in their shares and securities which cannot ever characterize "goods, wares and merchandize" so called. The fall of gold will not lessen the traffic while it will diminish the expenses, and probably the real freight of speculation would in no other form be shown, than by investments in this kind of property under the present temporary decline.

The imports at this port for the week ending

January 21 were $2,169,904, against $5,359,274, the same week in 1864, and the exports of domestic products were $4,064,905, against $2,871,565 the same week last year.

The amount of gold received for duties at this port, between July and January 21, was $27,396,188, and the amount paid out for interest on the public debt in the same time was $21,424,577. It is a noticeable fact that of the interest ordered to be anticipated to the public creditors, on the 18th of November last, $5,231,726 was uncalled for by the holders down to the 1st of January.

Money continues to be plentiful at the usual rates, and exchange stands at about the same price as it has done for months back. The shipments abroad have at the same time sensibly diminished. Our exports are increasing so largely that according to the received notions in commerce and political economy, there should not be much longer any sound reason for remittances in coin beyond the amount due to foreign holders of our Government securities.

One of the most interesting subjects now attracting the attention of our financiers is that of the production of gold and silver in our auriferous and argentiferous States and territories. Recent statements by travelers and eye witnesses who have just arrived from the overland journey are of the most surprising character. We have as yet no accurate statistics of the number of gold and silver mines actually and successfully worked. But they are counted by thousands and the number is increasing. Nothing is wanted but easy and safe transportation to the territories, to fill them with miners. A railway to Denver is the first practical movement for this purpose, and it is announced that this is to be attempted forthwith. The territories of Colorado and Idaho seem at present to be the preferred homes of the adventurous. The former contains a population of Americans amounting to 56,000, and is stated up to this time to have yielded one hundred millions of gold. The product is as yet only brought forward in the shape of ingots, the mint never having been put into operation for causes that reflect no credit on those responsible for the work. It is certainly a subject worthy of profound consideration as to how the Government should be enabled to derive revenue from these natural Sub-Treasuries. It has been at times suggested, that as soon as peace is established a large portion of the army whose time of enlistment is unexpired might be transferred to and settled as military colonists in those regions, assisting in constructing the Union Pacific Railroad, its branches, and in preparing future happy homes for themselves.

It is observed that Governments have drooped since our last. We may assign as a probable cause for this movement that the further issue of 7-30's with unexpectedly the legal tender clause, offers an immediate profit as compared with those securities longer on the market and held at advanced rates, and therefore withdraws public attention from them. Another reason given is that the losses sustained by a large class of operators in gold and railway shares, have compelled considerable sales of Governments in order to meet engagements connected with these losses. We give these opinions for what they are worth.

It is really surprising that Government bonds do not stand as high as they deserve. Take for instance the 10-40 5 per cent. bonds. We do not see the least reason why they should not bring as large a premium as Boston City 5s of 1887, now selling at 116. Are not the U. S. 6s of 1881, as good and safe an investment as Massachusetts State 6s of 1875, which sell at 120½; or California 7s of 1878, which bring 155? Is not the responsibility of the United States, *including* Boston, Massachusetts and California, as great as either of these places standing alone. The principal and interest of all these securities are payable alike in gold. The interest on the bonds of the United States is free from taxation; that of the States, cities, railroad companies, etc., etc., is subject to taxes of every description, and contributed last year three per cent. to the United States internal revenue fund. Dividends upon railroad stocks are taxed 5 per cent.; in Pennsylvania an additional State tax of 5 per cent. is added; and then to crown all an income tax of 3 per cent. upon the net amounts was levied, and collected. From all these burdens the holders of National securities are exempt. And yet this inequality of value in the market is persistently maintained against every dictate of common sense. It is time the error was dissipated.

The balance in the Sub-Treasury in this city on Tuesday, was $29,123,631 64. That in the Sub-Treasury in Boston is upwards of five millions.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Ohio 6s, 1881, 103; Detroit, Monroe and Toledo 1st mort., 98; Lackawanna and Western 1st mort., 105; Wyoming Valley Coal, 46; Central Coal Co., 40; Copake Iron, 4; Atlantic Mail S. S. Co., 153; Mariposa 1st mort., 158; Merchants Bank, 111; Am. Ex. Bank, 125; Metropolitan Bank, 126; Bank of Commerce, 112; Merchants Ex. Bank, 98; Ocean Bank, 95; Hanover Bank, 105; 4th National Bank, 100; Bank of Commonwealth, 103½; Corn Ex. Bank, 118; Atlantic Bank, 101; Park Bank, 146; Mechanics Banking Ass., 101; Market Bank, 105; Importers and Traders Bank, 108; Central Bank, 105.

Philadelphia.—Pittsburgh 5s, 75; do., 6s, 90; Allegheny Co. coupon 5s, 77; Pennsylvania 6s, 1879, 100; Reading mort. 6s, 99; Green and Coates street R. R. 7s, 95; Second and Third streets R. R. 1st mort., 101; 13th and 15th streets R. R., 24; Hestonville R. R. 15½; Clinton Coal, 1; Big Mt. Coal, 5; Fulton Coal, 6¼; Shamokin Coal, 14⅞; Preston Coal, 30; Swatara Coal, 6; Keystone Zinc, 1¼; Atlas Oil, 1⅝; Bruner, 1⅜; Big Tank, 2⅛; Bubbling Spring, 1½; Continental, 2; Caldwell, 6½; Cow Creek, 2.31; Crescent City, 1⅞; Corn Pl., 5⅞; Curtin, 13; Cherry Run, 30; Duncard, 1; Dalzell, 8⅝; Densmore, 5¾; Excelsior, 1⅜; Empire and O. C., 1½; Egbert, 3¼; Eldorado, 1⅞; Franklin, 1¾; Farrel, 1⅜; Gt. Basin, 2½; Hibbard, 1⅞; Howe's Eddy, 1½; Hyde Farm, 3.94; Krotzer, 1¾; McClintock, 6¾; Maple Shade, 24⅞; McCrea and C. R., 1½; Mingo, 3½; McElheny 5½; Mineral, 2¼; North Carbondale, 2¼; Noble and Delamater, 10; Organic, ¾; Oil Creek and Ch., 3⅞; Oil Basin, 9; Olmstead, 2⅞; Oil Creek, 8; Phila. and Oil Creek, 1⅜; Perry, 8⅝; Phila. and Tideoute, 3⅝; Pope Farm, 1½; Rock, 3⅛; Ross, 1¾; Rathbone, 2; St. Nicholas, 4; Sherman, 1.44; Story Farm, 2¼; Story C., 6¼; Story Centre, 6; Seneca, 4; Tarr Home, 5½; Tack, 3½; Union, 1⅞; Walnut, 3¼; Northern Bank of Kentucky, 125; Mechanics' Bank, 33; Manuf. and Mech. Bank, 30½; Commercial Bank, 60; Girard Bank, 52½¼. The latest quotations are: City 6s, 92¾@93; do., new, 97¾@97½; State 5s, 94½@95; do., coupon, 96@98; do., 6s, W. L., 103½@104; Phila., Wil. and Balt., 68¾; Reading, 52¼@52⅜; do., 6s, 1870, 100@101; do., bonds, 98½@99¼; Camden and Amboy, 137@140; Penn. R. Va., 00@05; do., 1st mort., 100@101; do., 2d mort., 100@103; do., 3d mort., 28@30; do., guar., 100@112; Marietta and Cincinnati 7s, 1891, 95@95; Central Ohio 1st mort., 92@100; do., 3d mort., 85; do., 4th mort., 50@59; do., income 1887-'60, 40½@42; Western Md. bonds, 75@85; do., guar., 107@110; Maryand 5s, coupon, 1870, 100@108; do., Ins., 100@108; do., 1890, 100@108; Baltimore 6s, 1870, 100@101½; do., 1873, 104@108; do., 1875, 105@106; do., 1886, 108@107; do., 1890, 105@108; do., coupon, 107@109½; do., 5s, 1838-'70, 98½@100; City Passenger R. R., 16@18; Canton Co. 27½@28; Gardner, 0.50@0.60, Gas Coal, 1.90@1.95; Maryland, 0.65@0.70; North State, .10@.15; Springfield, 1.25@1.40; George's Creek, 110@118; Santa Clara, 24@24½; Balt. Chrome, 2.40@2.50; Bare Hill, 2.85@3.10; Atlantic Coal, 1.20@1.25; Mineral Hill, 1.50@1.50; Baltimore Coal, 1.35@2.00; Laurel Cannel Coal and Oil Co., 5.00@5.15.

Substitute for Locomotives for Light Travel.

In another column we copy an account of the performance of a Steam Passenger Car, built by Messrs. Grice & Long, for the Utica and Clinton Railroad. A substitute of this kind is much needed on Tributary and other Roads, where the travel is light, and we are inclined to believe the car referred to, is just what is required where economy is desirable. The cost of running such cars, is not over one third the cost of Locomotives to do similar work, while it saves the wear and tear incident to a Locomotive train. The weight of these cars including Engine and all machinery, Baggage Room, with seats for 40 passengers, with coal and water for 20 miles will not exceed 14 tons; to perform same service with a Locomotive train, the weight would be not less than 42 tons, a saving of two-thirds or 28 tons. The relative cost say to run 100 miles, would be in about the same proportion as the weights of the steam car, only requiring an Engineer and Conductor, while in addition to these the Locomotive train would require a Fireman and Brakeman; and the consumption of Fuel would be over two-thirds more, aside from the saving of oil, which would be a large item, from the fact that the Engine and machinery of the Steam Car is very simple and compact, in addition to which she has but eight wheels, while the Locomotive trains to do the same work would have not less than 28 wheels or journals to oil.

We understand the enterprising Patentees of these cars have recently made some important improvements in the construction of their cars, and they are now as near perfect as can be, to perform the service for which they are intended.

We commend these cars to the attention of all interested in Railroads, who desire a cheap and economical mode of carrying passengers over short routes.

The Patentees we are informed, are building a number of these cars, for roads in different points of the country, and we expect soon to see them on all roads where the travel is light.

In another column will be found the advertisement of Messrs. Grice & Long, and we with pleasure refer our readers to it.

☞ The "New York, Philadelphia and Baltimore Petroleum Company," offer superior inducements to parties who desire to invest; their stock is nearly all taken up, and parties would do well to consult their own interests by calling at the office, No. 71 Broadway, where every information, with maps and prospectus of the company is freely given. See advertisement on another page.

Important to Miners.

"The United States Disintegrating Ore Company," organized under the State Laws of New York, have purchased from the inventor a perfected process for the treatment of ores, whereby the most unmanageable argentiferous, auriferous and other ores are fully and completely desulphurized and oxydized. By this process the assay can be reached, or, as nearly so as is possible, certainly 95 per cent of it expeditiously and cheaply, and with far less original outlay than is possible by any other known process. Large quantities can be treated in a single apparatus, reaching without difficulty 50 tons per day of 24 hours. Letters Patent have been secured by the Company, amply protecting their rights, and active measures are being taken to introduce their valuable process to the notice of the Mining interests. Temporary office, No. 74 Broadway, Rooms 14 and 15.

Philadelphia Passenger Railroads.—Suggestive Revenues.

The city passenger railway companies of Philadelphia, during last year paid corporation tax as follows: Citizen's, $1,598; Frankford and South; wark, $3,441; Darby, $75; Gray's Ferry, $1,438-Ridge Avenue, $495; Second and Third, $2,750; Thirteenth and Fifteenth, $1,225; West Philadelphia, $945. Two of these companies have paid a tax upon net earnings or incomes as follows: Citizens', $88; West Philadelphia, $73.

Boston, Hartford and Erie Railroad.

The Boston *Courier* says: "A large amount of the bonds of the Boston, Hartford and Erie Railroad have been taken up recently by some of our leading capitalists; sufficient, we understand, to complete at an early day the connection between Boston and Putnam, Ct., on the Norwich and Worcester Railroad, and the branch from Thompson to Southbridge. The extent of this first division will be about 77 miles. The bonds bear interest at 7 per cent., and are payable in 20 years. The issue is restricted by the charter to one-half the amount actually expended on the work."

☞ The Montreal Telegraph Company have completed arrangements to carry their wires down through Lower Canada and New Brunswick, to intersect with the wires of the American Telegraph Company at Sackville, N. B., in anticipation of the speedy completion of the Atlantic Telegraph Cable from Ireland to New Foundland.

Chenango Canal Extension.

From the report of the State Engineer recently sent to the Legislature, we learn that the surveys are in progress, that the work will soon be to let. Act chap. 185, laws of 1864, appropriated about $500,000 towards this work, to be realized by tax to be levied on tolls of 1864 and 1865.

The original estimate of this work, made by O. W. Childs, Esq., in 1840, was $829,488 21. Mr. Taylor does not give a full estimate of the cost, for the reason that the surveys in progress have not been completed. He expresses the opinion, however, that the work will cost one hundred per cent more now, than the estimate of 1860.

Connecticut River Railroad.

At the recent annual meeting of the stockholders of this company, the following gentlemen were elected Directors for the ensuing year; Daniel L. Harris of Springfield, John Chase of Chicopee, Chester W. Chapin of Springfield, Ignatius Sargent of Boston, I. M. Spelman of Boston, Edward A. Dana of Boston, Roland Mather of Hartford, Ct., J. H. Butler of Northampton, Henry W. Clapp of Greenfield. Votes were passed authorizing the Directors to contract with the Vermont and Massachusetts Railroad Company to run the trains of the River Line between South Vernon and Brattleboro' for ten years; and also authorizing the Directors at their discretion to build a second track between Springfield and Chicopee, and to pay for the same by issuing shares or otherwise as deemed advisable.

☞ From the report of Auditor General of Pennsylvania, recently made to the Legislature, it appears that the tonnage tax paid by the several transportation companies in that State during the past year, per act of April, 1864, was: Lehigh Coal and Navigation Company, $5,689; Lehigh River Navigation, $1,345; Reading, $18,255; Pennsylvania Railroad, $10,986; Lehigh Valley, $7,623; Wyoming Valley, $3,872; Pennsylvania Coal, $2,759. The tax on tonnage per act of August, 1864, paid, Reading, $27,888; Pennsylvania Railroad, $15,144; Canal Department, $1,-277; Pennsylvania Coal, $4,862; Lehigh Valley, $5,713; Wyoming Valley, $5,266.

☞ The earnings of the Milwaukee and Prairie du Chien Railroad for 1864, were $1,723,381; and the expenses, $1,206,950; net earnings, $516,431—which is 7 per cent. on the total cost of the property—$7,382,573. During last year the sinking fund paid off $90,500 of bonds, and 119,000 was added to material account. The debt now stands at $960,000, having been reduced from $2,-500,000 in eighteen months. No dividends can be paid on the common stock until the funded debt has been paid off.

☞ Mr. David McCargo has been appointed Assistant Superintendent of the Pittsburg division of the Pennsylvania Railroad, and Mr. S. P. Darlington, Assistant Superintendent of the Philadelphia division.

☞ M. H. Cruger Oakley, of the firm of L. P. Morton & Co., Wall street, has been elected a member of the Stock Exchange.

☞ A bill has been introduced into the Michigan Legislature to confer additional grants of land upon the Grand Rapids and Indiana Railroad,

Railroad Earnings—Weekly.

The earnings of the Grand Trunk Railway for the week ending Jan. 14, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$22,663 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	72,173 00
Total	$97,960 00
Corresponding week, 1864	99,370 00
Decrease	$1,419 00

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the 3d week of Jan., | $136,367 48
Corresponding week of 1864 | 74,746 57
Increase | $61,620 91

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of January, 1865, were | $78,500 00
Corresponding week of previous year. | 60,000 00
Increase | $18,500 00

The earnings of the Michigan Central Railroad for the 3d week in Jan., 1865 | $65,339 00
Corresponding week of previous year | 49,220 00
Increase | $16,119 00

The earnings of the Marietta and Cincinnati Railroad for the 2d week in January:

	1865.	1864.
Passengers	$9,070 53	$570 05
Freight	11,802 78	6,992 18
Mail, express & telegraph	1,186 33	944 58
Total	$22,059 59	$15,142 76
Total this month to date	42,603 38	26,494 91

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Jan. 7, 1865, were:

	1865.	1864.
Passengers	$2,271 59	$1,701 54
Freight	7,895 71	
Express	130 22	104 16
Mails	296 58	296 58
Total	$10,594 10	$970 79
Increase		$9,623 31

Chicago and Northwestern Railway.

NEW YORK, Jan. 24, 1865.

To the Stockholders of the Chicago and Northwestern Railway Company:

Certain publications having appeared in the *Express* and *Journal of Commerce*, purporting to be a summary of a bill in equity filed by JULIUS WADSWORTH, the holder of three shares only of the Galena Stock, impeaching the legality of the consolidation between the Galena Company and the original Northwestern Railway Company, the Board of Directors deem it due to the stockholders to state that the holders of 57,842 of the 60,280 shares of the Galena stock signed the agreement of consolidation. That of the remaining 2,442 shares about 600 voted for it with the others at the stockholders' meeting; and that most of the residue have omitted to exchange their stock from no reason known to the Board, except delays of legal formalities, absence or disability, and none whatever, except the three shares of JULIUS WADSWORTH are, as yet, represented in the suit.

That this board are advised by their counsel here and in Chicago that there is no doubt whatever of the legality and validity of the consolidation; that it rests on a settled course of legislation of the State of Illinois, and adjudications of the highest court of that State, upon which nearly all the railroad corporations of that State have acted and became themselves the products of similar consolidation, and issued the bonds and stocks by which these great properties are now represented, having a market value of at least one hundred millions of dollars.

That this Board do not believe that the bill in question was filed in good faith to remedy any real or imaginary injury, or for any other purpose than individual malevolence or stock speculations; that in the bill the license which public policy allows to a party in the statement in court of his case, is availed of to form a safe vehicle of falsehood, and then pretended summaries of the bill exaggerated and garnished with sensation headings and published as "legal intelligence," but paid for as advertisements are used to disseminate the falsehoods.

That in respect to all and singular, the allegations so laboriously interwoven with the long narrative of the bill or those pretended reports of the bill, which impute to this board or to any of its members anything whatever other than an upright, conscientious administration of their trusts according to the best of their judgment of the interests of the company, unaffected by any personal considerations whatever, this board declares them to be entirely without foundation and truth.

W. B. OGDEN, President.

The New Steam Car.

A trial trip was made yesterday to New Haven, with Mr. Reamer's new steam passenger car. A company of sixty persons went on the excursion for the purpose of witnessing the experiment. The run to New Haven was made in little over an hour, not including the stops that were made at different places on the road. Everything about the car and engine being new, the working of the machinery and gearing was not so free and easy, of course, as it will be after it gets a little worn and limbered. But all the operations were satisfactory, and such as to show that the whole thing is admirably contrived for service on short roads where it will not pay to run a locomotive and train of the usual dimensions. On this point, the trial was simply a practical demonstration, and so complete as to leave no doubt on the mind of any one who witnessed it. This point being established, nothing further is wanting in the way of argument or illustration, and the car henceforth must be regarded as a public institution. In all its appurtenances, the car is as convenient and pleasant for passengers as any that have yet been built. The wood work was all done by and under the direction of Mr. Reamer, and will bear comparison with the work of any other shop in the country, for strength, style and finish.

It is clear, also, that the car is well adapted for tracks running through the streets of the cities. But whether steam, including cost of car, at present prices, can be used as cheaply as horse power, is a question on which we have made no inquiries, and therefore have nothing now to say.

The run from New Haven back to Bridgeport was performed in less than an hour.

Among the number who composed the company to witness the trial, were Alderman Alvord and Councilman Bacon. After the arrival at New Haven, these gentlemen sought out Messrs. Grice & Long, inventors and builders of the engine, Mr. Reamer, builder of the car, (who were present and did the engineering,) and invited them to take dinner with them and others who were of the party at the New Haven Hotel. This part of the excursion was not, of course, in the original programme; but it was so handsomely and so well done, as to add very much to the pleasure of the trip.

We are glad to hear that some preliminary steps have already been taken towards the formation of a company in this city for the manufacture of these and other cars for passengers. For this branch of business Bridgeport has all the advantages that are required for its successful prosecution, several advantages that are important, and not to be found in inland towns where manufactories have been in operation for several years. With proper efforts, we see no reason why an establishment for this business may not soon be started here that will furnish employment for two or three hundred men.—*Bridgeport Farmer Jan.* 14.

Value of Railroad Property as affected by Peace.

The different degrees in which prices have been influenced by the war of the rebellion has been one of its most striking results. Those articles only have followed the price of gold that are subjects of universal commerce, or of immediate consumption; while railroad property, real estate, and the securities of States and municipal bodies, and even those of the United States, in the face of the extraordinary advance in gold, have either remained unaffected, or are even below their ordinary range with gold at *par*. We do not include railway shares, the prices of which may depend upon speculative movements, but first class bonds and stocks of all kinds, as well as those of the United States, are lower than they were in a normal state of affairs. During the whole process of the inflation there has been no considerable movement in real estate, which can be purchased today as cheaply as it could be five years ago.

This is certainly a very singular result, particularly in reference to railway property. Roads that cost their owners $40,000 per mile, could not now be constructed for $100,000 per mile. As a matter of necessity, no new works are thought of. The roads that are built, consequently, are masters of the field. They command, without fear of competition, the present as well as the future traffic of the country. Add to this advantage, the rapid development of our resources, a development which doubles the productions and internal commerce of the country in periods not exceeding five years, and we shall get some idea of the vast increase in the real value of our roads since the war broke out. Their aggregate traffic and tonnage is at least twice as great as it was four years ago. Why have not the market value of these securities increased somewhat in ratio to the advance in gold; or at least in ratio to their increased value?

There are several causes that have produced such an anomaly. The income from railway property and from real estate is payable in *currency*, at its reduced value. Attention has of late been largely drawn to Government securities payable in *gold*. But the cause more influential than all others has been the conviction that *peace* must soon bring the price of gold at *par*, and that the price of all other articles must follow. With every success, in obedience to this conviction, the price of railway shares and bonds declines. These have been so decided of late that not a doubt exists in the public mind as to a speedy restoration of the authority of government over the whole of the insurgent territory. This feeling has produced great indifference not only toward railway property, but toward property of every kind, and fully accounts for the combinations which are constantly found to accelerate, and profit by the anticipated decline.

We have shown that the price of railway property has receded rather than advanced under the rise in gold. As a necessary consequence, its price should not decline with the fall in this article. On the other hand, it can be demonstrated that every success of our arms, and every fall in prices, renders railroad property the more valuable, and that, too, just to the degree of such fall. The Erie Railway is to day paying two prices for every article used in operating its road. Is it not the gainer just to the extent that the prices of such articles decline? Suppose them to come eventually to a *gold* standard, the expenses of the road would not exceed 40 per cent on earnings of $13,200,000, instead of 67, as at the present time. In such case the net earnings would be $7,920,000 instead of $4,400,000, and would enable the company to pay dividends equalling 20 per cent, as easily as those of 8 per cent. are now paid.

The class of persons to suffer by a fall in prices are the holders of and producers of merchandise. Consumers of all kinds would be proportionally benefited. Railroads are not producers, they are common carriers, and consumers to the extent of more than one-half of their whole earnings. Every fall in price, consequently, is directly to their

advantage.* Builders and manufacturers on contract would be benefitted in the same way. The expenses of operating railroads would be reduced just in ratio to the fall in gold, and their value consequently increased in an equal degree.

A case well in point is the value of real estate. This has not materially risen in price. But no one supposes that it would fall in price by the return of peace, nor that it would not be the more valuable under the triumph of our arms and a complete restoration of the national authority, than with a continuance of the war and the consequent possibility of a divided country.

In every other point of view would peace inure to the value of railroad property. It would vastly increase the aggregate value of the productiveness of the country by returning more than a half a million of men to the industrial pursuits from which they were drawn. The result of the war will be to increase, on an immense scale, manufacturing establishments, and, as a necessary consequence, our internal commerce. The basis of all our prosperity is, of course, agriculture. No contingency can be foreseen why that should not advance as rapidly in the future as the past. Every year is it enlarging its markets in foreign countries as well as our own. For the excess over domestic consumption, there is always a foreign demand; so that its real prosperity is measured by that of the commercial world. Our manufactures will supply the home market, while they may be the consumers of only a small portion of the cereals and provisions we raise.

But peace will give a vast impulse to our trade by restoring to it that of one half of our wide domain. There is no branch of industry at the North that would not be immensely benefited by it. It would double the orders at every manufacturing establishment at the North. It would open an almost unlimited market to the food producing sections of the West. It would, in fact give an impulse to our domestic trade never felt before. All this commerce must pass over our railroads, and swell their business to an amount far beyond its present volume.

From a careful consideration of the whole subject, therefore, no other conclusion can be arrived at than that every step through victory toward peace, and every fall in gold, add to the real value of our railroads, and should add to instead of reduce the price of their securities. The thing is demonstrable beyond a doubt. Peace would vastly reduce their expenses, while it could not fail to increase their receipts. It would confirm the confidence felt in every kind of investment. The conservator of property is the civil government. The moment this is seen to be placed on a firm basis, men will act upon their convictions instead of upon their fears. Up to this time no small number among us have distrusted every kind of property the value of which depended in any measure upon political organizatien. All this apprehension will soon be, if it is not already, dispelled, and we have no doubt of soon seeing railroad property sought for at its real worth.—*Jerome, Riggs & Co.'s Circular.*

Pittsburg Passenger Railroads.

The Birmingham Passenger Railway Company held an election for Directors yesterday, when the old Board was chosen without opposition. The company did not declare any dividend, the expenses, owing to the high price of feed, &c., having been found sufficient to absorb the earnings. This is not surprising. The Citizen's road, which has a far larger traffic, not only paid no dividend, but if we are informed aright, sunk some $3,000 during the year. To be sure this may be but temporary, and *per contra*, the stockholders have already made handsomely on their investment, but still it shows that our city railways are not, by any means, the money-making concerns some suppose them to be, and if the present high prices continue they are likely to prove a source of serious loss to their owners. The Manchester Company elected Mr. Henry Irwin, President; Robert Hays, Wm. Bagaley, James Miller and A. S. Bell, Directors.—*Pittsburg Chronicle, Jan.* 19.

The Whale Fishery.

From an interesting review of the trade of the year 1864, published in the New Bedford *Shipping List*, we learn the number employed in the whale fishery January 1, 1865, was: of ships and barks, 227; briggs, 5; schooners, 44; having an aggregate tonnage of 79,690—showing a diminution of 31 ships and barks, an addition of 3 schooners, and a diminution of 9,093 tons. The number of vessels and amount of tonnage employed in the whale fishery since 1859, have been as follows:

	Ships & Barks.	Brigs.	Schrs.	Tonnage.
Jan. 1, 1859	561	19	45	195,115
" 1860	508	15	42	176,842
" 1861	459	14	41	158,746
" 1862	372	10	41	125,465
" 1863	301	10	42	103,146
" 1864	258	5	41	88,785
" 1865	227	5	44	79,690

The following statement will show the imports and exports of sperm oil, whale oil and whale bone from 1859 to 1864, inclusive:

Imports:	Bbls. Sperm.	Bbls. Whale.	Lbs. Bone.
1859	91,408	190,411	1,923,850
1860	73,708	140,005	1,337,650
1861	68,932	133,717	1,038,460
1862	55,641	100,478	763,500
1863	65,055	62,974	488,750
1864	64,372	71,863	760,450
Exports:			
1859	52,207	8,179	1,707,929
1860	82,792	13,007	911,226
1861	37,547	49,969	1,145,013
1862	27,976	68,583	1,004,981
1863	18,366	11,297	279,394
1864	45,000	12,000	530,000

The average price of sperm oil in 1864, was $1.78 per gallon; of whale oil, $1.28 per gallon; and of whalebone, $1.80 per pound. The closing prices in December were, $2.12, $1.46 and $2.18, respectively. The average price of Sperm Oil for 1863 was $1.61 per gallon; Whale Oil, 95¼c. per gallon; Whalebone—Northern, $1.62. and Southern, $1.44½ per pound, against $1.41½ for Sperm, 59½c. for Whale Oil, 88c. for Northern, and 76c. for Southern Bone, in 1862. The following statement will show the stock of oil and bone on hand on the 1st of January, in the last seven years:

	Bbls. Sp.	Bbls. Wh.	Lbs. Bone.
1859	17,176	82,376	400,000
1860	13,429	96,480	380,600
1861	15,838	80,469	488,700
1862	16,132	58,378	295,600
1863	16,038	23,019	91,500
1864	31,200	9,344	148,980
1865	20,382	6,679	170,150

Pittsburg and Steubenville Railroad.

The annual meeting of the stockholders of this company was held in Pittsburg on the 9th inst., but as the affairs of the road are altogether administered by the Western Transportation Company, to which it was some three or four years ago leased, the proceedings were almost devoid of interest. The road, says the *Chronicle*, is being rapidly pushed to completion, and in a very short time will be opened for travel. The event will be hailed with pleasure by all, and cannot but materially aid in the development of the rich mineral country through which the line runs. The following gentlemen were elected Directors to serve for the ensuing year: Isaac Jones, President; F. Smyth, M. B. Brown, Jas. Schoonmaker, M. O'Hara, Max. K. Moorhead, Jas. B. Murray, Nathaniel Holmes, William Phillips, Joshua Rhodes, A. S. Nicholson, W. S. Haven, Jesse Edgington.

Atlantic and Great Western Railway.

The traffic returns of the Atlantic and Great Western Railway for the months of January, February, March, April, May, June, July, August September, October, November and December, 1864, were respectively as follows:

	Passengers, &c.	Freight.	Total.
January	$38,615	$168,683	$207,298
February	50,189	178,852	229,041
March	60,518	166,215	226,733
April	58,992	138,275	197,267
May	57,193	157,486	214,679
June	73,654	240,867	314,521
July	82,665	249,433	332,098
August	95,077	310,999	406,076
September	135,502	310,542	446,044
October	108,121	288,726	396,847
November	107,814	273,996	381,810
December	105,837	251,719	357,556
	$979,177	$2,730,793	$3,709,970

Boston, Hartford and Erie Railroad.

We learn from the Boston *Advertiser* that during the last month rapid progress has been made in the filling on the South Bay. On Saturday last the road was opened through South Boston and the work of filling commenced on the line between First street and the tarminus at the foot of Summer street. About 4,700 feet of solid filling remains to be accomplished. Laying of the rails is in progress on the Southbridge branch. There seems to be no doubt that the first division, about 77 miles, will be opened in the ensuing spring.

Specie Product in Mexico.

Very little is known by the general public of the specie product of Mexico, and therefore the following statistics of the amount of money coined in that country since the year 1857 are valuable as well as interesting:

From 1537 to 1731, the period of colonial government, the mint of Mexico struck off in gold, silver and copper $760,765,406. From 1732 to 1821 the mints of Mexico, Chihuahua, Durango, Guadalajara, Guanajuato, Sombrete and Zacatecas coined in gold, silver and copper $1,300,816,552. From 1822 to 1823, the period of the empire, the mints of Mexico, Durango, Gaudalajara, Guanajuato and Zacatecas coined in gold, silver and copper $19,132,961. Under the republic, from 1824 to 1863, the mints of Mexico, Chihuahua, Culiaca, Durango, Guadalajara, Guadalupe and Calvo, Guanajuato, San Luis, Tlalpan and Zacatecas, struck off in gold, silver and copper $409,202,962.

The total produced a sum of $2,579,917,877, which, reduced to the French money system, would give the round sum of 11,899,589,355 francs.

Atlantic and Great Western Railroad.

At a meeting of the Directors of the Atlantic and Great Western Railroad, held in Meadville, the following officers were elected: President, J. J. Shyrock; Vice President, T. W. Kennard; Directors, G. Church, J. H. R. Rose, M. Kent, A. W. Mumford, Samuel Waun, John Dick, Wm. Thorp, G. V. Culver, Geo. A. Bittenbanner, W. G. Hamilton, Pearson Church.

☞ The County Court of St. Louis County has ordered the issue of $700,000 of St. Louis County bonds to the Pacific Railroad Company, authorized by the recent act of the Legislature, to aid in completing the 40 miles yet to be constructed between St. Louis and Kansas City, where it is intended to meet the road from Kansas. Workmen are now engaged on the Union Pacific Railroad, and prospects are said to be good for the extension of the road to Fort Riley the coming summer.

Spruce and Pine Street Passenger Railroad.

The gross receipts of this road for the past year were $82,781 56, and the total expenses were $65,322 60, leaving the net earnings $17,458 96. The average receipts for travel were $248 58 per day. The following gentlemen have been elected officers of the company for the ensuing year: President, S. Gross Fry. Directors, Oliver Hopkinson, Wm. Harbeson, J. P. McFadden, Wm. M. Farr, Israel Maull. Mr. J. P. McFadden was elected Treasurer.

Remoteness of Damage.—Liability of Railroad Companies for Negligence when Accident would not have Happened without Wrong Doing of the Third Party.

The recent case of Harrison against The Great Northern Railroad Company, in the Court of Exchequer, England, was an action which was tried at the last Spring Assizes held at Lincoln, in England.

It appeared that a company had been formed at the beginning of the century for the purpose of carrying out certain drainage works, in Lincolnshire in that country, and in particular to construct a delph or drain running into the river Witham at Horsleydeeps, and that by a certain statute or act, (10 Geo. IV. C., 123,) they were bound to keep this delph or drain in sufficient repair.

The Great Northern Railway Company, (the defendants,) by their act (9 and 10 Vict. C., 71,) were required to take a lease of their property for 999 years from the above company, and to perform all the duties which they had been bound to perform.

The River Witham, below Horsleydeeps was under the management of certain commissioners, who were bound to keep it of a certain width and depth.

These commissioners having neglected to clean the river, the water in the delph or drain was penned back, and on the occasion of some heavy floods in March, 1862, one of the banks gave way, and the neighboring lands, including those of the plaintiff, were placed under water and greatly injured.

It was contended on the part of the plaintiff, that the bank had been improperly repaired, and that it was owing to this fact that it had given way.

The defendant contended that the accident was entirely owing to the neglect of the commissioners in not keeping the river clear below Horsleydeeps.

The jury found, in answer to questions, submitted to them by the Judge, first, that the bank had been improperly repaired; secondly, that the accident was caused by the water being penned back through the neglect of the commissioners; thirdly, that it would not, however, have happened if the bank had been properly repaired.

The Judge ordered the verdict to be entered for the plaintiff on this finding, and the defendants' counsel having obtained a rule *nisi* to enter the verdict for the defendant, or to reduce the damages to a nominal sum, the plaintiff's counsel now showed cause, and urged the following points:

The first and third findings make the second immaterial; the defendants having made the delph and brought the waters there, were bound to prevent its injuring the neighboring proprietors. The defendants caused the injury by making the bank so high as to contain the water; if it had been lower a small quantity only would have overflowed. No action will lie against the commissioners, because they would say, if the bank had been good, as we had a right to expect, there would have been no damage. The defendants were bound to provide against any reasonable rise of the water, and they endeavored to do so, for they made the bank high enough to prevent the water from overflowing.

The defendants' counsel, in reply urged the following points:

The declaration is not framed on common law grounds, and could not be; it rests entirely on 10 Geo. IV. C., 123, § 10. It is admitted that the commissioners had broken their statutory obligations, and thereby not only penned back the water in the delph, but driven additional water into it, yet the bank withstood the pressure for two and a half days before it gave way. It is the same as if a man builds a house with its walls one brick thick, when it is provided by act of Parliament that the walls shall be one and a half thick. The house stands for a time, and would continue to do so, but a man drives against it and knocks it down, and in falling it kills somebody; would it be said that the owner of the house was the proximate cause of the injury? so too, the acts of the commissioners, and not of the defendants, caused the injury to the plaintiff. The legislature cannot be supposed to have in view the wrongful acts of third parties, or to impose on those with whom it deals the burden of providing against them.

POLLOCK, C. B.—In this case the defendants, for their own profit as owners of a navigation, had undertaken the burthen of maintaining a delph, or cut, for the carrying off of certain water. This they have maintained in an improper manner; that is to say, improper in the sense that the banks of it were not sufficient to resist the water they would contain, such insufficiency being owing to bad construction.

It was not shown that they were insufficient to hold the water that would come there by the wrongful act of others, which I am about to name; but they were insufficient in relation thereto. The outlet of the delph was in a certain channel, the commissioners for the management of which were bound to keep it of certain dimensions. They did not, and by reason thereof as found by the jury, the water in the delph was penned back—possibly, even water flowed from below into it. It consequently rose in the delph, and owing to its rising and the defective construction of the banks, they gave way, and the plaintiff's land was inundated and damaged.

The jury further found that but for this wrongful conduct of the commissioners the mischief would not have happened. The defect, however, of the channel in which the delph had its outlet, was not of recent occurrence, but of long standing, and on former occasions, the water had by the same cause been penned up in the delph. Further, there was nothing in the weather of so extraordinary a character that the defendants were not bound to anticipate it. The storm, though unusual and extraordinary in a sense, yet as happening once in a year, or in a few years, was not unusual.

It was argued for the plaintiff, that the defendants were insurers; that is, they for their purpose had the delph and brought the water there, and were bound to restrain it. It is not necessary to decide this, as we think they are liable on other grounds. They are bound to maintain a sufficient cut or delph. The sufficiency of a cut depends on its depth, width, fall, and outlet, as compared with the water likely to be in it. Now, in this case the cut was not sufficient to hold the water likely to be in it, owing to the condition of its outlet.

If no one was under any obligation in relation to that outlet, it is clear that that was insufficient, and that the defendants would be responsible. Are they less so because there is an obligation on the others as to the outlet which is not performed? We think not.

It is not the case of a sudden wrong done by others in stopping up the outlet. It is a permament, long continuing state of things, which it was the duty of the defendants to obviate or guard against.

Suppose A has a drain through the lands of B and C, and C stops up the outlet into his land from B's, and A, nevertheless, knowing this, pours water in the drain and damages B, surely A is liable to B? The present law may be tested thus: Suppose the plaintiff sued the sewer commissioners for this damage, could they not truly say they had not caused it? I think they could. They would say the proximate cause was the defective bank, and it was so; and so the defendants are liable, and the plaintiff is entitled to judgment.

The rule will, therefore, be discharged.

Rule discharged.

The Steubenville Tunnel.

The work on the Steubenville Tunnel is progressing as fast as the limited number of men employed will allow. It is being carried on under the greatest difficulties, but nevertheless it is fast approaching completion. The laborers experienced great inconvenience from the amount of water which collected in the bed of the tunnel after a heavy fall of rain, and which it was necessary to use a pumping apparatus to remove. This evil has since been remedied, and a system of drainage has been inaugurated which proves extremely useful.—*Pittsburg Chronicle.*

☞ During the past week a corps of engineers, under the direction of Col. William W. Taylor, have been in the field making a preliminary survey of a railroad route, from a point at the Relay House, on the Northern Central Railroad, to connect with the Western Maryland Railroad, *via* Hagerstown, to Canton. The route passes above the first toll-gate on the York road, and crosses the Harford road at the Homestead village, the Belair avenue at the entrance of Baltimore cemetery, down Mine Bank lane and through Potter's field, crossing Monument street a half mile east of the projected railroad which was stopped by an injunction a few years since, and never completed. The present survey proposes to carry the road to tide water.

☞ Notice is given in the Canada *Gazette* that application will be made to the Legislature at its next session for a charter to build a branch railway "to connect with the Montreal and Vermont Junction Railroad, from the Stanbridge depot to some point on the Province line, *via* Frelighsburg."

THE MARIETTA RAILROAD.—The decision of the Supreme Court of Ohio in the case of the Marietta Railroad, is creating some talk in railroad circles. The decision invalidates all action under the supplementary law of winter before last, authorizing the sale of the franchise, and renders all new stock issued under it null and void. Other roads in the State are deeply interested in this decision. —*Cincinnati Commercial.*

☞ The New Castle *Courant* says, that Geo. W. Cass, of Pittsburg, has subscribed $90,000 of stock to the New Castle and Beaver Valley Railroad Company.

☞ Public sentiment begins to be quite active in favor of constructing a city passenger railway from Cooper's to Kaighn's Point, New Jersey. Although no application for a charter has been made to the Legislature for such authority, yet the enterprise appears so feasible that it is believed a charter will be obtained by a company next year. The movement would be highly advantageous to the people and profitable to the stockholders.—*Phila. News.*

☞ The New Castle and Franklin Railroad Company have elected the following officers: President, G. W. Cass; Vice President, J. W. Blanchard; Directors, S. M. Kier, Geo. C. Reis, W. Stewart, D. W. Courtney, —— Egbert, J. C. Shaw, and Jacob Zugler. The New Castle and Beaver Valley Railroad Company have chosen the following officers: Alexander Crawford, President; R. W. Cunningham, D. B. Kurtz, Springer Harbaugh, J. M. Crawford, G. W. Cass, W. Patterson, Directors. Following are the officers of the Lawrence Transportation Company: J. M. Crawford, President; W. Patterson, G. W. Cass, J. C. McCullough, James Raney, Springer Harbaugh, Alex. Crawford.

☞ ROBERT H. SHEARMAN, who for the past three years has had charge of the Railroad Department in the office of the State Engineer, was on the 1st instant appointed Deputy State Engineer and Surveyor.

☞ A general movement is said to be on foot among the Western Railroad Managers, in view of the increased cost of fuel in particular, and of construction, repairs, and other expenses in general, to reduce the speed of passenger trains to a maximum of twenty miles per hour.

☞ An effort is now being made to open telegraphic communication from Brownsville to Pittsburg, by way of the Monongahela City Telegraph Line, *via* West Newton. It is proposed to build the line on the east bank of the river, with intermediate offices at Webster, Belvernoon, and Fayette City.

TRANSFER OFFICE OF THE CHICAGO AND NORTH-WESTERN RAILWAY CO., No. 8 Wall st.,
NEW YORK, Jan. 20, 1864.

THE COUPONS due Feb. 1, 1865, from the BONDS of the GALENA & CHICAGO UNION RAILROAD CO., and the CHICAGO & NORTH-WESTERN RAILWAY CO., will be paid on and after that day, on presentation at this office. JAMES R. YOUNG, Sec'y.

THE NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, Albany, Jan. 21, 1865.

TWENTY-THIRD SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-annual Dividend of Three per cent. on the Capital Stock thereof, free of the United States income tax, payable on the twentieth day of February next.

Dividends in New York will be paid at the Office of DUNCAN, SHERMAN & CO., in Boston, at the office of J. E. THAYER & BROTHER; in Albany, at the ALBANY CITY BANK.

The Transfer Books will be closed at the close of business on Tuesday, the thirty-first day of January instant, and be re-opened on the morning of Thursday, the twenty-third day of February next.

And 147 Baltimore street, Baltimore, Md.

This Company is organized under the laws of the State of New York. The principal office is No. 71 Broadway, with branch offices in Philadelphia and Baltimore, for the convenience of subscribers, where the certificates of stock will be issued to subscribers without delay. The property, embracing upwards of six hundred and thirty-five acres, has been selected with great care during the last three years by those of the directors who have been constantly operating on Oil Creek, and throughout the entire oil region of Pennsylvania, as well as Western Virginia, and was not selected to sell, but for the purpose of development and producing oil, having now some ten wells under contract, and being bored with vigor, besides those already completed and producing oil, making in all 13 wells now on the property. Every acre of this Company's property is bottom, and the best of boring land, much of it on Oil Creek, Cherry Run, Cherry Tree Creek, Walnut Bend, Alleghany River, and other streams where the lands are being developed with good success, and prospect of a very large product of oil.

OFFICE IN NEW YORK, where Prospectus, Maps, and every information can be obtained,
No. 71 BROADWAY, NEW YORK.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, Dec. 22, 1864

AT A MEETING of the Board of Directors, held this day, it was resolved that a dividend of five per cent. in cash, free of Government tax, be paid on the first day of February next, to the holders of full-paid shares of this Company, registered the 20th day of January next, and that the transfer books be closed on the said 20th day of January and opened on the 2d day of February.

AND

BUILDERS OF ALL DESCRIPTIONS OF CARS.

Fulton Works, No. 1340 Beach street, Philadelphia,

Office 182 Broadway, New York.

The attention of all interested in Railroads is invited to our Steam Cars for city or other Railroads. Their economy, durability, and efficiency commend them to all who have them in use, or witnessed their operation. They are now being introduced on Street and Suburban Roads in and adjacent to the principal cities; also on Tributary Roads.

With minimum weight and expense they have maximum power and capacity, and are free from noise and smoke. They can ascend the steepest grades, and turn the shortest curves with facility.

We are also prepared to execute orders for all other descriptions of Cars. Circulars with detailed information will be furnished on application.

MACKENZIE PATENT

BLOWER & CUPOLA,

PATENT

GAS EXHAUSTOR

AND COMPENSATOR.

THIS Blower is a Force Blast Machine, compact, durable and requires only one-third the power necessary to drive a Fan Blower. For all purposes where a pressure of Blast is required they are quite equal to cylinders, and can be driven with one-third the power, while their cost is trifling in comparison.

We manufacture these Blowers and Cupolas to melt from 1 to 15 tons Iron per hour. They will save one-quarter to one-half the time required by the old style Cupola, and from 25 to 33 per cent. of coal. Address

Ocean Mail Steamers.—Restoration of our Foreign Commerce.

It is a well known and not very agreeable fact, that our foreign commerce has during the last four years been conducted almost entirely under foreign flags. That portion of our merchantmen which ventured to retain the stars and stripes at their mastheads has been almost annihilated by rebel piracy, notwithstanding our great naval superiority. On the other hand, England which has encouraged, if it did not cause the original divisions between the North and South is again commercially speaking, the mistress of the seas. A small island not much larger than one of our inland lakes, with a limited coast and few rivers, takes the lead of the rest of the world in the extent of her commercial navy, her voyages, her traffic and her profits. Before the rebellion broke out the United States was her most enterprising competitor, but at present we are fallen behind, and unless some radical measures are taken, even the return of peace will not be attended with the immediate return of our lost commerce.

These measures which we term radical, are not those which are likely to be approved by those wedded to old notions and habits, who believe in routine and red tape, but they have fortunately attracted the attention of the present administration and have received in a few words, the approval of the President and the Postmaster General. What remains to carry them into effect is to give a proper impetus to public opinion on the subject, and to this end we resume its discussion, which we began in this JOURNAL nearly two years since.

We restate our original proposition, and will then give a brief account of what has befallen it, and of its success up to the present time.

It was this. That as we had no longer any mail steamers on the ocean, with the single exception of the lines connected with California, that as all regular correspondence with foreign ports with the same exception was through foreign mails, as our commerce was cut off, and would be affected even on the return of peace, for the want of regular mail facilities of our own, it was evidently the duty of the Government at the earliest practicable moment to employ a part of our surplus navy as mail packets, and to establish therewith suitable lines to all parts of the world. The old system of granting subsidies to private companies had been found unpopular in principle, and transitory in character, and if it were revived, would require years for construction, large monied combinations, and at every step would meet with opposition.

The Secretary of the Navy as early as 1863, on being urged to the consideration of the scheme, gave it his approbation in his official report. During the last winter session of Congress, a resolution was adopted in the House of Representatives calling on him for a report of the number and character of the vessels in our navy suitable for the service. This was promptly made, and it appears that we had then and still have at least twenty-seven wooden steamers of between 3,000 and 2,000 tons, with power, capacity and speed to form a complete system of mail packets for the ocean. On the 1st of July, the splendid ship Wampanoag of 3,000 tons will be ready to be thus employed, and she headed the list selected by the Secretary.

Mr. Blair, the former Postmaster General, paid no apparent attention to the subject, but the present intelligent and patriotic head of the Postoffice Department at once grasped the idea, saw its importance and recommended its consideration to Congress. The President also in his message sanctioned the recommendation of Mr. Dennison.

We have therefore the whole plan before us, and it has been indorsed in the very highest quarters. The next step is to have it carried out "*Hic labor, hoc opus est.*". At this moment there are resolutions before the New York Chamber of Commerce urging Congress to act at once in the matter, and it is to be hoped they will call forth the support of that eminent and influential body. What more is wanted is similar action on the part of the Boards of Trade in all our great Atlantic cities, and a ventilation of the whole by the leading presses.

Especially at this moment, for we see the symptoms of an unwise return to its old system of cruising about to be adopted by the Navy Department, in advance of the establishment of the so much needed mail steamers. We hear that a large fleet is to be placed on the Brazil station, and in the Mediterranean. We have between 5 and 600 steamers, and now not work enough for half of them. They are, however, to be divided up into squadrons and scattered round the world. For what? To protect a commerce which does not now exist! Or to give holiday excursions to favorite officers of the department. It is well known that these squadrons hitherto have spent half their time in port, for they really had nothing to do. The present plan offers more useful occupation and will produce such results, that squadrons will hereafter become more important than ever they have been before.

Again. Let us look into the pecuniary aspect of the old system about to be revived. The sum total of our trade with Brazil in 1860, in imports and exports just before the war, was about $10,000,000. The profit could not have been more than two and a half millions—say 25 per cent. Now what will be the annual cost of maintaining a fleet on the station that shall properly represent the power of our present naval organization. Five or six large steamers with their tenders, will cost the country annually more than all the profits which our merchants will make out of the trade!

And so especially will be the case with regard to our Mediterranean squadron, which will also be on the same large, if not a larger scale.

The trade with the countries on the Mediterranean where our ships resort is not so large as that with Brazil, and it is the custom of our squadrons there to lie at anchor at a few favorite ports for a large portion of their cruising time.

We propose therefore with regard to the old system to "reform it altogether." Turn these pleasure squadrons, for such in fact they have been for the most part, into mail carriers, and they will always be in the right places at the right time.

On every mail route there will be a continual movement of cruisers, sufficiently armed to protect themselves, and ready to give aid, and perhaps convoy to our merchant vessels when in danger. These mail steamers may readily carry valuable freight, as it is well known that value is oftenest found with the smallest packages; these and a full quota of passengers might always be counted upon in a Government vessel.

Thus, postages, freights of the most valuable character, and passenger traffic would produce enough to reduce the expenses of maintenance and relieve the Navy Department of one of the most considerable items in its budget.

We paid the last year one million of dollars for postages to foreign steamers. All this we could save and appropriate by carrying our own letters. In short, by establishing these lines we should be able to make them almost self-supporting, and yet the actual service of the navy, and its influence politically, would be fully maintained. Let us suppose then we had lines to England, France, Germany, Spain, Italy, Brazil, the River Plate, and between California, and China and Japan, the armed vessels carrying these mails would be at the same time the most effective and useful fleets on the oceans.

Nor would the arrangement be injurious to private enterprise. For it might be understood that the Government would at any time on the establishment of any merchant lines for the same purpose surrender its own, but not until their permanence was guaranteed and the service secured.

In arranging the various routes for these lines, it is no doubt foreseen, that a strong competition would grow up between some at least of the principal Atlantic cities as to their claims. All this we propose to obviate by a friendly arrangement beforehand, effected by their Boards of Trade and Chambers of Commerce. These might fix the routes so as to satisfy all, and their union on this point would secure the success of the whole plan.

It is in vain for us to expect any large increase of our foreign commerce outside of England and the continent of Europe generally without the means of regular correspondence. No merchants employ agents or send goods where they cannot be heard from. Multiply the means of communication and you increase trade. This is the whole secret of the present commercial prosperity of England; and we should be insane not to make use of it ourselves when we have such a splendid opportunity, such as we never had before, and would not have now, but for the wonderful increase of our navy, rendered necessary by the exigencies of war. Instead therefore, of regretting that increase let us make a good use of it. These vessels should not be laid up in navy yards to rot, nor sent round the world at an enormous expense merely to be seen, but should be set at work to do the most important part of the work of that commerce which they were built to defend.

We hope that our cotemporaries will unite with us therefore in keeping this question constantly before their readers, until public opinion shall do its work.

In six months' time if Congress would pass an enabling act, the Postmaster General could have half a score of mail lines in full operation.

Important to Miners.

"The United States Disintegrating Ore Company," organized under the State Laws of New York, have purchased from the inventor a perfected process for the treatment of ores, whereby the most unmanageable argentiferous, auriferous and other ores are fully and completely desulphurized and oxydized. By this process the assay can be reached, or, as nearly so as is possible, certainly 95 per cent of it expeditiously and cheaply, and with far less original outlay than is possible by any other known process. Large quantities can be treated in a single apparatus, reaching without difficulty 50 tons per day of 24 hours. Letters Patent have been secured by the Company, amply protecting their rights, and active measures are being taken to introduce their valuable process to the notice of the Mining interests. Temporary office, No. 74 Broadway, Rooms 14 and 15.

Oswego and Syracuse Railroad.

The earnings and expenses of this road for the years ending September 30, 1863 and 1864, have been as follows:

Earnings:	1863.	1864.
From passengers	$85,813 86	$119,074 93
" freights	69,210 98	95,347 41
" mails	3,239 78	2,846 39
" miscellaneous	1,492 90	1,725 16
	$159,757 52	$218,993 89
Expenses, viz:		
Repairs of road	$11,779 18	$20,325 90
" buildings, etc.	1,751 86	3,794 80
" engines	10,439 19	11,403 27
" cars	7,566 54	6,968 03
" tools, etc	1,195 80	1,020 94
Fuel	10,638 57	14,802 73
Oil and waste	973 96	1,370 13
Loss and damage	402 15	1,105 97
Road and train hands	12,360 38	15,460 61
Office expenses, etc.	1,228 84	1,124 90
Agents and clerks	2,888 55	2,818 29
Use of freight cars	216 07	1,155 48
General Superintendence.	2,150 00	2,300 00
Taxes on real estate	5,161 75	6,270 97
U. S. tax	2,471 46	5,646 39
All other expenses	9,073 78	11,869 95
	$79,697 58	$106,937 86
Net earnings	$80,059 94	$112,056 03

The expenses charged to cost of road and equipment during the year were $9,580 30, making the total expenses, $116,518 16. Ten new freight cars have been built at a cost of $7,306 56; and $1,796 71 have been expended upon an unfinished coach.

Two dividends of four per cent. each have been declared within the year, amounting to $38,592. The amount paid upon dividend account during the year was $39,223 50.

The equipment of the road consists of 6 engines; 10 passenger, 3 baggage, mail and express, and 51 freight cars. Miles run by engines with passenger trains, 44,737; with freight trains, 35,561; with working trains, 8,200—total, 88,498. Number of passengers carried, 181,416; do., carried one mile, 3,968,185. Tons of freight carried, 79,834; do., carried one mile, 2,451,432.

Length of road 35.910 miles. Length of double track, including sidings 2.211 miles. Weight of rail, 57 lbs. per yard.

The value, at cost prices, of stock and materials on hand at the close of the year was $15,934 71.

The amount of surplus fund derived from earnings, exclusive of bonds or the portion not expended for construction of the extension at Oswego, at the close of the fiscal year was $78,623 18.

A contract was made in March last for the necessary graduation and masonry to extend the tracks of the road down to the river at Oswego, and also for the construction of about 1,000 feet of ship channel, which is to be completed by the 1st of September next. A river front of about 1,700 feet has been secured, with ample dock grounds for transhipping lake freight, receiving, storing and delivering of coal into vessels, which is estimated to cost, including land damages, coal tracks and pockets, the sum of $200,000. The amount expended for the same to December 1st, was $72,500.

Income Account, September 30, 1864.

Balance October 1, 1863	$43,490 31
Receipts from passengers, freights, etc.	217,268 73

Material 1864–'65	7,282 10
Balance carried to surplus fund	125,473 82
	$378,721 20

The Oswego and Syracuse Railroad Company was chartered on the 29th of April, 1839, and procured a renewal of its charter on the 14th of May, 1845. The company was organized on the 25th of March, 1847; and immediately after commenced construction. The road was opened for public use on the 16th of October, 1848.

The original amount of capital stock, as authorized by charter, was 7,000 shares of $50 each—the whole amount $350,000, having been paid in. On the 5th of June, 1854, the stockholders authorized the issue of 2,800 shares increased stock to the holders of the original stock *pro rata*. Of this amount only 2,648 shares were issued—making the total amount issued to date $482,400. The increased stock has been issued to the holders of the original stock upon the payment of 35 per cent. in cash; the balance, 65 per cent. being given the stockholders in consideration of the earnings of the road having been expended in construction and other improvements. The amount of cash realized from the sale of the increased stock was only $46,340.

The bonded debt of the company amounts to $311,500, of which $36,500 is due in 1870; $50,000 in 1875; $61,000 in 1880; and $114,000 in 1885.

The office of the company is at Oswego, N. Y. The officers are:

President.—F. T. CARRINGTON.

Directors.—F. T. Carrington, Luther Wright, W. B. Phelps, A. P. Grant, S. Doolittle, Gilbert Mollison, Oswego; Allen Munroe, E. B. Judson, T. T. Davis, Austin Myers, Syracuse; R. H. King, H. H. Martin, Albany; Joseph Battell, New York.

Vice President.—ALLEN MUNROE.

Treasurer.—LUTHER WRIGHT.

Secretary.—A. P. GRANT.

Superintendent.—GEORGE SKINNER.

New York and Harlem Railroad.

The earnings of this road for the year ending September 30, 1864, were $1,860,428. The expenses for transportation and construction were $1,409,820; and for interest, $432,439, total $1,842,259—leaving a balance of $18,169. The cost of the road is represented by—

Bonds	$6,115,800
Real estate mortgages	98,136
Floating debts	14,260
Total debt	$6,228,296

Statistics of Michigan.

The State census of 1864 states the population of Michigan at 803,745, a gain of 54,632 since the census of 1860. The drain of the war upon our male population is shown by the fact that while in 1860 the number of male inhabitants of Michigan exceeded the number of females by 50,275, in 1864 it was but 21,132 greater. The number of bushels of wheat raised during the year 1864 is 1,374,442 greater than the product of 1859, but there is nearly as great a falling off in the number of bushels of corn. The wool clip has largely increased, from 4,062,858 pounds in 1860 to 7,249,934 in 1864. New York and Ohio were the only States whose wool clip exceeded 5,000,000 pounds four years ago.

Finances of San Francisco.

In the JOURNAL of October 29, 1864, we gave a full review of the finances of San Francisco for the year ending June 30, 1863, together with the annual aggregates since the incorporation of the city. The tabulations in the article referred to were very complete and will render unnecessary any repetition at the present time. We now propose to bring down its financial history to the end of the past fiscal year, viz: June 30, 1864.

And first as to the valuation of real and personal property subject to taxation for State, County, and City purposes. For the two last past years this was as follows:

	1863–'64.	1864–'65.
Real estate	$43,116,538	$47,292,903
Improvements	14,634,381	11,621,662
Personal property	19,378,147	21,822,000
	$77,129,066	$80,736,165
In addition to the amount of the personal, as shown above, by a supplementary list completed to the end of October, additional assessments were made, amounting to	1,560,655	1,666,124
Total	$78,689,721	$82,402,289

The rates per cent. of taxation for the same years were as follows:

	1863–'64.	1864–'65.
For State purposes	$0.90	$1.25
For City and County	1.20	1.73
Total	$2.10	$2.98

The following shows the specific purpose for which the City and County taxes were assessed:

Purposes—	1863–'64.	1864–'65.
General fund	$0.42½	$0.61
Street light fund	0.07½	0.07½
School fund	0.20	0.35
Total for current expenses	$0.70	$1.03½
Corporation debt fund	0.45	0.47
Interest tax—railroad bonds	0.05	0.02½
Sinking fund—bonds of '63.	0.00	0.02½
Interest account—b'ds of '63	0.00	0.17½
Total for debt	$0.50	$0.69½
Aggregate for city & county	$1.20	$1.73

The revenue of the city and county from all sources for the fiscal year 1863–'64, (exclusive of receipts from the State for its proportion of school moneys and assessment expenses,) amounted to $1,010,759 36, being a decrease from that of the previous year of $323,921 98, as shown in the following comparative table:

	1862–'63.	1863–'64.
Taxes	$982,304 79	$683,600 23
Licenses	160,686 79	129,409 18
Fees	101,628 58	107,628 57
Fines of Courts	34,428 20	32,750 35
Harbor dues	18,127 05	20,297 25
Wharf & ground rents.	9,789 00	2,725 72
Poll taxes	18,852 43	17,434 80
Interest on loans	3,680 08	15,152 26
Sundries	5,184 47	1,761 05
	$1,334,681 34	$1,010,759 36
Collected for State of California	520,960 47	685,712 66
Total revenue	$1,855,641 81	$1,696,472 02

A large surplus having accumulated in the Treasury in the fiscal year 1862–'63, the tax levy of 1863–'64, was reduced 64½ cents from that of the previous year. This, with a great reduction in State, county and municipal licenses of several classes made by the Board of Supervisors, accounts for the diminution in revenue as presented above.

The amount received from the State for school apportionment was $23,918 04, and for assessment expenses $5,444 44.

It is also to be noted that the tax levy for school purposes was fixed at 20 cents instead of 35 cents, the amount authorized by statute; $60,000 being transferred from the surplus in the General Fund to the School Fund, as an equivalent for the difference in revenue.

The following exhibits the payments to the State and from what sources derived for the fiscal years ending June 30, 1863 and 1864:

Sources—	1862–'63.	1863–'64.
Property tax	$390,655	$506,171
Poll taxes	48,229	68,740
Licenses, &c.	24,619	45,421
Stamps	57,457	65,380
Total	$520,960	$685,713

The total payments by all the counties in the State into the State Treasury for the two years ending Dec. 14, 1862, and to Dec. 1, 1863, were:

Fiscal year 1861	$1,095,020
" 1862	1,554,607
" 1863	1,901,981
Three years	$4,551,558
San Francisco alone	1,510,190

—statements which show that San Francisco City and County pay one-third the total amount required for the support of the State Government.

The expenditures on account of the city and county for the fiscal year 1863–'64, are thus stated by the Treasurer:

Purposes—	
General fund	$718,413 82
Special fee fund	42,597 91
School fund	197,940 97
School fund—special	3,484 29
School mortgage account	1,733 38
Interest acc't for school b'ds of 1854.	3,068 62
" " " of 1860.	6,165 69
" " " of 1861.	2,072 50
Sinking fund—school bonds of 1854.	29,950 00
" — " of 1860.	5,100 00
" — " of 1861.	2,500 00
" —fire bonds	86,503 05
Corporation debt fund	223,855 63
Account of coupon of bonds of 1858	68,730 00
Interest tax account—S. F. & S. J. R. R. bonds	22,417 50
Interest account—fire and civil bonds	45 00
Street light fund	108,781 51
Street department fund	639 59
Pound fee fund	900 00
Special pound fee fund	10 65
Police contingent fund	3,389 63
Total payments	$1,528,299 69
Cash on hand June 30, 1864	187,274 49
Total disbursements of Treasury	$1,715,574 18
The total receipts, including school fund, amounted to	1,178,743 76
And the surplus from the previous fiscal year	536,830 42
Total means of Treasury	$1,715,574 18

the details of which appear in the Auditor's Report, p. 46–51.

The following is a summary of the funded debt

of the city and county as it appeared on the records June 30, 1864:

Description of securities.	Principal Payable.	Interest Payable When.	Interest Payable Where.	Amount Outstanding.	S. Fund.	Annual
10s City bonds of 1851	1871	M. & N.	S. Fro.	$1,332,500	$50,000	
10s City fire bonds of 1854	1866	J. & J.	N. Y.	174,500	16,667	*
6s City bonds of 1855	1875	"	"	829,000		
6s City & C'ty b'ds of 1858	1888	"	S. Fro.	1,133,500		
7s School bonds of 1854	1866	M. & N.	N. Y.	42,000	+	
10s " of 1860	1870	J. & J.	"	59,500	5,000	
10s " of 1861	1870	"	"	20,000	5,000	
7s City & C'ty b'ds of 1862	1877		S. Fro.	240,000	2,500	
7s " " of 1863	1878		"	60,000		
7s " " Oct. 1, '63	1883	A. & O.	"	974,386	48,719	++++
7s " June 1, '64	1884	J. & D.	"	48,098	2,405	
Total June 30, 1864				$4,413,894	$130,291	
Annual interest					341,907	
Amount to be provided for by taxes for interest and sinking funds annually						$472,198

The note marks (*, †, &c.,) under the head of sinking fund, refer to the dates at which the annual payments thereto will commence, thus—* will commence in 1865; †, 1 1867; and ‡, in 1866. The "Sevens" of 1862 and 1863, payable in 1877 and 1878, were issued to the San Francisco and San Jose Railroad Company. The "Sevens" of Oct. 1, 1863, and of June 1, 1864, were issued principally in settlement of City Slip Judgments. The history of these is fully detailed in a former notice of the finances of the city. (See JOURNAL Oct. 29, 1864.)

From the above it appears that the amount of bonds outstanding June 30, 1864, was . $4,413,894
Coupons due and not presented for payment 84,592

Total liabilities on bonds $4,497,986

In hands of sinking fund commissioners, viz:

Debt of 1857: estimated value of fund, investments, loans, etc	$693,378	
At credit of S. F.—fire bonds, cash and loans	113,861	
At credit of S. F.—school b'ds, cash and loans	48,265	
At credit of corporation debt fund	47,360	
At credit of interest tax acc'nt S. F. & S. J. R. R. bonds ...	5,166	
		903,030

Amount of debt (less S. F., etc.) $3,594,956

The funded debt increased about $950,000, during the year 1863–'64, principally by the issue of bonds for judgments. Most of the fund judgments are now settled, but suits are still pending in the Courts to the amount of about $250,000.

As regards the heretofore non-issuance or problematic future issuance of bonds to the Central Pacific Railroad Company of $600,000, (or if by compromise $400,000,) and to the Western Pacific Railroad Company of $400,000, no reference is made in the reports of any of the city and county officers. A recent publication prepared by the Special Council of the city, however, relates the history of the matter in controversy and the present state of the question. We have not yet seen this, and in its absence we refer our readers for such information relating to the subject as we possess to our last article on San Francisco Finance, October 29, 1864, and to the judgment in the case recorded in suits against Placer County in the same issue of the JOURNAL.

The Municipal Reports of San Francisco make up a considerable volume of 360 pages, and relate to police, schools, hospitals, etc. It is scarcely possible without expanding our notice of it beyond the limits appropriate to a single article to notice these separately and at length. There are, however, prominent topics which invite attention while they exhibit the progress of the city in material and moral capacity, and measure the greatness to which it has attained in the few years elapsed since Americans commenced the grand civil structure which has been the result of their labors.

The great blot in the escutcheon of the city is the violence, crime, and immorality with which like all new and prosperous places it is beset. The number of arrests by the police in 1863–'64, was 7,138. Among these were 17 cases of murder, and (accessory to that crime;) 1,313 cases of assault, of which 58 were with deadly weapons, 22 with intent to kill, and 55 with intent to commit rape; 197 cases of grand, and 404 of petty larceny, 31 cases of robbery; 61 cases of burglary; 141 cases of malicious mischief; 60 cases of gamblers; 2,484 cases of drunkenness, etc. This is a catalogue of crime unprecedented in a city of the dimensions of San Francisco; but we are told that the police and authorities are unanimous in rooting out the evils these statistics discover. Gambling, especially, appears to claim the interference of the police, and the superintendent says that he will be able to extirpate it altogether if proper authority is vested in him for such purpose.

The fire department numbers 14 engine, 3 hook and ladder, and 4 hose companies, together 896 men. The city is supplied with water by two companies—the Spring Valley Water Works Company which supplies 145 public hydrants, and the San Francisco City Water Works Company which supplies 227 public hydrants. There are also 49 public and private cisterns, with capacities varying from 20,000 to 60,000 gallons, and aggregating about 2,000,000 gallons. The number of fires, not including 21 alarms, was 32, and the total loss of property by fire during the year, $145,000.

The coroner reports 20 suicides, 17 accidental deaths and 8 other sudden deaths—total 45 violent deaths. Of the suicides, 4 were by strychnine, 2 by arsenic, 4 by laudanum, 1 each by opium, morphia, prussic acid, strangulation, bleeding, and drowning, and 4 by pistol shots. Of accidental deaths 7 were by drowning, 3 by being run over, 5 by fire and one each by fall of wall and wagon. Among the other cause of death were—murder 6, still-born 1, and peritonitis 1. The whole number of cases attended to were 104, in which autopsy was initituted in 31 cases.

The harbor master reports 534 vessels of 60,894 tons as being in the coasting and bay trade. This is an increase of 27 vessels, and 9,870 tons over the previous year. These he classified as follows: 32 steamers, 11,042 tons; 11 ships, 6,546 tons; 47 barks, 16,996 tons; 38 brigs, 8,241 tons; 275 schooners, 14,573 tons; 132 sloops, 2,768 tons, and 4 barges, 728 tons. The arrivals from foreign ports and the Atlantic States numbered 536, measuring 416,832 tons, coming from the following countries:

	Vessels.	Tons.
Atlantic United States	110	117,828
Australia	27	13,881
Brazil	6	2,515
Chili	7	2,982
China	48	30,112
Central America	15	5,970
Ecuador	1	130
East Indies	14	7,102
Falkland Islands	1	709
France	14	6,165
Germany	10	4,219
Great Britain	31	25,631
Japan	7	1,796
Mexico	61	23,346
New Zealand	1	351
New Granada	44	99,318
Peru	7	2,108
Russian Possessions	12	4,204
Sandwich Islands	24	8,537
Society Islands	16	2,753
Spain	2	677
Vancouver & British Columbia.	60	50,955
West Indies	2	800
Whalers	16	4,733

And of the total the following is the descriptive list for 1862–'63 and 1863–'64:

	1863–'64.		1862–'63.	
	Number.	Tonnage.	Number.	Tonnage.
Steamers	93	159,489	91	139,373
Ships	194	184,832	178	179,363
Barks	148	53,992	127	46,178
Brigs	50	11,142	40	8,171
Schooners	52	7,377	59	5,538
Total ..	536	416,832	485	378,523
			536	416,832
Increase in 1863–'64			51	38,309

The city and county hospital received during the year 1,397 patients, and discharged 1,337, of which 189 were by death, and 903 cured. The number of inmates at the beginning of the year was 288, and at the end 348—the average number having been 322. This does not include 985 outside patients, nor 10 children born in hospital. Of the internal patients 414 were Americans, and 983 foreigners.

The industrial school contained at the end of the year 90 inmates, of which 76 were boys, and 14 girls. The whole number of commitments since the opening of the institution May 3, 1859, including 17 re-commitments, has been 352, viz., 290 boys and 62 girls. The cost of this institution to the public is $15,000 a year.

The school statistics are very interesting but too voluminous for our purpose. In 1860 there were in the city 15,116 youths under 21 years of age, in June, 1864, there were 30,879. The public schools of the city are classed as follows:—1 high school for boys and 1 for girls; 6 grammar schools, 15 primary; 4 evening; 1 normal; 1 colored, and 1 Chinese. The number of teachers employed is 102, of which 84 are females and 18 males. Twenty-four additional teachers would be employed in 1864–'65. The average daily attendance at these schools increases rapidly: in 1860, it was 2,837; in 1861, 3,377; in 1862, 3,794; in 1863, 4,389, and in 1864, 5,470. The cost of instruction the last year was $126,285, or $21 per pupil. In Boston in the same year it was $15 77, in Chicago $13 55, and in Cincinnati $12 55. In

these figures no account is taken of the cost of building or interest on the school debt.

There are other subjects in the reports which it would be interesting and profitable to examine, but space forbids; and San Francisco is not the nation at large.

Three railroads traverse the streets of the city extending into the suburbs, and there is a railroad in operation from San Francisco to San Jose a distance of 50 miles.

Erie and Pittsburg Railroad.

The following gentleman have been elected directors of this company for the ensuing year: W. L. Scott, President; Directors, John P. Vincent, Job Hearn, John A. Tracy, James Pierce, V. M. Thompson and Dean Richmond.

East Pennsylvania Railroad.

From the report of this company for the year ending November 30, 1864, we learn that the receipts during that time were:

From passengers	$111,802 04
" freights	215,589 91
" U. S. troops	16,328 80
" " freights	5,622 63
" express, mail, etc	8,065 75
	$357,409 13

And the expenditures were:

Transp. of passengers and freight, motive power, etc	$158,448 47	
Construction, renewal, interest, etc	231,338 12	
Rolling stock, land damages, etc	39,863 15	
		429,649 74
Deficiency		$72,240 61

The increase of gross earnings in 1864 over 1863, was $113,511 19; the increase in expenditure, $225,050 02.

The entire cost of the road, rolling stock, depots, land damages, real estate, etc., November 30, 1864, was $1,455,648 08—showing an increase during the year of $163,016 58.

The general office of the company, in Reading, is finished, and now occupied. It is a large three storied fire-proof brick building.

Shops for the repairs of engines, and the construction and repairs of cars, and also a round house for the locomotives, were built during the year. These buildings are of brick and covered with slate.

The shops are in operation, and will be of great advantage to the company. The cost of these buildings and the machinery in the shops largely increased the expenditures for the year, but they were indispensable.

All the sidings along the road and at Reading and Allentown were extended, and several new ore wharves and three new bridges constructed. A water station was built near Millerstown, and one at Allentown nearly finished. These are supplied from springs and of course will be no further expense.

The rolling stock is in good condition, and the track in first rate order, and the financial affairs very satisfactory, considering the large indebtedness of the company when they started and the improvements since made.

President—Edward M. Clymer. Directors—E. K. Alburtis, Horatio Trexter, William H. Clymer, C. H. Hunter, Isaac Ely, George R. Frill, George E. Clymer, Diller Luther.

American Railroad Journal.

Saturday, February 4, 1865.

Stock Exchange and Money Market.

We have always contended that as the war approached its conclusion, cotton was to play a large part in the settlement of our financial difficulties. The movement has begun. A thousand bales from Mobile, the proceeds of which are to be applied to the clothing and relief of the rebel prisoners confined at the North have already arrived in this city. Vessels loaded with the cotton captured at Savannah have been daily expected, and in addition to this, we are told that the abandonment of the war in St. Domingo by Spain just officially announced, will liberate many thousand bales more, to add to the accumulating stock. It is not strange, therefore, that the article which sold in September last at $1.75 per lb. has fallen to 85 cents. or about one half, nor that the shipment from this city the last week to Europe has commenced on a large scale, and is likely to be continued. When a pound of cotton which we can spare will produce nearly an ounce of silver abroad, it is very evident that those who can ship it conveniently, will not be slow to do so. Hitherto the supply owing to the war has been unequal to the demand of our own manufacturers, but now we shall have a surplus, and it will go forward. Consequent upon this we see its effect already in the fall of exchange, which moves always in parallel lines with gold. Good bills were sold the present week under par, and though some remittances in the precious metals continue to be made, they are made actually at a loss to the shipper, and under instructions without regard to that loss, or as dividends on the National securities.

It is estimated that there are even now, four millions of bales within the enemy's lines, and as these can no longer be exported by them, even in limited quantities owing to the successes at Wilmington, it is not credible that the owners, on the almost certainty of the restoration of the Union, will not seek every opportunity to convert them into money. It is evidently the interest of holders of cotton in the Southern States to save from the wreck all they possibly can, and it is a fair conclusion to draw that they will do so. They have made sacrifices enough for the gratification of their ambitious politicians, and to be utterly ruined for their sake when no possible advantage can be gained by the sacrifice, is asking too much of mortals, who wish to have food and clothing for a few years longer, and find ridiculous abstractions can be carried too far for human comfort.

There is besides this view of the subject another of some importance. It is this. The cotton speculators of England have been contracting on an immense scale for supplies from Egypt and the Indias on the supposition that the war in this Country was to last many years longer as they evidently wished it should. By monopolising the cotton of the East, they have expected to make their own prices for the fabrics composed of it, and thus secure a double profit, the one before it went to the looms, and the other after it should leave them. They are doomed to a double disappointment, and we expect nothing else, than to hear that the numerous failures in England we have recorded from time to time, will be followed by others more extensive.

Certainly if there is such a thing as poetical justice, if no other kind, the result will not be surprising. The early recognition of the South as belligerents was uncalled for, and not justified on the breaking out of the rebellion. It was if due at all, due at a much later period of the contest, and has tended to prolong it to this moment. Had it been withheld, the struggle would long ago have ceased, and cotton would have gone forward in its usual quantities. But those who made this couch, must now be content to lie in it. As regards our own market we can state that prices of cotton goods have already fallen very largely in this city. By our advices from Liverpool of the 15th instant, we learn that at the close of the previous week the stock in hand at Liverpool was 493,620 bales, and that there was at sea destined to the same port 270,000 bales. It is easy to see that a depression of 10 cents. per lb. would alone

cause a loss to the speculators of upwards of thirty millions of dollars. At the date referred to, a fall in cotton had commenced, but it had been checked by the news from the United States, nevertheless it had already dropped 6 cents per lb. providing a loss as estimated of ten millions of dollars. We may therefore count upon a further decline, as we have supposed.

We notice with some surprise an attempt in certain quarters to bolster up the value of railway shares by rather an unsatisfactory assumption, viz., that even with the return of peace we are to look forward "to a constantly increasing supply of money," and that it is to be the "most abundant article we shall have left," in short that is a "growing institution." On this hypothesis, it is contended, railway shares are to advance. We differ entirely from this opinion, and believe that railway property has a better foundation than irredeemable paper money, and that its value is not justly to be estimated on this principle. On the contrary we believe an early return to specie payments will increase their profits, since the freight and passenger traffic will continue to increase, while their expenses will diminish by the difference between paper and gold as they now are calculated. All labor and materials will be cheaper, and yet the fares and freight will be received at the gold standard. No one pretends that the rate of these will be diminished. The true way of regarding this kind of property is to look at its character, business and management, and not at the amount of paper money afloat, which can only affect its net earnings injuriously.

The price of gold has fallen the last week under the force of public opinion, and the very favorable condition of our military affairs. The rumors of Peace negotiations have also told upon the market. What faith is to be placed in them remains to be seen. Of one fact there can be little doubt. The great masses of the Southern people have had enough of their poor experiment. It is wonderful that they were ever misled for a moment. Their peculiar institutions were actually safe as long as they remained in the Union, as they had been from the first. Under no other probable conditions were they likely to be maintained, and the result has shown that they might have foreseen this, as such men as Alex. H. Stephens did. The idle talk that "there can be no just government without the consent of the governed," an assertion true enough in the case of the 13 original colonies, who had no voice and no part in the system under which they suffered, is absolutely false in its application to the South, who were always a part of the Governing power, and indeed the greater part of it for more than sixty years. Parties making their own government, controlling it and regulating it cannot assume that they are the governed with any truth, and even if occasionally they were in a brief mipority, still as it was their own Government after all, and they had the same civil rights they ever had they could not pretend that there was any distinction made against them or that they could be considered any part of an oppressed people.

It is not surprising therefore that the sophistry of ambitious demagogues is fast becoming odious to the people of the South, and we hail with satisfaction that returning power of discrimination, which we almost feared had been lost amid the clamor of the theorists, and the outcries of demagogues.

If cotton, a pound of which has so long been worth more than an ounce of silver, has fallen one half in price, and has been almost as much a standard to measure gold, as gold has been of paper, we cannot see how gold is to remain at its present rates. There is but one reason for it in the future, and that is the possible increase of the paper currency. But we are re-assured that the Treasury department is at length fixed in its policy not to issue any more; the circulation of the National Banks has also a limit of law, the internal revenue and customs are producing at the rate of between seven and eight hundred millions of dollars annually, and within a few months the expenditures for the war, must on the return of peace either by negotiation or military successes be completely stopped in its greatest amounts, so that we may very safely calculate that gold will shortly lose its advantages over paper money in a large degree, and that equality of paper and gold is not very far off.

This probable condition of things naturally gives rise to many speculations as to the quickest method of bringing about the desirable event. We take the liberty of giving an opinion from a very eminent financial source to this effect, viz., that Congress as soon as it will have no further occasion to authorize large loans for the support of the war may call in the legal tenders, by depriving them of their character of money, and making them necessary to be funded in a five per cent stock. This stock being supposed as the last of the system, would be a fair investment to the holders of these legal tenders.

In the meantime a National Bank of a hundred millions of dollars might be credited, to issue notes only redeemable in specie, and to receive such only. Of the stock the Government might hold one half, and the institution become the Sub Treasury and its financial agent and depositary. The return of all other Banks to specie payments within a limited period, should then be required by law.

On the supposition that peace is at hand, and that our military and naval expenses may be cut off within a few months, this plan it is contended would carry the Country and the Government safely over the gulf which lies between specie and paper.

It is announced that the Secretary of the Treasury has given out the particular agency of the 7-30 loan, resolving to trust to that and to taxation for the further support of the Government. This is confirmatory of the impression that the issue of further legal tenders is to be discontinued. We certainly have arrived at the point where this policy is commendable not only but wise. We have always thought that the paper money system as adopted by Mr. Chase was the only one which circumstances permitted, but we always had his assurance that he had never for a moment lost sight of the necessity of returning to a specie basis at the earliest opportunity. It has been quite common for the carping and the critical to compare this system with that of the celebrated French *Assignats*. Smatterers in history have alluded to the resemblance without knowing some important facts in relation to it. One is, that 45,000 million of francs were issued by the Government, before the currency had been abandoned as a resource. But the taxes did not produce 1-5th of the monthly expenditure, and there was no revenue from commerce, yet twice during their issue they rose to par, and had the proper steps then been taken, the whole catastrophe might have been avoided, or at least rendered supportable.

Another fact is, that the prices of lands, houses, properties of all kinds, real and personal, there rose to an enormous height, because every one desired to exchange their assignats for something tangible and certain.

In our case, our Government has only issued in legal tenders what is equivalent to two thousand millions of francs, and so far from the currency being unpopular, it is eagerly preferred to all other kinds. Nor has real estate risen in price much beyond its former value in gold; in many places it has not risen at all. Buyers will give no more in legal tenders than they would have been willing to give before the war, and this is the rule rather than the exception. Here is an essential difference quite overlooked by the writers alluded to. They would have been far more accurate, if they had drawn the parallel between the assignats and confederate money, the resemblance being much more remarkable and much more truthful.

Government securities were more inquired after the past week, and are reported steady. Large orders for the 5-20's on foreign account have recently been executed.

Railway shares have drooped the last few days, and stocks are generally dull, though the Governments stand well, and 110 is paid for the 5-20's for foreign account.

Money is easily obtained at 7 per cent. collaterals, but is not freely given on commercial paper, as it is supposed it is less reliable than it was from the approaching fall in goods on hand.

The balance in the Sub-Treasury in this city on Tuesday, was $31,568,901 39.

Taxation of National Securities.

A recent decision of the United States Court has settled a question of great interest to the holders of National securities. By the laws of New York passed at various times, a State tax was levied on the securities held by the State Banks as part of their capital. The Supreme Court and Court of Appeals of New York sustained the legality of these acts, but the recent decision of the U. S. Court, settles the question adversely, and affirms that such State taxation is unconstitutional, being a restriction on the powers of the general Government to borrow money. The decision necessarily gives a large increased value to National securities, as compared with all others in the market.

American National Bank.

We perceive by an official notice of Mr. McCulloch, Comptroller of the Currency, that the American National Bank has been duly organized in conformity with the act of Congress, and is authorized to commence business in this city. Its capital is $500,000, with the privilege of increasing it to $5,000,000. The President is Noah L. Wilson, Esq., long connected with the State Bank of Ohio, and yet as hitherto, the President of the Marietta and Cincinnati Railway Company. Its Vice President is Mr. D. W. Vaughan, late Cashier of the Fourth National Bank of this city. Its Cashier is Mr. Alfred A. Post, late Superintendent of the Government Account in the same institution. Among the principal capitalists connected with the new bank is David Gibson, Esq., of Cincinnati. It is understood that Western business naturally following capital of that character will be largely enjoyed by the American National, and it enters upon its career with the fairest promise of success.

Montreal and Vermont Junction R. W.

The annual meeting of the shareholders of this Company was held at their office St. Armand West, on the 16th instant. Hons. P. H. Moore, A. B. Foster, J. Gregory Smith, Joseph Clark, L. Brainard, J. D. Hatch, Esq., and Henri Des Rivieres, Esq., were elected directors of the Company for the ensuing year. At the meeting of the Board the Hon. P. H. Moore was elected President; the Hon. J. Gregory Smith, Vice-President, and J. C. Baker, Secretary and Treasurer for the coming year. On the same day the Road was opened for traffic.

☞ We again call the attention of our readers to the advertisement of the N. Y., Philadelphia and Baltimore Petroleum and Mining Company. This Company's property is located on Oil Creek, Cherry Run, Cherry Tree Creek, and Walnut Bend, being in the very heart of the Oil Regions, places well known for their inexhaustible supply of Oil. The Company's office is No. 71 Broadway, where prospectus, maps, &c. of the property, and all information regarding it is freely given.

Troy and Greenfield Railroad.

The receipts of the Troy and Greenfield Railroad during the past year were $493,070, including $450,000 from the State Treasurer. After paying the expenses, a balance remains of $6,127. The Commissioners estimate that it will cost from $25,000 to $30,000 a month to carry on the road the present year.

☞ We invite attention to the Advertisement of the Niagara Fire Insurance Company, in another column. It has a cash capital of $1,000,000; the surplus January 1, 1865, was $270,353—making the gross assets, $1,270,353. This company has recently paid its 29th dividend of six per cent. on the whole capital, free from U. S. tax. The President of the company is Jonathan D. Steel. Secretary, P. Notman. Office No. 12 Wall street.

Boston, Hartford and Erie Railroad.

Under the terms of agreement between the New York and Boston, and Boston, Hartford and Erie Railroad Companies, the holders of full paid shares in each of those companies are required to change them into the capital stock, share for share, of the Boston, Hartford and Erie Railroad Company (new corporation.)

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending Jan. 21, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$23,622 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	76,433 00
Total	$103,179 00
Corresponding week, 1864	102,082 00
Increase	$1,097 00

The earnings of the Marietta and Cincinnati Railroad for the 3d week in January:

	1865.	1864.
Passengers	$8,791 38	$5,452 15
Freight	12,050 24	5,443 37
Mail, express & telegraph	1,186 33	944 58
Total	$22,027 90	$11,840 10
Total this month to date	64,631 28	38,835 01

The earnings of the Toledo and Wabash Railroad Company for the 3d week of January, 1865, were $36,383 00
Corresponding week of previous year. 20,997 00
Increase $15,386 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in January, 1865, were $84,013 00
Corresponding week of previous year. 60,042 00
Increase $23,976 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Jan. 14, 1865, were:

	1865.	1864.
Passengers	$2,248 60	$1,408 52
Freight	8,360 39	4,381 99
Express	130 22	104 16
Mails	296 58	296 58
Total	$11,035 79	$6,191 25
Increase		$4,844 54

Receipts from January 1 to Jan. 14:

1865	$11,035 79
1864	6,191 25
Increase	$4,844 54

Wisconsin Railroad Decision.

ILLEGALITY OF RAILROAD COMPANIES TO ENGAGE IN BUSINESS NOT AUTHORIZED BY THEIR CHARTERS. NO POWER TO BUY AND HOLD LANDS SITUATED AT A DISTANCE FROM THEIR ROADS. FRADULENT REPRESENTATIONS AS TO PECUNIARY CONDITION OF RAILROAD COMPANIES. LIABILITY FOR REPRESENTATIONS OF THEIR OFFICERS AND AGENTS. CONVEYANCE OF LAND TO RAILROAD COMPANIES THROUGH FRAUD AND MISREPRESENTATION OF THEIR OFFICERS AND AGENTS.

The late case of Waldo *vs.* The Chicago, St. Paul and Fond du Lac Railroad Company, and others, was an appeal to the Supreme Court of the State of Wisconsin from the Circuit Court from Jefferson County in that State.

It was an action to have certain conveyances of land, made by the plaintiff to one Wm. B. Ogden, and by the latter to one Mahlon D. Ogden, set aside, or declared void, and to compel a re-conveyance to the plaintiff.

The complaint, after stating that the Chicago, St. Paul and Fond du Lac Railroad Company in the fall or winter of 1856, appointed a committee to canvass for subscriptions to the stock of said company to be paid by conveyances of land to said Wm. B. Ogden, and that Bradley, Pease, Wood and Johnson, who were members of said committee came during said winter to the County of Jefferson, and that various public speeches were made by them and said Ogden, to induce subscriptions to said stock, payable in land, and that various committees of citizens were appointed to co-operate with them in canvassing for such subscriptions, alleged that in February and May, 1857, the plaintiff conveyed to said Ogden, certain lands by warranty deed in the usual form, and received therefor $6,200 of the stock of said company, and that the plaintiff was induced to make said conveyance for said stock solely by means of certain false and fraudulent representations made at public meetings and in private, by said Ogden and said Bradley, Pease, Wood and Johnson, and by other persons who acted as citizen committees, and stated what said Ogden and the others above named directed them to state, believing all that was told to them, which representations were in substance as follows:

That said company under a former organization when it was known as the Rock River Union Valley Railroad Company, had been largely in debt, and that the present company had succeeded to their rights, and liabilities, and after securing their portion of the land grant from the states of Wisconsin and Michigan (donated by the U. S.), had become in good credit, and the former creditors of the old company, who had also been creditors of the new wishing to share in said land grant, had nearly all consented to converting their claims against said company into stock, and that all the large debts of the company had been already satisfied by conversion into stock, and that this process was still going on and would soon be completed so that the company would not owe a dollar; that the company was in good condition and credit; that the net earnings of the finished portion of the road from Fond du Lac to the La Crosse Junction, and from Chicago to Janesville, for the last six months, had been eqpal to 4½ per cent. on the entire cost of the road, represented by three millions of stock, and that the directors would have declared a semi-annual dividend of 4½ per cent., but they thought it best to use said earnings to carry on the road, and they had been carried to the construction fund instead of being divided among the stockholders; that the company only needed $600,000 inland, mortgages, bonds and cash subscriptions to complete the connecting link between La Crosse Junction and Janesville, and were getting it without difficulty; that the stock would soon be at par and above par; that the land grants made to said company were worth, at a low estimate, thirteen and a half millions of dollars, and that the road when completed from Chicago to Fond du Lac would certainly pay dividends of 10 per cent. per annum, &c., whereas in fact the said Ogden, Bradley, Pease, Wood and Johnson well knew that the company was at that time indebted to its mortgage bondholders about $1,800,000, and to other creditors unsecured a floating debt of about $1,600,000, and was not in good condition, but had no available resources with which to pay the principal or interest of its debts, and was on the verge of bankruptcy, and was without credit among capitalists, and its bonds and stock of very little value, and that the portion of the road completed was not earning any such net sum as 4½ per cent. for six months upon the cost thereof, as represented by the stock, and that said net earnings, whatever they may have been, had not been applied to extend the road, but to pay former debts and the expenses of the company; that the $600,000 proposed to be raised to enable the company to build its road from Janesville to La Cross Junction, would have very little value for that purpose, and would be swallowed up by the creditors of the company; that there was no prospect of the completion of said road from Janesville to said Junction for years, nor until the road should be in the hands of its bondholders or purchasers at a sale under their mortgage, that there was no good reason to suppose that the company would ever earn enough to pay more than the interest on its debts, or that its stock would ever be worth anything; and that the lands granted to the company were really worthless, and a large portion of them had long been subject to private entry at fifty cents per acre, and would be a poor investment at any price when taxes would have to be paid. The complaint also alleged that all the proceedings of said Ogden, and of the said committee of the company, were fradulent in intent and designed only to obtain so much more land as assets before the final bankruptcy of the company; and also that the plaintiff parted with his land solely in consequence of said false representations, and that he is ready and able to surrender the stock issued to him, to be cancelled as the court shall direct.

The other allegations of the complaint are sufficiently stated in the opinion of the court.

The company and the Ogdens demurred separately on the ground that the complaint did not state facts sufficient to constitute a cause of action.

The court overruled the demurrers and the defendants appealed.

By the Court, COLE, J.—In the case of Clark *vs.* Farrington 11 Wis. R. 306, 424, this court, among other things, held that a railroad corporation could not engage in any distinct or separate branch of business not authorized by its charter, for the purpose of raising funds to accomplish the objects for which it was created, that while the corporation in the exercise of the powers conferred upon it by its charter might adopt any convenient means proper in themselves, to accomplish the objects of its creation, it could not embark in the business of banking, or manufacturing or speculating in real estate, to raise money to build its road, for this would be acting outside of its charter. The distinction indicated by these illustrations is plain, important and fundamental. A railroad corporation created for the purpose of building and operating a railroad might buy its depot grounds, its road bed, its rolling stock, and pay for these things in the stock of the company, without exceeding its powers or violating any principle of public policy.

It might exchange its stock for road ties, or pay in stock for the grading of its road as well as sell its stock for the money with which to pay for these necessary and indispensable things, and still it would be doing nothing more than the company was authorized to do. And in that case we held, if the corporation should resort to a transaction of a two-fold character, and receive a bond and mortgage in payment of a stock subscription, and then sell the securities to raise money with which to build and equip its road, it would still be acting within the powers conferred upon it by its

charter. But when a corporation created for the purpose of building and operating a railroad, goes into the business of banking, or manufacturing and selling goods, or dealing and speculating in real estate, because its corporators or board of directors think such adventures may be profitable, or if a bank should go to building and operating a railroad for like reason, it is easy to see that in each instance the corporation is attempting to transact business which, under its organic act, it has no right or power to do. And if the corporation might embark in a separate and distinct business, not contemplated by its charter, merely because it was supposed it would be profitable, and increase its means and resources, there would be no safety to the public in granting any special charters, and none to individuals who might invest in the stock of the company.

We have, therefore, no difficulty whatever in arriving at the conclusion that the appellant could not go to speculating in real estate, and had no power under its charter to buy and hold lands situated at a distance from its road, which the company did not want and could not possibly use in constructing or operating its road, but our real difficulty in the case has been to determine what became of the title to the lands conveyed under the circumstances disclosed in the complaint. This question we have examined with all the care and diligence we were able to bestow upon the case, consistently with our other duties, and we have not arrived at any satisfactory result upon it. We think the demurrer to the complaint was properly overruled upon another ground, which we will presently notice but our desire was to pass upon the main question in the cause.

In the present case the respondent states that for the purpose of paying his subscription to the stock of the company, be conveyed to Wm. B. Ogden the lands mentioned in the complaint, to hold the same in trust for the corporation. He avers that the lands are not all timber or woodlands, that there was no stone quarry or gravel bed thereon, that they are not on or contiguous to the line of the railroad, and, as located, could be of no use or advantage to, and were not necessary for the purposes of the road. The complaint further alleges that Wm. B. Ogden has conveyed the lands to Mahlon D. Ogden, who took the conveyance with full notice of the circumstances under which they were obtained from the respondent, and holds the same for the use and benefit of the company. From these allegations it would seem that the corporation proposed embarking in the business of buying and selling real estate as a matter of speculation and profit, a thing which it clearly had no right to do. It was authorized to take and hold such lands and real estate as were necessary and proper for the use and enjoyment of its road but no more.

It is urged that when a grantor conveys lands to a railroad company, or to a trustee for its benefit, which he knows the company does not want and cannot use for the purpose of building and operating its road, he is a party to the illegal contract, and cannot claim relief in a court of equity. He becomes, it is said, a perpetrator in the unlawful contract, and therefore should meet the consequences of his own act. On the contrary it is said that the restriction is directed against the corporation alone, to prevent it from engaging in illegal transactions and that where it obtains real estate for a purpose not authorized by its charter, it can be compelled, in a suit in disaffirmance of the contract to restore the land which it has obtained. In the present case it will be observed that the lands were conveyed to a trustee, impressed with a trust which the law does not sanction, and does this change the law of the case, or affects the rights of the respondent? If he could reclaim the lands had they been conveyed directly to the company, ought he not to do so when they are conveyed to a trustee for its use and benefit? These questions have presented themselves to our consideration in the examination of this case, and we should have been glad to have decided them, had we come to a satisfactory conclusion upon them. They are interesting and important and controlling in this case; but we are compelled to leave them for further argument and consideration.

But upon the other ground, that the deeds were obtained from him by false and fraudulent representations as to the pecuniary condition of the company, we think the respondent shows himself entitled to relief. He alleges that Wm. B. Ogden, and the persons acting with him in soliciting stock subscriptions, represented that the company was in good pecuniary condition and repute; that the part of the road completed from Fond du Lac to the La Crosse Junction, and from Janesville to Chicago, was earning money very rapidly, and in fact that the net earnings of the road for six months then last past, had been equal to 4½ per cent on the entire cost of the road, which amounted to three millions of stock, while at the time they well knew that the company was on the verge of bankruptcy, and about to fail, and was without credit, its bonds and stock of little value; and that the road in operation was not earning any such sums as were represented.

It is very clear that those representations as to the pecuniary condition of the company and the earnings of the road, were material, and were such as the respondent had a right to rely upon when he sold his land for the stock of the corporation. He could not know what the road was earning, or that the company, instead of being in a sound financial condition, was upon the eve of bankruptcy. It is evident that these matters, which fixed the value of the stock could only be known to the agents and officers of the road. They had access to the books and records of the company, knew what the road was earning and whether the corporation was solvent, and nothing was more reasonable or natural than that a party about to subscribe for stock should rely on the statements of its officers and agents who were around soliciting subscriptions.

It is said that the company ought not to be held responsible for the misrepresentations of its agents, but we think otherwise. They were going about the country obtaining subscriptions, and whatever fraudulent representations they made as to the condition of the road and the value of the stocks while doing this must be deemed to be made by them in the execution of their agency, and for which the company is liable. This we think is very clear from the authorities. Sanford *vs.* Handy 23 Wend., 260; Gibson *vs.* D'Este, 21 Eng. Ch. R., 542; Younge and Collyer, 542,570; Phil., Wilmington and Baltimore Railroad Co. *vs* Quigley, 21 How. (U. S.) 202.

We therefore think that if the allegation of the complaint in respect to these false and fraudulent statements of the agents shall be sustained by the proof, the respondent will be entitled to have the contract rescinded on the ground of fraud.

The order of the circuit court overruling the demurrer is affirmed.

Order affirmed accordingly.

Interest and Dividends.

The Milwaukee and Prairie du Chein Railway Company have declared a dividend of 4 per cent. on the 1st preferred stock, payable February 10th; and 3½ per cent. on the 2d preferred stock, by 1st June next. Both payable less the Government tax of 5 per cent. Conversion of mortgage bonds into 1st preferred stock will be made from 10th to 20th February, both days inclusive.

The American Coal Company have declared a semi-annual dividend of 4 per cent., payable Feb. 15.

The Glen Carbon Coal Company, a dividend of 1 per cent., payable Jan. 30.

The Lykens Valley Coal Company, a dividend of 5 per cent., payable Jan. 28.

The Sherman Coal Company, a dividend of 1 per cent., payable Feb. 6.

The Washington Coal Company, $2.50 per share, payable on demand.

Albion Gold Mining Company of N. S., its first dividend of 3 per cent., payable Feb. 6.

Losses by Fire.

The number of fires in the United States in 1864 was 294, and the losses thereby $28,522,000. In 1863 the number was 150, and the losses, $14,060,000—showing an increase in fires of 144, and in losses of $14,462,000. The following table gives the losses by fire in the United States for the past eleven years:

Year.	Losses.	Year.	Losses.
1854	$20,578,000	1859	$16,058,000
1855	13,040,000	1860	15,597,000
1856	21,159,000	1861	18,020,000
1857	15,792,000	1862	17,640,000
1858	11,561,000	1863	14,060,000
		1864	28,522,000
Total			$192,027,000

Milwaukee and St. Paul Railroad.

The earnings of the Milwaukee and St. Paul Railway Company, including the Eastern Division of the La Crosse Railroad, are for 1864, $2,259,398; 1863, $1,764,243; increase for 1864, $495,155. The operating expenses of the year are 76 per cent.

Philadelphia and Baltimore Central R. R.

At the annual meeting of the Stockholders of this company held on the 9th ult., Samuel M. Felton was elected President; S. J. Dickey, David Woelpper, J. R. Ramsey, Dr. S. B. Stubbs, J. A. Strawbridge, M. Conard, J. Phillips, O. Brinton, Jr., P. Quigley, S. Dickey, J. Tome, D. Stubbs, Directors; Joseph Huddell, Treasurer; and R. Hodgson, Secretary.

European and North American Railway.

We learn by telegraph that the corporation of the city of St. John, New Brudswick, has subscribed $400,000 to the stock of the European and North American Railway Company. This amount, with the Government subsidy of $10,000 per mile and the individual subscriptions, insures the building of the line from St. John City to the Maine boundary.—*Boston Journal.*

Troy and Boston Railroad.

The earnings of this road during the year ending November 30, 1864, were $573,445; and the expenses, $535,063—leaving as net profit, $38,382.

Railroads in California.

Central Pacific Railroad.—We published last week a very full account of the Central Pacific Railroad, taken from the recent report of S. S. Montague, Esq., acting Chief Engineer. The following general statement from the Sacramento *Union*, throws additional light upon and gives great interest to the subject:

The great cost of a work of this magnitude placed it beyond the reach of unaided private capital. The result of the surveys and examinations was therefore placed before Congress, who, in view of the importance of the railroad as a great national highway, passed a bill on the first day of July, 1862, afterwards amended July 2, 1864, providing for the construction of a railroad from the Missouri river to the Pacific ocean, including this company among the recipients of the aid granted by the bill. The surveys made by this company, demonstrating the feasibility of constructing and operating a railroad over the Sierras, which had been deemed impracticable, contributed much to the success of this measure.

By these laws the company receives from the National Government its bonds to the amount of $16,000 per mile for that portion of their road between Sacramento and Arcade creek, about seven miles, and $48,000 per mile for the 150 miles east of that point. They also receive twenty sections of public land for each mile of their road, being 12,800 acres per mile—that is, every section designated by odd numbers within twenty miles on each side of the railroad, except mineral lands, on which, however, the timber is granted to the company.

The State of California has also provided for the payment of the interest, at seven per cent. per annum, on $1,500,000 of the bonds of the company, for twenty years, in gold, amounting to $105,000 a year during that time.

As soon as the Railroad Bill was passed by Congress, the company placed several corps of engineers in the field to make the final locative surveys of the first section of fifty miles. These surveys were so far advanced that they were able to let out the contract for grading the first eighteen miles, from Sacramento to the California Central Railroad, on the 27th day of December, 1862. The work was inaugurated with proper ceremonies, on the 8th day of January, 1863, but the grading was not actually commenced until February, 1863.

In the meantime an agent had been sent to the Atlantic States to purchase the iron and rolling stock in order that they might be on hand when the grading should be completed. Upon his arrival no American iron or rolling stock could be purchased except one locomotive, which was immediately bought and shipped. But contracts for the manufacture of iron and other material were promptly made. The first shipment of iron reached Sacramento October 8, 1863, and the grading being ready the laying of the track was immediately commenced. The work, with slight interruptions caused by the non-arrival of iron and ties, steadily progressed until the 26th of April, 1864, when the eighteen miles were completed, and the cars commenced running to the junction of the California Central Railroad.

In the meantime thirteen miles more of the line had been surveyed and located and the grading nearly completed. On the 6th day of June, 1864, the cars commenced running to Newcastle, thirty-one miles from Sacramento, and from that time to the present the company have been doing a large and steadily increasing business, fully proving that when extended to Dutch Flat, as well as when completed, it will be one of the best paying roads in the United States. In connection with the Dutch Flat and Donner Lake Wagon Road it forms the best and most expeditious route over the mountains both in Summer and Winter. Some of the advantages are the low elevation of the pass at the summit, it being about six hundred feet lower than Johnson's Pass, and therefore less liable to deep snow. It also avoids the second summit or eastern range of the Sierra (which is the most difficult of passage) as it follows down the Truckee river, which pierces that, as well as the Washoe range, in its course to the east.

The company has had to meet great difficulties in the prosecution of the work—delays in the manufacture and transportation of iron and rolling stock, the rugged, hilly character of the country through which the road has been graded, financial difficulties growing out of the war, and the necessity of using gold coin in payment of all their work in California, have been great hindrances; yet they have constructed and had in use for more than six months, thirty-one miles of a first-class railroad and telegraph line, expended over $100,000 in further grading, and accumulated a large stock of railroad iron and other material, while not a mile of rail has yet been laid on the eastern end of the Pacific Railroad. All this has been done without any National or State aid.

The assets of the Company for the further prosecution of the work are as follows:

Amount of capital stock unsold	$18,481,300 00
Amount due from stockholders	136,320 68
First mortgage bonds unsold	106,000 00
Placer county bonds	75,000 00
Sacramento county bonds	163,500 00
Seven per cent. gold bonds due from San Francisco	400,000 00
Thirty-year six per cent. bonds due from the United States	1,264,000 00
396,800 acres of land due from the United States, at $2 50 per acre.	992,000 00
Company seven per cent. gold bonds (Interest paid by the State)	1,500,000 00

The following is a statement of the work done and materials furnished and purchased for construction:

Earth and cement excavation	602,598 cubic yds.
Excavation material requiring blasting	195,576 cubic yds.
Stone masonry	3,280 cubic yds.
Cobble & granite around bridge piers	825 cubic yds.
No. of brick in the work	280,582
Timber in struct're, No. of ft. b'rd meas're	1,232,800
Lumber in struct're, No. of ft. b'rd meas're	180,000
No. of redwood ties	116,000
No. of tons of iron (70 lbs. per yard)	8,000
No. of locomotives	8
No. of cars	146

The business of the road to Jan. 1, 1865, was as follows:

No. of passengers	55,287	
Amount received therefor in gold coin	$72,750 00	
Am't received for freight and express	47,349 00	
T'l received for pass. and freight		$120,099 00
Operating expenses		63,264 26
Net earnings in gold coin		$56,894 74
Cost of the 31 miles completed		$1,023,000
Rolling stock		217,000
		$1,240,000

The estimated receipts when the road is complete to Dutch Flat are:

Annual rec'pts from passengers in Cal.	$208,050
Annual rec'pts from freight in California	496,000
77,500 tons of freight to Washoe, $10	775,000
48,000 pass. to Washoe and back, $6 75	324,000
Express and mails	20,000
Total	$1,823,050
Deduct operating expenses	546,000
Net earnings in gold coin	$1,277,050

When completed to the State Line it is calculated they will be as follows:

116,000 tons merchandise, $22 50	$2,610,000
100,000 cords wood, $5	500,000
30,000,000 feet lumber, per M. $10	300,000
10,000 tons return freight, $10	160,000
96,000 passengers, both ways, $12	1,152,000
Express and mails	30,000
Local California business	704,050
Total receipts	$5,456,050
Deduct operating expenses	1,636,800
Net receipts in gold coin	$3,819,250

The officers of the road are: Leland Stanford, President; C. P. Huntington, Vice-President; Mark Hopkins, Treasurer; E. H. Miller, Jr., Secretary; S. S. Montague, Acting Chief Engineer; Charles Crocker, General Superintendent; E. B. Crocker, Attorney. The Directors are Leland Stanford, C. P. Huntington, Mark Hopkins, E. H. Miller, Jr., A. P. Stanford, E. B. Crocker and Charles Marsh.

We also find in the same paper the following extracts in relation to the six other Railroads now constructed, and in process of construction in this rich and enterprising State:

Northern California Railroad.—This road was completed in February last, and extends from Marysville to Oroville, a distance of twenty-nine miles. The President of the Company is Captain M. H. Darrach, and the Superintendent, A. J. Binney. Two trips per day are made, each way, and the road was in excellent order when we last passed over it. Short in extent as it now is, it is a connecting link in a work of great magnitude, as it is the foundation of the great steam highway into Oregon that must ere long afford San Francisco a sure and safe connection with Portland. If extended twenty-five miles further it will bring to our doors the agricultural wealth of Butte and Chico Valleys, than which no richer sections of farming land anywhere exist. It is already an important tie in the chain of travel leading into the Humboldt mines in our sister State, Nevada, in addition to affording an excellent outlet for the traffic of Plumas, Lassen and Sierra counties.

Oakland Railroad and Ferry Line.—Finished August, 1864. Length about four miles, extending from the end of a long wharf at Gibbons' Point, in the county of Almeda and on the Bay of San Francisco, through the city of Oakland to the village of Brooklyn, otherwise known as San Antonio. In good order. George Goss, Superintendent.

Placerville and Sacramento Valley Railroad.—This company taps the Sacramento Valley Railroad at Folsom, and is now in good running order as far as Latrobe, a total distance of fifteen miles. There are also about eight miles of road graded and ready for laying the rails, but that work will not be commenced until all the grading, trestle work, etc., is completed to Shingle Springs, some nine miles further. The officers are: Charles E. McLane, President; G. W. Swan Vice-President; T. F. Tracy, Treasurer; N. A. Hamilton, Secretary; F. A. Bishop, Chief Engineer and Superintendent. Directors—C. E. McLane, G. W. Swan, C. W. Brewster, T. F. Tracy, Isaac Nash, John Blair, A. A. Van Voorhies, F. A. Bishop.

Sacramento Valley Railroad Company.—This railroad was finished to Folsom in 1856, and has been in constant operation ever since. It extends from this city to Folsom, a distance of twenty-two miles, connecting at Folsom with the Placerville and Sacramento Valley Railroad. It also has a branch or tap line leading to Freeport, on the Sacramento river. F. L. A. Pioche is President, and J. P. Robinson, Secretary. We made application for full statistics concerning this road, its present condition, its officers, and its business transactions and financial reports for the past year, but were unable to obtain the desired statement.

California Central Railroad.—There has been no particular change in the general condition and circumstances of this road since the 1st of January last, with the exception of the grade between Lincoln and Bear river having been completed.

The business of the road may be said to have increased considerably during the past year. We learn it is the intention of the Managers to lay the iron on the grade to Bear river in the Spring, and to complete the road to Marysville during the ensuing Summer. We are informed that an agent is about to proceed to the East soon, in order to purchase iron for the extension.

Alameda Railroad.—This road extends from the end of a long wharf at the Encinal of Alameda, in the Bay of San Francisco, to the villages of Alameda and San Antonio. Distance, about three miles. The road will soon be completed all the way through the great Alameda Valley. Alfred A. Cohen, Superintendent.

Cotton in California.

We learn by our latest advices from California, that large tracts of land in Los Angelos County are being prepared for the culture of cotton the present season.

TWENTY-NINTH DIVIDEND.

THE BOARD OF DIRECTORS have this day declared a Semi Annual Dividend of (6) SIX PER CENT on the whole Capital, (free from Government tax), payable on MONDAY, the 16th inst.

JONATHAN D. STEELE, President.
P. NOTMAN, Secretary.

New York, January 11th, 1865.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY,
WASHINGTON, January 25, 1865.

WHEREAS, By satisfactory evidence presented to the undersigned, it has been made to appear that the

AMERICAN NATIONAL BANK

of New York, in the city of New York, in the county of New York, and State of New York, has been duly organized under and according to the requirements of the act of Congress entitled "An act to provide a national currency, secured by a pledge of United States Bonds, and to provide for the circulation and redemption thereof," approved June 3, 1864, and has complied with all the provisions of said act required to be complied with before commencing the business of banking under said act:

Now, therefore, I, HUGH McCULLOCH, Comptroller of the Currency, do hereby certify that "THE AMERICAN NATIONAL BANK OF NEW YORK," in the city of New York, in the county of New York and State of New York, is authorized to commence the business of Banking under the act aforesaid.

In testimony whereof, witness my hand and seal of office this twenty-fifty day of January, 1865.

Signed, HUGH McCULLOCH,
Comptroller of the Currency.

This Company is organized under the laws of the State of New York. The principal office is No. 71 Broadway, with branch offices in Philadelphia and Baltimore, for the convenience of subscribers, where the certificates of stock will be issued to subscribers without delay. The property, embracing upwards of six hundred and thirty-five acres, has been selected with great care during the last three years by those of the directors who have been constantly operating on Oil Creek, and throughout the entire oil region of Pennsylvania, as well as Western Virginia, and was not selected to sell, but for the purpose of development and producing oil, having now some ten wells under contract, and being bored with vigor, besides those already completed and producing oil, making in all 13 wells now on the property. Every acre of this Company's property is bottom, and the best of boring land, much of it on Oil Creek, Cherry Run, Cherry Tree Creek, Walnut Bend, Alleghany River, and other streams where the lands are being developed with good success, and prospect of a very large product of oil.

The attention of all interested in Railroads is invited to our Steam Cars for city or other Railroads. Their economy, durability, and efficiency commend them to all who have them in use, or witnessed their operation. They are now being introduced on Street and Suburban Roads in and adjacent to the principal cities; also on Tributary Roads.

With minimum weight and expense they have maximum power and capacity, and are free from noise and smoke. They can ascend the steepest grades, and turn the shortest curves with facility.

We are also prepared to execute orders for all other descriptions of Cars. Circulars with detailed information will be furnished on application.

American Railroad Journal.

New York, Saturday, February 11, 1865.

Wealth and Resources of Oregon.

This State contains 95,274 square miles, or 60,975,360 acres. It has very diversified topographical features, such as: mountains, steep and rugged, vallies beautiful and fertile, sterile deserts, spacious bays, magnificent rivers, romantic and splendid waterfalls, picturesque lakes, broad prairies, and dense forests. A recent account appended to the Report of the Superintendent of surveys of the California Central Railroad, estimates the area at the larger figures of one hundred and twenty millions of acres, of which ten millions are fit for cultivation.

According to the returns of the last census, 895,375 acres were under improvement, and 5,316,817 were unimproved. This calculation is of course based on a less area than that above alluded to. The value of the farms was $14,760,353, and of the implements of husbandry used in their cultivation, $949,103. The Grand Ronde Valley contains excellent land, of which 8,000 acres are under cultivation, and a town, La Grand, is already established and becoming settled. Gold is found in the Salmon river and Boise Countries.

The Powder river valley, of which Auburn is the country seat, is filled with miners, especially of copper. Ten thousand acres of land are under cultivation. Its climate is like that of Northern Ohio. The Lake country is in the southeastern part of the State, a plateau, 5,000 feet above the ocean level, containing many lakes, some 10 miles by 30. The amount of arable land has not yet been ascertained. The Rogue river valley contains between 4,000 and 5,000 inhabitants, is very fertile, producing immense crops of wheat and oats and the finest fruits. What it lacks are good roads as outlets for transportation, but these have been commenced. The number of acres of arable land is estimated to be 150,000, of which one-fifth is under cultivation.

The Illinois valley is on the river of the same name; its principal place of business is Waldo, and the county seat is Kirbyville. It contains the "Queen of Bronze" copper mine, the most valuable on the coast. The Illinois river is navigable for steamers of light draught 30 miles from its mouth.

The Umpqua Valley is the largest in Southern Oregon, and second to the Willamette. It is well watered by the Umpqua river and its numerous affluents; and is called the Switzerland of America. The soil is varied and fertile. It contains several thriving towns such as Canyonville, Oakland and Scottsburg; the latter being at the head of Ocean schooner navigation on the before named river. This valley is reported to contain 225,000 acres of arable land of which 75,000 are under cultivation. Daily mail stages pass through the valley.

The Willamette is the finest on the Pacific, considering, its plentiful irrigation, and it is therefore preferred by agriculturists to that of Sacramento. It contains 3,000,000 of acres of the very finest land, and bears extraordinary crops of all kinds. Its apple orchards are very prolific, and justly celebrated; 100,000 boxes of this fruit are annually sent to San Francisco and Victoria.

There are ten rivers in the valley with unlimited water power. It contains 35 towns and villages, varying in population from 100 to 4,000 inhabitants, Portland is the largest of them and the commercial entrepot of the valley.

On the Columbia river are situated Wasco and Umatilla counties, the former containing rich gold mines, and a large amount of good land. Dalles city and Umatilla landing are the two commercial points, connected by the river with the Pacific. The Oregon Branch mint is located at Dalles. Columbia County is also on the same river, below the Willamette valley, and is important chiefly from its commercial position. It is expected that its county seat St. Stephens will be the terminus of the projected railway through the valley of Willamette. Salt springs are believed to exist in this country.

The description from which we have made this abstract thus describes the Coast Counties. They are sparsely populated but afford rich pasturage. Clatstop at the mouth of Columbia river is very prosperous. Astoria its principal town founded by Mr. Astor is at length prospering, and fortifications of a formidable character are being erected. Cattle are raised cheaply and largely. Coal is found in Coos County over an area of 20 square miles, and is in large demand. On the sea beach for 20 miles, fine gold is found in such quantities as to remunerate a number of miners collecting it to the extent of $20,000 per annum. Copper ore (virgin) is also found. There are two fine harbors in Coos county, on Coos bay, and Coquille river, and there is quite a number of vessels in the trade of the place, some of them of the burthen of 300 tons. Ship building is a leading occupation of the population, though as yet only a thousand in number.

Counties.	Wheat bush.	Oats.	Value of horses, sheep, swine and cattle.
Linn	1,000,000	600,000	$750,000
Lane	600,000	800,000	625,000
Marion	600,000	800,000	760,000
Clackamas	100,000	150,000	115,832
Multnomah	7,000	10,000	89,000
Washington	400,000	500,000	190,000
Yamhill	800,000	400,000	395,000
Polk	1,000,000	1,000,000	575,000
Benton	400,000	400,000	333,000
Douglass	———	———	63,241
Jackson	65,330	79,454	561,744
Wasco	———	———	560,000

Besides these products there are now raised considerable quantities of flax, hay, legumes, in

fact much greater than appear by the last census.

The lumber trade flourishes in Oregon. The firs and cedars are plentiful and of extraordinary size. Four millions of feet of sawed lumber were transported the last year by sailing vessels from Coos bay to San Francisco. This sells at $20 per M., and the business is yet in its infancy.

The Fisheries are numerous and profitable. Salmon are in abundance, and are taken of large size in the Columbia river. Sturgeon, cod, carp, flounders, perch, herring, crabs and oysters abound. There are as yet but 2,500 bbls of salmon put up annually which sell readily at $10 per bbl., while they might be increased easily to 100,000 bbls. Salt exists in abundance being found in many large springs. A single spring near St. Helen's, throws an unceasing jet 4 inches in diameter, which produces by evaporation, a half pound of the finest and best salt to each gallon of water. At this rate the daily product might be obtained of nearly 30 tons.

Turpentine, tar and rosin are being manufactured on a pretty extensive scale, the forests being rich in the material for their production, and the supply inexhaustible. The quality of these articles is said to be superior. Tanneries are much wanted, bark and hides being abundant and cheap. The flour and saw mills are only yet in moderate numbers, but the increasing necessity for them, is causing their rapid erection. The internal commerce of the State is favored by the two navigable rivers, the Columbia and its affluent the Willamette, the former being navigable for small steamers and sailing vessels as far as Portland on the Willamette. The larger craft during the summer season are obliged to lighter their cargoes at the bar of the last named stream. From Portland, steamers ply to Oregon city on the Willamette and the Cascades on the Columbia. These rapids, as well as others beyond known as the Dalles, are passed by means of railways; while between these rapids and beyond the uppermost, the other steamers ply in various directions for several hundred miles.

The manufacturing establishments number about 300, with a capital invested of $1,293,000 employing about the same amount in material, and producing values of $3,188,000.

The principal products as yet are flour and meal, lumber, woollen goods, malt and spirituous liquors in small quantities, steam engines, leather and agricultural implements.

The woollen mills are but three in number, and there are only three small foundries. A vast field for manufactures is open to the enterprising.

Mining being always attractive prevents a resort to other pursuits. Gold is found in paying quantities in the sands on most of the rivers. On the Santiam river gold and silver are found in the quartz rock; the ores of which assay from $20 to $10,000 per ton, so also on the John Day, Powder and Owhyhee rivers, where a large population is profitably employed. As much as a million per month of gold is sent to California from Oregon.

The silver ores of Owhyhee are so rich as to yield globules of the metal *even in a blacksmith's forge*, and it is easily converted into bars and shipped in that state.

Copper, lead, iron and coal are very abundant. It is estimated that during the present year the gold product of Oregon, will run up to three millions per month. Its friends confidently expect from its intrinsic resources, position, products, and convenience for foreign trade, that it must soon take high rank on the Pacific Coast, and that when the Northern Pacific Railroad shall be constructed to Puget's Sound, its career will be a splendid one. In the meantime it is advancing by its own inherent strength. The population of Oregon in 1860 was 52,465. Of the 12 principal towns Portland was the largest, containing 1371 inhabitants.

Dutch Flat and Donner Lake Wagon Road.

This road is about sixty miles in length, and is constructed from a point on the ridge near Dutch Flat, in Placer County, over the mountains, through the Donner Pass and by Donner Lake to the Henness Pass road, near Crystal Peak and the Truckee River—about thirty miles from Virginia City. The road bed is twenty feet wide, and the grade going east in no place exceeds ten inches to the rod. Stages and light vehicles easily make from seven to nine miles an hour over it, the track being remarkably firm and smooth.

The company that built it commenced the work in the Summer of 1863, diligently prosecuting it until driven off by the Winter snows, resuming it early in the following Spring, finally completing and opening it for travel June 15, 1864.

The average number of laborers employed was about three hundred and fifty, for a period of ten months; and the aggregate cost was about $200,000—a larger sum than has been expended upon any other one wagon road in the State.

On July 15, 1864, the California Stage Company put on a daily line of six horse coaches from Virginia City to Newcastle, there connecting with the Pacific Railroad to Sacramento, which has been maintained from that time to the present, being well patronized by the travelling public, and making the best time over this road of any in the State.

For the six months ending January 1, 1865, there have passed over this road:

Wagons, drawn by two to twelve animals	3,280
Buggies and one-horse vehicles	169
Horsemen	1,278
Head of loose stock	3,890

All the tolls received by the company since the road was opened have been expended in improving it, and there is now about forty miles of well-graveled and macadamized road, securing a hard, firm bed in the dry and rainy seasons.

This is the most direct route from Sacramento over the mountains to Virginia City; and passing as it does along and near the line of the Pacific Railroad, it affords to the traveler an interesting view of the progress of that great national work, and full proof of the feasibility of the route for a railroad.

The road is unquestionably superior to any other mountain road of equal length in the State. It has proved to be as superior for a Winter road as for Summer travel, there being less fall of snow and less liability to land slides, which have proved so dangerous on other roads. It is also free from all dangerous precipices. The mountain and lake scenery on the route is unsurpassed for magnificence and beauty. Donner Lake is one of the most healthful and invigorating Summer resorts in the Sierra Nevada mountains; the scenery around it is on the grandest scale.

The stages on this route made the trip to Sacramento regularly in the Summer in four to six hours less time than by any other road, and in the Winter they have generally made it in about twenty-four hours less time. The established Summer time over this route was eighteen hours, and Winter time thirty hours, from Virginia City to Sacramento. Notwithstanding the great severity of the Winter storms of November and December, in the mountains, the travel has been but seldom interrupted or the stages delayed.

On the 22d of August last the great race, of railroads and six horse coaches, came off over this and the Placerville routes, between the California and the Pioneer stage companies. Notwithstanding "heavy rains, heavy roads and heavy loads," the California Stage Company landed their passengers from Sacramento in Virginia City in thirteen hours—the quickest time ever made—and beating their opponents nine hours. It conclusively proved the superiority of this road for fast travel, and its superiority for heavy loaded teams is illustrated by the fact that Reed & Ash hauled with an eight mule team, from Newcastle to Virginia City, 19,400 pounds, which is the heaviest load ever taken over the mountains by eight mules.—*Sacramento Union.*

The New Mexican Mail Service.

The Post Office Department has made a contract for weekly mail service, to commence on the 1st of March, from Albuquerque, New Mexico, to Prescott, the capital of Arizona, and to La Plaz and Sal Baibadina. The distance is eight hundred and fifiy miles. The Territory of Arizona has heretofore had no mail facilities; but this arrangement connects it with the Atlantic and Pacific.

New Jersey Railroad and Transp. Co.

The following is an abstract of the report of this company for the year ending December 31, 1864:

RECEIPTS:		
From passengers		$1,196,853 08
From freight		214,214 07
From U. S. mail, rents, express, freight, and other sources		152,539 55
		$1,563,606 70
EXPENSES:		
Maintaining road, bridges and buildings	$157,734 96	
Repairs of locomotives, cars and machinery	110,999 02	
Fuel—cost and labor in preparing	163,805 64	
Operating the road and transporting passengers and freight	340,718 08	
Office expenses, salaries and contingencies	12,722 58	
		785,980 28
		$777,626 42
Interest on bonds		$44,316 75
Transit duty on passengers & freight		37,882 67
State tax on capital stock		21,989 00
Government tax		54,591 17
Loss by fire, workshop East Newark		53,916 78
Sinking fund		10,000 00
Dividends in cash, Aug. and Feb		439,775 00
Profit and loss to surplus earnings		115,155 05
		$777,626 42

The number of passengers transported over the road during the year was as follows:

Over the whole of the road	783,387½
Between Jersey City and Newark	1,440,847
" " Elizabeth	319,680
" " Rahway	97,923½
" " N. Brunswick	120,658½
" all intermediate places	548,449
Total—not including commuters and free passengers	3,319,940½

The number of tons of goods, wares and merchandize transported over the road during the year was as follows:

Over the whole line of the road	31,118½
Between Jersey City and Newark	43,790½
" " Elizabeth	7,486½
" " Rahway	7,320
" " N. Brunswick	24,294
" all intermediate places	51,763½
Total	165,773

The number of miles run by passenger, freight and other trains was 610,427.

GENERAL STATEMENT.

Capital stock		$4,397,800 00
Funded debt, including $485,000, the cost of the property and privileges purchased of the Jersey Associates		635,000 00
Floating debt		145,000 00
Profit and loss, being surplus earnings represented by permanent improvements and the property and cash stated below	$594,542 13	
Less amount paid for relaying road with new rails and other improvements	31,777 39	
		562,764 74
Dividend, 1st January, payable 1st February, 1865		219,887 50
		$5,960,452 24
Cost of road and equipments:		
For graduation and masonry, bridges, superstructure, iron, passenger and freight stations, buildings and fixtures, engine and car houses, workshops, machinery and fixtures, engineering, land, and land damages		$3,799,809 30
Locomotives, tenders & snow plows		265,796 00
Cars—passenger, freight & baggage		226,204 00
Property, viz:		
Bridge, ferry, turnpike and other stock, real estate, ferry boats, privileges and fixtures (including the property and privileges purchased of the Jersey associates for $485,000)		1,649,021 62
Cash in bank, cash items and balances due		19,621 32
		$5,960,452 24

President.—ALFRED L. DENNIS.

Treasurer.—H. J. SOUTHMAYD.

Sec'y and Gen'l Sup't.—F. WOLCOTT JACKSON.

Calais and Baring Railroad.

The annual meeting of this company was held in Calais, Me., on the 31st of December, 1864. The earnings during the year were:

From freight from Baring	$13,112 37
" " Milltown	7,541 07
" general freight	556 41
" rents	626 00
" passengers	1,459 67
" Lewy's Island Railroad	2,148 59
	$25,444 11
Expenses	15,716 88
Net earnings	$9,727 23

The freight from Baring consisted of 12,656,693 feet long lumber, 11,465,000 laths, 559,000 shingles, 492,879 feet ship timber, 190,390 feet spool wood, 75,000 feet hemlock logs, and 576 cords of mill wood; from Milltown, 13,772,778 feet long lumber, and 5,642,900 laths.

The equipment of the road consists of 3 locomotives; 2 passenger, 2 baggage, 140 eight-wheel and 13 four-wheel lumber cars, 8 gravel cars, 2 hand cars, and one-fourth of a snow plow. The number of miles run over the road by the company's engines was 14,312; do., over Lewy's Island Railroad 6,055. The Lewy's Island Company's engine has run over this road 2,260 miles. Number of passengers carried, 23,937. Value of materials on hand $1,600.

During the past year the total funded debt amounting to $113,700, maturing July 1st, was renewed at par, for a term of 15 years. The only new condition in the renewed bonds being the reservation each year, from the earnings, of an amount equal to 2 per cent. of the outstanding bonds, to be invested as a sinking fund, towards retiring the bonds at maturity.

This renewal of bonds on such favorable terms is an important move for the stockholders, and it is believed that hereafter a regular annual dividend will be paid, though in seasons like the past, it may prove small.

After paying a dividend of 4 per cent., and meeting interest on the funded debt, which matured the 1st of December, and setting apart the amount due to the sinking fund up to July 1, 1865, the Treasurer reports a small balance in the Treasury, and no floating debt.

The following gentlemen were elected directors for the ensuing year: Geo. M. Porter, H. N. Hill, John McAdam, E. A. Barnard, F. K. Swan.

At a subsequent meeting of the board, Geo. M. Porter was elected President; Francis K. Swan, Treasurer, and James S. Cooper, Clerk.

Lewy's Island Railroad.

This road during the past year has been under the sole management and control of Mr. W. W. Sawyer.

The earnings were	$15,293 31
And the expenses	6,577 87
Leaving net	$8,715 44

The number of way and through passengers was 7,986. Number of miles run, 9,418.

Copper Product of the Portage Lake District.

The following table from the Portage Lake *Mining Gazette* will show the productions of the various mines in that district for the past three years:

	—1864.—		—1863.—		—1862.—	
	Tons.	Lbs.	Tons.	Lbs.	Tons.	Lbs.
Quincy	1,485	1,362	1,472	1,531	1,252	1,493
Pewable	932	701	1,083	752	1,025	1,789
Franklin	781	880	780	189	945	1,194
Isle Royale	363	1,670	372	920	520	1,030
Gra'd Portage	316	196	247	883	....	....
Huron	310	1,622	69	283	98	874
Hancock	50	182	69	320	66	846
Mesnard	28	190	3	1,185	33	....
Shel. Colb'n	11	22	3	1,254	....	....
Arcadian	5	680	....	....	....	....
Alb'y & Bos	3	040	....	....	....	....
Douglass	2	1,459	....	....	....	....
St. Mary's	2	590	2	....	....	....
Total	4,292	1,691	4,106	1,317	3,942	1,226

Increase of 1863 over 1862 ..... 164 tons 091 lbs
Increase of 1864 over 1863 ..... 186 tons 374 lbs

Increase of 1864 over 1862 .... 350 tons 465 lbs

Considering the increased number of mines in 1864 over 1862 the gain has not, apparently, been in proportion. In 1862 the amount of ingot copper produced was 3,075 tons, while in 1864 it was 3,400 tons, which excess, when reduced to 80 per cent. mineral, gives 380 tons instead of 350 tons gain, as shown in the preceding table. This has been occasioned by improvements in washing machinery whereby a greater purity of mineral is obtained, but the number of tons is decreased. Another item is the scarcity of labor for the past two years; and every new mine that has been started has drawn away laborers from producing mines while the new mines have produced nothing. The prospects for another year, if labor grows no scarcer, are much more flattering than those for the three years past, and we may expect a decided increase over the product of 1864.

Eagle Harbor Copper Shipments.

The shipments of copper from the port of Eagle Harbor during the season of navigation of 1864, were as follows:

Central	609	tons,	314	lbs.
Copper Falls	246	"	315	"
Pennsylvania	136	"	1,152	"
Amygdaloyd	83	"	175	"
Delaware	42	"	19	"
Phœnix	8	"	500	"
Petherick	5	"	1,008	"
Madison	..	"	259	"
Total	1,130		1,742	

State Debt of Illinois.

The following is a statement of the State debt of Illinois, all of which bears interest at six per cent.:

Illinois Bank and internal improvement stock	$31,000 00
Illinois internal improvement stock	42 000 00
Illinois improvement scrip	19,570 33
Liquidation bonds	234,650 21
New internal improvement stock	1,848,407 85
Interest bonds	1,206,836 96
Interest stock	701,404 75
Two certificates of arrears of interest	1,002 58
Refunded stock	1,837,000 00
Normal University bonds	65,000 00
War bonds	1,679,000 00
Thornton loan bonds, (Act approved Feb. 21, 1861	182,000 00
Balance canal claims (under same Act)	3,624 58
Illinois and Michigan Canal bonds (payable in New York)	1,618,000 00
Illinois and Michigan Canal bonds (payable in London)	1,631,688 89
Interest certificates canal stock not registered	17,661 33
Canal scrip signed by Governor	2,616 97
Total	$11,121,564 45

Two years ago the State debt amounted to $12,222,388 20, and has consequently been reduced $1,100,823 75.

Finances of Allegheny Co., Penn.

From the annual report of Henry Lambert, Esq. County Controller, we learn that the entire amount of expenditures during the year 1864, was $293,412 71 as follows:

For judgments, interests and exp. on Railroad Bonds	$139,814 17
Funded debt, Volunteer Bounty B'ds purchased	16,057 50
Interest on Volunteer Bounty Fund	4,660 50
Sinking Fund	25,000 00
Commonwealth of Pennsylvania	3,721 20
Ordinary County Expenses	107,159 37

Of the $2,300,000 of original six per cent. bonds issued to railroad companies, there is now in possession of the county, and in the Bank of Pittsburgh $1,831,000, leaving $487,000 unsettled and outstanding. The estimated expenditures for 1865 are $287,716 32, to meet which ten mills on the dollar will be assessed. Last year the valuation for the county was $28,000,000; and if, under the present assessment, the valuation should exceed $31,000,000, the tax will be reduced to nine mills.

☞ Surveys are now being made for a railroad route from Orleans to Provincetown, Mass. It is estimated that the road can be built for $60,000 per mile.

Railroad Company.—Deposit of Luggage.—Ticket.—Sunday.—Reasonable Time.

In the late case of Stallard against The Great Western Railway Company, in the Court of Queen's Bench, England, the complaint stated that the plaintiff was a commercial traveller, and the defendants were carriers of passengers and their luggage on a certain railway, and kept an office for receiving and safely keeping goods, being the luggage of such passengers on their railway, for reward to the defendants; that the plaintiff was such passenger, and thereupon, in consideration that he delivered to the defendants certain goods, to wit., a case of patterns to be safely kept by the defendants, and to be redelivered by the defendants to the plaintiff, for reward to the defendants, upon request, and on the production of a certain ticket to the defendants, the defendants promised the plaintiff so to keep the case of patterns, and to redeliver the same to the plaintiff on request and on production of the ticket; that afterwards the plaintiff requested the defendants to redeliver the case of patterns to him, and produced the ticket to them, and a reasonable time for the delivery thereof elapsed after such request and production; yet the defendants did not redeliver the case of patterns to the plaintiff until a long and unreasonable time after the request and production of the ticket; and by reason of the premises, the plaintiff was obliged to wait at the defendants office a long time for the redelivery of the case of patterns, and thereby lost and was unable to proceed by a certain train to *Sheffield*, so as to arrive there in time for a certain market, at which he had arranged to be with his case of patterns, for the purpose of showing the patterns to his customers; and was greatly damaged and injured in his business of a commercial traveler; and was put to and incurred great expense in and about obtaining food and lodging for the night in *London*, and in and about endeavoring to proceed by the said train to *Sheffield*; and was otherwise greatly damaged.

The answer averred that the plaintiff did not deliver the goods, nor did the defendants promise in manner and form as alleged; that they were not guilty; and that the defendants redelivered the case to the plaintiff within a reasonable time.

On these pleadings issues were joined.

On the trial, it appeared that the plaintiff, who was a commercial traveler, arrived in London by the defendants' railway on *Saturday* night the 5th of October, 1861; and deposited his portmanteau containing a case of patterns, at the luggage and cloak office on the up platform of the *Paddington* Station, and on payment of 2*d.* received a printed ticket, on which, among others was the following:

"Left in the name of *Stallard*, and subject to the conditions on the other side.

PROSSER, Clerk."

"This ticket to be given up when the luggage is taken away."

CONDITIONS.

"N. B.—The Great Western Railway Company appoint that the undermentioned sums be paid them for warehousing passengers' luggage, which has been, or which is about to be conveyed on their railway, viz: "For any period not exceeding three days, 2*d.*, for each package; and after three days, one penny additional for each package per day or part of a day."

(Then followed a condition limiting their liability for loss of or injury to any packages beyond the value of 5*l.*, unless the value and nature were declared, and one penny per pound of the declared value paid for each day or part of a day for which the same should be left.)

"Every person depositing luggage will be furnished with a receipt, stating the number and description of the articles deposited, which receipt must be given up to the company's servants upon their delivery of the articles thereon described; and the company give notice, that they will not deliver up luggage except to persons producing the proper receipt for the respective articles claimed, which delivery shall acquit the company from all further claims in respect thereof."

"The company will not be responsible under any circumstances for loss of or injury to articles except left in the cloak room."

"The company's servants are prohibited, under pain of instant dismissal, from receiving fees or gratuities under any pretence whatever."

On *Sunday* evening, the 6th of October, the plaintiff wishing to leave London by the mail train of the *Great Northern Railway* for Sheffield, went to the *Paddington* Station at 20 minutes past 8 o'clock for his portmanteau; he found the luggage and cloak office locked, and no person in attendance. After waiting some time he was told by a porter that the superintendent was on the other side; whereupon he went across to the down platform, from which the 8 P. M. train was starting, and the superintendent sent a porter with the key of the luggage and cloak office, and he obtained his portmanteau. He was thus delayed forty minutes, and by reason of that delay was too late for the train to *Sheffield* that night. There are two luggage and cloak offices at the Paddington Station, one on the up platform and the other on the down platform, which are open all day on *week days*, but on *Sundays* they are open only for about twenty minutes after the arrival and before the departure of trains respectively. The plaintiff was not aware of this arrangement; and when he left his portmanteau on Saturday evening he gave no notice at what time he should want it.

The learned Judge directed the jury that though the conditions on the ticket did not mention any time at which articles left might be obtained, there was an implied contract that the defendants would have some person attending at the office at reasonable times; and he left it to them to say whether the portmanteau was, under the circumstances, delivered up to the plaintiff within a reasonable time, reserving leave to the defendants to move to enter a non-suit if the Court should be of opinion that there was no evidence to be left to the jury on which they could reasonably find for the plaintiff. The jury negatived special damage, and gave a verdict for the plaintiff.

The defendants' counsel moved accordingly.

COCKBURN, C. J.—I am of opinion that there ought to be no rule. By the conditions printed on the ticket the company have not made it part of the terms of the bailment of the portmanteau, that it should not be delivered up at any particular time on *Sunday*; on the contrary, articles left at the office are to be delivered up on the production of the ticket. Although there may necessarily be more delay in getting luggage from the office on Sunday than on other days, still the defendants were bound by the conditions to deliver up the portmanteau within a reasonable time, and whether they did so deliver it up was a question for the jury. I should not have been dissatisfied if the verdict had been for the defendants; and perhaps, if they were not precluded by the smallness of the damages from having a new trial on the ground that the verdict was against the evidence, I should have been disposed to grant that rule. The question, however, whether the person who deposits his luggage gets it back within a reasonable time, is entirely and exclusively for the jury.

CROMPTON, J.—I am of the same opinion. There was evidence to go to the jury of unreasonable delay. The plaintiff sues the defendants on a bailment of a peculiar nature arising from the practice of railway companies to receive and keep luggage for their passengers, whether they intend at a subsequent time to travel on the same railway or on some other railway. By this ticket the defendants agree for certain reward to keep articles until they are wanted; and they must know that luggage is frequently wanted by those who deposit it for the purpose of proceeding on some other line; there was therefore an implied contract that they would be ready to deliver up the portmanteau in a reasonable time with reference to the surrounding circumstances, and of this the jury were the proper judges. It is said that the defendants were not bound to have the office open at all hours on *Sunday*; but the defendants invite persons to travel on *Sunday*, and it is notorious that persons do travel on *Sunday*. The practice of the defendants as to keeping open the office on Sunday for a short time only, cannot affect the plaintiff unless he was informed of it.

BLACKBURN, J.—The proper construction of the bailment evidenced by the ticket is, that the company undertook to deliver up the portmanteau on a reasonable request and within a reasonable time. Therefore it was a question for the jury, whether there was a reasonable request by the plaintiff, and whether there was an unreasonable delay on the part of the defendants with reference to the surrounding circumstances; and they have found for the plaintiff. The grounds which my brother Crompton has mentioned, are such as the jury might have reasonably acted upon, and we cannot on this motion disturb their verdict. The railway company have a simple remedy by printing on the back of the ticket that the office is open for the delivery of luggage at certain specified hours only.

MELLOR, J.—This was a question of fact for the jury, though I feel bound to say that I should have been better satisfied if their verdict had been for the defendants.

Rule refused.

☞ The Swedish census, taken Dec. 31, 1863, has just been published. The total population of Sweden is 4,022,464, and there are 105,940 more women than men. The increase of population during the last quinquennial period has been ½ per cent. About three and a half millions live in the country, and the rest in the towns, Stockholm contains nearly 350,000 inhabitants. The population of Norway is about 1,500,000, which would give the united kingdom above five and a half millions of inhabitants.

Finances of Pennsylvania.

The returns for the two years ending November 30, 1863 and 1864, compare as follows:

	1863.	1864.
Balance in Treasury from previous year	$2,172,844 10	$2,147,331 70
Receipts during current fiscal year:		
Ordinary or general	3,959,438 61	4,738,313 02
Extraordinary	330,013 04	.....
Total means of Treasury	$6,462,295 75	$6,880,644 72
Payments made during the same years were as follows:		
Ordinary expenses	$3,139,121 08	$3,260,561 48
Military "	208,074 44	251,816 83
Commissioners of sinking fund	958,412 11	122,090 20
Revenue commissioners	9,356 42	.....
Premiums paid on interest as equivalent for coin	.....	463,151 90
Damages by rebel raids	.....	25,486 81
Expenses in quelling riots in Schuylkill County	.....	1,914 26
Expenses in repelling raid in June, 1863	.....	713,419 61
Relief of Chambersburg sufferers	.....	100,000 00
Total payments from Treasury	$4,314,964 05	$4,938,441 09
Balance November 30	$2,147,331 70	$1,942,203 63

The ordinary receipts and expenses for the four last fiscal years sum up as follows:

	Receipts.	Expenses.	Balances.
1860–'61	$3,017,645 57	$3,144,480 32	$1,551,605 72
1861–'62	4,047,822 39	3,083,110 06	2,172,844 10
1862–'63	3,959,438 61	3,139,121 08	2,147,331 70
1863–'64	4,738,313 02	3,260,561 48	1,942,203 63

—in the ordinary expenses is included the interest on the public debt.

The public debt of Pennsylvania at the commencement of the fiscal years 1863 and 1864, stood as follows:

	1863.	1864.
Public Debt	$40,448,213 82	$39,496,596 78
Deduct amount redeemed during the fiscal years:		
5 per cents	$888,499 78	$104,722 73
4½ "	63,000 00	10,000 00
Relief notes	109 00	.....
Interest certificates	8 26	2,270 11
Total redeemed	$951,617 04	$116,992 84
Public debt December, 1	$39,496,596 78	$39,379,603 94

—which was composed of the following classes:

FUNDED DEBT.

6 per cent. loans	$400,630 00	$400,630 00
5 " "	35,709,986 45	35,605,263 72
4½ " "	268,200 00	268,200 00

UNFUNDED DEBT.

Relief notes in circulation	$97,251 00	$97,251 00
Interest certificates outstanding	15,356 63	13,086 52
" " unclaimed	4,448 38	4,448 38
Domestic creditors' certificates	724 32	724 32
	$36,496,596 78	$36,379,603 94
Military loan per act of May 15, 1861	3,000,000 00	3,000,000 00
Total December 1	$39,496,596 78	$39,379,603 94

By the act authorizing the military loan of $3,000,000, a special tax of one half mile was laid on real and personal property to furnish a fund for reducing the same.

By reference to the summary of payments accompanying this report, it will be seen there was seven hundred and thirteen thousand four hundred and nineteen dollars and sixty-one cents paid last year for expenses in repelling raids in June, 1863. Although this was not a portion of the bonded debt of the State, it was nevertheless a debt contracted by the State in its defense; and had this debt not existed, the same amount could have been applied to the extinguishment of its bonded debt; and it shows that, but for the extraordinary expenses thrown upon our State by the existing rebellion, we could have reduced our debt last year from our ordinary revenue very nearly one million of dollars. This amount ($713,419 61,) is now due and owing to the State by the general Government.

The commonwealth holds bonds received from the sale of the public works, amounting to $10,300,000 as follows:

Pennsylvania Railroad Company's bonds	$6,800,000
Philadelphia and Erie Railroad Company's bonds	3,500,000
Total	$10,300,000

These bonds are in the sinking fund and reduce the nominal debt by the amount.

The history of the legislation of Pennsylvania relating to the payment of interest on the State debt, first in coin and last year in currency, occupies large portions of the Governor's messages for 1863 and 1864. Our limited space forbids any lengthy discussions on this point, for a single State, and we mention the fact here simply for the purpose of directing the attention of parties interested to these sources of information.

Lake Commerce of Buffalo.

The following is a statement of the arrivals and clearances of American and Foreign vessels to and from Canadian ports; also the arrivals and clearances of American vessels to and from American ports, the tonnage of the same, and number of men composing the crews arriving and departing:

	No.	Tonnage.	Crews.
American vessels entered	1,663	1,641,258	17,102
Foreign vessels entered	926	72,424	4,229
Coasting vessels entered	4,369	1,708,085	52,442
Total entered for year	6,958	3,421,767	73,773
American vessels cleared	1,810	1,659,883	17,424
Foreign vessels cleared	814	64,407	4,066
Coasting vessels cleared	4,523	1,735,291	52,898
Total cleared for year	7,147	3,469,581	74,388
Grand total for 1864	14,105	6,891,348	148,161
" 1863	15,376	6,757,903	157,415
" 1862	16,390	6,689,191	166,133
" 1861	13,866	5,963,896	144,173
" 1860	11,627	4,710,175	120,497
" 1859	10,521	5,992,626	118,109
" 1858	8,318	3,329,246	86,887
" 1857	7,581	3,226,807	132,183
" 1856	8,128	3,018,589	112,051
" 1855	9,211	3,360,233	111,575
" 1854	8,912	3,990,284	120,838
" 1853	8,298	3,252,978	128,112
" 1852	9,441	3,092,247	127,491

New Bedford and Taunton Railroad.

The receipts from operations of this road for the year ending December 1, 1864, were: from passengers, $93,023 21, from freight, $48,765 70, from mails, etc., $3,483 60—total, $145,272 51; and the expenses, including $17,800 estimated depreciation in the value of the road and buildings, $106,801 60, leaving as net earnings, $38,470 91. The receipts from the Fairhaven Branch were $62,095 94, and the expenditures $57,039 28—leaving net $5,056 66. The total receipts were $207,368 45, the total expenses $163,840 88, and the net earnings $43,527 57. The surplus fund has been increased from $64,792 10 to $73,319 67. The amount of dividends paid for the year is $35,000. President, Joseph Grinnell. Clerk and Treasurer, Lawrence Grinnell.

Illinois and Michigan Canal.

From the report of the Trustees it appears that the total receipts of moneys from all sources in 1864, amounted to $264,626 35, and the total expenditures during the same year amounted to $359,596 28—showing a deficit in the receipts to meet the expenditures of the year 1864 of $94,969 93. The receipts from tolls in 1864 were only $156,609 09, which is $54,000 less than the tolls received in 1863.

Massachusetts State Library.

The annual report of the Libarian states the number of volumes received by purchase for the year ending September 30 to have been 1,111, and the number of pamphlets 109. The number of volumes received by exchange through the State department has been 123, and number of pamphlets 29, exclusive of 28 volumes and 241 pamphlets received from foreign States by exchange. The number of volumes received by donation has been 36, and the number of pamphlets 125. The total number of volumes added during the year has been 1,416, and pamphlets, 549, and maps 14. The expenditures for the library were $2,670 84, and the total receipts were $3,660, and there is now a balance on hand of $689.

American Railroad Journal.

Saturday, February 11, 1865.

Stock Exchange and Money Market.

The ingenuity of the Americans is not only practical but speculative. They pass through the domain of thought with boldness and originality peculiar to their own organization and institutions, and thus far their success both as a nation, and individually has been unparallelled. It is this conviction of this innate power of quick adaptation to circumstances, and the sense of ability to perform almost any undertaking, which lightens the heart of those who look at the present extent of our public financial engagements. Professor Goldwin Smith, on his return to his own country, has published an interesting as well as an anxious letter, in which he gives it as his opinion, that our paper system has been a mistake, that the legal tender notes of the country have done mischief, and that we are able to solve all the problems before us but the financial one. For this he fears we have no solution.

We are not of this opinion, though we can well understand the force of his friendly apprehensions, the result of long established theories in the old world of the usual deductions from European history, a subject of which he is professionally a master, and of the limited area of production with which he is most conversant, and which is his stand point of observation.

We believe it would have been impossible to have preserved the country from disunion, but for an appeal to the confidence of the people in support of the necessary outlay. The whole business of the nation has been indissolubly connected with a paper currency and the banking system. Specie payments have again and again been suspended for comparatively slight causes in times of profound peace, and when the amounts of gold necessary to keep everything in order were but trifling. And yet it has been again and again found impossible to command at an unexpected moment the balance necessary to adjust the inequalities of currency and specie.

How fruitless and how absurd would it then have been to have attempted to carry on this war with gold and silver, which have disappeared so often under ordinary pressures. It could not have been obtained in quantities sufficient for three months' expenditure. Just as soon as the Government attempted to realize its subscriptions in gold, from the currency subscribed and paid in by investers, the banks would have stopped payment, and their bills would have largely depreciated. Or, on the other hand, supposing it possible that the banks could have maintained specie payments for a year or two, their currency would have been so scarce, for we know the extent of their circulation was then inside of two hundred millions, that the Government bonds would have been taken up at a constantly declining rate, probably 50 to 60 per cent. discount, and there would have been a most unpatriotic controversy going on the whole time between the Government asking for money, and capitalists demanding the highest rates. For a year or more the Government issues maintained almost an equality with gold, and this to the extent of hundreds of millions for which it paid no interest. This was a considerable gain to the Treasury, and by consequence to the people. So that all things considered, it is very doubtful whether by accident or design, either from the policy of Mr. Chase, or if we please so to consider it, his blunders, the result to which we have arrived is about the same as if we had attempted to carry on the war on a specie basis, which would have cost the country at least half the amount borrowed, or in other words, 50 per cent. of its nominal loans.

There is a novel view taken of the relation of gold to our National debt, in a recent interesting pamphlet on the subject of the disposition of our "Mineral Lands," by Mr. Edson Harkness, for which we are obliged to Mr. J. Conness, U. S. Senator from California. From this we make the following extract:

"The increase of gold during the last fifteen years has reduced its intrinsic value at least one half; and it is fair to infer that with suitable encouragement, the product will during the next

twenty years, be so far increased that its real value will be less *than the one half of what it is at present.* If this view of the case be correct, a debt of $100 is contracted to-day, payable in coin at the end of 20 years, although it will take $100 in coin to pay the debt, that amount of coin will only represent half the real value of what it does now. *In other words, our National debt will by the depreciation in the value of gold from its present value be practically reduced to the full extent of that value.*"

This proposition is a startling but a satisfactory one; and is in accordance with the prevailing opinions of European economists, that the relative value of the precious metals is undergoing a rapid decline. Numerous essays have been written to support this theory. And though it has been ascertained that the product of Australia has fallen off the last year about fifteen millions of dollars, that of our gold producing States and territories is largely on the increase.

It is estimated that the total amount of gold existing in the hands of the people of the various nations of the world in plate and coin, is about £1,200,000,000. To this sum California has in the last eleven years contributed the sum of $519,413,500, which was actually exported to other countries.

But if we take an estimate of high authority Mr. Hittell, between the years 1848 and 1862 both inclusive, the amount of gold produced in California was $754,220,000, and of that was exported $596,473,872. If we add the production of 1863 and 1864, we have a total from 1848 to 1864, in coin of $861,901,468, or thereabouts. There are other estimates, however, still higher. We published one Sept. 5, 1863, which was as large as $1,049,356,572, though without asserting its precision. It will thus be seen that our products of gold are large in proportion to the whole amount in circulation, and may very easily produce the result as stated by Mr. Harkness.

The conclusion which we come to is irresistable, that we shall find our National debt much more easy of liquidation and payment than we now suppose, and that to secure this result all the Government has to do, is to pass the act introduced by Mr. Julian into the House of Representatives to provide for the survey, subdivision and sale of the gold and silver lands of the United States, so as to secure their settlement, ownership and full production, a plan we have always favored.

The action of Congress cannot too early be directed to this subject, and by the sale of these lands, and by stimulating their production by the muniment of a good title, we shall not only attract a large foreign immigration, but preserve directly and indirectly the means to pay a large proportion of our national debt, which by the very process will be relatively declining in magnitude. Professor Goldwin Smith, would in this view of the subject find cause for consolation in his fears about our financial future. It is an American remedy for an American inconvenience, which could not exist or be possible in any other country of the world, and is as characteristic of our people as everything else they contemplate or take in hand.

The actual movement of gold the last week has been upwards. On Tuesday it had reached 215¼ per cent. This was the result of the general belief that the interview between the President and the Confederate Commissioners was not only a failure but without promise for the future. Another reason is given in this form; that the amount of cash gold used in each day's operation is known to be only about three millions, and that with this knowledge there are parties willing to buy any quantity on time that they can get offered. Just as certain therefore as they can get options at any price beyond and above the amount which can be delivered, they are sure of a rise and a handsome profit out of the shorts. Our own opinion with regard to the late Peace Conference is short and simple. There is strong discontent as well as great apprehension among a large body of the southern people, and this pressure is so strong that the rebel leaders were compelled to do something to quiet the general dissatisfaction. It will be seen by their statements made to their constitutents whether they think themselves strong enough to carry on the war, because they were refused an armistice, or whether they will gloss over the facts of the meeting so as to prepare for a final submission. They will unquestionably take the one course or the other as circumstances and present expediency demand.

Railway securities have improved since our last, and Governments have also advanced, and been in demand. When we reflect that its gold paying bonds are not to be increased beyond their present limit, we are surprised they do not rise to their just market value. They are gold in fact, principal and interest, and ought now to bring a premium of the same character. By-and-bye it will be too late to take advantage of this fact, but those who already appreciate their real character will make largely on their purchases at present prices.

No sales of cotton have yet been made by the Government, but in anticipation of these shipments to a considerable extent have been made from this city to Liverpool, to realise present prices before an expected fall.

Our advices from England to the 22d inform us that during the first fortnight of the present year, the imports of cotton from India, China and Japan were 113,870 bales, of which 100,000 were consigned to the port of London. The manufacturers at Manchester had ceased to be purchasers, beginning to fear that the war in this Country would be suddenly brought to a close. Consols were drooping, standing at about 89, and other securities sympathised. A new Italian loan of $40,000,000 nominal has been put on the English market, in £100 bonds at £77 10s each, interest 5 per cent. Its attraction is in its character of a lottery, as in 15 drawings in 15 years, a certain number of the bonds are paid off at once after each drawing, so that a subscriber not only receives interest, which is equivalent to £6 15s on each bond, but may get back a part of his principal, or the difference between £100, and the cost to wit £77 10. This principle has been adopted in this Country in several cases, and is all very well, if the bonds drawn are forthwith paid. That contingency is not a sure one in all cases. Gold was at the date referred to 2 10s per cent. dearer in Paris than London, of the same price at Hamburgh and dearer in London than New York, and affording a small profit accordingly to the shipper. Per contra we may assert that good merchant bills may be obtained in this city on Liverpool, below par.

At the same date the prices of American grain, in Mark Lane were quoted as follows: Fresh 22 to 23s per bbl. Sour 20 to 21s.

Our local money market is well supplied, and the rates are reported at 6 to 7 for prime securities, but commercial paper is not taken freely. It is reported that dealers who have hitherto required cash for sales, are now extending credits on a large scale for the purpose of reducing their stocks. At retail a large number of articles of cotton and woollen staple are sold at very reduced prices from those obtained a few weeks since.

We have now 782 National Banks in operation, the circulation of which is stated to be $87,288,-300. It is evident that this system of banking is to supersede the former one, and with much advantage to stockholders and the Country at large.

We notice in our English quotations that Canada 6s now bring 94, for the £100, while the Victoria 6s sell readily at 107.

We also notice a fact with regard to the British Copper currency, one we put on record for future comparison with our own. The old British copper issue was intrinsically worth in coin ⅔rds of its nominal value. The new issue is not worth quite so much. The new bronze currency which as metal was worth £82,482 was converted into coin of the legal value of £150,648. Therefore a half-penny contains a little more than a farthing's worth of metal. Our own cents, whether of nickel or copper will compare favorably with the British.

The exports of domestic produce and miscellaneous goods the last week amounted in value to $4,808,132 against $3,475,880 for the same week last year. The receipts of California gold thus far at this port for the present year have been $2,-693,870 against $1,298,137 same time last year.

The balance in the Sub-Treasury on Tuesday, was $29,436,709.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Connecticut 6s, 99; Illinois War Loan, 98; Ohio 6s, 1881, 103; Louisianna 6s, 60; Brooklyn City Water Loan, 106; Galena and Chicago 2d mort., 100; Mil. and St. Paul 1st mort., 85; Sixth Avenue R. R., 115; Mariposa 1stmort., 51; Wyoming Valley Coal Co., 45; Ashburton Coal, 15; Quartz Hill Gold, 5; 4th National Bank, 100; Bank of Commerce, 100; Central National Bank, 104; Am. Ex. Fare on the Railroads.

By an order from the General Superintendent of the U. S. Military Railroads, all civilians traveling on the railroads leading out of Chattanooga, says the *Gazette*, will be required to pay their fares, no orders for transportation being issued to any parties but the military or those in Government employ. On the Chattanooga and Knoxville, and Chattanooga and Atlanta roads, the rates are ten cents per mile. On the Chattanooga and Nashville road it is eight cents, but it is probable that the latter will shortly be raised to the same figure as the others.

Legislation on the Public Mineral Lands.

We have received from the Hon. J. Conness, U. S. Senator from California, a copy of the bill introduced into the House of Representatives, contained in fourteen sections, providing for the subdivision and sale of the gold and silver lands of the United States, and for the coining of the products thereof. It appears to meet a great necessity and is well adapted to encourage purchases, settlement and mining. We have not space to republish the bill, but we trust it will receive the active support of Congress, even if it is not noticed adequately by the press.

Accompanying the bill was a pamphlet of value, from the pen of Mr. Edson Harkness, of California, which gives new and interesting information as to the character and extent of our gold bearing regions, deserving of attentive perusal, with some novel suggestions that we have deemed worthy of particular notice in our financial article in the present number of the Journal.

Chicago and Great Eastern Railway.

The Cincinnati and Chicago Air Line Railroad Company has been consolidated with the Chicago and Great Eastern Railway Company, under the name of the Chicago and Great Eastern Railway Company, and all business of the line (extending from Chicago, Illinois, to Richmond, Indiana,) will hereafter be transacted in the name of the new corporation.

The Directors are: Frederick Schuchardt, James D. Fish, James W. Elwell, Henry Morgan, W. D. Judson, Amos Tenney, New York; Joseph E. Young, Chicago. The officers are: E. W. Judson, President, New York; Joseph E. Young, Vice President and Chief Engineer, Chicago; Henry Morgan, Treasurer, New York; Amos Tenney, Secretary, New York; John Brandt, Jr., Superintendent, Chicago; L. H. Walkley, Auditor and General Ticket Agent, Richmond, Indiana; Henry J. Page, General Freight Agent, Chicago.

☞ Business can no longer be conducted in uncomfortable and inconvenient localities. There is no greater improvement than that of late adopted in this city, of building first class offices, as a part of our architectural accommodations. A well lighted, well ventilated, and neatly furnished office, is an advantage to business men's health and comfort. Mr. Edward Matthews, advertises in another place a large number of the best offices in this city.

☞ The operations of the large Express Companies expand with the necessities and discoveries of the age. Exchange is now largely sold by telegraph, and through the enterprise of Wells, Fargo & Co., as it will be observed from their advertisement in another place, money may be transferred as readily from New York to California and Oregon, as from one bank in this city to another. This house also furnishes exchange on London, Dublin and Paris.

Cayuga and Ontario Ship Canal.

A bill has been introduced in the Senate of New York to incorporate the Cayuga and Ontario Ship Canal Company. The object of said corporation to be to construct a ship canal at or near the site of the Sodus Canal, from Cayuga Lake to Lake Ontario. The capital stock of the company to be $500,000, to be divided into shares of $100 each.

California Stage Routes.

The California Stage Company furnishes the greater proportion of accommodation for stage travel in this State and the adjoining ones of Nevada and Oregon. Its principal office is at Marysville, but the Superintendent, A. G. Richardson, resides in this city. The officers are James Haworth, President; F. S. Stevens, Vice-President; Henry A. Charles, Secretary. Directors—J. Haworth, A. G. Richardson, John Andrews and W. Montgomery. A. Wagner, Agent, Sacramento.

Sacramento and Virginia City, Nevada (Pioneer Line)—Distance 140 miles, including 37 miles by railroad to Latrobe. The running time in Summer is about 18 hours; in the Winter about 32 hours, varying slightly according to weather. The accommodation line formerly run by this company to Placerville, *via* Folsom, has been discontinued. The office in this city is at the What Cheer House. L. McLane & Co., Proprietors; H. Montfort, Agent. We made application for more specific information respecting this line, but were unable to obtain it.

Sacramento to Virginia City, Nevada (*via* Dutch Flat and Donner Lake)—Distance 156 miles. Departures at 6½ A. M. by Pacific Railroad as far as Newcastle Gap, thence by stages to Summit Pass and Virginia. Time to Virginia City in Winter, 32 hours; in Summer about 18 hours.

Sacramento to Portland, Oregon—Distance, 710 miles. Leaves Sacramento daily at 6½ A. M. by Pacific and California Central Railroad to Lincoln, Placer Co., thence to Marysville by stage; from Marysville to Oroville by Northern Railroad, thence by four-horse coaches to Chico, Tehama, Red Bluff, Cottonwood, Shasta, French Gulch, Trinity Centre, Callahan's Scottsburg, Yreka, Jacksonville (Oregon), Cayonville, Roseburg, Oakland, Eugene, Corvallis, Albano, Santiam, Salem, Dutchtown, Oregon City and Portland. Time, six days five hours; schedule time, seven days for mail; number of stations, 60.

Sacramento and Nevada (*via* Newcastle Gap, Auburn and Grass Valley—Distance 60 miles.

The stage line of this company from Marysville *via* Henness Pass and Huffaker's to Virginia City, has been discontinued during the Winter months.

The principal independent lines of stages running out of Sacramento are as follows, to wit:

Sacramento and Petaluma (*via* Vacaville, Suisun, Fairfield, Rockville, Napa and Sonoma)—Distance 84 miles; four horse coaches. J. McKenzie & Son, proprietors.

Sacramento and Jackson (Forest line) Daily by two-horse wagons, *via* Ione valley; a distance of 46 miles. Couch & Co., proprietors.

Sacramento and Mokelumne Hill (*via* Drytown)—Distance 65 miles (connecting with cars of Sacramento Valley Railroad at Folsom); four-horse daily line. Couch & Co., proprietors.

Sacramento and Georgetown (*via* Folsom by railroad), with a branch to Coloma—Distance 31 miles; daily four-horse line. James Orr, proprietor.

Sacramento Gold Hill and Ophir—Distance 34 miles; tri-weekly two horse line.

Sacramento and Stockton—Distance 45 miles; two-horse daily line.—*Sacramento Union.*

Important to Miners.

"The United States Disintegrating Ore Company," organized under the State Laws of New York, have purchased from the inventor a perfected process for the treatment of ores, whereby the most unmanageable argentiferous, auriferous and other ores are fully and completely desulphurized and oxydized. By this process the assay can be reached, or, as nearly so as is possible, certainly 95 per cent of it expeditiously and cheaply, and with far less original outlay than is possible by any other known process. Large quantities can be treated in a single apparatus, reaching without difficulty 50 tons per day of 24 hours. Letters Patent have been secured by the Company, amply protecting their rights, and active measures are being taken to introduce their valuable process to the notice of the Mining interests. Temporary office, No. 74 Broadway, Rooms 14 and 15.

Railroad Earnings—Weekly.

The earnings of the Grand Trunk Railway for the week ending Jan. 28, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$21,723 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	73,710 00
Total	$98,557 00
Corresponding week, 1864	108,681 00
Decrease	$10,124 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Jan. 21, 1865, were:

	1865.	1864.
Passengers	$2,286 87	$1,663 33
Freight	8,281 15	5,676 40
Express	228 00	104 16
Mails	296 58	296 58
Total	$11,092 60	$7,740 47
Increase		$3,352 13

Receipts from January 1 to Jan. 21:

1865	$33,722 49
1864	14,902 51
Increase	$18,819 98

Railroad Earnings—Monthly.

The business of the Illinois Central Railroad for the month of January, 1865:

LAND DEPARTMENT.

Acres construction lands sold	18,873.15	for	$212,485 59
Acres Interest Fund Land sold	969.42	"	12,285 90
Acres Free Lands sold	6,820.82	"	113,083 61
Total sales during month of Jan. 1865	26,663.39	for	$337,855 10
To which add town lot sales			3,290 95
Total of all			$341,146 05
Cash collected in January			$275,761 16

TRAFFIC DEPARTMENT.

Receipts from passengers	$192,691 99
" freight	337,359 30
" mails	6,358 34
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in month of Jan., 1865	$546,409 63
Total receipts in month of Jan., 1864	327,900 29

The Washington Insurance Co.

The assets of this company are six hundred and sixty thousand dollars. They have just declared a dividend of ten per cent. to their stockholders and a scrip dividend of sixty per cent. to their participating patrons. Their income during the last twelve months was three hundred and sixty-five thousand dollars, and seventy eight thousand dollars have been added to their surplus fund. They have reimbursed their customers to the extent of $85,000 for losses, and have paid $64,000 in dividends. $55,000 have been reserved for reinsurance, and more than $260,000 are invested in United States securities.

This company returns three-fourths of its net income to its profit-sharing insurers, and scrip to the amount of $78,000 will be handed them for the past year. This is the fourth consecutive annual statement in which this sum has reached sixty per cent. of the participating premiums. Six per cent. on the capital was received by the shareholders in August last. After liquidating losses, expenses, &c., the receipts are 45 per cent. on the stock, of which twenty have been apportioned as surplus, sixteen as dividends, and nine as reserve. More than a quarter of a million have been disbursed to its stockholders since the commencement of the participative system, and this is the fourteenth successful year of the company's transactions. They have also declared six per cent interest on the outstanding scrip.

State Banks of Maine.

The State banks of Maine report as follows their business for the years 1863 and 1864:

LIABILITIES.

	1863.	1864.
Capital	$8,008,000	$6,785,000
Circulation	6,019,156	7,042,093
Deposits	6,421,005	5,120,762
Bank balances	118,020	258,042
Profits	759,859	965,566
Immediate liabilities	2,558,181	12,480,897

RESOURCES.

Loans	$14,988,609	$15,167,320

Cash on hand	823,971 39	936,895 67
Average rate & aggregate amount of ordinary dividends for last yr.	4.14 per cent. 2,258,495 56	4.90 per cent. 2,087,115 32
Annual expenses of the Institutions.	184,739 77	140,713 22

☞ The valuation of personal property in Illinois is $87,560,697; railroad property, $11,525,555; lands $192,970,693; town lots, $89,972,926; a total wealth of $381,999,871. The total number of acres in the State is $35,459,200, but only 7,706,915 are cultivated and improved.

☞ The revenue of Greece and the Ionian Islands for the year 1864 are estimated at less than 27,000,000 drachms. The expenditure of the year 1865, by the budget of M. Sateropoulos, is estimated at 27,750,000. To cover the deficit he counts on an improvement of the revenue and on the collection of arrears.

National Banks.

The following is an abstract of quarterly reports of the National banking associations of the United States, showing their condition on the morning of the first Monday in January, A. D., 1865, before the commencement of business on said day:—

RESOURCES.

Loans and discounts	$166,021,650 40
Overdrafts	427,067 60
Real estate, furniture & fixtures	4,083,226 12

Other items	265,620 87
Aggregate	$512,568,666 68

Union Steamship Co.

At an adjourned annual meeting of the stockholders of this company recently held in Boston, a report from the directors was presented, in which it was stated that the steamers Mississippi and Merrimack had been in the employ of the government on the route between New York and New Orleans at the rate of $700 per day, the government paying the cost of coal, &c. The Mississippi is now in dock at South Boston under repairs, and will soon be completed. The Merrimack is at New York having her boilers repaired. It is hoped that both vessels will be in running order in about two months, and will not need repairs for two years. The directors have been earnestly requested by citizens of New Orleans to place their steamers on the route between Boston and that city, and a company in St. Louis trading with New Orleans has also made proposals of business connection which promises profitable returns. The directors presented a proposition that the boats should be again placed upon the route, provided outside parties could be induced to purchase stock in the company from persons who hold a larger number than one hundred shares.

From the report of the treasurer, it appears that the receipts during the past year have been $198,646 82; including $173,000 received by the agent of the company from the government, for the use of the steamers. A dividend of $50,000 has been paid. At the time of making the report $40,000 remained due from the government, of which $20,000 has since been paid, leaving the amount on hand, $39,875 84.

The following gentlemen were elected directors of the company for the ensuing year: Edward S. Tobey, James M. Beebe, William H. Hill, Otis Daniell, Arthur Pickering, Benjamin E. Bates, Samuel Atherton, Josiah B. Richardson, Harrison Loring, J. C. Converse, N. H. Emmons, E. R. Sawyer, E. T. Farrington.

Lorenzo Sabine, esq., was re-elected clerk of the company.

☞ We publish elsewhere the card of Messrs. J. AMSDEN & SON, Civil and Mechanical Engineers. Mr. J. Amsden has been employed as follows: As Civil Engineer in surveying and mapping the City of Utica, also of Rome, N. Y., and extensions of each; upon the Erie Railway, the Utica and Oswego Railroad, the Genesee Valley and Black River Canals in the State of New York; also as architect of a number of churches, hotels, stores, dwellings, &c., in Rome, Utica and Buffalo, New York. Was employed upon the turbines of the Lowell and Lawrence factories, and by the Glendon Iron Company in Pa., in the construction of furnaces and machinery, and in surveys of mines, mapping, &c.; and as architect of a number of buildings in Easton, Pa. Both J. Amsden & Son were employed as Civil Engineers upon the D., L. & W. R. R. and its connecting roads in Pa., and the Warren Railroad in N. J. Have been employed more or less for the last 14 years by the Lackawanna Iron and Coal Co., in making the original map and laying out the large and flourishing town of Scranton Pa., and the additions thereto, and upon other of said company's works. Were engineers of the Gas and Water Works of that place. Have designed nearly all of the most important and costly churches, hotels, stores, mansions, villas, cottages and other dwellings, engine houses, &c., of Scranton and vicinity; and a large cathedral and other buildings are now in process of construction from their designs and under their architectural supervision. They offer their services as either consulting or executive engineers, architects, &c.. Address Messrs. J. AMSDEN & SON, 4 and 6 Broad street, New York.

The New Atlantic Telegraph.

We find in the London *Times* some interesting statements in regard to the new Atlantic cable, a portion of which is now being put aboard a vessel for transference to the Great Eastern. It is stated to be greatly superior in all respects to the old cable. Though much larger, its weight in water per mile is less than half that of its unfortunate predecessor, its breaking strain is 7¾ tons, against 3¼ tons, the *maximum* strength of the old rope. About 900 miles of the cable have now been completed. and 1,500 nautical miles are yet to be manufactured. The factory now turns out fourteen miles a day of completed rope, which in four months' time will give 1,350 miles at the present rate of working, though, of course, as the days grow longer, so in proportion will the hours of labor.

The cable is to be coiled on board the Great Eastern in three separate tanks, comprising in all 2,253 miles. No final arrangements have yet been made as to the rules to be followed in laying the cable, but it will, of course, be commenced from the English side of the Atlantic and carried across to Newfoundland, to get the benefit of the westerly winds which generally blow in summer. Steaming against a head wind the Great Eastern is as steady as a rock. The rate of steaming across will never exceed seven knots an hour, and at this rate the great object of the expedition ought to be accomplished in from ten to eleven days.

Boston and Roxbury Mill Corporation.

From the report of this company it appears that the receipts for 1864 were $5,561 15; cash on hand January 1, 1864 $16,838 40; notes receivable, $111.70—making the total available funds for the year, $133,599 55. The expenditures were $124,657 34—leaving a balance on hand of $8,942 21, consisting of: cash $442.21, notes receivable, $8,500. The total available assets now amount to $8,104.71. The contract for filling the flats between the sluices and Danforth's store has been completed as far as was thought expedient. Payments for this and the building of the sea-wall have been made to the amount of $59,264 82. This sum has been placed to net saleable lands, which account now stands charged, including the original valuation, with $119,374 82. The property of the corporation is as follows: 28,200 feet of flats at the sluices, not available at present; 195,000 feet of land, ready for sale, west of the sluices, containing about 49 house lots of 25 feet front each; 75,000 feet of flats between this filled land and Danforth's store; 21,770 feet of solid land under the house and store and the hotel belonging to the corporation; 352,465 feet of flats between the hotel and Brighton branch of the dam; several pieces of valuable marsh lands, and a hotel, store and several dwelling houses. The report says that the high price of materials during the year has almost entirely put a stop to the erection of buildings, but that as there is at this time a considerable demand for dwelling houses, and the prospect of an approximation to old prices, it is hoped that a portion of the lands of the corporation will be put into the market. The old Board of Directors were also re-elected, as follows: Charles Henry Parker, T. Amory Davis, B. T. Reed, S. Jennison, W. W. Tucker, William Gray Jr., Daniel N. Spooner. William S. Whitwell was unimously re-elected clerk.

☞ The Harrisburg correspondent of the Philadelphia *Ledger* says: "The Lehigh Coal and Navigation Company is actively engaged in completing a new railroad, in opposition to the Lehigh Valley route from Mauch Chunk to Easton. The corporation desired to build a bridge over the river at Easton, so as to connect either with the New Jersey Central or with the Morris and Essex Railroad to New York, but it was found impossible to obtain a charter from New Jersey. Another act of our Legislature was therefore passed, authorizing the Coal and Navigation Company to make arrangements with some New Jersey Railroad for the joint use of a bridge, to be constructed by the two companies jointly." It is also stated by the same writer that: "The Manatawny Railroad is proposed to be constructed from Pottstown, on the Reading line, to a point on the East Pennsylvania Railroad. It may develop an agricultural section, but will form no part of any thorough line. The country, moreover, is such as will require heavy grades. The charter as proposed, requires the line to be finished within five years of its date."

☞ The Boston and Lowell and Nashua and Lowell Railroads have made an arrangement with the Concord Railroad, by which the business of the latter road will go over the former road, instead of by the Boston and Maine road. The arrangement went into effect on the 1st inst., and is to continue for thirteen years.

Lumber Trade of Albany.

The *Evening Journal*, in its annual review of the Lumber Trade of Albany says:

A greater proportion than usual of the pine received in 1864 came from Canada, the supply from Southern New York having been largely decreased by the want of snow for logging last winter, and that from Michigan by the high rates of lake and canal freights, with the increased toll charged by the State. Lumber from Canada had to be paid for in gold, and therefore prices followed largely the fluctuations in that standard of value. The value of the lumber, shingles and staves received in 1864 exceeded $8,500,000. The stock held over this Winter is larger than usual, being estimated at 50,000,000 feet. The greater part of the pine in market is 13 feet long, and principally tally boards and plank. There is also a heavy stock of these in Canada, held mostly, however, by strong hands who will not send to market, unless cost and a fair profit can be realized. At the present rate of gold, lumber cannot be sold at the prices ruling on the close of the season, without loss to the manufacturers. There is a large reduction reported by Canada dealers in the quantity of logs being cut this Winter, and should the supply for next season be materially less than for 1864, remunerative prices may be obtained. The demand for exportation will not probably be heavy, as foreign markets are reported as well filled. The retail yards are generally but lightly stocked, and should building be more active a good demand may be anticipated from that source, and wants of manufacturers and the Government will probably continue during the season as large as 1864. The following table shows the official receipts by the canals at Albany during the years named:

Years.	Boards and Scantling, Feet.	Shingles, M.	Timber, Cubic Feet.	Staves, Pounds.
1859..	291,771,762	43,756	70,381	114,070,503
1860..	301,022,600	41,522	46,888	148,785,369
1861..	162,952,500	31,782	44,754	143,784,500
1862..	223,899,100	32,622	148,217	210,212,100
1863..	243,611,500	21,323	307,700	146,746,300
1864..	255,418,130	24,004	314,995	185,789,493

The following table shows the official receipts by the canals at tide-water during the years named:

Years.	Boards and Scantling, Feet.	Shingles, M.	Timber, Cubic Feet.	Staves, Pounds.
1859..	352,329,600	177,000	1,454,200	260,926,000
1860..	377,688,600	63,400	1,299,800	282,910,000
1861..	301,607,000	45,200	1,190,000	264,228,000
1862..	412,105,800	49,800	2,506,800	357,080,000
1863..	466,304,600	36,100	5,560,600	282,478,000
1864..	495,287,400	30,832	4,121,000	286,250,000

Giving these data as to the stock on hand, probable supply and demand, with the fluctuations of gold last year, we leave to those interested prognostications as to the probable prices and the prospect for profitable business in lumber during 1865.

New York County Debt.

Harlem bridge bonds	$20,000
County court house stock	1,400,000
Soldiers' substitute bounty redemption bonds	2,000,000
Soldiers' substitute and relief redemption bonds	646,700
Soldiers' bounty fund bonds	4,000,000
" " " No. 2	996,100
Riot damages redemption bonds	1,000,000
" " "	442,100
Aggregate debt	$10,004,900

☞ The Cape Cod Railroad Company have petitioned the Massachusetts Legislature for permission to increase their capital stock to an amount not exceeding $600,000, and for liberty to extend their road to Provincetown.

Boston Public Library.

The Twelfth Annual Report of the Trustees of the Boston Public Library has been published. From the report of the Superintendent we learn that during the year, 6,626 books, 2,939 pamphlets, 367 maps and charts, 887 separate paders, 29 engravings, and a lithographic stone, containing designs relating to the life of Franklin, have been added to the Library. Of these 1,081 books, 2,772 pamphlets, 224 maps, and all the other articles enumerated, are due to the liberality of 219 individuals and societies. The number of books purchased during the year is 5,145, which is about the average of former years. The Library contains at present in Bates Hall, 93,342 volumes; in the lower hall. 23,592 volumes, making a total of 116,934 volumes. The number of pamphlets is 31,837.

During the year, 4,758 applications for cards to take out books have been answered, making the whole number of persons who have signed the promise to obey the rules of the Library, and who have thus acquired the right to enjoy its privileges, 35,239. The number of new signatures is larger than in any year since 1860. The number of lendings of books for home use was 184,035, a number considerably larger than in any preceding year. The number lent from the Upper, or Bates Hall, was 7,468 against 5,222 for last year. The number used in the Hall, 11,057 against 7,124 last year. It should be stated, however, that the statistics of last year covered a period of only ten months. The Reading Room has been frequented as heretofore. The average daily circulation throughout the year was 664.34. The largest reported any previous year was 643.56. There were, on an average, throughout the year, 302 daily visitors in the Reading Room, and 202 in Bates Hall, making with those who came to borrow books for home use, an average daily number of 1,128 frequenters of the Library. On some days it has been ascertained that more than two thousand persons have come to the Library for literary purposes, besides those who came from mere curiosity.

The financial statement shows the expenditures the year ending Aug. 31, 1864, to have been $32,789 28.

Interest and Dividends.

Interest coupons on the first mortgage Turtle Creek Division Construction bonds, (Pittsburg and Connellsville Railroad,) due Feb. 1st, will be paid at the 1st National Bank, Pittsburg.

The Chicago and Alton Railroad Company has declared a dividend of 5 per cent. upon the preferred and common stock, free of Government tax, payable on the 25th inst.

The half yearly gold dividend of five per cent. on the shares of the Quicksilver Mining Company will be paid at the office, No. 17 Nassau street, on the 15th February.

The Hampshire and Baltimore Coal Company have declared a semi-annual dividend of 5 per cent., payable 10th inst.

The New Bedford Copper Company has declared a dividend of 10 per cent., payable Feb. 18.

☞ The failures last year in Upper Canada were 250, with liabilities to the amount of $2,864,174, and in Lower Canada, 82, with liabilities to the amount of $1,689,412.

Canal Claims.

The number of canal claims in this State filed during the year ending September 30, 1864, was one hundred and forty-one, on which was claimed the sum of $211,616 34. From January 1, 1851, to September 30, 1864, the total number of claims against the State, filed in this office for the action of the Canal Appraisers, is four thousand five hundred and five, on which was claimed the sum of $7,698,664 25. The number of claims of all kinds filed since January 1, 1855, is three thousand five hundred and three on which is claimed $6,194,312 93. The number of awards made during the year ending September 30, 1864, is two hundred and seventy-three; on which was claimed $505,659 02. Allowed thereon, $209,738 02.

☞ From official returns just published it appears that the population of Brussels on the 1st of January last amounted to 184,932, of whom 89,971 were males, and 94,961 females.

☞ The valuation of Portland, Me., in 1864 was $26,963,939—an increase since 1844 of $22,598,151. Her exports to foreign countries increased from $251,097 in 1845, to $4,396,142 in 1864; her imports, from $399,791 in 1845, to $18,039,749 in 1864—showing not only a growth of business, but an increase of wealth, unexampled in any other city of New England during the same period.

East Boston Ferry.

The receipts of this company for the year ending December 31, 1864, were $107,708 68

Running expenses	$89,294 57	
Depreciation	10,000 00	
		99,294 57
Net gain		$8,414 11

The following is a copy of the trial balance:

Capital stock, 2,250 shares	$225,000 00
Collateral bond account	13,400 00
Unpaid dividends	220 00
Collateral bond with trustees	35,100 00
Notes payable	44,276 84
Company bond outstanding	500 00
Interest (coupons)	1,161 00
Profit and loss	65,967 76
	$385,625 60
Ferry property	$297,665 71
Cash on hand	2,569 82
Trustees bonds	26,978 81
Suspense account	48,500 00
Fuel account	9,411 26
Suffolk railroad	500 00
	$385,625 60

The Traveler's Insurance Company.

Stephen Super, a railroad conductor on the line from Peoria to Galesburg, Ill., was recently killed by falling between the cars of his train. His policy was the second one issued by the agent of of the Traveler's Insurance Company at Galesburg, who had held his appointment but very few days. By this timely provision and an investment of only $30, this poor man's family have secured the handsome sum of $5,000, which will be promptly paid.

☞ The Canada Engine and Machinery Company have no less than seventeen locomotives in process of manufacture, all of which are to be completed this year. These, however, are only a portion of what will be done in this one branch of the establishment in 1865, and give some idea of the large amount of work which the entire establishment is capable of turning out. All the iron

work—engines, boilers, &c., of Mr. Gildersleeve's new iron steamer is being made by this company. —*Kingston News.*

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY,
WASHINGTON, January 25, 1865.

WHEREAS, By satisfactory evidence presented to the undersigned, it has been made to appear that the

AMERICAN NATIONAL BANK

of New York, in the city of New York, in the county of New York, and State of New York, has been duly organized under and according to the requirements of the act of Congress entitled "An act to provide a national currency, secured by a pledge of United States Bonds, and to provide for the circulation and redemption thereof," approved June 3, 1864, and has complied with all the provisions of said act required to be complied with before commencing the business of banking under said act:

Now, therefore, I, HUGH McCULLOCH, Comptroller of the Currency, do hereby certify that "THE AMERICAN NATIONAL BANK OF NEW YORK," in the city of New York, in the county of New York and State of New York, is authorized to commence the business of Banking under the act aforesaid.

In testimony whereof, witness my hand and seal of office this twenty-fifty day of January, 1865.

Signed, HUGH McCULLOCH,
Comptroller of the Currency.

Fulton Works, No. 1340 Beach street, Philadelphia,

Office 182 Broadway, New York.

The attention of all interested in Railroads is invited to our Steam Cars for city or other Railroads. Their economy, durability, and efficiency commend them to all who have them in use, or witnessed their operation. They are now being introduced on Street and Suburban Roads in and adjacent to the principal cities; also on Tributary Roads.

With minimum weight and expense they have maximum power and capacity, and are free from noise and smoke. They can ascend the steepest grades, and turn the shortest curves with facility.

We are also prepared to execute orders for all other descriptions of Cars. Circulars with detailed information will be furnished on application.

New York, Saturday, February 18, 1865.

California and Columbia River R. R.

We have received the report of Col. Charles Barry, Superintendent of surveys of the California and Columbia River Railroad, in relation to the construction of a road from Marysville, California, to the Columbia river, Oregon. It is written in non-professional language, being rather for general circulation than particular study, and embraces general views of the route through the Willamette, Umpqua and Rogue river vallies, the character and resources of which were described in our last issue.

In passing from the Rogue river to the Umpqua valley, three routes have been explored, either of which is practicable. The second of those mentioned in the report, leaving the Rogue river near the mouth of Big Butte creek, and passing up Trail creek on the general line of the old Kearney trial, over the divide and over a branch of the south fork of the Umpqua river coming into the main valley at the mouth of Myrtle creek is understood to be twenty miles shorter than either of the two others, has an easy grade, is free from rock cuttings and offers the resource of plenty of timber. The Applegate pass in the Calapooins, on the route between the Umpqua valley and the Willamette is stated to be the most practicable line for a railroad between the two vallies, saving fifteen miles of distance with slight grades, excavations small, and timber plentiful. The line through the Willamette valley commences at the north end of the Applegate pass and runs to the foot of the Seappoose mountains 120 miles, with not a single mile of a greater grade than 15 feet. Thence the line crosses Seappoose creek to the Columbia river.

Col. Barry considers this the straightest, shortest and most economical route through the Willamette valley. For a terminus the city of Portland may be selected and approached by the West branch of the Willamette river crossing at the Falls, by the way of Sucker lake, and the West branch of the river below Oswego, and by the way of Cornelius pass and the West bank of the river below Portland.

The estimates are that from the Summit of the Siskiyou mountains (where it is proposed to connect with the Oregon and California Railroad Company) to Ashland 26 miles the cost will be $80,000 per mile, thence to Hunter's ferry 38 miles $40,000 per mile, thence to Canyonville 12 miles $89,000 per mile, thence to Roseburg 31 miles $40,000 per mile, thence to the head of the Willamette valley 50 miles $40,000 per mile, thence to the navigable waters of the Columbia 130 miles $35,000 per mile.

The total cost would therefore be $15,000,000 in the State of Oregon.

The traffic and earnings of a road, with termini on the Pacific Ocean and passing through and connecting all the great vallies and grain growing districts, controlling the whole coastwise travel and trade, and connecting Oregon, Idaho, Washington, British Columbia and Vancouver's with California, Nevada, and the Atlantic States, are naturally claimed to be of such magnitude in the future as to distance all competition and rivalship. It is contended that it will control the freight and traffic of all the great vallies, lying almost in a straight line with each other; each six millions of acres, (but a small part of the whole,) contributing 1,500,000 tons per annum of freight, at $10 per ton. But the report taking 500,000 tons per annum for its basis, considers the revenue, from freight alone would be $5,000,000 per annum, without reference to the freights and business from the mines of silver, gold, lead, copper, and coal along the line of the road itself.

The freight from these mines is estimated to be 100,000 tons per annum, a moderate calculation, which at $10 per ton would be $1,000,000 more; lumber 50,000 tons at $5, would be $250,000, merchandize up the road from San Francisco, 50,000 tons at $10, 500,000, and for passenger traffic $650,000. This stated more in detail would be as follows:

Estimated earnings of the California and Oregon Railroad from Marysville, California, to the Columbia river, Oregon:

To 500,000 tons local freight (exclusive of freight from mines)@$10 per ton..	$5,000,000
To 100,000 tons of freight from mines @10 per ton....	1,000,000
To 50,000 tons of freight on lumber @$5 per ton	250,000
To 50,000 tons through fast freight @$10 per ton	500,000
To local passengers fares	650,000
To 50,000 through passengers @$30	1,500,000
To mails and express	300,000
Total earnings per annum	$9,200,000
From this deduct:	
Running exp. 650 miles @$4,000 per m.	$2,600,000
Annual repairs	1,000,000
Total expenses	$3,600,000
Net earnings	$5,600,000

which is 18¾ per centum on thirty millions of dollars—the estimated cost of construction of the whole line.

The funds for the construction of this road it is contended by Col. Barry, should in part be raised by the people along the line; by seeking aid from Eastern capitalists, and then by obtaining from Congress such aid as it has given to other States. The plan is one of the largest, and will undoubtedly at no distant day be successful.

☞ A line of steamers has been established to sail between Boston and Liverpool direct, once a fortnight. The line has been established by Messrs. Warren & Co., and will begin its trips April 8th.

North Pennsylvania Railroad.

We have the report of this company for the year ending October 31, 1864. The time of closing the fiscal year has been changed from November 30th to October 31st, consequently the report embraces a period only of eleven months.

Earnings:	1863. 12 months.	1864. 11 months.
From passengers	$190,539 91	$280,960 45
" coal	140 288 94	176,101 61
" pig iron	19,867 22	23.690 9
" lumber	7,046 85	14.245 09
" local freight	118,690 31	137,792 29
" through freight	38,235 87	48,206 76
" mails	2,756 00	2,679 34
" rents, etc	7,212 59	5,928 81
	$524,637 69	$689,605 33
Expenses, viz:		
Maintenance of way	$54.174 12	$86,838 42
Motive power	86.292 43	117,849 05
Maintenance of cars	21,888 12	99,079 26
Conducting transp.	67,626 77	50,323 18
General expenses	19,098 29	24,113 20
	$249,079 73	$357,703 11
Net earnings	$275,557 96	$331,902 22

This shows an increase, over the previous fiscal year, in gross earnings of $164,967 64; in expenses of $108,623 38; and in net earnings of $56,344 26.

The earnings in November were $60,423 98; the expenses, $35,100 66; and the net earnings $25,828 32.

For the year ending November 30, 1864, the earnings were $750,034 31; the expenses, $392,803 77; and the net earnings $357,230 54—an increase in gross earnings, as compared with the year ending November 30, 1863, of $225,396 62; in expenses of $143,724 04; and in net earnings of $81,672 58.

The charges against income for the year are as follows:

Six per cent. coupons	$150,000 00
Ten " "	36,000 00
Interest on scrip	14,742 30
Ground rents and interest on mortgages	6,258 18
National and State taxes	12,769 09
	$219,769 57
Less interest earned	3,169 67
Total	$216,572 90

—leaving a balance for the eleven months of $115.329 22; or for the year of $140,657 64.

The earnings as stated above are those of the North Pennsylvania Railroad alone, excluding all sums received for other companies; and the expenses include renewals and repairs.

The increase in the business of the road, both in passengers and freight, necessitated a large increase in the rolling stock, side tracks, engine houses, etc., for its accommodation. These have been provided in a measure as fast as the finances of the company would warrant. There have been placed on the road during the year 8 new locomotives, 7 passenger, 2 express, 21 house, and 35 platform cars. A large freight shed and platform, have been erected at Front and Noble streets, at a cost of $4,602 60; and a freight house at Quakertown, which cost $1,074. A small brick office at Willow street, has cost $481 38, and a larger one $865. A brick engine house $650 25, and a stone do., at Lansdale $1,704 98. Two new iron turntables at Lansdale, and at Hilltop, near Coopersburg, have cost $4,608 96; and $1,544 87 has been expended on water stations, wells and fixtures at Lansdale, Rockhill and Hilltop. A large number of new sidings have been laid, the aggregate length of which has been little less than three miles. The amount charged to that account is $33,996 82; including which, and the amount paid on account of the new passenger depot at Berks street, $6,068 85, the total amount charged to construction during the year, has been $64,816 01. The amount charged to equipment account during the same time was $93,350 61.

The company have purchased (on ground rent) a large lot on Berks street, extending from American to Third street, adjoining the other property of the company, which will afford ample room for erecting the necessary engine houses, etc., in future. The company now own 1,445 feet on American street, a considerable portion of which extends from Second to Third streets, and embracing an area of over eight acres.

The passenger depot, which the company are erecting at the corner of American and Berks streets, will when finished, be capable of holding 36 passenger cars under cover, standing upon five tracks. It is intended to make it the terminus of all the passenger trains, no portion of the city track worked by horse power, will then be used by passenger trains. The front of the building, which is of brick, 50 by 78 feet, and two stories high, is already under roof. The car shed will be 436 feet long and 118 feet wide, the foundation walls of which are built.

The company have 20 locomotives. The number of miles run has been: with passenger trains, 181,183; with freight trains, 115,000—total, 296,183. Cost of repairs $22,490 43. Cost of fuel, $50,594 24. Cost of stores, $4,610 59. Average cost per mile for passengers 16.6 cents; for freight, 36.4 cents. Number of passengers carried, 625,805; do., carried one mile, 10,564,759—equal to 195,642 through passengers. Tons of freight carried one mile, 11,223,167. The increase in mileage of passengers over the previous year was 3,252,679; and in mileage of freight, 962,516.

The opening of the Penn Haven and White Haven Railroad, though delayed beyond the time contemplated, has added considerably to the passenger and miscellaneous freight business of the company.

The Lehigh Coal and Navigation Company are now engaged in constructing a railroad parallel with their canal, along the north side of the Lehigh River, which they intend to connect with the North Pennsylvania Railroad at Bethlehem. It is thought that this will add largely to the business of the line.

The construction of the connecting railroad, from Frankford to West Philadelphia has been commenced, and there is good reason to hope that it will benefit the North Pennsylvania Railroad.

The arrangement entered into between the company and the bondholders for funding certain coupons, has been practically carried out; but $430 of the 6 per cent., and $25 of the 10 per cent. remain unfunded. Under that arrangement $58,500 of the unissued chattle mortgage bonds of the company were pledged to trustees as collateral security for the punctual payment at maturity (July 1, 1870,) of the scrip issued under said agreement. The balance of the bonds, say $81,500 have been cancelled, making the chattle-mortgage account stand thus:

Amount issued	$360,000
Held as above stated	58,500
Cancelled	81,500
Making, as originally authorized	$500,000

CONDENSED BALANCE SHEET.

Secretary.—EDWARD ARMSTRONG.

Engineer and Sup't.—SOLOMON W. ROBERTS.

Terre Haute and Richmond Railroad.

The earnings and expenses of this road for the years ending November 30, 1863 and 1864, have been as follows:

Earnings:	1863.	1864.
From passengers	$263,981 89	$404,565 41
" U. S. troops	65,830 36	61,776 81
" freight	383,449 17	453,900 18
" coal	35,686 30	55,880 90
" mail, express, etc.	25,670 76	31,856 41
	$774,618 48	$1,007,979 21
Expenses, viz:		
Running road	$80,041 14	$105,029 71
Road repairs	88,645 63	183,398 70
Machine shop	68,947 67	90,071 67
Sundries	81,535 56	88,852 46
U. S. Tax	10,174 05	16,372 27
	$329,344 05	$486,724 81
Net earnings	$445,274 43	$521,254 40
Additional expenditures	137,747 28	174,770 92
Balance	$307,527 15	$346,483 48

The capital stock of the company has been increased during the year by the conversion into stock of $6,000 of 7 per cent bonds; also by a dividend in stock of 25 per cent., in April last,

amounting to $376,700. The amount of capital stock now outstanding is $1,900,150; and of 7 per cent. bonds, $88,000—making the aggregate of stocks and bonds November 30, 1864, $1,988,150.

The increase of transportation receipts in 1864 over those of 1863 is $233,360 73; and of operating expenses, including U. S. taxes, $157,380 76—leaving the increase of net earnings, $75,979 97.

The gross receipts from transportation were		$1,007,979 21
From other sources		45,718 51
Total revenue		$1,053,697 72
Operating expenses	$467,352 54	
U. S. taxes	19,372 27	
Additional expenses	174,770 92	
		661,495 73
Receipts, less expenditure		$392,201 99
U. S. tax on stock dividend	$11,771 51	
Fractional stock dividend.	3,912 50	
June div. and U. S. tax..	119,946 80	
December dividend	95,007 50	
" " extra..	95,007 50	
U. S. tax on same	10,000 78	
" on surplus	2,822 80	
		338,468 89
Balance		$53,733 10

The directors at their meeting held on the 24th of December, declared a dividend of five per cent., also an extra dividend of five per cent out of the surplus fund, reserving the remainder of that fund, with a view to the construction in part, or in whole, of a double track.

The additional expenditures, noted above, consist of:

New locomotives	$102,741 90
" passenger cars	10,930 33
" freight "	34,979 58
" buildings	4,863 38
Rebuilding bridges	6,742 80
State and county taxes	6,917 10
Interest and exchange	7,595 83
	$174,770 92

The equipment of the road consists of 23 locomotives; 20 passenger, 8 baggage and mail, and 440 freight, coal, stock, gravel and hand cars. Two locomotives, and three first-class passenger cars with raised roofs, have been placed on the road during the year, and 57 cars for freight, etc., built in the company's shops. Two more locomotives, and one passenger and one freight car have been purchased, which have not yet been delivered on the road.

The number of miles run by engines with passenger trains has been 141,807; with freight trains, 192,273; with other trains, 36,475—total, 370,555. Cost for repairs, $32,795 02, or $8.85 per 100 miles run. The average cost of running an engine per 100 miles was $30.08.

The number of through passenger carried was 109,914; way do., 169,893—total 279,807, an increase over the previous year of 87,917. Troops transported, 42,372—a decrease of 5,037.

During the year 1,369¾ tons, or 14 miles of new rails, 47,055 new cross-ties, 7,494 wrought iron chairs, and 21⅔ tons of spike have been put in the main track, and 12 miles re-ballasted. Within the past five years, 41 miles of the main track has been re-laid with new rails leaving 32 miles of the original rails now in the track, which should be renewed within the next two years, requiring 1,660 tons of rails for each year. About one mile of new sidings have been laid with cut or re-welded iron. One new wrought iron bridge, of 57 ft. span has been built. It is intended to re-build the remaining seven during the coming year if the prices of labor and materials will admit of making the necessary expenditure.

Within the year, contracts have been made with the "Union Transportation Company" upon favorable terms to run a through line of cars between St. Louis, Pittsburgh, Philadelphia and New York, over this road; also with the "Erie Transportation Company" for the same purpose. These arrangements will add materially to the future gross freight earnings of the road, and practically increase the facilities of the company for moving through freights promptly.

The passenger fares upon this road have been increased during the year from $2.25 to $3.00. The advance in passenger fares and freight tariffs since 1852 has been 33 per cent, while the expense accounts have been increased an average of 60 to 70 per cent.

President.—E. J. Peck.

Directors.—Chauncey Rose, James Farrington, Demas Deming, Charles Wood, W. K. Edwards, F. Nippert, L. G. Warren, W. R. McKeen, E. J. Peck.

Secretary.—Charles Wood.

Treasurer.—John Scott.

Sup't and Engineer.—R. E. Ricker.

☞ Efforts are being made to establish a territorial government, under the name of "Neosho," for the district west of Arkansas and south of Kansas, now occupied by Indians, most of whom by joining the rebels have lost their claim to favorable consideration by the government. The number of Indians, of different tribes, is about sixty thousand, and they have made very little progress towards civilization. It is a fine country, and will probably be opened up to white settlers at an early day.

Interest and Dividends.

The Oswego and Syracuse Railroad Company have declared a dividend of 4 per cent. payable Feb. 20.

The Wrightsville, York and Gettysburg Railroad Company will pay a dividend for the year 1864 of 2 per cent. less 10 per cent. thereof retained for National and State taxes.

The Salem and Lowell Railroad Company have declared a dividend of 50 cents per share, payable Feb. 15.

The Naugatuck Railroad 5 per cent., payable on demand.

The Quincy Mining Company has declared a semi-annual dividend of $8 per share, payable February 23.

The Pennsylvania Coal Co. have declared a dividend of 7½ per cent., payable Feb. 15.

The Locust Dale Coal Co., 5 per cent., payable Feb. 25.

The Oil Basin Oil Company a dividend of 5 per cent., payable on the 20th inst.

The Allegheny and Pittsburg Oil Company a dividend of two per cent., payable March 1st.

The Cherry Run Petroleum Company a dividend of ten per cent., payable, clear of State tax, on the 23d instant.

The Ross Oil Company of Pittsburg, a dividend of 3 per cent. for January, being the fifth monthly dividend. Payable on the 15th inst.

The Chesapeake Oil Company of Baltimore, has declared a second monthly dividend of 2 per cent.

The Massachusetts Oil Creek Petroleum Company have declared their second monthly dividend of 2½ per cent., payable Feb. 14.

The Jersey Well Oil Company announces a dividend of three per cent., payable March 1st.

Northern Pacific Railroad Company.

The above named company is now fully organized under its charter from the present Congress, approved in July last. The Directors chosen at the stockholders' meeting are: Samuel C. Fessenden, L. D. M. Sweat, of Maine, George Briggs, Philander Reed of New York, K. B. Small of Alabama, Josiah Perham, Willard Sears, Oliver Frost, A. W. Banfield, I. M. Beckett, A. Abbott, Nathaniel Green, Jr., and O. Hall of Massachusetts.

The Board of Directors organized by the choice of Josiah Perham for President, George Briggs for Vice President, and I. S. Withington for Treasurer.

Baltimore City Passenger Railway.

This company commenced operations on the 28th of July 1859. The rate of fare established by the charter was five cents per passenger, the city requiring the payment into its treasury of one-fifth of the gross receipts for the purchase and improvement of parks, etc. Since the company has been in operation, a period of more than five years, the payments to the city, including city taxes and license, have amounted to $245,035 61, while the entire profits accruing to the shareholders has been a dividend of $30,000 only, upon an actual capital of $640,000. In January, 1864, owing to the enhanced cost of feed, labor, etc., the Common Council passed an ordinance by which the company was relieved from the payment of city taxes,

and license charge upon cars; and the General Assembly amended the charter by a supplemental act, authorizing the company to increase its rate of fare to six cents. The company have now petitioned the legislature so to amend the act of incorporation as to require the payment of only one-third of its net profits to the city, instead of one-fifth of the gross receipts. Attached to the Memorial, of which the above is an abstract, is the following Memorandum containing much valuable information in reference to the working of the company:

MEMORANDUM—JANUARY 1, 1865.

The Baltimore City Passenger Railway commenced operation July 28, 1859.

Capital (amount paid in) $640,000.

Paid city of Baltimore to January 1st, 1865, Park Tax	$233,062 93
Paid city of Baltimore to January 1st, 1865, City Tax and License	11,972 68
	$245,035 61

Dividend paid Shareholders since the road commenced operations $30,000.

Depreciation in Track and Equipment.—Thirty miles of track will require renewal in twelve years; will cost to renew, with a credit of old material, $8,000 per mile. Depreciation of Track $20,000 per annum, for five years $100,000.

80 Cars have run an average of 4 years, will require renewal in 6 years.

Cost per Car, $1,200, credit old Cars	$200
Depreciation Cars, per annum, say	13,000
For four years	52,000
Original stock of Horses	400

The difference between the amount given as the collections for the ten months ending June 30, 1863, and the amount stated in the last annual report ($524,401 77), is the balance of collections reported to the office since the date of that report.

In addition to the $102,214,165 10 collected during the year ending June 30, 1864, there was paid directly to the bureau the sum of $14,636,507 34—making the total receipts $116,850,672 44, viz:

Received by collectors	$102,214,165 10
Receipts from banks, railroad Co., &c., paid directly to commis'r.	7,017,547 03
Receipts from salaries	1,705,124 62
Receipts from sale of stamps	5,894,945 14
Receipts from passports through Department of State	10,515 00
Receipts from suits on account of office	408 32
Receipts from warrants of distress	7,968 22
Total receipts	$116,850,672 44

Of the $102,214,165 10 collected during the year, the collectors have paid into the treasury $93,833,415 28.

The total amount of taxes collected on incomes other than that derived from being an officer of the government, was $14,919,279 58. Of this New York paid $4,918,369 67; Pennsylvania, $2,035,166 03; Massachusetts, $1,904,732 03; Ohio, $1,117,691 18; Illinois, $586,435; and California, $580,227 01. The balance of the states, with the exception of Maryland, which is returned $510,765 27, paid less than $500,000 each. The District of Columbia paid $146,689 24, which is more than the revenue derived from the same sources in New Hampshire, Vermont, Minnesota and Kansas combined.

The total amount derived from licenses for business, exhibitions, &c., was $7,178,205 26. From retail liquor dealers licenses the amount collected was $1,612,636 25; from retail dealers, $1,338,345 95; from wholesale dealers, $1,220,787 01; from wholesale dealers in liquor, $175,764 76; from commercial brokers, $207,098 26; manufactures, $471,091 45; physicians, $282,774 04; from peddlers of all descriptions, $264,111 64; lawyers, $129,186 20; hotels, $238,081 82; brokers of cattle, $106,337 29; and money brokers, $98,678 05. The amount derived in the District of Columbia from this source of revenue was $104,937 47.

The gross amount of taxes received from manufactures and productions was $75,403,386 60. Of this New York contributed $16,814,455 90; Pennsylvania, $9,585,964 65; Ohio $9,453,335 95; Illinois, $8,288,949 83; Massachusetts, $8,250,872 92; Kentucky, $3,061,489 64; Indiana, $2,549,890 66; Louisiana, $1,893,911 41; Maryland, $1,842,728 22; Rhode Island, $1,340,387 28; Maine, $882,980 14; and the District of Columbia, $71,341 33.

The total amount of revenue derived from slaughtered animals was $695,201 68; from gross receipts of steamers, express companies, &c., $2,895,998 63; from sales by auction, &c., $138,082 43; from legacies, $310,836 18.

The receipts from fermented liquors, such as ale, beer, cider, &c., were $2,223,719 73. To this sum New York contributed $780,255 78; Pennsylvania, $310,287 98; Ohio, $209,685 97; Illinois, $155,570 21; and District of Columbia, $9,216 13.

The amount derived from cigars was $1,255,424 79. Of this sum New York paid $356,461 47; Pennsylvania, $292,784 07; Ohio, $115,650 60; and Massachusetts, $97,547 27.

In the manufactures of iron Pennsylvania takes the lead. The total amount collected in that state on this article was $955,880 97. New York paid $606,988 49, Massachusetts $480,180 51, and Ohio $208,546 46.

The revenue derived from Rock and Coal oil was $2,235,328 80. Of this Pennsylvania paid $1,235,156 66; New York, $243,430 39; Ohio, $241,136 82.

From distilled spirits there was received $28,431,979 83. Illinois contributed $7,262,433 15; Ohio $6,442,408 03; New York, $5,986,255 30, and Pennsylvania $2,194,425 94.

The amount derived from paper and manufactures of paper was $901,914 17; from leather, $3,697,433 87; from all kinds of tobacco, 7,086,684 74; from manufactures of wool, $3,007,885 73; from manufactures of wood, $1,679,940 25; from sugar produced directly from the sugar cane, $1,267,616 28; from manufactures of cotton, $1,835,027 75; from raw cotton, $1,268,412 56; from cotton cloths and all textile fabrics before they are prepared, $1,713,148 76; from cigars, $1,255,424 79; from gunpowder, $155,302 07; from incomes on interest on United States securities, $75,373 93; and for miscellaneous manufactures, $6,285,076 32.

Wealth and Resources of Washington Territory.

This is one of the great territories of the Union which is hereafter to become a powerful and wealthy State. No one can look at the map of the new States and territories on the Pacific, and intermediate between that ocean and the Mississippi and Missouri Rivers, without being struck with the grandeur of their dimensions, their vast natural strength, their central continental position and their fitness for maintaining a thriving and dense population.

Of Oregon we gave the latest account in the last number of the JOURNAL, and Washington which lies North of it and West of Idaho, is next in order for a proper notice.

It is already divided into 19 counties, and contains 69,002 square miles, or 44,161,280 acres. It was reduced from its original size by the creation of the territory of Idaho, which lies to the east of it, and between it and Montana. Its population by the census of 1860 was 11,594, but in 1863 it was believed to contain 15,000, having increased from the previous enumeration in 1850 at the rate of 865 per cent.

Its cultivated farms amount to 83,022 acres, of the value of $1,116,202, and the implements of husbandry used upon them $202,506.

The live stock consisted of 5,005 horses, 178 asses and mules, 2,777 working oxen, 16,072 other cattle, 10,162 sheep, and 9,836 swine.

The products of animals were as follows: Butter, 157,802 lbs., cheese, 12,146 lbs., wool, 20,726 lbs., wax, 5,820 lbs., and the value of slaughtered animals was $105,108.

The cereal crops were of wheat, 92,609 bushels, rye, 244, Indian corn, 4,792, oats, 158,001, barley, 1,715, buckwheat, 977.

The commercial crops consisted of a very trifling quantity of tobacco, but 10 lbs., hops, 28 lbs., flax, 89 lbs.

The miscellaneous crops were:

Peas and beans, bushels	88,065
Irish potatoes "	191,354
Sweet " "	18
Wine, gallons	179
Hay, tons	4,871
Clover seed, bushels	116
Grass seed "	211

The orchard products were of the value of $23,779, market gardens, $27,749, and home made manufactures $33,506.

The number of manufacturing establishments was 52, with a capital of $1,296,700, consuming annually $432,000 of raw material, employing 890 operatives, of whom but 4 were females, and producing fabrics of the value of $1,405,000, more than the whole capital and more than three times the value of the raw material employed, thus showing a most extraordinary profit.

Of the various articles produced, sawed and planed lumber was the leading one, estimated at $1,172,520. Flour, 73,800 bbls. Coal, 5,374 tons, in value $32,244. Fish, 18,900. Oysters, $14,597. Leather, $17,500.

The commerce of the territory is considerable. 7,000 tons of shipping are of American ownership, and the whole amount of tons entering and clearing the last year was upwards of 33,000.

Puget's Sound which has its head in this territory furnishes a noble harbor, and a secure refuge for commercial fleets no matter what their size may ever be. The town of Olympia is at or near the head of navigation. The British possession, north of the sound and the Strait of Juan de Fuca, known as Vancouver's Island, is the British naval station in the North Pacific, and is succeeding as a settlement in consequence of its commercial and natural advantages. Coal is found there in inexhaustible quantities, affording certain resources for the supply of all the steamers that are to one day resort to Puget's Sound.

Washington Territory is therefore to be considered as a rival of Vancouver's, in the race of progress, and is fully organized for the work. It has common schools, a university, and a flourishing town called Florence, with 3,000 inhabitants, in the mining region of Salmon River. Olympia is the territorial capital. The eastern portion of the territory is rich in gold mines, which are extensively worked and found profitable. The territory enjoys the advantage of a good wagon road from Walla Walla near the bend of Columbia River to Fort Benton, the head of navigation on the Missouri River, which was constructed by the United States Government, and is invaluable as a route of transportation and emigration.

☞ A bill has been introduced into the House of Representatives, and referred to the select committee on the Pacific Railroad, providing for the extension of the road eastward to Ontonagon, in Michigan, so as to have it connect with Eastern through routes. The existing grants of land, immunities and privileges to the Northern Pacific Railroad are to be extended to this road also.

☞ The project of a railroad from Albany, along the west bank of the Hudson river, is again being revived. A meeting was held at Coeyman's on the 14th ult., at which a committee was appointed to ascertain what material aid the inhabitants would furnish to bring the road from Albany to that village.

American Railroad Journal.

Saturday, February 18, 1865.

Rise of our National Securities Abroad.

We are advised by the last arrival from England, that when the news of the fall of Fort Fisher was received there, our National securities advanced 7 per cent. This insures a large profit to present holders, and will create a still further demand.

Stock Exchange and Money Market.

As the long continued and unceasing drain of specie for the last four years has had a direct influence on our own financial condition, keeping up exchange and the premium on gold, the falling off of late in its export is worthy of consideration in reference to our future. Our readers will have observed that we have kept them advised from time to time in relation to the movements of cotton, which we have constantly believed was, when in loyal hands to be used for a most valuable and opportune purpose.

A similar view of the subject appears to prevail among intelligent dealers in the article in England. Our files of the 29th ult., discover considerable anxiety on the subject. Cotton has been imported in unusual quantities into Liverpool and London. The following is a statement which shows the condition of the cotton market there and in Havre:

	Bales.
Stock in Liverpool January 13	510,000
" London "	128,000
" in the hands of spinners	70,000
" at Havre	57,000
Total	765,000

A fall of 9d. in the pound is predicted on this amount, producing a loss of $45,000,000. From India the shipments were going on at the rate of 47,131 bales every fortnight, the arrivals of which were increasing the apprehensions of the fall.

Now the cotton fleet from Savannah having arrived we shall have 30,000 bales and upwards thrown into the market. Large deliveries are also taking place on the Mississippi, and the consequence is seen in shipments from this port, to be steadily increased, and the fall of exchange greater than it has been for years. It is clear that while a revulsion may be expected in England, if not a financial crisis, here we shall soon become creditor dealers on a large scale, and the effects must be favorable in the reconstruction of our financial system and the return to specie payments.

The first great step has been taken at Washington, in the adoption of a rigid purpose to stop all further inflation of the National currency. There is enough paper money afloat of a real character to be returned to the Treasury for its required loans, present and prospective, and were the war suddenly to cease, of which the symptoms are marked and flattering, and further loans became unnecessary, the return to a specie basis would be easy and practicable at an early day. The conversion of the cotton still in the country into money would change the direction of the specie current with rapidity and certainty, whether done by the Government as captors, or by the Southern holders coming back to the enjoyment of their citizenship by amnesty or submission.

It appears that Governor Morgan having been unexpectedly nominated to the Secretaryship of the Treasury has peremptorily declined the office, and as we think for obvious reasons not only "with emphasis" but "good discretion." An able financier who should be clear of all political aspirations and combinations, would we think have no difficulty whatever in making everything go smoothly. There is really a splendid basis for the operations of such a Secretary.

On the 31st of October, the total debt of the United States was $2,017,099,515. If we apportion this among the population of the loyal States only, we have an average of $84 04 per head. The interest on this at 6 per cent., is $5 04 per head per annum, if it was raised by direct tax, and in that shape in lieu of all other taxes it would not be felt. Let us compare this state of things with that in Great Britain. In 1793 it was there $83 46 per head, and excited no particular alarm. In 1816 after the long wars with France,

it had risen to $218 20 per head, and the confidence of the people and the Government was unshaken, and in 1863 after 47 years of retrenchment on the one hand, and of commercial progress, and an increased population on the other, it was still $180 47 per head.

Nearly double even now of our present individual liabilities as tax payers. And though the aggregate wealth of Great Britain was about 35 millions against 15 millions in the loyal portions of the United States in 1863, as nearly as can be computed, yet the rate of increase is entirely in our favor. The rate there during the last decade was but 3¼ per cent., here it was 8½ per cent., or in other words, while the wealth of Great Britain is doubling every 21 years and 8 months, here it doubles every eight years and 6 months. So that in 1872, counting from 1863, our wealth in the loyal States will be 30 millions, and in 1881 60 millions!! Here are facts which do not leave a doubt as to our ability to meet our future engagements, especially those maturing at a period equally remote.

The proposition may be verified in another and practical form, viz., that of estimating the products per capita of the people of both countries in gold. As follows:

Annual product loyal States per head.

1850	$86 41
1860	128 50
1864	160 77

The same calculation with regard to the annual products in Great Britain during the same periods gives the following results:

Annual product Great Britain per head.

1850	$89 74
1860	100 60
1861	120 10

The average interest on our National debt in October last, was but 5⅓ per cent., or if we deduct for the legal tenders which bear no interest, it was but 4 1-5th per cent. So that if we had gone on and paid whatever interest was charged by capitalists for money as in the last few months of Mr. Buchanan's administration, 12 per cent., and as a specie basis would undoubtedly have compelled us to pay, we should in 10 years have sunk the whole capital of the money borrowed, and still have had a heavy rate of interest to pay. Besides for a considerable time after the war broke out, the Government got full value for its currency and its loans; or the full equivalent in gold for its issues. And this is evident from a single fact, that numerous applications are being constantly made to Congress for relief by heavy contractors, who assert they have lost by their contracts, or in other words, the Government have been gainers by those contracts. This should not be left out of sight by those harping on our depreciated currency of the last two years.

These considerations induce us to repeat our remark in this place, that there is a splendid opportunity for a man of talent in the Treasury Department to put the finances of the country in the very best possible condition, especially as it is evident that the war is near its close. And if not, if it is protracted by the desperation of our opponents, several hundred millions more added to the present debt will not in the least impair the argument we have already made, nor the resources and ability on which it is founded.

The actual position of the National debt at this moment, including currency bearing no interest was communicated to a member of Congress on Monday last, in reply to a letter requesting the information.

Aggregate of debt bearing interest in coin	$1,087,550,438 80
Interest	63,433,131 45
Debt bearing interest in lawful money	608,576,952 44
Legal tender debt bearing no interest	433,160,569 00
Fractional currency	24,096,918 93
Total principal	$2,153,735,442 26
Total interest	93,131,901 86
Amount of unpaid requisitions	136,100,000 00
Amount in Treasury	$10,252,958 16
Balance	125,847,041 84

Thus it appears that the funded interest bearing debt is but $1,696,123,391 24, a much less sum than is generally supposed. If the war should close, and expenditures cease on their present large scale, it is clear that the payment of taxes would of itself absorb the outstanding legal tenders in a short time, which might be cancelled instead of being funded. If this could be effected, it would make a very material difference in our National monetary affairs, and we do not see why it may not be under the conditions named. It is understood, however, that a further loan of six hundred millions supposed to be in full of all possible further deficiencies, will be adopted by Congress, but we trust its authorization will be carefully limited to the actual necessity to arise.

Further taxation, and the rapid increase of the receipts from the internal revenue would give it would seem, a very large sum during the present year. At the same time retrenchment and economy in the public service should be seriously studied. Thus we object to all increase of salaries as a general rule, and to the grant of large sums of money for the painting of pictures for the adornment of the capital as has been recently proposed. So too, the numerous outlay for the increase of the Navy now large enough, should be checked. We have between 6 and 700 vessels in the service, and it will be utterly impossible after a few months to employ this great number.

It is noticeable that the Government securities have been in large demand the past week and at advancing rates. Under the active management of Jay Cooke, & Co., the 7-30s are being rapidly absorbed. The advantage of agencies is clearly seen in this as in previous instances. By this means information is widely discriminated among the people desirous of investing their surplus earnings large or small, The 5-20s have sold readily at 109 and a fraction above, and the 10-40s at 12½. Railway shares are steadier and advancing, confidence in them beyond all question being unimpaired among the large majority of holders. This is evident from the rise in Railway shares which will be found noted in our report of sales. Railway bonds are in demand at full prices. Money is easy and loans have been made at 5 per cent. without difficulty.

Our exports the past week have amounted to the very large sum of $7,078,813 against $3,546,130 for the corresponding week last year, of which first named sum $1,059,389 was in cotton.

The exports from the port of Baltimore for the same week were $291,027, and from Boston $488,138.

The balance in the Sub-Treasury on Tuesday, was $30,045,544 55.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Steam Stone Cutter.

We call the attention of railway managers and contractors to this remarkable machine. It will do the work of thirty men, and do it better than it can be done by hand. It is certainly one of the greatest labor saving machines which has been brought out for many years. A short description will justify the universal opinion in its favor, by men who have tested it, and clearly show that it is a desideratum in cutting stone from their natural beds, for building or masonry purposes, or for excavations in heavy rock work. The machine is mounted upon a railway track, with cogs upon the inner sides of the rails into which the cog wheels of the machine work, thus giving a forward and backward motion. It is driven by a five-horse power engine, mounted upon the same track in rear of the machine. This track is moveable and is fastened upon the rock to be cut, by means of small, shallow holes drilled into the rock, and plugged with wood, and then a wood screw turned into the wooden plugs, through a section of the track.

The machine has sixteen drills eight feet long, composed of square bars of cast steel, and placed in gangs of eight each on each side of the machine. These gangs move up and down, through guide slides which are adjustable by means of a screw, so the drills can stand at a perpendicular or at any angle to forty-five degrees. The gangs are raised by a lever which is operated by a cam. At the opposite end of the lever a hidden spring is attached which gives the power to the stroke of the drill. Any desired power can be given to the drills, but in practice a crushing weight of about one thousand pounds has proved to be the most economical. Each gang works seventy to eighty strokes to the minute, giving the equivalent of twelve hundred strokes of a single drill per minute. Each drill is set lower in the gang than the preceding one, so that every drill cuts upon a step or stair instead of striking dead, like a common hand drill, and every blow throws off a chip.

The machine will cut from one-fourth to three-fourths of an inch deep at each stroke depending upon the hardness of the stone. It can be applied upon any kind of rock at any dip of the strata. It will be seen by this imperfect description that for heavy masonry work such as preparing stone for arches, culverts, bridges, etc., that an immense saving can be secured over the old methods as in making rock excavations the stone can be cut out in shape to use, and leave the sides of the excavation smooth and perpendicular only requiring cut through the rock sufficiently wide for the road bed.

The machine is coming into use where it has been tried, and is endorsed by some of the experienced quarrymen in the country—and will eventually be extensively applied in the great West upon the limestone formations for building and masonry purposes. The saving is immense over manual labor, and upon such works as the Pacific road and other great works it must prove in its line, as invaluable as the cotton gin to the planter.

The 7-30's.—Jay Cooke & Co.

The great success which has attended the previous agency of Jay Cooke & Co., in procuring subscriptions to the Government loans, has very properly led to their re-employment in the disposition of the 7-30's. They have entered upon the duties of their agency with their wonted zeal and activity, and with great success. Large sums are daily absorbed through their wide and popular arrangements, and we cannot doubt that the whole amount required will be rapidly subscribed. This particular loan is a desirable one, it is popular in its character, and invites all classes to sustain it, and through the agencies of Jay Cooke & Co., all have now the opportunity.

Personal.

Mr. Charles Minot having resigned the office of General Superintendent of the Erie Railway, has been appointed Consulting Engineer, and Mr. Hugh Riddle has been appointed General Superintendent. The resignation and appointments will take effect on the 1st day of March, proximo.

Mr. Harlow W. Chittenden, formerly Assistant Superintendent of the Middle Division, and recently of the Western Division of the New York Central Railroad, has been appointed General Superintendent, *vice* Hon. Chauncy Vibbard, resigned.

Mr. Samuel A. Black has resigned the position of Superintendent of the Oil Creek Railway, and accepted that of Assistant Superintendent of the Middle Division of the Pennsylvania Railway. Mr. David McCargo is Assistant Superintendent of the Pittsburg Division, and Mr. S. P. Darlington, of the Philadelphia Division.

Mr. E. C. Gibson, late Master Mechanic on the Oil Creek Railway, has been appointed Superintendent, *vice* Mr. Samuel A. Black, resigned.

Mr. F. W. Rankin, has been appointed Secretary of the New Jersey Railroad and Transportation Company.

Sorghum.—Its Uses.

Since the Sorghum plant has been introduced largely among our agricultural products, its uses and its value have become widely known. We see it was stated at a recent meeting of the Maryland Sorghum Convention, that from the cane, vinegar, and a very excellent wine, are obtained as well as molasses. The seeds are used largely to feed cattle, and are convertible into chocolate, and coffee, this last not being distinguished from the best Java. This form of its use is as follows. Saturate wheat bran thoroughly with Sorghum syrup, pour it in a pan, brown it lightly and it is ready for use.

Maryland and Delaware Railroad.

It is stated that the entire stock of the Maryland and Delaware Railroad has been taken by foreign capitalists, and that work on the road will speedily be resumed and the road built without delay.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of January, compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$425,530 56	$161,399 90
Passengers	223,516 68	107,565 75
Express matter	7,800 00	4,600 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	2,504 11	2,201 93
Total	$684,259 68	$290,675 91
Increase		$393,583 72

The earnings of the Chicago and Northwestern Railroad in Jan., 1865 $535,675 18
Same period last year 273,875 56

Increase $261,800 88

The traffic receipts of the European and North American Railway for the month of Jan., 1865, compared with the corresponding month last year, is as follows:

	1865.	1864.
Passengers	$2,884 51	$3,423 66
Freight	4,020 67	5,770 22
Mails and Sundries	509 30	430 00
Total	$7,414 48	$9,623 88
Decrease in 1864		$2,209 40

The earnings of the Atlantic and Great Western Railway for Jan., 1865, were $319,711 00
January, 1864 207,298 00

Increase $112,413 00

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending Feb. 4, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$21,879 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	75,512 00
Total	$100,515 00
Corresponding week, 1864	103,183 00
Decrease	$2,668 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Jan. 31, 1865, were:

	1865.	1864.
Passengers	$2,988 25	$2,523 56
Freight	1,480 41	10,082 56
Express	228 00	104 16
Mails	296 58	296 58
Total	$10,993 24	$13,006 86

Receipts from January 1 to Jan. 31:

1865	$44,715 73
1864	27,909 37
Increase	$16,806 36

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the 1st week of Feb., $112,934 73
Corresponding week of 1864 77,544 11

Increase $35,390 62

The earnings of the Chicago and Rock Island Railroad for the 1st week in February, 1865, were $63,141 00
Corresponding week of previous year 40,569 00

Increase $22,572 00

The earnings of the Michigan Central Railroad for the 1st week in Feb., 1865 $68,181 00
Corresponding week of previous year 68,160 00

Increase $21 00

The earnings of the Marietta and Cincinnati Railroad for the 1st week in February:

	1865.	1864.
Passengers	$9,730 91	$6,600 68
Freight	6,890 82	9,952 97
Mail, express & telegraph	1,194 33	937 58
Total	$17,826 06	$17,451 85
Total for the fiscal year, commencing 1st Jan.	115,938 26	82,258 25

Commerce of Montreal.

We are indebted to the Montreal *Gazette* of the 23d ult., for a brief sketch of the commerce of that port for the fiscal and calendar year 1864, which informs us that notwithstanding enlarged importations, expectations had not been realized, and that it has been one of the dullest and most unprofitable experienced for several seasons.

The principal cause of this state of things it attributes to the low prices which have ruled, and are likely to obtain for some time to come, in timber and breadstuffs which constitute the chief articles of export, and to the falling off in the demand for manufactured lumber in the American market.

Trade, nevertheless, has generally been in a healthy, prosperous condition; comparatively few failures have taken place, and speculative tendencies been restricted to the lowest limits compatible with progress.

The exports also show a large decrease, amounting for the entire province to about seven millions of dollars, but as the crops were on the whole up to those of the previous year, it may safely be assumed that the decrease was not occasioned by deficiency, but rather to the desire to hold over for better terms than those current in the Summer and Fall of 1864—the light stocks held in Europe encouraging the belief in an immediate demand from that country, and a consequent improvement in prices at the port. The prospects for 1865 under these circumstances are considered very favorable, and a more flourishing trade is anticipated.

During the course of the Summer it became apparent that the Government estimates of customs would be greatly exceeded, the imports having already assumed unwonted proportions. The full returns of the year confirmed these anticipations, and the same results obtained in all the principal ports, Quebec excepted. In London the amount of duties collected during the year was $145,247, an average over the receipts of the previous year of $21,611; in Hamilton the increase of duties during the same period was $42,228; in Toronto $180,979; and in Montreal $975,371, or all but a million. In Quebec the duties collected increased only by the sum of $100,000 more or less. Such an increase is unprecedented in the annals of the country, and, although imposed at a period when the trade of the country was greatly depressed by external causes, was borne with great apparent ease. The total receipts collected at the Montreal Custom House amounted to $3,963,992 47, against $2,988,620 92 in 1863, being an increase of $975,371 55. The appended table will show the receipts monthly:

Jan	$142,069 84	July	$358,500 27
Feb	334,597 81	Aug	609,326 10
March	423,461 21	Sept	436,165 12
April	254,605 70	Oct	408,081 82
May	334,554 33	Nov	288,867 66
June	312,248 35	Dec	111,514 26
Total for 1864			$3,963,992 47

The total receipts for the last seven years were as follows:

1858	$1,673,503 14
1859	2,335,190 10
1860	2,452,248 91
1861	2,391,819 84
1862	2,490,026 38
1863	2,988,620 92
1864	3,963,992 47

The imports at the port for the fiscal year 1864 were valued at a total of $25,651,738. From the detailed list we select the following as representing their general character; premising, however, that the imports of Montreal like those of New York are, exceedingly diverse and furnish ample supplies for assorted cargoes:

	Quantity.	Value.
Whiskey, gallons	32,436	$20,915
Gin "	182,854	47,955
Rum "	38,038	12,625
Ale and beer in wood, gals.	337	1,246
" bottles, doz.	17,515	19,656
Brandy, gallons	125,074	151,974
Wine in wood, gallons	401,722	266,934
Wine in bottle, doz.	17,635	55,112
Tea, lbs.	5,084,937	1,845,793
Coffee, green, lbs.	628,374	94,353
Do. roasted	2,810	379
Chicory, lbs	935,430	3,847
Cocoa and chocolate	20,722	3,967
Spices	83,000	17,468
Dried fruits and nuts, lbs.	3,864,078	185,150
Prepared oils, gallons	216,175	156,653
Mustard, lbs	103,052	15,682
Soap, "	777,000	39,835
Candles, "		17,746
Refined sugar, lbs.	25,826	2,030
Raw " "	22,462,010	1,156,722
Molasses, gallons	1,480,684	338,330

The values only of the following are given:

Leather	$222,873
" Manufactured	81,998
Dressed skins	9,074
Boots and shoes	40,490
Saddlery	3,666
Chinaware	5,687
Earthenware	174,376
Glassware	106,536
Paints	86,590
Oils	156,653
Dry lead	26,856
Turpentine	26,840
Cottons	3,192,724
Linens	505,046
Woolens	4,423,807
Carpets	137,242
Thread, etc.	38,891
Hats, caps, etc	277,112
Hosiery	196,995
Shawls	62,221
Silks, satins, etc.	484,877
Parasols, etc	89,162
Cotton yarn, etc.	50,897
Clothing	36,796
Small wares	504,556

The following is a statement of quantity and value of other principal articles imported this year:

	Quantity.	Value.
Coal oil, gallons	63,782	$18,881
Confectionery, lbs.	69,826	10,467
Cordials	3,369	3,578
Cigars, lbs	230,257	160,386
" M	6,235	
Patent medicines		28,018
Snuff, lbs	5,271	1,183
Starch, lbs	262,756	12,934
Tobacco, manufactured, lbs.	7,119,691	11,110
Brooms and brushes		8,391
Cabinet ware		14,975
Carriages		8,282
Cider, gallons	31,588	1,919
Clocks		10,470

Toys		14,169
Vinegar, gallons	81,903	17,010
Unenumerated articles		148,588
Copper in bars		23,718
Copper or iron tube, drawn		29,917
Cotton candle wick		30,496
Jewellery		130,927
Lead in sheets		12,306
Locomotive frames		47,699
Silk twist		22,028
Zinc		31,341

The following tables give comparative statements of the imports classified for the two last fiscal years:

Goods paying—	1864.	1863.
Specific duties	$89,796	$43,016
Specific and ad valorem	1,085,277	2,729,089
100 per centum		52,476
40 "		32,157
30 "	135,626	201,996
25 "	80,953	53,512
20 "	9,503,008	8,698,827
15 "	647	447
10 "	1,104,533	1,235,864
Coin and bullion—free	1,448,013	949,989
Merchandize—free	5,133,561	4,844,012
Total	$25,651,738	$18,841,885
Total value of dutiable goods imported in 1864		$19,070,164
Total value of free goods 1864		6,581,574
Aggregate bond and free		$25,651,738
Goods paid duty ex. ship		$11,896,827
" " ex. warehouse		5,950,380
Total value paid duty		$17,847,207
In warehouse Dec. 31, 1864		$1,975,435

The compilation given below shows the total value of imports for the seven years ending with 1864:

	Dutiable.	Total.
1858	$9,698,191	$11,584,072
1859	12,025,690	15,690,340
1860	12,305,910	15,479,458
1861	12,459,496	16,814,161
1862	12,492,741	20,529,839
1863	12,803,793	18,841,485
1864	19,070,164	25,651,738

We have as yet seen no statement of the aggregate export trade of the port for the year 1864. The details of the trade in produce, however, are given in full. The list shows a large falling off from the previous year, as before observed, but chiefly in grain and flour. The prices as compared with former years ruled very low and withheld stocks from market which would otherwise have been brought forward.

The following is a statement of the receipts of produce at Montreal from the 1st of January to the 31st December:

	1864.	1863.	1862.
Ashes, brls	41,987	44,593	37,507
Flour, brls	824,774	1,088,193	1,144,752
Wheat, bush	1,125,152	5,136,812	8,041,199
Indian corn, bush	100,430	788,969	2,649,135
Pork, brls	36,512	37,468	41,549
Butter, kegs	68,188	66,217	78,230
Peas, bush	304,759	540,590	465,326
Lard, kegs	11,298	7,598	4,440
Beef, brls	945	1,741	645

The exports of produce from Montreal during the same period (1st January to 31st Dec.) *via* the St. Lawrence, Portland and Boston, were:

	1864.	1863.	1862.
Ashes, brls	38,222	34,870	30,206
Flour, brls	424,556	606,732	632,764
Wheat, bush	2,355,600	3,776,507	6,992,093
Indian corn, bush	466	612,221	1,770,209
Pork, lbs	1,878	2,516	5,145
Butter, kegs	62,091	58,868	72,448
Peas, bush	197,562	746,169	707,117
Lard, brls	3,804	10,626	7,408
Beef, brls	1,470	2,482	864

The following statement shows the destination of the produce shipped at Montreal during the season of navigation:

	Wheat, bush.	Peas, bush.	Ashes, brls.	Flour, brls.
Liverpool	754,605	125,492	12,808	64,706
London	202,238	139,802	2,610	81,420
Other Eng. ports	162,831	78,152	10	1,486
Glasgow	947,741	86,977	12,260	168,533
Other Scot. p'rts	106,595	.....	241	18,019
Ireland	29,411	.....	.....	350
Cork for orders	119,181	.....	.....	53
Lower ports	88	12,366	5	69,814
Total 1864	2,323,740	441,789	27,429	344,481
" 1863	3,741,146	719,216	26,604	495,205

An enormous decrease is also observable in the item of Indian corn, only 259 bushels having been shipped this season, against 646,481 bushels in the season of 1863. The decrease and increase in other articles are shown in the following statement:

Wheat, bush. decrease	1864	1,417,406
Peas, "	do.	277,427
Flour, brls. "	do.	150,724
Ashes, " increase	do.	825

We give the total shipments of grain and flour from the undermentioned ports for the year 1863 and 1864. They give but a very imperfect idea of the trade at these different points. Nearly the whole of the exports here reported are to the United States:—

	Flour brls.		Grain bushels.	
	1863.	1864.	1863.	1864.
Goderich	36,142	23,547	87,393	133,255
Chatham	1,495	29	221,077	95,967
Clifton	82,718	33,754	33,995	14,767
Oakville	992	1,307	104,261	47,051
Oshawa	693	7,144	49,275	112,508
Whitby	3,500	4,000	182,165	407,686
Newcastle	.....	441	72,440	81,511
Cobourg	.....	.....	89,566	77,536
Belleville	.....	.....	277,414	57,199
Gananoque	5	147	199	7,481
Brockville	.....	50	2,624	28,508
Total	125,545	70,419	1,070,409	1,063,864

As the principal avenue of the internal trade of Montreal, the Lachine Canal deserves a special notice. The canal opened on the 8th May, and closed on the 3d December.

The following shows the number of trips upwards during the years 1863 and 1864, distinguishing steamers and sailing vessels:

		No.	Tons.
Steamers	1863	1,067	119,341
"	1864	1,207	130,247
Sailing vessels	1863	4,364	372,420
"	1864	3,941	341,623

The number of trips downwards to Montreal through the canal during the same years were:

		No.	Tons.
Steamers	1863	1,082	122,038
"	1864	1,211	132,874
Sailing vessels	1863	4,215	388,705
"	1864	3,788	356,063

The passengers carried compare as follows:

	1863.	1864.
Upwards	7,587	6,756
Downwards	16,844	14,764

The following is a summary of the tolls collected in the two years:

	1863.	1864.
Upward tolls	$21,851 98	$18,000 41
Downward tolls	69,149 69	41,216 30
Other dues	10,838 81	8,612 48
Amount of drawback	.....	11,259 69
	$101,335 48	$79,088 48

"From this exhibit it will be seen that there was a large decrease in nearly every branch of business by the canal, the inland navigation partaking in the general dullness observable in the operations at the port throughout the season.

Construction of Statute.—Pecuniary Loss.—Reasonable Expectation.—Damages.

The late case of Pym *vs.* The Great Northern Railway Company, was an action brought by the plaintiff as administratrix, &c., against the defendants, to recover compensation for the loss sustained by plaintiff, (she being the intestate's widow) and her younger children, in consequence of the death of the intestate, who was killed by an accident to a railway carriage of the defendants in which he was travelling, occasioned, as was alleged, by the negligence of the defendants, or their servants.

The circumstances of the deceased were as follows: He was tenant for life of an estate in land, the value of which was a little short of 4,000*l.* a year. By the provision a settlement, executed in 1847, a jointure of 1,000*l.* a year was settled on his wife, and a sum of 20,000*l.* was secured to the younger children on his death. The estate itself passed under the entail to his eldest son. The personal property amounted to about 3,400*l.* He left 8 younger children, all under 12 years of age. The Lord Chief Justice left to the jury to say whether the death of the deceased was occasioned by the negligence of the defendants or their servants, and told them that, in estimating the amount of damages, they must not take into consideration any pain of mind or wounded feeling caused to the widow or children by the death, and must assess damages *solely* as compensation for *pecuniary* loss sustained by them in consequence of it. He told them that they might take into consideration the loss of the advantages, of superior education, social position, and personal comforts, of which the father's income, had he lived, would have secured the benefit and enjoyment to the family; and also the loss of that provision, which it was to be presumed that the deceased, as a prudent father of a family, would have made by saving from his income for the benefit of his wife and younger children.

The jury found a verdict for the plaintiff, damages 18,000*l.*; apportioning 1,000*l.* for the widow,

and 1,500*l.* for each of the younger children. No compensation was awarded to the elder son he having succeeded to the landed property of the deceased under the entail.

The defendant's counsel obtained a rule, in pursuance of leave reserved, to enter a verdict for the defendants, or a non-suit, on the ground that there was no cause of action established by the evidence; or for a new trial, on the ground that the damages were excessive. The rule was accordingly argued.

The 9 and 10 Vict. C. 93 entitled "An act for compensating the families of persons killed by accidents," after reciting that "no action at law is now maintainable against a person who by his wrongful act, neglect, or default may have caused the death of another person, and it is oftentimes right and expedient that the wrong doer in such case should be answerable in damages for the injury so caused by him," enacts.

Sec. 1. "Whensoever the death of a person shall be caused by wrongful act, neglect, or default, and the act, neglect, or default is such as would (if death had not ensued) have entitled the party injured to maintain an action and recover damages in respect thereof, then and in every such case the person who would have been liable if death had not ensued, shall be liable to an action for damages, notwithstanding the death of the person injured, and although the death shall have been caused under such circumstances as amount in law to felony."

Sec. 2. "Every such action shall be for the benefit of the wife, husband, parent, and child of the person whose death shall have been so caused, and shall be brought by and in the name of the executor or administrator of the person deceased; and in every such action the jury may give such damages as they may think proportioned to the injury resulting from such death to the parties respectively for whom and for whose benefit such action shall be brought, and the amount so recovered, after deducting the costs not recovered from the defendant, shall be divided amongst the before mentioned parties in such shares as the jury by their verdict shall find and direct."

The plaintiff's counsel showed cause, and the defendants' counsel were heard in support of the rule.

The judgment of the court was delivered by Cockburn, C. J.—In this case it was objected on the part of the defendants, first, that the plaintiff was not entitled to recover in point of law; secondly, that, even if the plaintiff was entitled to recover, the damages were excessive. (The chief justice here stated the facts.)

The heads of loss mainly relied on by the plaintiff were, first, the loss of the advantages of superior education, and of the social position and personal comforts of which the father's income, had he lived, would have secured the benefit and enjoyment to the family; secondly, the loss of that provision which it was to be presumed that the deceased, as a prudent father of a family would have made by saving from his income, for the benefit of his wife and younger children.

The jury, who were properly directed, if they considered the fact of negligence, as established, to estimate the damage with reference to pecuniary loss alone, assessed the damages at 13,000*l.*, being 1,000*l.* for the widow, and 1,500*l.* for each of the children.

It is objected on the part of the defendants, that, independently of the amount of damages, the verdict cannot stand; first, because the case does not come within the terms of the statute 9 and 10 Vict. c. 93; secondly, because the loss, even if a pecuniary loss at all, is in the present instance too uncertain and remote to be properly the subject of compensation under the statute.

In support of the first of these grounds of objection, the language of the first section of the act was relied on; and it was contended that, inasmuch as if death had not ensued from the effects of the accident, the deceased could have had no right of action against the company in respect of a pecuniary loss arising only on his death this action could not be maintained by the representative, inasmuch as the right of action is given only where the deceased could have maintained an action if death had not ensued.

We were at first struck with this argument, but, on consideration, we are of opinion that the condition that the action could have been maintained by the deceased if death had not ensued has reference not to the nature of the loss or injury sustained, but to the circumstances under which the bodily injury arose, and the nature of the wrongful act, neglect, or default complained of. Thus if the deceased had, by his own negligence, materially contributed to the accident whereby he lost his life, as he, if still living, could not have maintained an action in respect of any bodily injury, notwithstanding there might have been negligence on the part of the defendants, the present action could not have been supported. But supposing the circumstances of the negligence to have been such that, if death had not ensued the deceased might have brought his action in respect of any injury arising to him from it, we are of opinion that his representative may maintain an action in respect of an injury arising from a pecuniary loss occasioned by the death, although that pecuniary loss would not have resulted from the accident to the deceased had he lived.

As to the second head of objection, we are of opinion that as the benefit of education, and the enjoyment of the greater comforts and conveniences of life depend on the possession of pecuniary means to procure them, the loss of these advantages is one which is capable of being estimated in money, in other words, is a pecuniary loss; and therefore the loss of such advantages arising from the death of a father whose income ceases with his life, is an injury in respect of which an action can be maintained on the statute.

A fortiori, the loss of a pecuniary provision, which fails to be made owing the premature death of a person by whom such provision would have been made had he lived, is clearly a pecuniary loss for which compensation may be claimed.

It is true that it must always remain matter of uncertainty, whether the deceased person would have applied the necessary portion of income in securing to his family the social and domestic advantages of which they are said to have been deprived by his death; still more, whether he would have laid by any and what portion of his income to make provision for them at his death. But, as it has been established by the case decided upon this statute, that, if there be a reasonable expectation of pecuniary advantage, the extinction of such expectation by negligence occasioning the death of the party from whom it arose will sustain the action, it is for a jury to say, under all the circumstances, taking into account all the uncertainties and contingencies of the particular case, whether there was such a reasonable and well founded expectation of pecuniary benefit as can be estimated in money, and so become the subject of damages in such an action.

We are not insensible to the argument *ab inconvenienti*, founded on the very serious consequences which might ensue to a railway company, in the event of a fatal accident happening from negligence to an individual of very large fortune. But we think this is rather for the consideration of the legislature, as to whether any limit should be put to the liability than for us. We see no difference in principle between such a case as the present, and that of a claim by the family of an artisan for the loss of the advantages arising from their father's earnings, in which case it is not doubted that the action may be maintained.

As regards the amount of damages we are led to think that the sum awarded by the jury is too large. Considering that by the settlement, provision is already made on the father's death for the widow and children, that it is uncertain how far the deceased would have added to their provision by saving from his income for their benefit, and that any such provision, whether under the settlement or otherwise, would not have come to them till the father's death, while, on the contrary, both the money secured by the settlement and the compensation awarded by the jury now become realized at once, we think the amount of the damages, so far as the children are concerned, too large. We suggest, while the sum awarded to the widow should stand, the amount awarded to the children should be reduced from 1,500*l* to 100*l*. If this should be assented to on the part of the plaintiff, the verdict will be reduced to 9,000*l*., and the rule will be discharged; if not, the rule will be absolute for a new trial, on the ground that the damages found by the jury are excessive.

Plaintiff's counsel consented to reduce the damages accordingly.

Rule discharged.

Liabilities of Railroad Companies.—How far Companies are Excused for Loss or Injuries by "The Act of God," or "Public Enemies."

It is a general rule, that a person undertaking the performance of a service for another is not responsible (in the absence of a special contract,) for losses or injuries resulting from *inevitable accident*, or *irresistible force*. By "inevitable accident," commonly called "the act of God," is meant any accident produced by any physical cause which is irresistible; such as a loss by lightning or storms, by the perils of the seas, by an inundation or earthquake, or by sudden death or illness. By "irresistible force" is meant such an interposition of human agency, as is, from its nature and power, absolutely uncontrolable; such as the inroads of a hostile army, or by public enemies, pirates, &c. Robbery by force is also deemed irresistible. (*Story on Bailments*, § 25.) So an accident which could not have been avoided by the exercise of the utmost care and vigilance, will not render the party liable for injuries caused to others thereby.

We shall, in this article, give a number of instances in which the Courts have held accidents inevitable, and have excused parties from liability therefor; and shall endeavor to adduce therefrom the principle upon which the Courts will act in such cases.

In applying these principles to railroads, it must be carefully distinguished that, generally speaking, railroad companies sustain two distinct characters, which in no small degree govern and regulate their liability. The first is as carriers of goods, technically known as *Common Carriers*; and second as *Carriers of Passengers*.

I.—CARRIERS OF GOODS.

As carriers of goods, or common carriers, their liability for damage or loss to the goods is of quite a different nature from their liability as carriers of passengers for injury to the person of the passenger. In the former relation, they are to be considered as *insurers* of the goods, and they can only be relieved from that liability by proving that it was beyond the power of man to prevent the loss or damage. In the language of Chief Justice BEST, a very eminent English Judge, when goods are delivered to a carrier, they are usually no longer under the care of the owner; he seldom follows, or sends his servant with them to the place of their destination. If they should be lost or injured by the grossest negligence of the carrier or his servants, or stolen by them, or by thieves in collusion with them, the owner would be unable to prove either of these causes of loss. His witnesses must be the carriers servants; and they, knowing that they could not be contradicted, would excuse their masters and themselves.

To give due security to property, therefore, the law has added to that responsibility of a carrier, which immediately rises out of his contract to carry for a reward, namely that of taking all reasonable care of it, the responsibility of an insurer. "From his liability as an insurer, the carrier is only to be relieved by two things—the act of God and the king's enemies." (Riley *vs.* Horne, 5 Bing. R., 217.) In questions, therefore, as to the liability of a carrier, the point ordinarily is not so much, whether he has been guilty of negligence or not, as whether the loss comes within either of the accepted cases.

The risks therefore which a common carrier takes in the carriage of goods, are for all losses, except those occasioned by the act of God or public enemies, in other words, by inevitable accident or irresistible force; and it becomes necessary to inquire—1. What are and what are not, losses by the act of God. The act of God means something in opposition to the act of man; for everything may be said to be the act of God that happens by his permission. (Forward *vs.* Pittard, 1 T. R., 33.) But a loss by fire, not arising from the act of God, as for example, a loss arising from a conflagration in a city, without any fault whatsoever on the part of the carrier, will furnish no excuse for the carrier; for it does not fall within the exception. (Hyde *vs.* Trent Navigation Company, 5 T. R., 389; Gotliffe *vs.* Brown, 4 Bing., Nav. Co., 314; Miller *vs.* Steam Navigation Co., 10 N. Y., 431; 10 Barb., 612.)

But although the immediate cause of the loss, damage or delay may have been some inevitable accident, such as a snow storm, or some irresistible force, such as pirates or armed bands of robbers, yet if it should appear that the effect of these could have been avoided by the exercise of proper precautions, the carrier will be liable. Thus if the engineer of a railway train should rashly run his train upon a bridge over a stream which was greatly swollen and tossed by the wind, and while on the bridge it should be carried away by the force of the wind and waters, and a loss of the train with its freight should ensue, the company might doubtless become chargeable on account of the temerity and imprudence of the engineer. Thus in a case in England, (Amies *vs.* Stevens, 1 Str., 128,) a bargemaster who rashly "shot" a bridge, when the weather was tempestuous, by which his cargo was lost, it was held that he was liable. But the Court remarked that it would be otherwise, if using all proper precautions, he should shoot a bridge at a proper time, and the barge should be driven by the force of the current or by the wind against a pier, and thereby the goods should be lost; for then it would be esteemed a loss by mere casualty.

So too, where by an unreasonable delay in the transportation of goods, they are exposed to a flood of unusual violence, and are thereby damaged, the carrier is liable; for if there had been no delay the goods would not have been exposed to

the peril. This was the ruling of the Court in a case against "Spaulding's Express," in the Superior Court of this city in 1859. (5 Bosw., 395.) There the defendant agreed to carry 86 cases of goods from New York to Louisville. Eighty-one of these cases were safely carried and delivered. The five others were allowed to remain in the depot at Albany for a few days. During the night the Hudson River rose suddenly four feet higher than it had ever before risen, and submerged the floor of the depot where the five cases were deposited, damaging them to a considerable extent. The Court said, that if the defendant had carried these five cases as he did the others, instead of leaving them behind, they would have escaped the flood; and therefore, although the flood was "inevitable," the defendant should be held liable.

So too, a loss occasioned by an obstruction in a river, produced by mixed causes, and which is not the result of the operation of natural forces upon natural objects alone, as the shores or the bottom, is not, in a logical or legal sense, the act of God. Thus, where a steamboat was wrecked in the Hudson, by running upon the mast of a sunken vessel which had been capsized and sunk by a violent storm, a day or two before, it was held that the owner of the steamboat was liable for property lost by the sinking of the steamer (Merrit *vs.* Earle, 31 Barbour, 38).

The exemption of a common carrier from the performance of his duty by the act of God is said to extend no farther than is necessary for the purposes of justice. The carrier must fulfill his obligation as nearly as the act of God will allow. (Williams *vs.* Vanderbilt 29 Barb, 491.)

The principle is general, therefore, that the contract of the carrier is to carry safely, and he must show, in order to excuse his failure to do so, that his loss or damage was beyond his control, by the exercise of all acts that could be done under the circumstances. Thus, the freezing of perishable articles by reason of an unusual intensity of cold is not such an intervention of providence as excuses the carrier, if it appears that the accident might have been prevented by the exercise of due diligence and care on his part. Doing what is usual is not sufficient to exempt him from the charge of negligence. He must show that he has done all that was necessary to be done under the circumstances.

We think this branch of the subject has been sufficiently elucidated, and that the principle is established, that the inevitable accident which can excuse a common carrier for loss, damage or delay, must be the immediate and proximate cause of the destruction or damage; and that it must be such that no reasonable foresight or precaution could have prevented it.

2. What is the irresistible force which will excuse a carrier? Losses, which are occasioned by robbing or by the depredations and violence of mobs, rioters and insurgents and other felons are not deemed losses by "public enemies." By "public enemies" is meant those with whom the nation itself is at open war.

It is to be remarked that carriers are responsible only for the exertion of *due diligence* in respect to the *time of delivery*. They may excuse *delay* in the delivery, by proving accident or misfortune, although not inevitable or produced by the act of God. And as it is within the scope of this article to treat only of such inevitable accidents or irresistible forces as will exempt carriers from liability for losses, we shall not go at length into that subject.

H. Carriers of Passengers.

The liability of a common carrier of passengers is somewhat different, as before remarked, from that of a carrier of merchandise. In the latter character, a railroad company, taking freight for transport, has absolute control over it while in their custody; it can be fastened, as has been said, with ropes, or be placed in boxes, and put under lock and key. But, as a carrier of passengers, it must leave to the passengers some power of self direction, some freedom of motion, some care of themselves. Upon this ground is founded the well established rule, that, instead of being liable for all losses, except those resulting from the act of God or the public enemy, only that degree of care and diligence of the carrier is required which a reasonable and cautious man would use. The contract to carry passengers differs from that to carry freight only in this, that, in the latter case, the carrier is responsible at all events, except for the act of God and the public enemy; while in the former case, his liability is limited by various considerations, such as negligence on the part of the plaintiff, violations of the rules of the company, and others, which were considered in a former article. The carrier is also exempt from liability on account of personal injury to a passenger occasioned by inevitable accident, or by irresistible force.

In addition to the examples of inevitable accidents which we have already given, we shall give a few others, sufficient to enable the reader to form a general idea of the character of such as may be denominated inevitable. It was long held that a carrier of passengers was not liable for an accident arising from a concealed or impalpable cause, which it was impossible by search and examination to discover and prevent. (Ingalls *vs.* Bills, 9 Mit., 1; Camden and A. R. R. Co. *vs.* Burke 13 Wend., 626, Hollister *vs.* Newton 19 Wend., 236; Christie *vs.* Griggs, 2 Camp., 79.) But the court of appeals in this state has gone far to modify this rule. In the case of Hegeman *vs.* The Western R. R. Corporation, 13 N. Y. R., 9, it was held that the degree of precaution, care and skill required of a carrier of passengers by stage coaches, in the preparation and management of the means of conveyance is not a test of that which is required of those engaged in transporting persons at a high rate of speed, by means of steam power, upon a railway. The *utmost* precaution, care and skill are therefore required of a railway company to see that their cars and engines are well and properly built. Thus in that case, when a passenger in a car was injured by the breaking of one of the axles in consequence of a latent defect, which could not be discovered by the most vigilant external examination, the company was held responsible to him for damages, although it purchased the car from extensive and skillful car makers, and the axle was procured from a manufacturer of skill and reputation, it being proved that the defect could have been discovered in the process of manufacturing the axle or car by the application of a test known to men skilled in such business. It was also held by the court in that case, that it went to show the company's negligence that the peril might have been avoided, if they had used on their cars the safety beam, shown to have been, at the time, already in use on other roads for a considerable period. It is a question for the jury to determine whether they were not guilty of negligence in not ascertaining the utility of such an improvement, and adopting it to protect passengers from injuries by accidents to which cars are liable. In a case in 1859 against the Harlem Road (19 N. Y. R. 127) it was held that a railroad company is liable for damages for an injury resulting to a person lawfully using its road, for its neglect to introduce any improvement in its apparatus —(e. g, the "frog and guard rail," instead of the "short switch") which it knows to have been tested and found materially to contribute to safety.

These cases will show the general drift of the law in this state as to the liability of companies for defects in the construction of their cars or rails, and we leave the subject with our readers for their reflection and their own inferences.

Boston and Worcester Railroad.

The gross income from operations of this road for the years ending November 30, 1863 and 1864, have been as follows:

	1863.	1864.
From passengers.. } " freight..... }	$1,149,842 61	$1,409,685 45

Surplus from income undivided		$13,780 43

The gross receipts have exceeded those of last year by $269,331 03; the expenses by $270,224 16. The United States government tax on receipts and dividends was $53,050 62. The new state tax of 1 1-6 per cent $64,045 56. These are now and additional burdens caused in part by the exigencies of the times. The prices of labor, fuel and all materials used for repairs, have been by the same causes enhanced to an unprecedented extent. The labor rolls exceed those of last year by 28½ per cent; of materials for repairs by an average of 22 per cent.

The number of miles run by passenger trains

has been 413,488; by freight trains, 223,169; by other trains, 1,865—total miles run, 638,522—an increase over the previous year of 65,008. The number of passengers carried in the cars has been 2,141,198; do., carried one mile, 39,901,252; do., carried one mile to and from other roads, 15,205,964. Tons of merchandise carried, 458,320; do., carried one mile, 17,823,725; do., carried one mile to and from other roads, 14,569,622. Increase in passengers carried, 561,693; increase in passengers carried one mile, 10,476,223. Increase in tons of merchandise carried, 44,589; increase in tons of merchandise carried one mile, 1,633,480. The report says:

We have completed our Car-repair shop in Boston at a cost of $5,740; built a Car-shed, at a cost of $5,332; a stable, at a cost of $4,446; also, a Car-shed and Engine House on Milford Branch, at Framingham, at a cost of $6,273.

The Road, Road-bed, bridges and rolling stock were never in a better condition.

We have added to our rolling stock seven new Passenger Cars, built in our own shop, of the best materials, and in the most substantial manner.

We have also added to our equipment of Locomotive Engines two, built to order by William Mason, of Taunton, which prove to be the best ever placed upon the road.

FINANCES.—ASSETS.

Cash	$25,017 95
Loans on collateral	466,300 00
Notes receivable	30,264 27
Bills receivable	117,852 08
Balances due from other roads and individuals	38,576 42
Land not included in construction account	100,028 28
Fuel, iron, sleepers, and materials on hand	173,294 12
	$951,333 07
Deduct Jan. dividend, 5 per ct. and Gov't Tax on same $236,842 10	
Balances due other roads and individuals 229,060 97	
	465,903 07
Leaving a surplus of	$485,430 00

The Grand Junction Bonds, &c. ($106,176 65) are not included in the above assets.

The petition for the consolidation of this and the Western Railroad, referred to in our last Report, was fully heard by the Joint Committee of the General Court on Railways, a majority of whom reported against it. A report by a minority of the committee, recommending the passage of an act for the purpose, was also submitted, but the report of the majority was adopted by the Legislature.

The equipment of the road consists of 32 locomotives; 51 8-wheel, and 1 4-wheel passenger cars, also 2-5 of 5 on steamboat train, and 44-234 of 23 on land route trains; 9 8-wheel baggage cars—also 2-5 of 2 on steamboat, and 44-234 of 11 on land route trains; 302 8-wheel and 9 4-wheel merchandize cars.

	$107,637 82	$111,522 22
Net gain	$77,299 09	$136,702 33
Dividend on preferred stock	94,400 00	94,400 00
	$17,100 91	$42,302 33
Balance from previous year	323,344 56	306,243 65
Total amount at credit of profit and loss Dec. 31	$306,243 65	$348,545 98

Compared with 1862 the gross earnings of 1863 show an increase of $45,053 97; with an increase in expenses of $25,383 41—making the increase in net earnings $19,670 56.

Compared with 1863 the gross earnings of 1864 show an increase of $98,979 07; with an increase in expenses of $35,691 43—making the increase in net earnings $63,287 64.

The operating expenses of 1864 were 42.08 per cent. of the gross receipts, against 43.88 in 1863, and 41.90 in 1862.

The company have 10 locomotives; 12 passenger, 6 baggage, and 266 freight cars.

The number of miles run by engines in 1864 was 203,329; in 1863, 183,257. The report says:

It has been deemed necessary, by your directors, to establish a line of steamers between this place and the city of New York, and in pursuance of this policy the sum of $26,000 has been subscribed to the stock of the Housatonic Transportation Company, a joint stock corporation organized under the laws of this State, with a capital of $30,000, and the further sum of $71,080 58 has been loaned the said company and has by them been invested in the purchase and repairs of the Propeller "Capt. A. H. Bowman," and the side wheel Steamer "Stamford," and in the re-building of Pier No. 35, East River, New York, which has been leased for the term of five years with the privilege of ten. For the above indebtedness we hold the note of the said company, secured by mortgage for $70,000 on both the boats. It is believed that this investment will prove to be a profitable one; but the real reason for making it, existed in the necessity for having under our control some sure and satisfactory means of getting our freight transported to and from New York. In the absence of such facilities, there would be great and constant danger of having the business of our road, especially in the winter season, seriously diminished by the want of transportation by water, as was the case in the winter of 1863–'64.

The indications at present are that the earnings of the present year will exceed 8 per cent., and may reach 12, but it depends much on the condition of our manufacturing business.

CONDENSED BALANCE SHEET.

Assistant Sup't.—R. H. BOOTH, Canaan, Conn.

Treasurer.—CHARLES K. AVERILL, Bridgeport.

☞ The New Jersey Railroad Company have asked for a supplement to their charter, authorizing them to increase their capital stock to $6,000,000, which increase shall be divided into shares of fifty dollars each.

Business Failures During the Year 1864.

The following statement from the Annual Circular of Messrs. R. G. Dun & Co., of this city, shows only 510 failures in 1864, with liabilities amounting to $8,579,700, which by comparison with previous years, exhibits a remarkably healthy state of the trading community. The number and liabilities of failures in the Northern States for the past eight years have been as follows:

	Number.	Liabilities.
1857	4,257	$265,818,000
1858	3,113	73,608,747
1859	2,959	51,314,000
1860	2,733	61,739,474
1861	5,935	178,632,170
1862	1,652	23,049,300
1863	495	7,899,000
1854	510	8,579,700

In submitting these figures, Messrs. Dun & Co., call attention to the fact of a large diminution in the amount of annual failures since the rebellion broke out. This is attributed mainly to that rigid caution which has obtained in our business community in dispensing credits, and to the increased values of stocks on hand. The immense and general prosperity of all branches of agriculture has augmented the wealth of the trading classes, and the scarcity of labor, suitable to the requirements of the mechanical interests, has tended to increased wages, and enhanced receipts of the operating classes. These, the principal consuming interests, on account of their vast number, and constituting as they do the material wealth of the country, have created an unusually large expenditure, through the channel of the retail trade, and yielded returns that enabled this class of merchants to meet their obligations promptly to the jobber. The latter has, therefore, been prompt with the importer and commission merchant. Hence, the natural conclusion must be that each, acting in harmony with the other, has produced a more satisfactory result than could have been anticipated by even the most sanguine.

The following table from the Circular will show the estimated wealth of the merchants, manufacturers and traders throughout the Northern States:

	Business Houses.	Wealth.
Connecticut	5,832	$145,688,000
Delaware	1,150	24,701,000
District of Columbia	1,282	17,448,000
Illinois	12,215	207,568,000
Indiana	8,512	184,240,000
Iowa	5,052	38,532,000
Kansas	438	3,357,000
Kentucky	1,628	39,559,000
Louisiana (N. Orleans only)	802	50,794,000
Maine	4,982	99,298,000
Maryland (except Balt.)	1,425	13,089,000
Baltimore	2,240	89,270,000
Mass. (except Boston)	12,785	353,958,000
Boston	4,517	514,857,000
Michigan	5,934	33,943,000
Missouri	3,263	31,934,000
Minnesota	979	7,602,000
New Hampshire	2,851	38,685,000
New Jersey	5,910	90,250,000
N. Y. (except N. Y. City)	26,286	442,194,000
New York City	10,646	1,235,010,000
Ohio	17,005	310,725,000
Pennsylvania (except Phil.)	15,485	379,437,000
Philadelphia	7,456	353,859,000
Rhode Island	2,487	115,704,000
Vermont	2,494	19,989,000
Wisconsin	5,869	58,775,000
Total	168,925	$4,994,766,000

The States of Missouri, Kentucky, Louisiana and Kansas, having been made the theatre of war, thereby disorganizing trade, are consequently not fully represented in this estimate; and California, as it will be observed, is entirely omitted. Still, without them, the aggregate shows 168,925 business houses, representing a wealth of $4,944,766,000, mostly invested in personal property. It is generally conceded that the average profits of trade range from 12 to 15 per cent.; but assuming the low figure of 10 per cent., we have $494,476,600 as the accrued gain the past year on the business interests spoken of.

Pennsylvania Mining in 1864.

The Philadelphia Board of Trade estimate the business of Pennsylvania in coal, iron, and coal oil for 1864 as follows:

COAL.

The total production of coal has been—

Of anthracite	tons	9,876,174
Of semi-anthracite	"	422,292
Of bituminous	"	2,399,246
Total	"	12,698,532
The value as estimated at the point of shipment nearest the mines, by a gentleman conversant with the trade, at $5 50 per ton		$69,841,926
On which the government tax was		437,193

IRON.

The product of iron has been—

Railroad bars, re-rolled, 37,672 tons.	
Railroad bars, new, 92,222 tons, at $85	$8,257,210
Of rolled plate iron, 86,932 tons, at $100	8,693,200
Of rolled bars other than rails, 73,342 tons, at $90	6,600,780
Of building castings, 45,772 tons at $100	4,577,200
Of cut nails, rivets, etc., exclusive of those made of imported iron, 37,135 tons, at $200	7,427,000
Hollow ware and stoves, 11,950 tons, at $200	2,390,000
Various manufactures of iron	12,633,600
Steel bars, 4,029 tons, at $250	1,009,750
Of finer kinds, 3,219 tons at $400	1,287,600
Of manufactures of steel	1,908,611
Total value of iron and steel	$54,784,997
Government internal revenue tax	1,046,837

PETROLEUM.

Export of refined, 24,035 699 gallons.	
Worth in England, 2 shillings sterling	£2,403,569
Total export of crude, 8,069,319 gallons	941,420
Total sterling value, subject to shipping expense	£3,344,939
And in our currency, in round No. over	$30,000,000

The home consumption has been—

Refined in Pennsylvania, gallons	13,349,974
Average value, 74c., 81c., $1, say $10,012,481.	
Refined out of the State, gallons	8,069,319
Total refined, gallons	21,418,293
Government tax $2,141,829 30.	

Value in Pennsylvania of the 8,069,319 gallons refined out of the State, being equal to 11,430,876 gallons of crude oil, worth $3,429,260.

The values of the three articles to Pennsylvania for the year:

Coal	$69,841,926
Petroleum	46,912,430
Iron	54,784,997
Total	$171,539,353

And the internal revenue tax to the government:

On coal	$437,193
On iron	1,046,837
On petroleum	2,141,829
Total	$3,625,859

Banks of the State of New York.

The subjoined summary shows the aggregate of the resources and liabilities of the Banks of the State of New York, as exhibited by their reports to the Superintendent of their condition on the morning of Saturday, December 31, 1864:—

RESOURCES.

Loans and discounts		$196,649,246

This report embraces returns from all the Banks in the State—three hundred and three banks nineteen of which have given notice of "winding up."

New York and Boston (Air Line) and Boston, Hartford and Erie Railroads.

The consolidation of these corporations under the name of the Boston, Hartford and Erie Railroad Company, took place on the 15th ult. So few of our readers, outside of the parties immediately interested, are aware of the magnitude of the operations contemplated by this new corporation, that we have taken considerable pains to collect a clear and succinct statement of the work accomplished and in progress.

The project for an air line railroad from Boston to New York has been nearly twenty years before this community, but it was not till 1855 that a union of all the interests then involved was effected under one charter granted by the Legislature of Massachusetts. If there had been no influences adverse to its consummation, there would have been at this time, in successful operation, a railroad between Boston and New York by way of Woonsocket, Daysville, and Willimantic, and New Haven, reducing the distance between the two cities twenty-five miles as compared with the Springfield route, and fourteen miles by the Shore Line.

At present but 34 miles have been completed, from Brookline, Mass., to Woonsocket, R. I.

Under the new management this section will be known as the "Woonsocket Division." This portion of the line has been in direct competition with the Norfolk County road from Blackstone to Dedham. The rivalry was of more benefit to the public than to the shareholders and bondholders. This fact, with the prospect, if both enterprises were carried out, of perpetual and disastrous competition from Boston to Willimantic, (87 miles) led to the union of interests. In due time, the results for which both companies have struggled, will be accomplished. The saving of capital to be invested will not fall short of three million dol-

lars. The co-operation of all parties and interests will be secured. The shareholders have been protected in the act of merger, and the time lessened wherein they may reasonably expect the market value of their investment to approximate to that of the leading railways in New England.

The Boston, Hartford and Erie Railroad Company, under the new organization, is authorized to increase its capital to twenty-five million dollars, and is restricted in its issue of mortgage bonds to one-half of the actual cost of the road.

Regarded as a new route to the West, the line is composed of the now broken links of a chain of roads lying between Boston and the Hudson river, hitherto known as the Boston and New York Central, Norfolk County, and the Providence, Hartford and Fishkill Railroads. In the spring of 1865 there will be one unbroken line of fifty-nine and a half miles from the foot of Summer street, Boston, to Mechanicsville, Connecticut. In the course of another year there will be completed a new link from Mechanicsville to Willimantic, a distance of little more than twenty-six miles. From this latter point the road is now in excellent condition, reaching, *via* Hartford to Waterbury, nearly sixty-three miles. From this point to Fishkill on the Hudson, opposite Newburg, (the Northern terminus of the Erie Railroad,) the line is undetermined. If by way of Danbury, the distance will be about seventy-seven miles; if by way of Litchfield, from sixty-five to sixty-seven miles, making the total distance from Boston to the Hudson river from two hundred and thirteen to two hundred and twenty-six miles.

New surveys will be made of the line from Woonsocket, *via* Pascoag, Willimantic and Middletown, to New Haven. In addition to the above are the following branches: Providence division from Providence to Willimantic, 58½ miles; Medway branch, 4½ miles; Dedham branch, 2 miles; Southbridge branch, East Thompson, already graded and rail provided, 17½ miles.

Recapitulation of miles now in running order or to be completed during the spring of 1865:

Woonsocket division, 34 miles; Boston to Mechanicsville, 59.57; Dedham and Medway branches, 6.50; Providence division, 58.50; Willimantic to Waterbury, 62.87, Southbridge division, 17.50—238.94 miles.

The aggregate expenditures under all the corporations formerly owning these roads, together with the amount to be expended during the next four months will be not much short of $13,000,000.

At this moment Boston is interested in extending and multiplying her routes to the West. But railroads were never built for the public good alone. The capitalists must be convinced that the enterprise will pay before he will invest in shares or in bonds.

The managers of the Boston, Hartford and Erie Railroad expect an immense through business, when their line is completed, based partially on the freight business of the Erie road destined for New England. The cattle and live stock trade will be another profitable source of income, and particularly the transportation of anthracite coal from Pennsylvania, which will be brought to Fishkill and distributed by means of this line and its connections through various parts of New England.

The road offers remarkable facilities for this department of business, as it crosses eleven distinct railways at right angles, which will be serviceable as channels for the delivery of coal, and also other freights at points remote from this route. The existence of large deposits of hematite iron ore in the valley of the Fishkill, it is asserted, will be of great value, as the line of the Boston, Hartford and Erie road is located in the immediate vicinity of the ore beds which are now wrought by companies at Poughkeepsie and Cold Spring.

The present condition of this company appears highly encouraging, as it has absorbed several minor corporations which have been and are doing a profitable business, and are daily developing in means and resources. Besides it passes through the heart of the State of Connecticut, and is too far removed from any parrallel road to fear competition or any diversion of its business. In the State of New York it passes through Dutchess county, the most fertile and beautiful county in the State. The Board of Directors is composed of some of the wealthiest gentlemen and most distinguished merchants in Massachusetts and New York and Connecticut, and there is evidently an abundance of capital at hand to make this enterprise a success.—*Boston Traveller Feb. 3.*

Finances of California.

The following statement will show the receipts and expenditures of the State Treasury from December 1, 1863, to December 31, 1864:

Balance on hand Dec. 1, 1863	$697,173 72
Receipts in December, 1863	452,375 69
" year ending Dec. 31, 1864.	2,211,086 08
Total	$3,360,635 49
Expendit's in Dec. 1863 $144,991 18	
Expendit's during year ending Dec. 31, 1864. 2,035,327 18	
	2,480,318 86
Balance, Jan. 1, 1865	$880,317 13

At a cost to seminary fund of ..	6,300		
	46,800 00		
	$167,508 80	$170,500 00	

Railways in Mexico.

The subscription for the Chalco Railroad continues, and the works are finished upon the Vera Cruz line as far as Paso Ancho, a point between Camaron and Paso del Macho. Mr. Moran, the English contractor for this section, has displayed most praiseworthy energy and activity, and if his example is followed, the iron road connecting Mexico with Vera Cruz will no doubt be completed before the period fixed. The St. Louis road from Potosi to Tampico is also being pushed on with vigor, as well as the repairs of that running from the capital to the coast by way of Guadallajara, Tepic, and San Blas.—*London Railway News.*

☞ The movement of specie at this port since the beginning of the year has been:

Specie in Banks and Sub-Treas. Jan. 1.	$30,054,450

Interest and Dividends.

The Curtin Oil Company have declared a dividend of two per cent., payable on the 25th inst.

The St. Nicholas Coal Company a dividend of one per cent., payable on the 25th inst.

The Corn Planter Oil Comwany a dividend of one per cent., payable on the 20th inst.

The Penn Oil Company a dividend of one and a-half per cent., from their net earnings payable March 6th.

Railroad Earnings—Monthly.

The earnings of the Erie Railway for the month of Jan., 1865, were $908,341 50
Corresponding month last year .... J. 980,893 80

Increase $72,552 30

The earnings of the North Pennsylvania Railroad Company for the month of January, 1865 were $64,247 22
Corresponding month last year 48,531 65

Increase $15,715 57

The earnings of the Housatonic Railroad for the month of Jan. 1865, were $36,249 00
Corresponding period of previous year. 32,771 13

Increase $3,477 87

Union Canal.

This canal is an important work, and connects Philadelphia by way of the Schuylkill Navigation at Reading, with the Pennsylvania Canal at Middletown. As a connecting link, bringing the trade of the Western part of the State directly to Philadelphia, instead of permitting it wholly to pass down the Susquehanna Canal and thus on to Baltimore for a market, any movement pointing to its improvement merits consideration here. At the recent election for officers of the company, a new and energetic set of men were chosen. The extrication of the company from its long-continued financial embarrassment, by the funding of all the floating debt incurred by the enlargement, puddling and making water tight the canal, it is expected will result in restoring it to usefulness, to the benefit of the trade of this city and to the profit of the share and bondholders.—*Philadelphia Ledger.*

☞ The amount of farm mortgages issued for the benefit of railroads in Wisconsin still outstanding, is by estimation above $1,360,000. Dodge County owes $600,000; Washington, $250,000; Ozaukee, $225,000; Fond du Lac, $20,000; Columbia, 200,000; Green Lake and Marquette, $40,000; Sauk, $20,000; Juneau and Adams, 25,000; La Crosse, $30,000.

☞ The total gold deposits at the U. S. Mint, Philadelphia, for January, 1865, was $281,866 79. Coinage for same month—Gold, $183,995 22; Silver, $28,489 66; Copper, $92,200; total, $304,684 88.

MINING STOCKS—GOLD, SILVER, COPPER, IRON, LEAD, ETC.

American Railroad Journal.

Saturday, February 25, 1865.

Stock Exchange and Money Market.

We notice that our recommendation that the legal tender currency should be forthwith cancelled as it comes into the Treasury from the collectors of the internal revenue, based on the supposition that the war is near its close, and immediate retrenchment is now probable and practicable, has been simultaneously advocated by Professor Bowen of Cambridge. We are glad to perceive that this simple and natural remedy for inflation is suggesting itself to other minds than our own.

We never have been alarmed at the condition of our National finances, so far as to fear repudiation or bankruptcy, though sensible enough of the evils of an irredeemable paper currency. For the Government in one sense at least, has always kept its borrowing credit in a palmy condition. It has since the war paid the interest of its gold bearing interest securities exactly as it promised to do. It has never faltered for a moment in its payments in coin on regular dividend days; on the contrary it has several times anticipated the interest due by several months, a very unusual course even with Governments in the highest credit.

The gold bonds of the United States have never stood in the market as high as they deserved. There is no good reason to give why they should not have borne as large a premium as gold itself, certainly as large as the gold bearing bonds of Boston and Massachusetts. This part of our financial system having therefore in point of promptness and certainty been unexceptionable, it forms a solid basis for further operations for the restoration of the value of our currency. Professor Bowen believes that by a cancellation of a portion of the legal tenders from time to time as they are received from taxes into the National Treasury, the premium on gold could be reduced to 30 without difficulty.

Another movement is now freely discussed and approved in some of the leading journals of this country. It is no more or less than to form a patriotic combination to pay off the National debt, which as funded, amounted in October last to sixteen hundred and odd millions of dollars, but likely to be enlarged to two thousand millions. Influential journals in Boston and Philadelphia so far from treating the plan as a visionary one, point out the way in which it may be easily accomplished. The motive is so good a one and the method suggested so ingenious yet simple, that it deserves to be recorded as a grand American idea and worthy of our great country. It is, to obtain donations of $10,000 each, from 200,000 of our wealthiest citizens throughout the loyal States, a number largely within the limit of those who have superabundant ability. The plan has actually drawn forth the most patriotic offers of contribution. One gentleman in Boston who is a warm advocate of the measure, has offered to give $200,000 himself, and on all hands it is admitted that it would be for the interest of our large monied institutions, companies and manufactories to contribute, as they would by this means be gainers in the end, by the cessation of direct taxation.

If our National debt was thus wiped out by this patriotic effort, the revenue from customs would at one hundred millions a year entirely meet the ordinary expenses of the Government. The country relieved from heavy taxation would rebound from its present position of constraint into immense activity and production, and the credit of the Nation would only be second to its glory. Such a spectacle would astonish the world and do more for the reputation and stability of republican institutions than was ever done before.
